HTML is an acronym for Hyper d104 Mark-Up Language. It is the main programming language used to develop websites. It acts as a framework of sorts where different elements like color, video, images, flash animation, etc. could be added later on. Back in the day, website creation and development would only go as far as one's imagination. Website developers of yesteryears had to get specialized education just to be able to learn a programming language and start developing websites, applications, etc. This was an extremely grueling process and would often times become the deterring factor for students. However, when HTML was introduced, website creation and develop got a whole lot easier. This book will help you understand HTML's syntax and semantics, which will allow you to create a website completely from scratch. We'll teach you how to lay down the foundations--the backbone--of a website and then add aesthetic elements later on using Cascading Style Sheets or what's commonly known as CSS. Here's What You'll Learn From This HTML & CSS For Beginners Book: □ Introduction □ HTML Fundamentals □ HTML Fundamentals 2 □ HTML Fundamentals 3 □ CSS In-depth and much more What Are You Waiting For? Start Coding HTML & CSS Right Now! **Mastering CSS** Apr 27 2022 The book is a detailed guide for beginners to understand CSS with full-fledged introduction to web page and design to create a website. This book will teach you new features that can aid in the development and extension of your CSS skills. This book also explores animations, grids, flexboxes, masking, filtering, and compositing

HTML & Htm15 Jan 31 2020 Why study HTML? Learning HTML would enable you to become more familiar with how websites work and how browsers display a page. Alternatively, if you are aiming to become a web developer it is must. If you want to learn PHP, ASP, or even

JavaScript, you will need to learn it as a prerequisite. HTML is THE language of the internet, so learning it could get you far in e-commerce. Whether you just want to learn it for learning's sake or you want to use this book as a reference to pass your HTML certification, you will surely understand and know how HTML works and how you can create a web page from scratch after reading this book. This introduction will not be long; after all, you got a lot to read after this. Take note that HTML and CSS code examples will be in the Courier New font, the supposed result of those codes will be in Times New Romans (though some might not), and explanations and discussions will be left in regular font, which is Georgia. The book is aimed at beginners or to aspiring web developers. Nevertheless, it could be useful to advanced developers as a reference book for teaching HTML. Have fun learning HTML!

Css Sep 01 2022 This book will help you learn the basics of CSS. You will see lots of code examples and their results and you will be able to create your own codes for designing your very own website. *I'll cover a short introduction of what CSS is. You will learn about the CSS syntax and the option of adding comments to each CSS code for easy reading and remembering. *I'll teach you about CSS selectors and the insertion of CSS style sheets into HTML elements. You will be able to learn specific types of CSS selectors like the id selector, class selector, universal selector, and the grouping selector. Then I will move on to explaining how you can insert CSS into HTML elements. I will describe three general ways to insert CSS style sheets into an HTML document. The three ways are internal CSS, external CSS, and inline CSS. *I'll shed comprehensive light on CSS Margins, Width, and Padding. You will learn how to adjust the margins and padding around your content. I have added many code examples with their results in the browser so that you will find it easy to study the code and recreate it with your values and ideas. *Then I will focus on CSS borders as well as backgrounds. You can adjust the width of the CSS border, its colors, and its thickness. Then I will move on to explain CSS backgrounds. You will learn how you can add colors to the background of your web page. *I'll cover CSS texts and walk you through adjusting font-size, font-style, and font-weight. You will learn different ways to style the font and adjust the weight of the text on the web page. *You will learn how you can set the colors of the web page. There are different kinds of adjusting the colors on your web page by various methods such as RGB value, HEX value, and HSL value. In the end, I will explain the alpha factor. Let it be a surprise. *We'll review the CSS outline, boxes, tables, and forms. You will learn how to style outlines and how to contain pieces of text inside boxes. *I'll cover the styling CSS links. You will learn how to fill tables with different colors and also how to make the forms look good. *And I'll cover CSS images and lists. You will learn about styling the images, such as displaying them in a round shape or square shape, inside the text, or at the start of the paragraph. Then comes lists. You will learn how to add colors to your lists and make them less boring. *Learn how to make things pretty with rounded corners on your webpage. You will learn to shape them by different methods in

different forms, like elliptical and slightly rounded. *I'll also focus on the layout, float, and inline-block properties of CSS. You will learn how to position the content of the webpage as per your requirements. *In the last chapter of the book I cover the navigation bar. This is an exhaustive chapter, which will explain different types of navigation bars like vertical and horizontal. You will also learn how to create fixed and sticky navigation bars.
