Paul McPharlin is one of the 20th century's most important contributors to the art of puppetry. Over a period of nine years he created some 20 productions with marionettes, rod puppets, hand puppets and shadow figures. He was also a prolific writer whose technical, theoretical and historical works contributed significantly to a puppetry revival. His book *The Puppet Theatre in America* is considered the definitive history of American puppetry. Though shy and aloof, McPharlin was also energetic. He had an ability to bring people together and used this knack to found a national puppetry organization, *Puppeteers of America*. Besides the author's extensive research on McPharlin and puppetry, the book draws on significant contributions from McPharlin's wife, puppeteer and author Marjorie Batchelder McPharlin, who allowed the use of her 18-year correspondence with Paul in the creation of the book. Chapters take the reader through McPharlin's childhood as a loner in Detroit, his maturation and education in New York, and his early, erratic and often unsuccessful attempts at making a living. His puppeteering years, 1929 to 1937, are detailed, as are the later years that saw him first working for the WPA and then being drafted into the army to serve in World War II at age 38. He continued making important contributions to the art of puppetry until a brain tumor took his life at age 45 in 1948. Appendices

present two of McPharlin's plays, The Barn at Bethlehem: A Christmas Play and Punch's Circus. Another appendix details puppetry imprints, including yearbooks, plays, handbooks, worksheets and books. A fourth lists Paul McPharlin's Puppeteers, members of the Marionette Fellowship of Detroit. There are many institutions around the world holding collections of three-dimensional rod puppets but many are unaware of what options are available in terms of their overall care or who to ask for such information. Without proper care rod puppets face deterioration, carrying away the history and tradition in which they were created and which they represent. A three-dimensional rod puppet is a round puppet that is made primarily of painted wood in combination with various secondary materials (i.e metal, plastic) and is controlled by at least one rod from below, above, or behind. As important as they are in their respective societies, it is unfortunate that little information is available pertaining to their care as part of a museum collection. This project hopes to fill that gap by gathering the best methods for caring for 3D rod puppet specifically addressing optimal storage care. This project focused on puppet collections in U.S. institutions to collect and present recommended techniques that collections personnel can use for storing 3D rod puppets. Offers the history of puppets as a form of entertainment from around the world, providing instructions for making puppets from Japan, India, and Burma. Designing and making marionettes, glove puppets, rod puppets, and shadow puppets. Linking actual instances of language use with structures of social power in francophone Belgium, Gross outlines the history and contemporary

configuration of rod puppetry in Liège. The analysis of this working class performance art moves between what occurs on and off stage. As puppeteers speak in other voices, sometimes in Walloon and sometimes in French, they create a sociolinguistic model based on 19th century renditions of medieval texts, the voices of past puppeteers, and the language that surrounds them. The high level of linguistic reflexivity created by the regional language movement has led to frequent metalinguistic and metapragmatic commentaries within the puppet shows. This complex speech genre embedded in social context shows the influence of identity struggles: from local class oppositions to imperial designs abroad. Keeping a tight focus on language, Speaking in Other Voices examines the process of entextualization and recontextualization as stories of war and religion are transmitted to succeeding generations.
