in shaping the conceptual framework and practice of this approach. It also provides a deep insight into Professor John McKnight's (one of the originators, and the most central figure in ABCD alongside Professor Jody Kretzmann) thinking on society and community. It offers a wealth of commentary on the challenges facing society and community, what needs to change, and how we might go about it. Ever wondered how the computer hacks or website hacks happen? What constitutes a website hack? How come a Computer, which in layman circle, usually seen as a 'Perfect' machine doing computations or calculations at the lightning speed, have security vulnerabilities?! Can't all websites be safe and secure always? If you have all these innocent doubts in your mind, then this is the right book for you, seeking answers in an intuitive way using layman terms wherever possible! There are 7

different chapters in the book. The first three of them set up the ground basics of hacking, next three of them discuss deeply the real hackings i.e. the different types of handpicked well-known web attacks and the last chapter that sums up everything. Here is the list of chapters: 1)Introduction: A brief discussion on workings of computers, programs, hacking terminologies, analogies to hacks. This chapter addresses the role of security in a software. 2)A Simplest Hack: To keep the reader curious, this chapter demonstrates the simplest hack in a computer program and draws all the essential components in a hacking. Though this is not a real hacking yet, it signifies the role of user input and out of box thinking in a nutshell. This chapter summarizes what a hack constitutes. 3)Web Applications: As the book is about website hacks, it would not be fair enough if there is no content related to the basics, explaining components of a website and the working of a website. This chapter makes the user ready to witness the real website hackings happening from the next chapter. 4)The SQL Injection: Reader's first exposure to a website attack! SQL injection is most famous cyber-attack in Hackers' community. This chapter explains causes, the way of exploitation and the solution to the problem. Of course, with a lot of analogies and intuitive examples! 5)Cross-site Scripting: Another flavor of attacks! As usual, the causes, way of exploitation and solution to the problem is described in simple terms. Again, with a lot of analogies! 6)Cross-site Request Forgery: The ultimate attack to be discussed in the book. Explaining why it is different from previous two, the causes, exploitation, solution and at the end, a brief comparison with the previous attack. This chapter uses the terms 'Check request forgery' and 'Cross Bank Plundering' sarcastically while drawing an analogy! 7)Conclusion: This chapter sums up the discussion by addressing questions like why only 3 attacks have

been described? why can't all websites be secure always? The chapter ends by giving a note to ethical hacking and ethical hackers. The A.B.C.D: An Introductory Book into the English Alphabet is an elementary pronunciation course for beginning learners who are

being introduced to the English Alphabet for the first time or those learners in elementary and intermediate schools who have consistently shown considerable difficulties with either learning to read and write in English or have difficulties grasping the essence of English Pronunciation. The book aims to help learners learn to pronounce, read and write the sounds of the English language. The book consists of three parts, all of which are further subdivided into numerous chapters. It is my hope that this introductory book into the sounds of the English letters will help the young learners to recognize and pronounce all the vowel and consonant sounds of the English Language. Indeed, they would become exceptional writers, avid readers and fluent speakers of the English language at an early age. A new storybook that aims to help children understand and come to terms with COVID-19 has been produced by Sana Amir Bakhsh. The book - is aimed primarily at children aged 5-16 years old. As the coronavirus pandemic spreads, the need to explain the coronavirus to children grows exponentially. And it needs to be done, everyone agrees, in an age-appropriate way. Today started as any other day, with the exception that today, I was getting a typewriter to start my cookbook. On May 10, 2013, my wife was looking for a recipe for a jalapeño quiche to prepare for Mother's Day, May 12. As my wife was looking for this recipe, she looked through this big pile of papers. She made a

“throw-away pile” and a “keep pile.” I had an “aha” moment, much like Oprah has from time to time; most of you can relate too. My thought was something like, This one man’s trash is another man’s treasure, recipes that endearing clients and friends had given us throughout the years. And as I picked up the pile and looking and reading through the recipes, this flood of memories surrounded me; the pile she has gathered is 90 percent recipes. I am one short of 100. Wow! The cover of this work was painted by the artist: Annabelle C. Doan Do you have a child in you? Would you like to become influential?
