Microeconomics Jan 31 2023 Parkin's
Microeconomics is a worldwide leader because it provides a serious, analytical approach to the discipline using the latest policy and data. Parkin trains students to think like economists by offering a clear introduction to theory and applying the concepts to today's events, news, and research. From our global food shortage to global warming, economic issues permeate our everyday lives. Parkin brings critical issues to the forefront. Each chapter begins with one of today's key issues, and additional issues appear throughout the chapter to show the real-world applications of the theory being discussed. When the chapter concludes, students "read between the lines" to think critically about a news article relating to the issue, demonstrating how thinking like an

economist helps make informed decisions.

August 2006, we are launching a new,
streamlined version of MyEconLab to better
fit the needs of both students and

Foundations of Economics was developed on
the premise that economics is a core
competency for the responsible citizen and
a foundation tool for every type of
career. The Bade/Parkin package is

designed to encourage learning by doing. Each chapter concentrates on a manageable number of core concepts that are called out in the beginning-of-chapter Checklist. Students know what they're expected to learn and are given the chance to apply those lessons to real-world problems. Practice is the cornerstone of the innovative Bade/Parkin approach. A full page Checkpoint containing a Practice Problem with solution and a parallel Exercise immediately follows each main idea. Checkpoints serve as stopping points and encourage students to practice using a concept before moving on. Different learning styles need different learning tools, and Bade/Parkin's extensive and tightly integrated web environment puts students in the driver's seat and allows them to use technology in the way that suits them best.
