A Man of Three Worlds Nov 09 2020 In the late fifteenth century, many of the Jews expelled from Spain made their way to Morocco and established a dynamic community in Fez. A number of Jewish families became prominent in commerce and public life there. Among the Jews of Fez of Hispanic origin was Samuel Pallache, who served the Moroccan sultan as a commercial and diplomatic agent in Holland until Pallache's death in 1616. Before that, he had tried to return with his family to Spain, and to this end he tried to convert to Catholicism and worked as an informer, intermediary, and spy in Moroccan affairs for the Spanish court. Later he became a privateer against Spanish ships and was tried in London for that reason. His religious identity proved to be as mutable as his political allegiances: when in Amsterdam, he was devoutly Jewish; when in Spain, a loyal converso (a baptized Jew). In A Man

of Three Worlds, Mercedes García-Arenal and Gerard Wiegers view Samuel Pallache's world as a microcosm of early modern society, one far more interconnected, cosmopolitan, and fluid than is often portrayed. Pallache's missions and misadventures took him from Islamic Fez and Catholic Spain to Protestant England and Holland. Through these travels, the authors explore the workings of the Moroccan sultanate and the Spanish court, the Jewish communities of Fez and Amsterdam, and details of the Atlantic-Mediterranean trade. At once a sweeping view of two continents, three faiths, and five nation-states and an intimate story of one man's remarkable life, A Man of Three Worlds is history at its most compelling.

The Passion for Happiness Aug 19 2021 Although widely perceived as inhabiting different, even opposed, literary worlds, Samuel Johnson (1709-1784) and David Hume (1711-1776) shared common ground as moralists. Adam Potkay traces their central concerns to Hellenistic philosophy, as conveyed by Cicero, and to earlier moderns such as Addison and Mandeville. Johnson's and Hume's large and diverse bodies of writings, Potkay says, are unified by several key questions: What is happiness? What is the role of virtue in the happy life? What is the proper relationship between passion and reflection in the happy or flourishing individual? In their writings, Johnson and Hume largely agree upon what flourishing means for both human beings and the communities they inhabit. They also tell a common story about the history that led up to the enlightened age of eighteenth-century Europe. On the

*divisive topic of religion, these two great men of letters wrote with a decorum that characterizes the Enlightenment in Britain as compared to its French counterpart. In *The Passion for Happiness*, Adam Potkay illuminates much that philosophers and historians do not ordinarily appreciate about Hume, and that literary scholars might not recognize about Johnson.*

The Exodus Story in the Wisdom of Solomon May 16 2021 This exemplary study presents the hermeneutical principles and theological tendencies of Pseudo-Solomon's biblical interpretation of the Exodus story in the Wisdom of Solomon. Why and how did the author interpret the Exodus story? What is the socio-historical function of his interpretation? Through a comparison with corresponding biblical and extra-biblical texts, the text's dominant interpretative technique is seen to be the reshaping of the biblical story, as the author freely handles the biblical material, ignoring the literary intention or flow of the biblical accounts. Cheon argues that this interpretation was intended to provide hope and consolation for the

Alexandrian Jewish community soon after a severe persecution during the reign of Gaius Caligula (37-41 CE).

Disability Insurance and Public Policy Feb 05 2023

Without some form of outside assistance, physical disability is very likely to create economic hardship for victims of accident or illness. Existing programs that provide income to the disabled, including Workmen's Compensation, retirement pension programs, private insurance, public assistance, and compensation under tort law, have been severely criticized as either too generous or inadequate. However, there has been no strictly economic analysis of the system of disability compensation. This study attempts to fill that void, using economic theory to examine the functioning of the insurance market and the relationship between insurance and precautions against disability. A critical review of the arguments for government intervention in this market reveals that the case for mandatory insurance coverage is weak. Rea's analysis also provides a framework for designing an insurance benefit structure and offers insights into the relative merits of lump-sum and periodic benefits, the design of insurance benefits in an inflationary environment, and the taxation of disability benefits. The 'no-fault' approach is assessed using the example of automobile insurance and in light of many possible changes in the existing system, such as mandatory disability insurance, strict liability of drivers for accidents to passengers and pedestrians, and periodic rather than lump-sum benefits. This study will be of

interest to economists, lawyers, members of the insurance industry, and those concerned with public policy on disability.

The Burning of Los Angeles Jul 06 2020 Samuel Maio's first poetry collection, "The Burning of Los Angeles", demonstrates impeccable prosodic skills. Invoking Nathaniel West, "whose visionary/ Foresaw the slow, smokeless burning of decay", Maio casts his own sardonic observations within neatly controlled lines and diction reminiscent of early Pound and Eliot. The poet's stance of an ironic observer, however, creates distance from the characters in his vignettes by the narrator's implied feelings of superiority. We enter a social milieu where lovemaking becomes a calculated form of narcissism, self-adoration on the make - a beautiful young woman undresses as "a wax model/ Self-sculptured and deftly rouged". In "The Real Thing" (ironic title, here) the couple is "conscious. . .of looking for the cameras". Looking through the lustful eyes of an ageing former beach surfer, at the Filipina whose "V" of long black hair "Points to the cleft showing above her bikini", we appreciate the details, but fail to care about the man. More poignant in its effect is "The Jack London Nuthouse", where the observer longs to "envision once more. . .The first time driving over the long bridge /A resplendent beauty awaiting him /Instead of the world's open nuthouse". The final section of the book, and the most autobiographical, draws the reader in completely. "Dark Woman Well" is a poem to be read with pounding heart. This remarkable memory/dream enacts a

boy's ordeal of descent to hoist up a woman's corpse. This section, which comprises poems remembering the poet's father, and his unaffectedly skilled elegy for a writer friend, offers kinship to the reader as well.

Samuel Wiseman's Book of Record Jun 28 2022 In 1676, Nathaniel Bacon led a well-known colonial uprising against the authority of King Charles II, in the person of Virginia's governor Sir William Berkeley. Bacon and other colonists identified as their chief concern Berkeley's non-aggressive policies toward local Native Americans. Bacon's revolt dramatically altered relations between Chesapeake colonists and Native Americans, and also induced late Stuart imperialists to crack down on colonial autonomy. Despite the widely recognized significance of Bacon's Rebellion, the most important documents chronicling this event have been scattered in several archives and repositories, impeding students' access. Michael Leroy Oberg has transcribed, edited, and introduced the official

record left by Samuel Wiseman, King Charles II's scribe assigned to this uprising's investigation--making this history widely available for the first time in book form.

The Turn of the Cycle Sep 19 2021 The monograph produces a new interpretation of the opening chapter of 1 Samuel by combining several hermeneutical models, including the theory of chaotic (dynamically unstable) systems and the most recent, essentially post-modern, form criticism, to produce a new interpretation of the opening chapters of 1 Samuel. It argues that 1 Samuel 1-8 is an integral literary unit whose stance on such pivotal

issues as monarchy and cultic centralization poorly agrees with that of the balance of Deuteronomy - Kings. In the diachronic perspective, this unit can be construed as a post-Deuteronomistic redactional interpolation polemically directed against several planks of the Deuteronomic/Deuteronomistic agenda. In the synchronic perspective, the pattern of relationship between 1 Samuel 1-8 and the balance of Genesis - Kings calls for a non-linear, multi-dimensional reading of the corpus. Both interpretational trajectories lead to the conclusion that the thrust of the Former Prophets in its final form is controlled to a considerable extent by non-Deuteronomistic elements.

Educating the Disfranchised and Disinherited Apr 14 2021
Best remembered as the founder of Hampton Institute and mentor of Booker T. Washington, Samuel Chapman Armstrong played a crucial role in white philanthropy and educational strategies toward nonwhite people in late-nineteenth-century America. Until now, however, there has been no scholarly biography of Armstrong--his story has usually been subsumed within that of his famous protégé. In Educating the Disfranchised and Disinherited, Robert Francis Engs illuminates both Armstrong's life and an important chapter in the history of American race relations. Armstrong was the son of missionaries to Hawaii, and as Engs makes clear, his early experiences in a multiracial, predominantly non-European society did much to determine his life's work--the uplift of "backward

peoples." After attending Williams College, Armstrong commanded black troops in the Civil War and served as a Freedmen's Bureau agent before founding Hampton in 1869. At the institute, he implemented a unique combination of manual labor education and teacher training, creating an educational system that he believed would enable African Americans and other disfranchised peoples to rise gradually toward the level of white civilization. Recent studies have often blamed Armstrong for "miseducating" an entire generation of African Americans and for Washington's failings as a "race leader." Indeed, as Engs notes, Armstrong's educational designs were paternalistic in the extreme, and in addressing certain audiences, he could sometimes sound like a consummate racist. On the other hand, he frequently expressed a deep devotion to the ultimate equality of African Americans and incorporated the best of his black graduates into the Hampton staff. Sorting through the complexities and contradictions of Armstrong's character and vision, Engs's masterful biography provides new insights into the failures of emancipation and into the sometimes flawed responses of one heir to antebellum abolition and egalitarian Christianity. The Author: Robert Francis Engs is associate professor of history at the University of Pennsylvania and the author of *Freedom's First Generation: Black Hampton, Virginia, 1861-1890*.

The Logic of American Politics Dec 31 2019 For all their complexity, there is a logic and rationale embedded in American institutions and political processes. *The Logic of American Politics* is a refreshingly accessible and engaging book that explores this underlying logic and leads readers toward a more nuanced and sophisticated understanding of American government. *The Logic of American Politics* poses many provocative questions that encourage readers to think critically and actively about our system of government. For example, why do so many citizens fail to exercise their cherished right to vote? Or, why don't we do more to stop pollution from cars, since we all agree on what causes it and how harmful it is? *The Logic of American Politics* covers all the important topics from constitutional development to governmental institutions to political processes. The book is written as a narrative but is designed for easy reference. The text is supplemented by abundant illustrations throughout: tables, figures, maps, cartoons, and photos.

The Reasoning Voter Apr 02 2020 *The Reasoning Voter* is an insider's look at campaigns, candidates, media, and voters that convincingly argues that voters make informed logical choices. Samuel L. Popkin analyzes three primary campaigns—Carter in 1976; Bush and Reagan in 1980; and Hart, Mondale, and Jackson in 1984—to arrive at a new model of the way voters sort through

commercials and sound bites to choose a candidate. Drawing on insights from economics and cognitive psychology, he convincingly demonstrates that, as trivial as campaigns often appear, they provide voters with a surprising amount of information on a candidate's views and skills. For all their shortcomings, campaigns do matter. "Professor Popkin has brought V.O. Key's contention that voters are rational into the media age. This book is a useful rebuttal to the cynical view that politics is a wholly contrived business, in which unscrupulous operatives manipulate the emotions of distrustful but gullible citizens. The reality, he shows, is both more complex and more hopeful than that."—David S. Broder, The Washington Post

Entrepreneurship and Innovation in Automobile Insurance
May 08 2023 Entrepreneurs play a central role in economic growth and development, but how they do so is the subject of considerable debate. This book explains that process through an historical case study of an automobile insurance entrepreneur, Samuel P. Black, Jr., and Erie Insurance, the company he helped build. It also recounts the largely untold history of American automobile insurance. One of this study's central themes is the role of innovation in the entrepreneurial process. The rise of Erie Insurance from a four-person enterprise in Erie, Pennsylvania, in 1925 to the fourteenth largest property-casualty insurer today was the result, in part, of Black's relentless push to innovate. His continual efforts to cut costs, develop new products, satisfy customers, increase sales, and improve operations, all contributed greatly to the company's growth. A second theme is the automobile's dramatic impact on modern America. Its takeover of mass transportation provided the basis for the development of the automobile insurance industry and created many of the opportunities that Black and Erie Insurance capitalized on. These themes combine in the history of Black and Erie Insurance to illuminate the dynamic process by which the cultural, social, economic, and technological environment creates opportunities that entrepreneurs and entrepreneurial firms exploit, and how entrepreneurial actions stimulate economic growth.

The Use of Arthurian Legend in Hollywood Film Mar 14

2021 *This is the first book to examine the various uses of the Arthurian legend in Hollywood film, covering films from the 1920s to the present. The authors use five representational categories: intertextual collage (or cult film); melodrama, which focuses on the love triangle; conservative propaganda, pervasive during the Cold War; the Hollywood epic; and the postmodern quest, which commonly employs the grail portion of the legend. Arguing that filmmakers rely on the audience's rudimentary familiarity with the legend, the authors show that only certain features of the legend are activated at any particular time. This fascinating study shows us how the legend has been adapted and how through the popular medium of Hollywood films, the Arthurian legend has survived and flourished.*

Times Square Red, Times Square Blue Aug 07 2020 "If one street in America can claim to be the most infamous, it is surely Forty-second Street. Once known for its peep shows, street corner hustlers, and movie houses, Forty-second Street has been overwhelmed by the quest for safety - from safe sex and safe neighborhoods to safe cities and safe relationships. Now defined by corporate theme stores and large, neon-lit cafes, Forty-second Street has, in effect, become a family tourist attraction for visitors from Berlin, Tokyo, Westchester County, and the New Jersey suburbs." "Samuel R. Delany sees a disappearance, not only of the old Times Square, but of the complex social relationships that developed there; the points of contact between people of different classes and

paces in a public space. In Times Square Red, Times Square Blue, Delany tackles the question of why public restrooms, peep shows, and tree-filled parks are necessary to a city's physical and psychological landscape." "Times Square Red, Times Square Blue paints a portrait of a society dismantling the institutions that promote communication between classes and disguising its fears of cross-class contact as "family values"." --Book Jacket.

The Psalms Jan 30 2020 In this monumental work, his most ambitious undertaking, the late Samuel Terrien brings together a lifetime of scholarship on Psalms, long the wellspring of Jewish spirituality as well as the main hymnal of the Christian church. The book's insightful and clearly written introduction treats such subjects as the longevity and ecumenicity of the psalms, their Near Eastern background, the Hebrew text and ancient versions, their music, their strophic structure, their literary genre, their theology, and their relation to the New Testament. In the commentary itself Terrien freshly elucidates the theological significance of these collected poems by putting readers in touch with the formal versatility and religious passion of the psalmists themselves. While Terrien always engages in scientific exegesis before drawing theological conclusions, he is careful to allow full expression to the theological -- and, especially, the doxological -- voice of these unmatched spiritual songs. The result is a commentary that provides a link between the archaic language of Psalms and the

intellectual demands of modern thinking and spirituality. Throughout his exposition Terrien shows great respect for the scribal testimony of the Jewish tradition, especially the consonants of the Masoretic text. He likewise displays great care in finding the most accurate meaning for Hebrew words of obscure origin. This meticulous work renders a translation of Psalms more reliable than those of Terrien's predecessors. He also draws on many fruitful gains of structural analysis in discerning the strophic divisions within the Hebrew text. Often he finds unity of composition where earlier critics denied it. And for readers interested in specific aspects of translation and interpretation, Terrien has appended bibliographical lists of modern works on each psalm.

The Response to Industrialism, 1885-1914 Sep 07 2020 In this new edition, Samuel P. Hays expands the scope of his pioneering account of the ways in which Americans reacted to industrialism during its early years from 1885 to 1914. Hays now deepens his coverage of cultural transformations in a study well known for its concise treatment of political and economic movements. Hays draws on the vast knowledge of America's urban and social history that has been developed over the last thirty-eight years to make the second edition an unusually well-rounded study. He enhances the original coverage of politics, labor, and business with new accounts of the growth of cities, the rise of modern values, cultural conflicts with Native Americans and foreign nations, and changing roles for women, African-Americans, education,

religion, medicine, law, and leisure. The result is a tightly woven portrait of America in transition that underscores the effects of impersonal market forces and greater personal freedom on individuals and chronicles such changes as the rise of social inequality, shifting power, in the legal system, the expansion of the federal government, and the formation of the Populist, Progressive, and Socialist parties.

No One at the Wheel Mar 02 2020 The country's leading transport expert describes how the driverless vehicle revolution will transform highways, cities, workplaces and laws not just here, but across the globe. Our time at the wheel is done. Driving will become illegal, as human drivers will be demonstrably more dangerous than cars that pilot themselves. Is this an impossible future, or a revolution just around the corner? Sam Schwartz, America's most celebrated transportation guru, describes in this book the revolution in self-driving cars. The ramifications will be dramatic, and the transition will be far from seamless. It will overturn the job market for the one in seven Americans who work in the trucking industry. It will cause us to grapple with new ethical dilemmas-if a car will hit a person or a building, endangering the lives of its passengers, who will decide what it does? It will further erode our privacy, since the vehicle can relay our location at any moment. And, like every other computer-controlled device, it can be vulnerable to hacking. Right now, every major car maker here and abroad is working on bringing autonomous vehicles to consumers. The fleets are getting

ready to roll and nothing will ever be the same, and this book shows us what the future has in store.
