If you don't exercise your brain, it will atrophy, at least the part your not using. 'Use it or lose it' is as true of our mental faculties as it is of our physical abilities. Fortunately, most of us do get plenty of stimulation in our daily lives, jobs, leisure activities and relationships. The problem is that our brain stimulation is often not very balanced, and that imbalance can affect your sense of well-being. This book provides exercises for all the major brain functions at several different levels. Inside you will be able to: test your brain fitness level, develop right brain association and creative ability, and improve your logic and numbers skills using left-brain workouts invented by scientists. Get fit like 50 Cent: The phenomenally fit superstar rapper reveals his strategic six-week workout plan for achieving a ripped body—and developing the mental toughness to stay in shape for a lifetime. Survival is a recurring theme of 50 Cent's lyrics, and his life. That's why, with obesity rates soaring and fitness levels declining, he wants to give everyone an all-access pass to his premium plan for lifelong fitness. In Formula 50, the mega-successful entertainer and entrepreneur unleashes the power of metabolic resistance training (MRT), the key ingredient that has helped him achieve the famously buff physique that makes his music videos sizzle. Through MRT, 50 Cent's fitness plan breaks down the barriers between traditional weight training and cardio workouts, accelerating fat loss while building muscle and improving overall fitness. Designed for a six-week rollout for total mind-body transformation, the Formula 50 regimen builds willpower while it builds physical power. In addition to motivation, nutrition is another key element; readers will discover the unique dietary combinations that fuel 50 Cent's workouts. Coauthored with Jeff O'Connell, health journalist and editor-in-chief at Bodybuilding.com (the world's largest fitness website), the book delivers a payoff that goes beyond six-pack abs and flab-free pecs: This is a fitness plan that boosts energy, endurance, flexibility, and mobility. The result is a body you've always dreamed of—and the mindset to attain the rest of your dreams. Finally, the solution to the #1 reason we don't exercise: time. Everyone has one minute. A decade ago, Martin Gibala was a young researcher in the field of exercise physiology—with little time to exercise. That critical point in his career launched a passion for high-intensity interval training (HIIT), allowing him to stay in shape with just a few minutes of hard effort. It also prompted Gibala to conduct experiments that helped launch the exploding science of ultralow-volume exercise. Now that he's the worldwide guru of the science of time-efficient workouts, Gibala's first book answers the ultimate question: How low can you go? Gibala's fascinating quest for the answer makes exercise experts of us all. His work demonstrates that very short, intense bursts of exercise may be the most potent form of workout available. Gibala busts myths ("it's only for really fit people"), explains astonishing science ("intensity trumps duration"), lays out time-saving life hacks ("exercise snacking"), and describes the fascinating health-promoting value of HIIT (for preventing and reversing disease). Gibala's latest study found that sedentary people derived the fitness benefits of 150 minutes of traditional endurance training with an interval protocol that involved 80 percent less time and just three minutes of hard exercise per week. Including the eight best basic interval workouts as well as four microworkouts customized for individual needs and preferences (you may not quite want to go all out every time), The One-Minute Workout solves the number-one reason we don't exercise: lack of time. Because everyone has one minute. *** THE NO-EQUIPMENT WORKOUT PERFECT FOR YOUR SMALL SPACE *** CELL WORKOUT is a bodyweight training guide devised from a prison cell but accessible to anyone who wants to get fit in a small space using no specialist equipment. "Many people believe the only way to get in shape is by putting a lot of money into trendy fitness centers, or spending hard-earned cash on a variety of workout videotapes. In the end, these methods seldom provide the results we're all looking for. But don't get me wrong--I am not demeaning gyms or workout tapes; in fact, I still enjoy the benefits of a gym to keep fit. Weight-lifting rooms and other facilities can be extremely beneficial. However, to obtain and maintain supreme cardiovascular fitness and a rock-hard body, I must continually use the training regimen I learned as a member of the Navy SEALs." -- from The Navy SEAL Workout As the world's most elite combat unit, the Navy SEALs have long been known for their tremendous physical fitness and mental stamina. Their training program has also carried somewhat of a mystique, as so few people actually enter and stay in the program. Now Navy SEAL Mark De Lisle reveals the no-frills workout that has conditioned some of the best bodies around. From stretching through cooldown, including a variety of running and swimming workouts as well as tips on top-notch nutrition, The Navy SEAL Workout can improve any committed participant's cardiovascular fitness and overall shape and tone. "After 27 years as a Navy SEAL, I feel The Navy SEAL Workout program is the best one on the market, encompassing the physical training regimen required of a Naval Special Warfare Warrior. The levels of intensity, from beginner to advanced, are so well laid out that both the biggest 'couch potato' and professional athlete can see improvement after a short period of time." -- Allan Starr, Command Masterchief, Naval Special Warfare Command Group One "In The Navy SEAL Workout, Mark De Lisle has developed a program soundly based in a state-of-the-art knowledge of exercise physiology and principles. This book would be a valuable addition to the library of anyone who is interested in peak performance." -- W.K. Prusaczyk, PhD, Exercise Physiologist, Navy Health and Research Center "It has been interesting to note the numerous SEAL-related materials that have come out in recent years. As a former Marine, I salute you for your fine work with the SEALs and in promoting fitness to the masses." -- Harvey Newton, Director of Program Development National Strength and Conditioning Association Mark De Lisle became a U.S. Navy SEAL at age 27. He lives in San Diego, California. A step-by-step, illustrated reference to the physical fitness program utilized by New York City firefighters uses a four-phase progressive approach to total body conditioning that can be personalized in accordance with individual goals and starting-point fitness levels. Frustrated by your forgetfulness? Don't be. Memory lapses aren't necessarily a sign of age -- more often they are a sign of the times, as we're all inundated with important information to remember, from PINs and cell phone numbers to children's schedules and crucial business facts. Dr. Cynthia Green, founding director of The Memory Enhancement Program at Mount Sinai School of Medicine, shows you how to make the most of your memory, sharing her powerful yet practical eight-step program for improving your recall. Do you sometimes enter a room and forget what you went there for? -- page 29 Do you find yourself struggling to remember details from an important meeting? -- page 110 Are you constantly misplacing your keys or glasses? -- page 113 Do you find it impossible to remember directions, phone numbers, or computer passwords without writing them down? - - page 136 Do the names of people you've just been introduced to slip your mind? - - page 193 With more and more people realizing the need to exercise, gyms are cropping up at every nook and corner, roads are occupied by recreational runners and yoga schools have an enviable waiting list. But along with this has grown the number of injuries and disillusionment at not getting 'results'. This leads to fads. It's the exact same place 'diet' was five years ago when Rujuta wrote her first book Don't Lose Your Mind, Lose Your Weight. The basic problem is the complete lack of understanding about exercise, how it works and how to make it work for you. Through this book, Rujuta tackles pretty much every myth and fad to do with exercise, demystifies exercise for everyone and presents it as not a brainless activity but a science which has the potential to combat all lifestyle disorders including diabetes and obesity, way better than any drug. Strength training, Cardio and Yoga get a detailed chapter each along with their pre- and post workout meals, an often neglected but crucial aspect. So whether you are a beginner or want to take your workouts to the next level, the sample training schedules and real life workout examples with analysis and modifications will bridge the gap between knowing and doing and ensure that you are in a position to start and/or progress with a sensible, doable and a wholesome exercise plan. This is not a dream, this is reality. Enter The High Intensity Fitness Revolution for Women.
