***World Bank Engagement at the State Level Jan 21 2022 This report is a pilot cross-country study that summarizes 10 years (1998-2008) of the World Bank s engagement at the state level in selected large federal countries and combines elements of a country assistance evaluation and a thematic review. It looks at several strategic and operational questions posed by state-level engagement, among them the selection of states, the scope, and the modalities of engagement. According to the report, two tendencies often in tension featured in most approaches for selection of states for direct engagement. One was to support better-performing, reformist states, while the other was to support the poorest states as a more direct route to reducing poverty. Overall, the study confirms the desirability of continued selective lending in a few focus states. Among other findings: the Bank s engagement with progressive reformist states has added value and has been highly appreciated, but in order to enhance the poverty impact of state level interventions, greater weight should be given to the needs of poorest states by balancing states propensity to reform and the concentration of poverty within them; continued focus on public finance management appears sound, irrespective of whether engagement is confined to this area or serves as an entry point for broader engagement; there is considerable scope for greater impact from knowledge transfer between states and countries and expanded knowledge services to the state-level clients.***

***Theatre and the World Jan 01 2023 Why is theatre in every culture? Why is theatre recorded throughout world history? Why did countries influence each other? Learn your own answer as you go through five different world cultures and time periods. We begin our study in Ancient Rome, travel over to China, visit the Spanish Renaissance and learn about the cultures they suppressed and influenced, next we learn about the French Renaissance and end our unit of study with modern day Germany, Polish and Czechoslovakian theatre. This unit includes a self-examination of media influences on a person's behavior and values and a study of multi-cultural play wrights in Contemporary U.S. theatre.***

***The Global Economy Dec 28 2019 The global economy is enormous--about \$32***

***trillion per annum--and it is pervasive. Because of mass communication and advanced technology, the global economy affects the output of goods and services of every nation. Gone forever are the days when mighty oceans or mountains allowed any country to isolate itself from the rest of the world. Time zones have been replaced by the 24-hour-a-day stock market. The fate of the South Korean won and the Thai baht is a matter of major concern to the stock markets of Washington, London and Sao Paulo. Today, no nation is an island but a part of a world-wide economic archipelago. Today, because economics is global, politics is becoming global. Furthermore, the globalization of the economy impacts the socio-cultural shape of every nation and people on the face of the earth. From soft drinks to jeans, automobiles to computers, television news to movies, the world is being homogenized, usually in the American image. The film Titanic is playing to standing-room-only crowds in New York City, London and Tokyo. Country singer Garth Brooks is the best-selling singer in history. CNN is the global news network. Cultural blockbusters and superstars are eclipsing smaller, indigenous cultural offerings and entertainers. Is the planet truly becoming Hollywood? Yet, in a world that is changing faster and more dramatically than at any time in history, the family remains the fundamental social unit of every country. How is it faring, economically, socially, spiritually? Beyond debate, the family is being subjected to stresses and strains it has heretofore never known. It is buffeted by China's one-child policy, America's 1.2 million abortions a year, Japan and Western Europe's rapidly aging population, the spreading AIDS epidemic in Africa and Asia, a widening gap between haves and havenots within nations and between nations, and the sharpening conflict between fundamentalists and secularists in many countries. And still most agree that there can be no viable society without viable families. This volume examines the focus of globalization on politics and society and what can be done to preserve and strengthen the family in a world increasingly indifferent to the age-old virtues of faith, hope, and charity.***

***Religious Politics in Global and Comparative Perspective Dec 08 2020 Current social and political theories, which tend to dismiss religious resurgence as a deviant occurrence in the broad sweep of history, do not provide an adequate framework for the study of the dramatic resurgence of religion as a worldwide political force. This book is the first to address the interplay of religion and politics systematically and on a global scale. Offering interpretive essays as well as quantitative comparative analyses, it develops a comprehensive theoretical framework and presents the most complete comparative account available of the realities of religious politics in the contemporary world. The first of the interpretive chapters focuses on the cultural factor as a means of clarifying the role of religion in the modern world system. The next two chapters examine the concept of the self in the context of globalization and the absence of solidarity as a unifying force in societal systems. The role of ultimate values in politics and the reasons for the emergence of militant religious movements in nation-states is also considered. A worldwide study of religious change between 1900 and 1980 gives a clear picture of contemporary global religious movements and formulates a tentative set of explanations of change based on data analysis. The statistical links between religious beliefs and political views, and between religion and democracy, are explored. The editor's concluding chapter looks at the implications of the authors' findings for general theory in the sociology of religion. The editor stresses the need for reconceptualizing basic theoretical constructs, particularly the concept of religion itself. An important contribution to our understanding of the religious and political forces that are shaping the modern world, this work will be of interest to academics, researchers, and students of world religions, sociology, and political science.***

***World Atlas of Holocene Sea-Level Changes Feb 19 2022 This timely study is concerned with the current record of sea-level changes during the past 10,000 years; their rates, and our ability to estimate these changes accurately. The author begins with an extensive introduction to the subject, covering the historical background and the possible causes of sea-level changes and the main methods used to reconstruct former sea-level positions. The second and main part of the Atlas provides a worldwide review of Holocene sea level changes by assembling some 800 local relative sea-level curves, deduced from field data from all parts of the world, and comparing these with over 100 curves predicted by geophysical models. This data is compiled in 77 regional plates, each containing 4-20 relative sea-level curves drawn to the same scale. These plates enable a visual assessment of geological trends in sea-level during the Holocene to be made. Comparing this data with trends deduced from tide gauges and near-future trends predicted by climate models, should enable more accurate assessment of near future sea-level changes on a local scale. The regional plates are fully annotated with locations, authors' names, year of publication and some indicative values of the spring tidal range in the region, as well as an accompanying text of comments. Finally, the author provides a state of the art review, proposes improvements in methodology and suggests directions for further study. An extensive bibliography of over 750 references, and two indexes complete the study. This comprehensive work contains data and interpretations of value to all those with an interest in regional geography, climatology, sea-level change, and environmental science.***

***Leading at the Strategic Level in an Uncertain World Dec 20 2021 The fundamental nature of a leader's work changes at the strategic level. Leaders***

**currently working as strategic leaders or those aspiring to become strategic leaders must gain a fine appreciation for the effort and skills required at the strategic level. Moreover, they need to develop and hone their personal dimensions (including conceptual, social, and behavioral capacities; individual traits, attitudes and characteristics; and technical skills and business acumen), and acquire the new knowledge essential for success at the strategic level. This book is intended to help develop strategic leaders in each of these personal dimensions.**
