An overall view of the cancer problem and development of cancer chemotherapeutic biosynthetic products to February 1976 was presented in Volume 1. In the short time that has elapsed since the preparation of Volume 1, several very stimulating advances in application of biosynthetic cancer chemotherapeutic drugs in cancer treatment have been reported. At the May 1976 meeting (in Toronto) of the American Association for Cancer Research, a Sloan-Kettering research group summarized an improved treatment of human neuroblastoma using a combination of vincristine, cytoxan, trifluorothymidine, and papaverine. In the same period other clinical groups described significant advances in the cancer chemotherapeutic treatment of human breast cancer and oat cell carcinoma of the lung. Each of these newer advances in cancer treatment was based on combinations of biosynthetic and synthetic cancer chemotherapeutic drugs. Certainly, further examination of the antineoplastic biosynthetic agents summarized in this volume and the vast number yet to be discovered will eventually provide the means for controlling and/or curing the various types of human cancer. Foreword magazine finalist for 2003 Book of the Year in Philosophy. Provides a focus on character and understanding responsibility in creating an environment where conscience is chosen over convenience. More information at very descriptive website at www.thelanguageofconscience.com. TABLE DES MATIERES 1. M. Logar, S. Pavlovia: The manner of iron and aluminium appearance in neoserpentine mineral from the mine „Sip" (Kosovo) Yugoslavia 1 2. M. Stefanovi?, Lj. Krsti?, A. Jokie, B. Rihter, S. Mladenovi?: Synthesis of 5-Hydroxy-7, 8, 3', 4'-tetramethoxyflavone 7 3. M. Stefanovi?, Lj. Krsti?, A. Jokia, B. Rihter, S. Mladenovi?: Synthesis of 5-Hydroxy-7, 8, 3', 4'-tetramethoxyflavanone — 13 4. V. M. Petrovie, Olga Rajeia, M. Vrbagki, Biljana Mind: Adaptation to cold and liver protein synthesis in the rat — — — 19 5. M. Sugie: The kinetics of the electrolytic decomposition of NaA. zeolite 27 6. M. Sugi?, Nadada Petranovia: The decomposition kinetics and the capacity of the double electric layer of the chloride inclusion zeolite complex NaA.NaC1 35 7. J. Pamir: Triassic gabbro-albite granosyenite association of the Radovan massif (Bosnia) 43 8. S. Karamata: The transitional zone between tectonite ultramafic rocks and igneous — cumulate rocks in the ophiolite complexes of Yugoslavia 57 9. Gj. Stefanovie, Marjetka Kidrie: Relative amounts of different nucleic acid classes in pes (*Pisum sativum* L.) seedlings grown under different light conditions 63 10. V. M. Petrovie, Katica Maksimovi?: Adaptation to cold and diurnal fluctuation of the sensitivity to noradrenaline in the rat — 81 11. Rajka Radoiti?: *Clypeina neretvae*, n. sp., a new neocopnian Dasycladacea from the Neretva valley 87 12. V. Majer, S. Karamata: Porphyroblastic amphibole schist („Garbenschiefer") from the metamorphic suite at the base of the Brezovica peridotite (Yugoslavia) 91 13. M. V. Sugi?, S. V. Mentus: The viscosity and structure of molten stannic chloride 99 ??? ???? ?? ???????????? ??? ????????? ???????? This careful, well-informed study by Michael Bergunder ably fills that gap. After a brief historical introduction to the worldwide growth of Pentecostalism, Bergunder delves into the history of the South Indian Pentecostal movement in the first section. The second section gives a systematic profile of the current movement in South India, based on a wide range of source materials and on formal interviews with nearly two hundred leading pastors and evangelists. Bergunder finishes his work with prospects for the future. Three appendixes and an extended bibliography offer ample ground for further research. Study, with reference to Tamil Nadu, India. Flavonoids are secondary plant products that have previously been shown to be helpful in determining relationships among plant groups. This work presents comprehensively the occurrence, patterns of variation, and systematic and evolutionary importance of flavonoids in the sunflower family (Asteraceae), the largest family of flowering plants (23,000 species). It gathers together the more than 2500 reports of flavonoids in Asteraceae published between 1950 to the present and interprets these data in context of new taxonomic (especially generic) alignments. The authors discuss flavonoid patterns with reference to modern phylogenetic studies based on morphology and DNA data. This book provides, therefore, the most exhaustive synthesis and evaluation of the systematic and evolutionary import of flavonoids ever accomplished for any large family of angiosperms. AN ILLUMINATING ACCOUNT OF THE DMK AND ITS CHARISMATIC FOUNDER In 1967, C.N. Annadurai became the chief minister of Madras state, when his party, the DMK, swept to power for the first time. In this definitive biography, R. Kannan traces the growth of Annadurai—from a young protégé of the radical thinker Periyar E.V. Ramasamy into a revered leader known as Anna, or elder brother. Kannan draws on Anna's considerable body of writing, and the memoirs of other leaders and authors in Tamil, to candidly examine Anna's complex relationship with Periyar and his disillusionment with the corruption he witnessed when in power. Featuring luminaries like Rajagopalachari and Kamaraj, K. Karunanidhi and MGR, among many others, Anna offers a warm and rounded portrait of a man who showed the way for the democratic expression of regional aspirations within a united India. Through this book, my memoirs, I would like to share with you certain incidents and events that had made me emotional, shocked, angered, elated, depressed and also motivated me to think with the right perception. I especially would like to narrate to you, the incidents that enhanced my awareness levels, about people and events that brought about a change in my personality and attitude. I am sure that my memoirs will make interesting reading for you, and I hope you will go through and enjoy all the experiences, and

feel all the emotions the way I felt them. Now, if you are wondering why I titled my memoirs as Suryavamsam, please go ahead and read on, you will know the reason. This book is a comprehensive account of the essential features of the chemistry of organic compounds of natural origin. The objective has been to condense the encyclopedic range of the subject into a medium-sized book by taking a radically different approach. With reference to India.
