Arranged under 39 categories, e.g., Biomedical sciences, basic studies; Biomedical sciences, applied studies; Health and safety; and Fusion energy. Entry gives bibliographical information and abstract. Corporate, author, subject, report number indexes. The story of Baby Doe Tabor has seduced America for more than a century. Long before her body was found frozen in a Leadville shack near the Matchless Mine, Elizabeth McCourt "Baby Doe" Tabor was the stuff of legend. The stunning divorcée married Colorado's wealthiest mining magnate and became the "Silver Queen of the West." Blessed with two daughters, Horace and Baby Doe mesmerized the world with their wealth and extravagance. But Baby Doe's life was also a morality play. Almost overnight, the Tabors' wealth disappeared when depression struck in 1893. Horace died six years later. According to the legend, one daughter left home never to return; the other died horribly. For thirty-five years, Baby Doe, who was considered mad, lived in solitude high in the Colorado Rockies. Baby Doe Tabor left a record of her madness in a set of writings she called her "Dreams and Visions." These were discovered after her death but never studied in detail—until now. Author Judy Nolte Temple retells Lizzie's story with greater accuracy than any previous biographer and reveals a story more heartbreaking than the legend, giving voice to the woman behind the myth. Reprint of the original, first published in 1862. This book presents a fascinating analysis of expertise and policy formation, based on an in-depth study of the UK Royal Commission on Environmental Pollution. The Commission provided expert advice to governments from 1970 to 2011. Often portrayed as a scientific body, it was in fact an interesting hybrid, which embodied wide-ranging expertise. It delivered thirty-three reports, leaving a significant mark on British environmental policy, and having influence within Europe and beyond. Drawing upon an extensive literature and a wide range of sources, Knowledge, Policy, and Expertise provides the only full account of this important advisory body, covering a period in which the policy landscape was profoundly transformed. It offers a rich and detailed analysis of authority, autonomy, and trust; of the diverse roles that advisors can play and the networks within which they operate; and of the circumstances of influence in which expert advice comes to be accepted gratefully, used strategically, absorbed in diffuse ways, or ignored. Above all, this book demonstrates the complexity and contingency of knowledge-policy relations, contributing substantially to a theory of expertise, and drawing out important implications for the future of good advice. "Report of the Dominion fishery commission on the fisheries of the province of Ontario, 1893", issued as vol. 26, no. 7, supplement. This first volume, spanning the first thirty-five years of William Penn's life, from 1644

to 1679, documents his activities as a young Quaker activist. Reprint of the original, first published in 1860.
