Jan 04 2021 Excerpt from Revolutionary Services and Civil
Life of General William Hull: Prepared From His Manuscripts
Many an individual more highly distinguished than General
Hull, has descended to the grave with out a record of his
public services or private worth. But the manoeuvring of the

Politician will some-6 times fix, with more distinctness and permanency, the laurel on the brow which his hand was raised to dea stroy. Had it not been for a persecution as severe as it was unmerited, the zeal, the ability, the faithful ness and the patriotism of General Hull in his country's service, might never have been made public. ... CHAPTER n. War Of 1812.--Governor Hull Affointed

Brigadier, general To Lead The Troops From Ohio To Detroit.--March To Detroit.--Invasion Of Canada.--Fall Of Michilimackinac, And Subsequent Events. In February, 1812, Governor Hull being at Washington, received accounts from the Territory of Michigan, that the Indians were becoming hostile to the defenceless inhabitants of that exposed frontier.* He urged upon the administration the expediency of providing a force for their protection. War with Great Britain was imminent: Congress was augmenting the army, and messages had been sent by the British officers in Canada to all the powerful tribes of the Northwest; accompanied with presents of arms or clothing, urging them to take part with Great Britain, their natural ally. Accordingly, the President called upon the Governor of Ohio to detach twelve hundred militia, and prepare them for actual service. These militia were to be joined by the 4th United States regiment, then at Post St. Vincennes. After these arrangements were made, the Secretary of War, Mr. Eustis, stated to Governor Hull, that it was the wish of the President to appoint him to the command of these troops, with the rank of Brigadier-General, in order that he should march them to Detroit. * Hull's Memoirs of the Campaign of 1812, page 15. Governor Hull declined the appointment in the most unqualified manner, stating that it was not his wish to receive any military appointment. Colonel Kingsbury was then ordered to Washington, to take command of these troops, and to receive his instructions to that end. He fell sick on his arrival, and became thus unable to perform the duty. The proposition being again made to Governor Hull, he finally consented to accept any military appointment, .

Service Innovation May 08 2021 In the most advanced service economies, services create up to three-quarters of the wealth and 85% of employment, and yet we know relatively little about managing innovation in this sector. The critical role of services, in the broadest sense, has long been recognized, but is still not well understood. Most research and management prescriptions have been based on the experience of manufacturing and high technology sectors. There is a clear need to distinguish which, if any, of what we know about managing innovation in manufacturing is applicable to services, what must be adapted, and what is distinct and different. Such is the goal of this book. This unique collection brings together the latest academic research and management practice on innovation in services, and identifies a range of successful organizational responses to current technological opportunities and market imperatives. The contributors include leading researchers, consultants and practitioners in the field, who provide rigorous yet practical insights into managing and organizing innovation in services. Two themes help to integrate the contributions in this book: . OCo That generic good practices exist in the management and organization of innovation in services, which the authors seek to identify, but that these must be adapted to different

contexts, specifically the scale and complexity of the tasks, the degree of customization of the offerings, and the uncertainty of the environment. OCo That innovation in services is much more than the application of information technology (IT). In fact, the disappointing returns to IT investments in services have resulted in a widespread debate about the causes and potential solutions OCo the so-called OC productivity paradoxOCO in services. Instead here the authors adopt a broader notion of innovation, including technological, organizational and market change. The key is to match the configuration of organization and technology to the specific market environment. Sample Chapter(s). Introduction (35 KB). Chapter 1: Managing Service Innovation: Variations of Best Practice (490 KB). Contents: Conceptual and Analytical Frameworks for Service Innovation: Services and the Knowledge-Based Economy (I Miles); Service Innovation: Aiming to Win (T Clayton); Sector and National Studies of Innovation in Services: Innovation in Healthcare Delivery (D J Bower); Product Development in Financial Services: Picking the Right Leader for Success (E Chortatsiani); Applying Innovation Management Good Practice to Services: A Composite Framework of Product Development and Delivery Effectiveness in Services (F M Hull & J Tidd); Product Development in Service Enterprises: Case Studies of Good Practice (F M Hull); and other articles.
