Assessment for learning is meant to engage, motivate, and enable students to do better in their learning. However, how students themselves perceive assessments (both high-stakes qualifications and low-stakes monitoring) is not well understood. This volume collects research studies from Europe, North and South America, Asia, and New Zealand that have deliberately focused on how students in primary, secondary, and tertiary education conceive of, experience, understand, and evaluate assessments. Assessment for learning has assumed that formative assessments and classroom practices would be an unqualified success in terms of student learning outcomes. Making use of a variety of qualitatively interpreted focus groups, observations, and interviews and factor-analytic survey methods, the studies collected in this volume raise doubts as to the validity of this formulation. We commend this volume to readers hoping to stimulate their own thinking and research in the area of student assessment. We believe the chapters will challenge researchers, policy makers, teacher educators, and instructors as to how assessment for learning can be implemented. International Handbook of Technology Education. There has been growing interest in recent years in the influence of tests on teaching and learning - a phenomenon commonly referred to as 'washback'. Despite persistent assertions about its nature and scope, empirical studies investigating test washback are still limited in number, and few of these make use of both qualitative and quantitative methods in washback research. This volume presents a study of how the introduction of the 1996 Hong Kong Certificate of Education in English - a high stakes public examination - impacted on classroom teaching and learning in Hong Kong secondary schools. The washback effect was observed initially at the larger 'macro' level, among different stakeholder groups within the Hong Kong educational context; and also at the more local 'micro' level, in terms of teachers' attitudes, teaching content and classroom interactions. This study: provides a theoretical background to the washback concept, discusses the need for empirical investigation of washback, describes the use of a mixed methodology approach in washback research, offers insights into the role of tests as agents of innovation and change in the classroom and broader educational context. This volume will be of particular relevance to language test developers and researchers interested in the consequential validity of tests; it will also be of interest to teachers, curriculum designers, policymakers and others in education concerned with the interface between language testing and teaching practices/programs. Book jacket. This book discusses Hong Kong's use of onscreen marking (OSM) in public examinations. Given that Hong Kong leads the way in OSM innovation, this book has arisen from a recognised need to provide a comprehensive, coherent account of the findings of various separate but linked validation studies of onscreen public examinations in Hong Kong. The authors discuss their experience of the validation process, demonstrating how high-stakes innovation should be fully validated by a series of research studies in order to satisfy key stakeholders. This

volume covers the language situation in Hong Kong, Timor-Leste and Sri Lanka explaining the linguistic diversity, the historical and political contexts and the current language situation, including language-in-education planning, the role of the media, the role of religion and the roles of non-indigenous languages. Two of the authors are indigenous to the situations described while the other has undertaken extensive field work and consulting there. The three monographs contained in this volume draw together the literature on each of the polities to present an overview of the research available about each of them, while providing new research-based information. The purpose of the volume is to provide an up-to-date overview of the language situation in each polity based on a series of key questions in the hope that this might facilitate the development of a richer theory to guide language policy and planning in other polities where similar issues may arise. This book was published as special issues of Current Issues in Language Planning. Criteria for Awarding School Leaving Certificates: An International Discussion focuses on formal and official evaluation of school learning and student achievement at the time schooling is discontinued. The book is based on the proceedings of the 1977 Conference of the International Association for Educational Assessment held at the Kenyatta Conference Center in Nairobi, Kenya on May 23-28, 1977. The selection first discusses school leaving examinations as a function of external and educational factors and the terms of reference for school leaving examinations. The book also takes a look at the comparability of grading standards in public examinations in England and Wales; basic assessment issues in school-leaving examination programs; and the case for school leaving examinations in The Netherlands. The text reviews the alternatives to school leaving examinations in Sweden and Brazil, as well as the abolition of final examination, transition from secondary school to higher education, and support structures. The book also ponders on the structure of secondary school system in Austria, Australia, Bermuda, Cyprus, Hong Kong, India, and Ireland. The selection is a dependable reference for readers interested in school learning and student achievement measurements. The culmination of more than a decade of research, this compelling volume offers a fresh approach for applying functional linguistics to assess student performance, to inform the teaching and learning of Chinese and to design curriculum and teaching materials. Documenting authentic systemic functional linguistics (SFL) studies in researching and teaching Chinese as a first or second language, this research is set in the multilingual settings of Hong Kong and Australia. The experiences of SFL and genre teaching in English have been well demonstrated as valid, viable and practical in different contexts; however this volume covers the relatively new domain of research into the applications of SFL to the teaching of Chinese. Using SFL as the research framework, the authors cover three major areas in Chinese language education: effective pedagogies, curriculum and material design, and text analysis. Covering major local curriculum reforms and the rapid growth of International Baccalaureate programmes worldwide, this book will be of interest to linguists, language teachers and teacher educators and those involved in the teaching and learning of Chinese around the world. The first International Online Language Conference was successfully held in September 2008. This event invited professors, Masters and Ph.D. students, and academicians from around the world to submit papers in areas related to the conference theme. The event was organized by International Online Knowledge Service Provider (IOKSP). The main conference objectives were as follows: to provide a platform for language educators, academicians, and researchers from diverse cultural backgrounds to exchange ideas and the best practices for effective language teaching and learning; to promote better understanding of cultural diversity in language learning; to encourage language educators to be involved in the research process in order to achieve comprehensive excellence; and to produce a collection of scholarly papers. 'This volume addresses a very timely and important topic, and provides both broad and in-depth coverage of a number of large-scale English tests in China, including Hong Kong and Taiwan, and about the Chinese learner.' - Lyle F. Bachman, From the Foreword Building on current theoretical and practical frameworks for English language assessment and testing, this book presents a comprehensive, up-to-date, relevant picture of English language assessment for students in China (Mainland China, Hong Kong

and Taiwan) and for Chinese learners of English around the world. Written by well-recognized international scholars in language testing, it covers: the history of tests and testing systems, issues and challenges, and current research in China both test-designers' and test-users' points of view on test development and test validation within a range of political, economical, social, and financial contexts in China theoretical/conceptual perspectives on the use of the English language assessment at different levels, including societal, university, and schools empirical research related specifically to test development, curricular innovation, and test validation Given the long history of objective testing and its extensive use in Chinese society, and considering the sheer number of students taking various tests in English in China and elsewhere, an understanding of the impact of English language testing is essential for anyone involved in testing and assessment issues in China and elsewhere in the world. This is a must-read volume for testing and assessment policy makers, curriculum designers, researchers, ESL/EFL materials writers, graduate students, and English language teachers/researchers at all levels. 2021 DSE Washback refers to the influence of language testing on teaching and learning. This volume, at the important intersection of language testing and teaching practices, presents theoretical, methodological, and practical guidance for current and future washback studies. In the field of language testing, researchers' major interest has traditionally been focused on issues and solving problems inherent in tests in order to increase their reliability and validity. However, the washback effect goes well beyond the test itself to include factors, such as curriculum, teacher and learner behaviors inside and outside the classroom, their perceptions of the test, and how test scores are used. Only recently have researchers started to empirically investigate the phenomenon of washback. This volume of such research serves two essential purposes by: \*providing an overview of the complexity of washback and the various contextual factors entangled within testing, teaching, and learning; and \*presenting empirical studies from around the world that offer insights into the effects of washback in specific educational contexts and models of research on which future studies can be based. The extensive use of test scores for various educational and social purposes in society nowadays makes the washback effect a high-interest phenomenon in the day-to-day educational activities of teachers, researchers, program coordinators/directors, policymakers, and others in the field of education. Washback in Language Testing: Research Contexts and Methods is a valuable resource for those who are interested in the application of findings to actual teaching and learning situations or conduct washback research in their own contexts, including educational and psychological testing experts, as well as alternative assessment people in all fields, and for policy- and decision-makers in educational and testing organizations. It is a useful supplements to textbooks. The questions appear in the order of the

syllabus for easy reference. All questions are carefully selected to cover various question types requiring different levels of skills. The book is an in-depth and comprehensive analysis of the case of language in education reform and language policy controversies of Hong Kong over the initial two decades after 1997. It is a scholarly monograph of conscientious educators and researchers who have been active during the education reform, collaborating with different parties on school development and classroom teaching experiments. This book provides a multiple-perspective investigation into the education and language matters. Besides socio-political perspectives, this book also emphasizes the frontline educational and practical perspectives. The book explores the benefits and effective methods of mother-tongue and multi-lingual teaching that have emerged in the period. Based on the problematic experience of language purism and bifurcation in the reform, the book argues for an inclusive multilingual education policy with mother-tongue as the core. This book provides potential solutions and good practices to tackle the complex issues brought about by medium of instruction policy reforms in post-colonial times. In an increasingly volatile and unpredictable world, the education of young people who both understand the contexts in which they are growing up and see the need for engaging with them is a top priority. This task falls to social studies education which carries the responsibility for inducting young people into their social world and helping them to see the role they can play within it. This is particularly important in East Asia where strong economic growth, long held cultural values and diverse political systems create an environment that challenges young people on multiple fronts. This book, with its team of regional authors, shows how different societies in the region are dealing with these challenges and what can be expected from future citizens. The book will appeal to policy makers, researchers and teachers interested in the current state of social studies education in East Asian societies. Learning disability is a classification that includes several disorders in which a person has difficulty learning in a typical manner. Depending on the type and severity of the disability, interventions may be used to help the individual learn strategies that will foster future success. Some interventions can be quite simplistic, while others are intricate and complex. This book deserves a wide audience; it will be beneficial not only for teachers and parents struggling with attachment or behavior issues, but it will also benefit health care professionals and therapists working directly with special needs such as sensory integration dysfunction. Discussing international perspectives on teaching about hazards and disasters, this volume features examples from Germany, France, South Africa, New Zealand, Hong Kong and Nigeria. This volume gathers contributions in the closely linked fields of English language assessment and language education. The contributors from China and Hong Kong represent a mixture of established and new scholars. Areas covered in the language education section range across major developments in the redefining of Hong Kong's secondary and tertiary curricula, as well as the huge field of China's vocational education curriculum. Regarding assessment, the contributions reflect major changes in the marking of examinations in Hong Kong, whereby all examinations from 2012 onwards are marked onscreen, to quality control issues in the administration of China's College English Test, which is taken by over 10 million candidates every year. This textbook gives you clear strategies and tips to make your HKDSE Score higher than you thought possible.
