*Feature Films in English Language Teaching Jul 27 2021 Feature Films in English Language Teaching deals with the use of motion pictures in the advanced EFL (English as a foreign language) classroom. It provides a general introduction to film literacy and explains the rationale, methods, and objectives of working with feature films. In addition, the book contains in-depth considerations on sixteen selected films, which are grouped regionally (Australia, New Zealand, South Africa, USA, Great Britain). Each chapter describes the topical focus of the film and its central theme and provides background information on social, historical, political, and geographical issues. A profound analysis of selected scenes lays the foundation for considerations on the teaching potential of the film. In a download section, the chapters are complemented with ready-to-use teaching materials on film-specific aspects (narrative, dramatic and cinematographic dimensions), which are organised as pre-/while-/post-viewing activities. A glossary on technical terms for film analysis completes the volume.*

*Management in English Language Teaching Sep 16 2020 In the course of their careers, foreign language teachers can expect at various times to be involved in areas such as the management of students and of colleagues, the organization of their institutions, the development of curricula, staff recruitment, and the financial aspects of running a school or program, including marketing and promotion. This book is the first to provide a comprehensive, practical introduction to these areas, particularly in relation to ESL institutions. The authors each have specialist expertise in the fields of organizational management, personnel management, marketing management, and commercial management in the context of ESL, which form the four main sections of the book.*

*Exploring English Language Teaching Feb 14 2023 This title will provide a single*

volume introduction to the field of ELT from an applied linguistics perspective.

The Routledge Handbook of English Language Teaching Oct 10 2022 The Routledge Handbook of English Language Teaching is the definitive reference volume for postgraduate and advanced undergraduate students of Applied Linguistics, ELT/TESOL, and Language Teacher Education, and for ELT professionals engaged in in-service teacher development and/or undertaking academic study. Progressing from 'broader' contextual issues to a 'narrower' focus on classrooms and classroom discourse, the volume's inter-related themes focus on: ELT in the world: contexts and goals planning and organising ELT: curriculum, resources and settings methods and methodology: perspectives and practices second language learning and learners teaching language: knowledge, skills and pedagogy understanding the language classroom. The Handbook's 39 chapters are written by leading figures in ELT from around the world. Mindful of the diverse pedagogical, institutional and social contexts for ELT, they convincingly present the key issues, areas of debate and dispute, and likely future developments in ELT from an applied linguistics perspective. Throughout the volume, readers are encouraged to develop their own thinking and practice in contextually appropriate ways, assisted by discussion questions and suggestions for further reading that accompany every chapter. Advisory board: Guy Cook, Diane Larsen-Freeman, Amy Tsui, and Steve Walsh

Emotions and English Language Teaching Mar 23 2021 Taking a critical approach that considers the role of power, and resistance to power, in teachers' affective lives, Sarah Benesch examines the relationship between English language teaching and emotions in postsecondary classrooms. The exploration takes into account implicit feeling rules that may drive institutional expectations of teacher performance and affect teachers' responses to and decisions about pedagogical matters. Based on interviews with postsecondary English language teachers, the book analyzes ways in which they negotiate tension—theorized as emotion labor—between feeling rules and teachers' professional training and/or experience, in particularly challenging areas of teaching: high-stakes literacy testing; responding to student writing; plagiarism; and attendance. Discussion of this rich interview data offers an expanded and nuanced understanding of English language teaching, one positing teachers' emotion labor as a framework for theorizing emotions critically and as a tool of teacher agency and resistance.

Color, Race, and English Language Teaching Feb 19 2021 The unique contribution of this book is to bring together Critical Race Theory and narrative inquiry and apply them specifically to a largely overlooked area of experience within the field of TESOL: What does it mean to be a TESOL professional of color? To address this question, TESOL professionals of color from all over the world, representing a wide range of racial, ethnic, and cultural backgrounds, offer accounts of their own experiences, responding to two related questions: \*Can you identify critical events or conditions in your personal or professional life that are the result of you being a person of color that affect who you are now and what you do as a TESOL professional of color? \*What have you learned from these events or conditions that have had a bearing on your life as a TESOL professional of color? Color, Race, and English Language Teaching: Shades of Meaning is intended for researchers, professionals, and students in the field of English language teaching. The book is designed as a text for MATESOL programs and courses that deal with issues of language, culture, and teaching. Values in English Language Teaching Nov 18 2020 This book offers a new perspective on language teaching by placing moral issues--that is, questions of values--at the core of what it is to be a teacher. The teacher-student relation is central to this view, rather than the concept of language teaching as merely a technical matter of managing students' acquisition of language. The message is that all language teaching involves an interplay of deeply held values, but in each teaching situation these values are played out in different ways. Johnston does not tell readers what to think, but only suggests what to think about. Values in English Language Teaching explores the complex and often contradictory moral landscape of the language classroom, gradually revealing how teaching is not a matter of clear-cut choices but of wrestling with dilemmas and making difficult decisions in situations often riven with conflict. It examines the underlying values that teachers hold as individuals and as members of their profession, and demonstrates how those values are played out in the real world of language classrooms. Matters addressed include connections between the moral and political dimensions in English language teaching, and between values and religious beliefs; relationship(s) between teacher identity and values; the meaning of professionalism and how it is associated with morality and values; the ways in which teacher development is a moral issue; and the marginality of English language teaching. All the examples are taken from real-life teaching situations--the complexity and messiness of these situations is always acknowledged, including both individual influences and broader social, cultural, and political forces at play in English language classrooms. By using actual situations as the starting point for analysis, Johnston offers a philosophy based in practice, and recognizes the primacy of lived experience as a basis for moral analysis. Examples come from teaching contexts around the world, including Brazil, Thailand, Poland, Japan, Central African Republic, Turkey, and Taiwan, as well as various settings in the United States. This book will change the way teachers see language classrooms--their own or those of others. It is a valuable resource for teachers of ESL and EFL and all those who work with them, especially teacher educators, researchers, and administrators.

*Professionalizing Your English Language Teaching* May 05 2022 Written by leading experts in the field of TESOL, this book explores the literature on various topic areas and demonstrates how teachers can increase their levels of professionalism by acquiring some general and field-specific strategies. Being a teaching professional is not simply about having the right teaching qualifications and good academic standing, it involves a commitment to being innovative and transformative in the classroom and helping both students and colleagues achieve their goals. A dictionary definition of professionalism reads as follows: professionalism is the conduct, aims, or qualities that characterize or mark a profession or a professional person; and it defines a profession as a calling requiring specialized knowledge and often long and intensive academic preparation (Merriam-Webster, 2013). However, according to Bowman (2013), professionalism is less a matter of what professionals actually do and more a matter of who they are as human beings. Both of these views imply that professionalism encompasses a number of different attributes, and, together, these attributes identify and define a professional. The book is primarily intended for teachers at all levels and in all contexts who are interested in improving their professionalism and developing strategies that can take them to higher levels in the field of TESOL/ELT.

This has created a demand for teachers who can teach English to learners of varied cultural, socio-economic and psychological backgrounds. The book, in its second edition, continues to discuss the modern trends, innovations, as well as the difficulties and challenges in teaching and learning ESL in a non-native context. The book, with contributions from many experts (each one specializing in a particular field) from countries such as UK, USA, Australia, New Zealand, India, Nigeria, Sri Lanka, China, and Japan, provides new methods, strategies and application-oriented solutions to overcome the problems in a practical way. Second Handbook of English Language Teaching Dec 12 2022 The *Second Handbook of English Language Teaching* provides a comprehensive examination of policy, practice, research and theory related to English language teaching in international contexts. Over 70 chapters focus on the research foundation for best practices, frameworks for policy decisions, and areas of consensus and controversy in second-language acquisition and pedagogy. In countries around the globe, English has become the second language taught most frequently and intensively. In many countries, particularly in Asia, government policies have made English a part of the curriculum from primary school on. Demand for English teaching by parents and adult learners is fueled by the desire to increase economic competitiveness, globalization of the workforce, immigration, and a move toward lifelong learning.

Immigration has led to an increased demand for English-language teaching even in countries where English is the dominant language.

*Non-native Educators in English Language Teaching* Jul 15 2020 The place of native and non-native speakers in the role of English teachers has probably been an issue ever since English was taught internationally. Although ESL and EFL literature is awash, in fact dependent upon, the scrutiny of non-native learners, interest in non-native academics and teachers is fairly new. Until recently, the voices of non-native speakers articulating their own concerns have been even rarer. This book is a response to this notable vacuum in the ELT literature, providing a forum for language educators from diverse geographical origins and language backgrounds. In addition to presenting autobiographical narratives, these authors argue sociopolitical issues and discuss implications for teacher education, all relating to the theme of non-native educators in ETL. All of the authors are non-native speakers of English. Some are long established professionals, whereas others are more recent initiates to the field. All but one received part of the higher education in North America, and all except two of the chapters are at least partially contextualized in North America. Particularly relevant for non-native speakers who aspire to enter the profession, graduate students in TESOL programs, and teacher educators, the unique nature of this book's contributors and its contents will interest researchers and professionals in applied linguistics generally and in ELT, and all those who are concerned with the role of non-native speakers in English-language teaching.

*International Handbook of English Language Teaching* Apr 11 2020 This two volume handbook provides a comprehensive examination of policy, practice, research and theory related to English Language Teaching in international contexts. More than 70 chapters highlight the research foundation for best practices, frameworks for policy decisions, and areas of consensus and controversy in second language acquisition and pedagogy. The Handbook provides a unique resource for policy makers, educational administrators, and researchers concerned with meeting the increasing demand for effective English language teaching. It offers a strongly socio-cultural view of language learning and teaching. It is comprehensive and global in perspective with a range of fresh new voices in English language teaching research.

*Exploring English Language Teaching in Post-Soviet Era Countries* Aug 28 2021 *Exploring English Language Teaching in Post-Soviet Era Countries* analyses different elements of English language teaching from the Soviet era to a new era of Westernised influence. This work provides an insight into the problems that occur in present-day English language education in post-Soviet era countries, considering English language teaching at all stages of education. The book outlines the challenges that many countries of the former Soviet Union experienced at the turn of the twenty-first century and relates these to education as a crucial social phenomenon. It considers the teaching of English as a lingua franca at all education levels in the countries of the former Soviet Union, with particular emphasis on universities. Using empirical research from case studies in Azerbaijan, the book considers whether post-Soviet era countries have truly moved towards a Westernised model of language education or simply imitated one. This book is the first of its kind to treat the problem by listening to teachers' and students' voices as the major actors of the educational process. This book will be of great interest to academics, researchers and post-graduate students in the fields of English language education, education in Eastern Europe and applied linguistics.

*Successful English Language Teaching* is about how we teach English Language Learners (ELLs) and how our ELLs learn. Farrell and Jacobs encourage those involved in teaching English to develop, maintain and rediscover the reasons that led them to take up the profession. They focus on the essentials in teaching the English language that teachers can implement in their instruction so that their students can excel in their learning: Encourage learner autonomy Emphasize the social nature of learning Develop curricular integration, focus on meaning Celebrate diversity Expand thinking skills Utilize alternative assessment, and Promote English language teachers as co-learners along with their students. These essentials are best implemented as a whole, rather than one at a time and so they are interwoven with each other to encourage a holistic teaching approach. Highly accessible, each chapter comes with case studies and a range of activities to encourage the reader to put each of the essentials into practice. With these the authors aim to bring an inner smile to all English language teachers that reassures them they made the right choice when they chose to become teachers of the English language. This reflective and engaging book will be invaluable to postgraduate students of TESOL and applied linguistics, and in-service language teachers.

*Innovation in English Language Teaching* Feb 02 2022 This reader provides both theoretical perspectives and practical tools for analysing and understanding how ELT classroom curricula can be analysed, developed and evaluated. A series of case studies are provided to highlight both the role of the teacher in curriculum innovation and various processes of planning and implementation. Race, Empire, and English Language Teaching Nov 11 2022 This timely book takes a critical look at the teaching of English, showing how language is used to create hierarchies of cultural privilege in public schools across the country. Motha closely examines the work of four ESL teachers who developed anti-racist pedagogical practices during their first year of teaching. Their experiences, and those of their students, provide a compelling account of how new teachers might gain agency for culturally responsive teaching in spite of school cultures that often discourage such approaches. The author combines current research with her original analyses to shed light on real classroom situations faced by teachers of linguistically diverse populations. This book will help pre- and in-service teachers to think about such challenges as differential achievement between language learners and "native-speakers;" about hierarchies of languages and language varieties; about the difference between an accent identity and an incorrect pronunciation; and about the use of students' first languages in English classes. This resource offers implications for classroom teaching, educational policy, school leadership, and teacher preparation, including reflection questions at the end of each chapter.
