In Situ Impulse Test Jun 30 2020 Special experimental field testing and analytical studies were undertaken at Fort Lawton in Seattle, Washington, to study "close-in" wave propagation and evaluate data interpretation procedures for a new in situ impulse test. This test was developed to determine the shear wave velocity and dynamic modulus of soils underlying potential nuclear power plant sites. The test is different from conventional geophysical testing in that the velocity variation with strain is determined for each test. In general, strains between 10⁻¹ and 10⁻³ percent are achieved. The experimental field work consisted of performing special tests in a large test sand fill to obtain detailed "close-in" data. Six recording transducers were placed at various points on the energy source, while approximately 37 different transducers were installed within the soil fill, all within 7 feet of the energy source. Velocity measurements were then taken simultaneously under controlled test conditions to study shear wave propagation phenomenology and help evaluate data interpretation procedures. Typical test data are presented along with detailed descriptions of the results.

Get Through MRCPCH Part 2: Data Interpretation Questions, second edition Dec 05 2020 Get Through MRCPCH Part 2: Data Interpretation Questions is based on the original title, 100 Data Interpretation Questions in Paediatrics for MRCPCH/MRCP, and provides valuable revision material for candidates sitting the two written papers for Part 2 of the Membership of the Royal College of Paediatrics and Child Health (MRCPCH) exam. This new edition has been revised and expanded and now includes four different question types: best of list; n from many; extended matching questions; and questions to which a written answer must be given. This gives the reader practice in real-life exam style questions as well as more open-ended questions that don't appear in the exam but really test the reader's knowledge while they are revising. It will prepare candidates for questions dealing with data interpretation, including ECGs, EEGs, growth charts, lists of test results and other materials commonly encountered in the examination. The answers are supplemented by invaluable extra information to help the reader understand why an answer is right or wrong, and to aid further revision on the topics covered. All cases have been selected according to the criteria of the MRCPCH exam, comprehensively covering all paediatric topics and coming from years of genuine clinical paediatric experience. This is an essential text for all candidates sitting the MRCPCH exam, as well as examiners and trainers for those exams, senior house officers, specialist registrars and their overseas equivalents.

Data Interpretation Tests: An Essential Guide for Passing Data Interpretation Tests Jan 30 2023

Off the Charts! Data Interpretation Apr 20 2022 Off the Charts! Data Interpretation is like having a best friend who happens to be really, really good at explaining everything you need to figure out how to get better at solving those word problems about charts and graphs. Imagine if your friend could teach you how to recognize and adapt to any curve balls the test maker tries to sneak in to make a question really difficult. Build up your ability to interpret data that is presented visually. Each of the major standardized tests has increased its emphasis on questions which require you to consistently do three things well: Interpret the wording of the question correctly, so you know exactly what information you need to obtain from the data visualization. Interpret the data visualization correctly, so you retrieve the correct information from it. Setup the right equations so you can perform the right calculations, when applicable, on the numbers you retrieved from the data visualization. You will learn to efficiently arrive at the right answer, every time. In this book, you will find: A set of structured-but-flexible approaches which can be combined in different ways to solve even the hardest questions. Sample questions are asked in a variety of ways to enhance your ability to work with simple and complex tables, charts, and

graphs. Refresher content presented in ways which accelerate your learning and improve your retention of related facts, relationships, and formulas.
