Cross-Cultural Risk Perception demonstrates the richness and wealth of theoretical insights and practical information that risk perception studies can offer to policy makers, risk experts, and interested parties. The book begins with an extended introduction summarizing the state of the art in risk perception research and core issues of cross-cultural comparisons. The main body of the book consists of four cross-cultural studies on public attitudes towards risk in different countries, including the United States, Australia, New Zealand, France, Germany, Sweden, Bulgaria, Romania, Japan, and China. The last chapter critically discusses the main findings from these studies and proposes a framework for understanding and investigating cross-cultural risk perception. Finally, implications for communication, regulation and management are outlined. The two editors, sociologist Ortwin Renn (Center of Technology Assessment, Germany) and psychologist Bernd Rohrmann (University of Melbourne, Australia), have been engaged in risk research for the last three decades. They both have written extensively on this subject and provided new empirical and theoretical insights into the growing body of international risk perception research. Technics and Civilization first presented its compelling history of the machine and critical study of its effects on civilization in 1934—before television, the personal computer, and the Internet even appeared on our periphery. Drawing upon art, science, philosophy, and the history of culture, Lewis Mumford explained the origin of the machine age and traced its social results, asserting that the development of modern technology had its roots in the Middle Ages rather than the Industrial Revolution. Mumford sagely argued that it was the moral, economic, and political choices we made, not the machines that we used, that determined our then industrially driven economy. Equal parts powerful history and polemic criticism, Technics and Civilization was the first comprehensive attempt in English to portray the development of the machine age over the last thousand years—and to predict the pull the technological still holds over us today. “The questions posed in the first paragraph of Technics and Civilization still deserve our attention, nearly three quarters of a century after they were written.”—Journal of Technology and Culture This book is the first of a new series which will present the proceedings of the newly established Nestlé Nutrition Workshop Series: Clinical & Performance Programme aimed at adult nutrition. Undernutrition is a common phenomenon in elderly people, and malnutrition reaches significant levels in those being in hospital, nursing homes or home care programs. Consequences of malnutrition often go unrecognised owing to the lack of specific validated instruments to assess nutritional status in frail elderly persons. The Mini Nutritional Assessment (MNA) provides a single, rapid assessment of nutritional status in the elderly of different degrees of independence, allowing the prevalence of protein-energy malnutrition to be determined and to evaluate the efficacy of nutritional intervention and strategies. Easy, quick and economical to perform, it enables staff to check the nutritional status of elderly people when they enter hospitals or institutions and to monitor changes occurring during their stay. Moreover, the MNA is predictive of the cost of care and length of stay in hospital. This publication will be of immense assistance to heads of geriatric teaching units, teachers in nutrition, clinicians general practitioners and dieticians, enabling them to better detect, recognise and start treatment of malnutrition in the elderly. Anarchist, journalist, drama critic, advocate of birth control and free love, Emma Goldman was the most famous—and notorious—woman in the early twentieth century. This abridged version of her two-volume autobiography takes her from her birthplace in czarist Russia to the socialist enclaves of Manhattan’s Lower East Side. Against a dramatic backdrop of political argument, show trials, imprisonment, and tempestuous romances, Goldman chronicles the epoch that she helped shape: the reform movements of the Progressive Era, the early years of and later disillusionment with Lenin’s Bolshevik experiment, and more. Sounding a call still heard today, *Living My Life* is a riveting account of political ferment and ideological turbulence. First time in Penguin Classics Condensed to half the length of Goldman’s original work, this edition is accessible to those interested in the activist and her extraordinary era Ines is convinced that every wife is bound to be betrayed one day, so she is not surprised to find a note in her husband's briefcase with a heart smeared in lipstick crossed by the words 'All Yours'. She follows him to a park on a rainy winter evening and witnesses a violent quarrel he has with another woman. The woman collapses; Ernesto sinks her body in a nearby lake. When Ernesto becomes a suspect, Ines provides him with an alibi. After all, hatred can bring people together as urgently as love. But Ernesto cannot bring his sexual adventures to an end... Un nuevo caso de Aurora Roe Teagarden. Ir a dos bodas -una de ellas la de un antiguo amor- y al funeral de uno de los miembros del club, ya disuelto, de aficionados al estudio de crímenes mantiene muy ocupada a Aurora «Roe» Teagarden durante unos meses. Por desgracia, su vida personal parece estar en un punto muerto, hasta que su suerte cambia inesperadamente. Tras el funeral, Roe descubre que Jane Engle, la fallecida, la ha nombrado beneficiaria de una considerable herencia que incluye dinero, joyas y una casa con un cráneo oculto en la repisa de una ventana. Conociendo a Jane, Roe concluye que la anciana le ha dejado deliberadamente un asesinato por resolver. Por tanto, deberá identificar a la víctima y descubrir cuál de los vecinos de Jane, todos aparentemente normales y corrientes, es un asesino. Y todo ello sin ponerse ella en peligro de muerte... (abridged and revised) This reference grammar offers intermediate and advanced students a reason ably comprehensive guide to the morphology and syntax of educated speech and plain prose in Spain and Latin America at the end of the twentieth century. Spanish is the main, usually the sole official language of twenty-one countries, ) and it is set fair to overtake English by the year 2000 in numbers 2 of native speakers. This vast geographical and political diversity ensures that Spanish is a good deal less unified than French, German or even English, the latter more or less internationally standardized according to either American or British norms. Until the 1960s, the criteria of internationally correct Spanish were dictated by the Real Academia Espanola, but the prestige of this institution has now sunk so low that its most solemn decrees are hardly taken seriously - witness the fate of the spelling reforms listed in the Nuevas normas de prosodia y ortografía, which were supposed to come into force in all Spanish-speaking countries in 1959 and, nearly forty years later, are still selectively ignored by publishers and literate persons everywhere. The fact is that in Spanish 'correctness' is nowadays decided, as it is in all living languages, by the consensus of native speakers; but consensus about linguistic usage is obviously difficult to achieve between more than twenty independent, widely scattered and sometimes mutually hostile countries. Peninsular Spanish is itself in flux. Available in North America Only Statism and Anarchy is a complete English translation of the last work by the great Russian anarchist Michael Bakunin, written in 1873. Then he assails the Marxist alternative, predicting that a 'dictatorship of the proletariat' will in fact be a dictatorship over the proletariat, and will produce a new class of socialist rulers. Instead, he outlines his vision of an anarchist society and identifies the social forces he believes will achieve an anarchist revolution. Statism and Anarchy had an immediate influence on the 'to the people' movement of Russian populism, and Bakunin's ideas inspired significant anarchist movements in Spain, Italy, Russia and elsewhere. In a lucid introduction Marshall Shtatz locates Bakunin in his immediate historical and intellectual context, and assesses the impact of his ideas on the wider development of European radical thought. A guide to further reading and chronology of events are also appended as aids to students encountering Bakunin's thought for the first time. This book traces the history of the Maya Indians of Yucatan, Mexico, during a four-hundred-year period from late prequest times through the end of Spanish rule in 1821. Nancy Farriss combines the tools of the historian and the anthropologist to reconstruct colonial Maya society and culture as a web of interlocking systems, from ecology and modes of subsistence through the corporate family and the community to the realm of the sacred. She shows how the Maya adapted to Spanish domination, changing in ways that embodied Maya principles as they applied their traditional collective strategies for survival to the new challenges; they fared better under colonial rule than the Aztecs or Incas, who lived in areas more economically attractive to the conquering Spaniards. The author draws on archives and private collections in Seville, Mexico City, and Yucatan; on linguistic evidence from native language documents; and on archaeological and ethnographic data from sources that include her own fieldwork. Her innovative book illuminates not only Maya history and culture but also the nature and functioning of premodern agrarian societies in general and their processes of sociocultural change, especially under colonial rule. The best way to learn history is to visualize it! Anthony Giddens has been in the forefront of developments in social theory for the past decade. In *The Constitution of Society* he outlines the distinctive position he has evolved during that period and offers a full statement of a major new perspective in social thought, a synthesis and elaboration of ideas touched on in previous works but described here for the first time in an integrated and comprehensive form. A particular feature is Giddens's concern to connect abstract problems of theory to an interpretation of the nature of empirical method in the social sciences. In presenting his own ideas, Giddens mounts a critical attack on some of the more orthodox sociological views. *The Constitution of Society* is an invaluable reference book for all those concerned with the basic issues in contemporary social theory. Forty-five years after Che's assassination in Bolivia in 1967, his widow and the great love of his life has finally released her memoir of their years together. They met as fellow guerillas during the revolutionary war in Cuba and married in June 1959, a few months after the revolution. They had four children together. Here, with great passion and poignancy, Aleida describes their shared dreams for the future and their family. This book begins from the premise that we are living in an age in which the social is in a continuous process of reinvention. The book is also grounded in the assumption that music is a perennial key player in the processes of reinventing the social since music holds the power to stimulate and transport visions of change through its appeal to all human senses in the Americas and beyond the American hemisphere. Chapters address the intersection of music and identity politics, the role of music in social movements, music's presence in commodity and tourist culture, music in the context of museum culture, music's presence in literature and the visual arts, and music documentary as alternative sonic historiography. From Bob Beckel, the popular co-host of "The Five" on Fox News Channel, a deeply moving, redemptive memoir about his life as a political operative and diplomat, his long struggle with alcohol and drugs, and his unlikely journey to finding faith. Growing up poor in an abusive home, Bob Beckel learned to be a survivor: to avoid conflict, mask his feelings, and to lie--all skills that served him well in Washington, where he would become the youngest-ever Deputy Assistant Secretary of State and manage Walter Mondale's 1984 presidential campaign. But Beckel was living a double life. On January 20, 2001--George W. Bush's first Inauguration Day--he hit rock bottom, waking up in the psych ward. Written with captivating honesty, Beckel chronicles how his addictions nearly killed him until he found help in an unexpected ally, conservative Cal Thomas, who helped him find faith, get sober, and get his life back on track. "This synthesis of history, anthropology, and linguistics gives a view of the first two hundred years of the Spanish colonization of the Yucatec Maya. Drawing on a range of sources, it documents the crucial role played by language in cultural conquest: how colonial Mayan emerged in the age of the cross, how it was taken up by native writers to become the language of indigenous literature, and how it ultimately became the language of rebellion against the system that produced it. The book includes analyses of the linguistic practices of both missionaries and Mayas—as found in bilingual dictionaries, grammars, catechisms, land documents, native chronicles, petitions, and the forbidden Maya Books of Chilam Balam. It presents an approach to the study of religious and cultural conversion that aims to illuminate the history of Latin America and beyond."-- This paperback version of Pastor John Hagee's newest book has ripped-from-the-headlines updates. New material has been added regarding the death of the dollar, a nuclear Iran, and the rejection of Israel. Further, this New York Times best-selling author says the United States is heading into a "Perfect Storm." Titanic. John F. Kennedy's assassination. 9/11. John Hagee maintains that these American tragedies all have one element in common: they were unthinkable. And in the opening pages of his newest book, *Can America Survive?* Hagee uses these tragedies to prove two points: that the unthinkable can happen and, given the right conditions, the unthinkable can quickly become the inevitable. In *Can America Survive?* Hagee asserts that the seeds for tragedy are once again being sown, evidenced by the disturbing economic, geopolitical, and religious trends that now threaten to dismantle the very nation itself. "Think it can't happen?" Hagee asks in a theme repeated throughout the book. "Think again." Indeed, Hagee presents alarming examples of recent events, current research, scientific evidence, and biblical prophecy that are gathering to create a "perfect storm" that could bring down the "unsinkable" United States of America including: The U.S.'s negligent handling of Israel, and history's evidence of the danger to any nation that challenges Israel's God-mandated right to exist The dangerous belittling of Iran's nuclear threat by careless spy agencies—and the super-weapon that could stop the U.S. in its tracks instantly The chilling biblical prophecy that confirms Iran as one of six countries that will form an Islamic military force "as a cloud to cover the land" The real \$2.5 trillion price tag of healthcare reform, the international currency shifts, and the national economic trends that are poised to bring about the death of the American dollar The criminalization of Christianity around the world; *Can America Survive?* is not just a warning. It is a wake-up call and a rallying cry to Christian citizens everywhere to prevent the next unthinkable American disaster. After all, as Hagee points out, "those who do not remember the mistakes of the past are doomed to repeat them in the future." Think it can't happen? Think again. "Zarathustra" was Nietzsche's masterpiece, the first comprehensive statement of his mature philosophy, and the introduction of his influential and well-known (and misunderstood) ideas including the "overman" or "superman" and the "will to power." It is also the source of Nietzsche's famous (and much misconstrued) statement that "God is dead." This classic was due for an update and overhaul. A considerable part of Nietzsche's genius is his ability to make his language dance, and this is what becomes extraordinarily difficult to translate. Aphorist and punster Thomas Wayne puts the play back into this work. El Grupo de Investigación en Ingeniería Financiera —GINIF— de la Universidad de Medellín hace varios años tomó la decisión de editar periódicamente un libro de compilación de resultados de investigación tanto del grupo como de otros investigadores externos. Lo anterior con el propósito de extender la visibilidad del programa de Ingeniería Financiera y contribuir con la generación de conocimiento mediante el desarrollo de actividades de docencia e investigación. Las ediciones anteriores se han presentado de manera exitosa en ferias internacionales como la Feria Internacional del Libro de Guadalajara y se utiliza como material de consulta académica e investigativa en diferentes países latinoamericanos como Ecuador, México, Perú, entre otros, constituyéndose como un aporte a la divulgación del conocimiento resultado de investigación de los diferentes proyectos que ha adelantado el grupo de investigación GINIF. En esta ocasión se presenta el libro Finanzas, Modelación y Riesgos, resultado de diferentes actividades de investigación de profesionales internos y externos a la Universidad. overlooked, works of the twentieth century, it was *The Order of Things* that established Foucault's reputation as an intellectual giant. This is the Fourteenth volume of the "Hague Yearbook of International Law," which succeeds the "Yearbook of the Association of Attenders and Alumni of the Hague Academy of International Law." The title "Hague Yearbook of International Law" reflects the close ties which have always existed between the AAA and the City of The Hague with its international law institutions, and indicates the Editor's intention to devote attention to developments taking place in those international law institutions, viz. the International Court of Justice, the Permanent Court of Arbitration, the Iran-United States Claims Tribunal, and the Hague Conference on Private International Law. This volume contains in-depth articles on these developments (in English and French) and summaries of (aspects of) decisions rendered by the International Court of Justice, the Permanent Court of Arbitration and the Iran-United States Claims Tribunal, and the Hague Conference on Private International Law. A Gallery Book. Gallery Books has a great book for every reader. "I think we got off on the wrong foot, with you telling me I had to be killed and then me getting all upset about it. Let's start again. My name is Jameela, and I'm a writer. What do you do, besides . . . assassinations? Is that a hobby or more of a full-time thing?" Jameela Green has only one wish: to see her memoir on the New York Times bestseller list. When that doesn't work out, she decides that her best next step is to make a deal with God, so she heads over to her local mosque. The idealistic new imam, Ibrahim Sultan, is appalled by Jameela's shallowness but agrees to assist her, on one condition—that she perform a good deed. Jameela reluctantly accepts his terms, kicking off a series of unfortunate events. The homeless man they try to help gets recruited by a terrorist group, causing federal authorities to become suspicious of Ibrahim. When the imam mysteriously disappears, Jameela is certain that the CIA has captured her new friend for interrogation and possibly torture. Despite having no talent for this sort of thing, Jameela decides to set off on a one-woman operation to rescue him. Her quest soon lands her at the center of an international plan targeting the leader of the terrorist organization—a scheme that puts Jameela and count-less others, including her hapless husband and clever but disapproving daughter, at risk. A no-holds-barred satire about the international cost of the American Dream, *Jameela Green Ruins Everything* is a compulsively readable, darkly comedic, yet unexpectedly touching story of one woman's search for meaning and connection. Emilia Pardo Bazan (1851-1921) was a Spanish novelist, journalist, poet, critic, editor and professor known both for introducing realism to Spanish literature and as a standard bearer for women's rights. This novel was first published in the original Spanish in 1889 and is reprinted in an English translation of 1891 which is illustrated throughout. Awe and exhilaration—along with heartbreak and mordant wit—abound in *Lolita*, Nabokov's most famous and controversial novel, which tells the story of the aging Humbert Humbert's obsessive, devouring, and doomed passion for the nymphet Dolores Haze. *Lolita* is also the story of a hypercivilized European colliding with the cheerful barbarism of postwar America. Most of all, it is a meditation on love—love as outrage and hallucination, madness and transformation. *Alongside Community* is a step-by-step guide that prepares social science students to be democratic citizens by examining the theory, method, and sociopolitical dynamics that impact helping those different from oneself. The first part of this book explores the more theoretical issues of helping others, including issues of social identity, values, and power. The second part of this guidebook examines action-based methods; interventions available for community-based engagement; and the sociopolitical issues that inevitably arise for those who strive to create social change including issues of race, ethnicity, social class, gender, sexual orientation, mental health, educational and environmental justice along with suggestions on how to address these issues. The third part of *Alongside Community* critically explores how to measure the impact of community service on major stakeholders including student, faculty, college and community agency and ends with reflections and suggestions on how to be a lifelong civically engaged citizen. "Every line resonates with a wind that crosses oceans."—Jamaal May "Zamora's work is real life turned into myth and myth made real life." —Glappitnova Javier Zamora was nine years old when he traveled unaccompanied 4,000 miles, across multiple borders, from El Salvador to the United States to be reunited with his parents. This dramatic and hope-filled poetry debut humanizes the highly charged and polarizing rhetoric of border-crossing; assesses borderland politics, race, and immigration on a profoundly personal level; and simultaneously remembers and imagines a birth country that's been left behind. Through an unflinching gaze, plainspoken diction, and a combination of Spanish and English, *Unaccompanied* crosses rugged terrain where families are lost and reunited, coyotes lead migrants astray, and "the thin white man let us drink from a hose / while pointing his shotgun." From "Let Me Try Again": He knew we weren't Mexican. He must've remembered his family coming over the border, or the border coming over them, because he drove us to the border and told us next time, rest at least five days, don't trust anyone calling themselves coyotes, bring more tortillas, sardines, Alhambra. He knew we would try again. And again—like everyone does. Javier Zamora was born in El Salvador and immigrated to the United States at the age of nine. He earned a BA at UC-Berkeley, an MFA at New York University, and is a 2016–2018 Wallace Stegner Fellow at Stanford University.
