Beer, wine, spirits, coffee, tea, and Coca-Cola: In Tom Standage's deft, innovative account of world history, these six beverages turn out to be much more than just ways to quench thirst. They also represent six eras that span the course of civilization—from the adoption of agriculture, to the birth of cities, to the advent of globalization. A History of the World in 6 Glasses tells the story of humanity from the Stone Age to the twenty-first century through each epoch's signature refreshment. As Standage persuasively argues, each drink is in fact a kind of technology, advancing culture and catalyzing the intricate interplay of different societies. After reading this enlightening book, you may never look at your favorite drink in quite the same way again.

It brings together a team of leading contributors from the fields of linguistics, sociology and medicine to describe each phase of the primary care consultation, identifying the distinctive tasks, goals and activities that make up each phase of primary care as social interaction. A New York Times bestseller: "This terrific new book . . . [explores] the 'notion of whiteness,' an idea as dangerous as it is seductive."—Boston Globe Telling perhaps the most important forgotten story in American history, eminent historian Nell Irvin Painter guides us through more than two thousand years of Western civilization, illuminating not only the invention of race but also the frequent praise of "whiteness" for economic, scientific, and political ends. A story filled with towering historical figures, *The History of White People* closes a huge gap in literature that has long focused on the non-white and forcefully reminds us that the concept of "race" is an all-too-human invention whose meaning, importance, and reality have changed as it has been driven by a long and rich history of events. "From 1326 to 1402, Bursa, known to the Byzantines as Prousa, served as the first capital of the Ottoman Empire. It retained its spiritual and commercial importance even after Edirne (Adrianople) in Thrace, and later Constantinople (Istanbul), functioned as Ottoman capitals. Yet, to date, no comprehensive study has been published on the city's role as the inaugural center of a great empire. In works by art and architectural historians, the city has often been portrayed as having a small or insignificant pre-Ottoman past, as if the Ottomans created the city from scratch. This couldn't be farther from the truth. In this book, rooted in the author's archaeological experience, Suna Çağaptay tells the story of the transition from a Byzantine Christian city to an Islamic Ottoman one, positing that Bursa was a multi-faith capital where we can see the religious plurality and modernity of the Ottoman world. The encounter between local and incoming forms, as this book shows, created a synthesis filled with nuance, texture, and meaning. Indeed, when one looks more closely and recognizes that the contributions of the past do not threaten the authenticity of the present, a richer and more accurate narrative of the city and its Ottoman accommodation emerges."-- Bangladesh did not exist as an independent state until 1971. Willem van Schendel's state-of-the-art history navigates the extraordinary twists and turns that created modern Bangladesh through ecological disaster, colonialism, partition, a war of independence and cultural renewal. In this revised and updated edition, Van Schendel offers a fascinating and highly readable account of life in Bangladesh over the last two millennia. Based on the latest academic research and covering the numerous historical developments of the 2010s, he provides an eloquent introduction to a fascinating country and its resilient and inventive people. A perfect survey for travellers, expats, students and scholars alike.

It takes a graveyard to raise a child. Nobody Owens, known as Bod, is a normal boy. He would be completely normal if he didn't live in a graveyard, being raised by ghosts, with a guardian who belongs to neither the world of the living nor the dead. There are adventures in the graveyard for a boy—an ancient Indigo Man, a gateway to the abandoned city of ghouls, the strange and terrible Sleer. But if Bod leaves the graveyard, he will be in danger from the man Jack—who has already killed Bod's family.

Burma has lived under military rule for nearly half a century. The results of its 1990 elections were never recognized by the ruling junta and Aung San Suu Kyi, leader of Burma's pro-democracy movement, was denied her victory. She has been under house-arrest ever since. Now an economic satellite and political dependent of the People's Republic of China, Burma is at a crossroads. Will it become another North Korea, will it succumb to China's political embrace or will the people prevail? Michael Charney's book- the first general history of modern Burma in over five decades - traces the highs and lows of Burma's history from its colonial past to the devastation of Cyclone Nargis in 2008. By exploring key themes such as the political division between lowland and highland Burma and monastic opposition to state control, the author explains the forces that have made the country what it is today. Designed as a companion reader to accompany Ways of the World, each chapter of Thinking through Sources for Ways of the World contains a Thinking through Sources project of six to eight carefully selected written and visual primary sources organized around a particular theme, issue, or question. Each source feature is accompanied by incisive questions to guide students' skillful examination of the sources. Headnotes and questions to consider before each document help students approach the documents, and essay questions at the end of each chapter provide a starting point for classroom discussion or a written assignment. Thinking through Sources for Ways of the World is FREE when packaged with Ways of the World, and is included for FREE with ACHIEVE: Read and Practice, and in the LaunchPad for Ways of the World.
