The schoolhouse has long been a crucible in the construction and contestation of the political concept of "family values." Through Spanish-bilingual and sex education, moderates and conservatives in California came to define the family as a politicized and racialized site in the late 1960s and 1970s. Sex education became a vital arena in the culture wars as cultural conservatives imagined the family as imperiled by morally lax progressives and liberals who advocated for these programs attempted to manage the onslaught of sexual explicitness in broader culture. Many moderates, however, doubted the propriety of addressing such sensitive issues outside the home. Bilingual education, meanwhile, was condemned as a symbol of wasteful federal spending on ethically questionable curricula and an intrusion on local prerogative. Spanish-language bilingual-bicultural programs may seem less relevant to the politics of family, but many Latino parents and students attempted to assert their authority, against great resistance, in impassioned demands to incorporate their cultural and linguistic heritage into the classroom. Both types of educational programs, in their successful implementation and in the reaction they inspired, highlight the rightward turn and enduring progressivism in postwar American political culture. In Classroom Wars, Natalia Mehlman Petrzela charts how a state and a citizenry deeply committed to public education as an engine of civic and moral education navigated the massive changes brought about by the 1960s, including the sexual revolution, school desegregation, and a dramatic increase in Latino immigration. She traces the mounting tensions over educational progressivism, cultural and moral decay, and fiscal improvidence, using sources ranging from policy documents to student newspapers, from course evaluations to oral histories. Petrzela reveals how a growing number of Americans fused values about family, personal, and civic morality, which galvanized a powerful politics that engaged many Californians and, ultimately, many Americans. In doing so, they blurred the distinction between public and private and inspired some of the fiercest classroom wars in American history. Taking readers from the cultures of Orange County mega-churches to Berkeley coffeehouses, Natalia Mehlman Petrzela's history of these classroom controversies sheds light on the bitterness of the battles over diversity we continue to wage today and their influence on schools and society nationwide. Der BBG 2.0 hilft dir noch gesünder zu leben und ist der beste Weg, um deine Fitness-Ziele zu erreichen! The American body is in trouble. Unprecedented numbers of us suffer from obesity, heart disease, diabetes, and other debilitating illnesses. The root cause is a once-revolutionary idea that seemed to offer so much promise, but instead has become the cause of a global health crisis: processed foods. Over the past seventy-five years, a number of factors aligned to create a reality in which processed carbohydrates became our main food source. In Fast Carbs, Slow Carbs, bestselling author and former FDA Commissioner David A. Kessler explains how the quest to feed a nation resulted in a population that is increasingly suffering from obesity and chronic disease and offers a solution for changing course. For decades, no one questioned the effects of these processed carbohydrates. The focus was on fertile grassland, ideal for growing vast amounts of wheat and corn; an industrial infrastructure perfect for refining those grains into starch; a food production behemoth that turns refined grains into affordable, appealing, and ever-present food items, from pizza to burritos to bagels; and an efficient distribution network that ensures consumption by Americans nationwide. But during those same decades, our bodies quietly contended with the metabolic chaos caused by consuming rapidly absorbable starch. Slowly but surely, these effects accumulated and became disastrous, leading to the public health crisis in which we find ourselves today. In Fast Carbs, Slow Carbs, Kessler explains how eating refined grains such as wheat, corn, and rice leads to a cascade of hormonal and metabolic issues that make it very easy to gain weight and nearly impossible to lose it. Worse still is how excess weight creates a very real link to diabetes, heart disease, cognitive decline, and a host of cancers. We can no longer afford to dismiss the consequences of eating food that is designed to be rapidly absorbed as sugar in our bodies. Informed by cutting-edge research as well as Dr. Kessler's own personal quest to manage his weight, Fast Carbs, Slow Carbs reveals in illuminating detail how we got to this critical turning point in our health as a nation—and outlines a plan for eliminating heart disease, allowing us to, finally, regain control of our health. In Un-Junk Your Diet, she teaches readers about anti-inflammatory dieting in a way that's engaging, funny, and approachable. This book begins with a call to action to help shake up perceptions of what food means to our bodies and illuminate all the ways that marketers co-opt healthy eating messages to coerce us into choosing food that is unworthy. Because there is no one right way for every individual eater, Nielsen offers a brief exercise in self-discovery before providing four distinct plans for becoming healthier. The International Bestselling Fitness Book for Women Is this a workout book that can give you a lean and toned "Hollywood babe body" in 30 days flat? No. Is it a bodybuilding book full of dubious diet and exercise "hacks" and "shortcuts" for gaining lean muscle and melting belly fat faster than a sneeze in a cyclone? Absolutely not. But is it an exercise book (and nutrition book) that'll show you exactly how to eat and exercise to lose up to 35 pounds of fat (or more) and gain eye-catching amounts of muscle definition and strength? Yes. And faster than you probably think possible, or your money back. Because here's the deal: Muscle building and fat loss aren't nearly as complicated as you've been led to believe. You don't need to: Obsess over "clean eating" and avoiding "bad" or "unhealthy" foods like sugar, meat, and bread. Some foods are just more nutritious than and should be eaten more frequently than others. That's it. You don't need to: Constantly change up your fitness routine. A little of the right variability in your exercise is productive, but more than that is obstructive. You don't need to: Spend a couple of hours in the gym every day grinding through punishing strength training workouts. Sweating buckets, getting really sore, training until bone-tired . . . all wholly overrated for gaining lean muscle and strength. You don't need to: Slog away on the treadmill. In fact, you don't need to do any cardio exercise at all to shed ugly belly, hip, and thigh fat and even build your best body ever. You don't need to: Waste coin on sketchy fitness supplements like fat burners, amino acids, and greens powders. Most of these products either haven't been scientifically proven to do what you're paying for or have been proven outright ineffective. Those are just a few of the harmful lies and myths that keep gals from ever achieving the lean, toned, and strong body they truly desire. And Thinner Leaner Stronger will teach you something that most women will never know: How to transform your body while eating all of the foods you like and doing just a few challenging (but not grueling) resistance training workouts per week. Oh and cardio? Completely optional. Here are just a few of the things you'll discover inside this fitness book for women: The 10 biggest fitness myths and mistakes that keep women weak, overweight, and confused. For example, "calories are all that matters," "carbs and sugars make you fat and unhealthy," and "strength training makes women bulky." The primary driver of muscle growth that literally forces your muscles to get fitter and stronger. And no, it has nothing to do with "muscle confusion," "functional training," or any other pseudoscientific fitness nonsense. How to create meal plans for losing fat and building muscle with all of the foods you love so you never feel starved, deprived, or like you're "on a diet" (and especially a "bodybuilding diet"). 12 months of done-for-you, paint-by-numbers strength training workouts for getting lean, sexy curves and muscle definition in all of the right places on your body . . . in only 3-to-5 hours of resistance training per week. A no-BS guide to fitness supplements that'll save you hundreds if not thousands of dollars on useless (and sometimes even dangerous) pills, powders, and potions for fat loss, muscle gain, and the rest of it. And that's not all, either . . . 367 peer-reviewed scientific studies support the Thinner Leaner Stronger system of eating, exercising, and recovering for losing fat and gaining lean muscle and strength. Thinner Leaner Stronger has sold over 400,000 copies in 13 different languages and is regularly revised based on the latest findings in nutrition and exercise scientific research (four editions released and counting!). It's also backed by a "No Return Necessary" money-back guarantee that works like this: if you're unsatisfied with this workout book for women or the program for any reason, let the author know, and you'll get a full refund on the spot. So, imagine . . . just 12 weeks from now . . . looking at the changes in your physique and thinking, "I did that. That's awesome. I'm awesome." And believing it. The bottom line is you can get that beautiful "beach-ready" body without following a bland, boring, bodybuilding diet and without doing exhausting strength training workouts you hate. And this exercise book shows you how. Get your copy now, and start your journey to a fitter, leaner, and stronger you. Losing weight and successfully maintaining it over the long term is not as much about what you put in your stomach; it’s more about what’s happening in the brain. In *Brain-Powered Weight Loss*, psychotherapist and weight management expert Eliza Kingsford shows that more than 90 percent of people who go on diet programs (even healthy ones) fail or eventually regain because they have a dysfunctional relationship with food. Changing this relationship by changing the way you think about and behave around food is what it takes to permanently achieve weight-loss success. Kingsford’s 11-step first-of-its-kind program enlists dozens of mind-altering and behavior-changing exercises and techniques that shows you how to:

 - Identify and reverse the conscious and unconscious thinking errors and food triggers that lead to the behaviors that drive our food decisions.
 - Let go of the mindset of going on or off a diet in favor of a conscious quest to pursue a lifestyle of healthy eating and everyday activity--one that can last forever.
 - Successfully use what Kingsford calls "dealing skills" to outsmart high-risk situations, tame stressful times, and prevent an eating "slip" from leading to a setback or all-out binge.
 - Find out if you have what emerging research shows is an addiction to certain high-fat and sugar-added, processed foods that can be as powerful as addiction to cigarettes and narcotics.
 - Design a personal healthy eating program built on Kingsford’s 10 Principles of Healthy Eating. Hey Gorgeous! Feeling BALANCED AND BEAUTIFUL is only 5 days away! A heart-warming new rural romantic suspense set in the Victorian High Country by the bestselling author of *Brumby’s Run*. Armed with nothing but some loose change and her beloved dog Duke, Mallee girl Pippa Black has finally found the courage she needs to escape a dangerous relationship. Two cryptic words written on a paper napkin send her in search of the one person who might help her – a long-lost brother she has always dreamed of finding. Pippa’s quest leads her to the remote town of Currajong, high in the beautiful Victorian alps. As a runaway seeking refuge among strangers, Pippa learns that she’s been mistakenly implicated in a shocking crime. She finds her way to *Brumby’s Run*, a wild-horse sanctuary, where she begins work assisting the enigmatic farm manager Levi, and becomes entranced by Thowra, a magnificent golden stallion who leads a herd of brumbies in the region. Both man and horse will teach Pippa more about herself than she ever thought possible – including when to run, when to hide, and when to stand up and fight. Set among the majesty of the High Country snowgums, The Mallee Girl is a moving and heartfelt story about the power of love and the land to heal old wounds, and the freedom that comes in confronting your greatest fears. “The Mallee Girl has all the ingredients of a great rural read – a feisty heroine, a hero to die for, an evocative setting that will make you yearn for the country and themes of love, faith and overcoming adversity.” – Bestselling author Rachael Johns. We would all love to eat less carbohydrates and switch to a low-carb diet, but many of us think we just do not have the time. We believe that low-carb cooking and baking are time consuming, because you have to start from scratch, and it involves specialised ingredients which may be expensive or hard to find. Not so, says Vickie de Beer, who believes the problem lies in the fact that we have become afraid of the kitchen and lost the knowhow of basic cooking techniques. The truth is that you can still cook nutritional and flavourful meals without refined carbohydrates even when you are pressed for time. In *Low-Carb Express*, Vickie shows that with a little planning and better time management, you can cook healthy meals in a cinch that will not only benefit you and your family’s overall health, but might also benefit your budget.
