Ecotheology - Sustainability and Religions of the World gives a very interesting overview of the frontiers of scientific research in this important multi- and transdisciplinary area. Its chapters use ecotheological approaches to discuss the multiple aspects of an environmental crisis from almost every segment of our planet. This book will be very useful for everyone - researchers, teachers, students, or others interested in the field - who would like to gain some insights into this aspect of our culture. The derivative practitioner's expert guide to IFRS 9 application Accounting for Derivatives explains the likely accounting implications of a proposed transaction on derivatives strategy, in alignment with the IFRS 9 standards. Written by a Big Four advisor, this book shares the author's insights from working with companies to minimise the earnings volatility impact of hedging with derivatives. This second edition includes new chapters on hedging inflation risk and stock options, with new cases on special hedging

situations including hedging components of commodity risk. This new edition also covers the accounting treatment of special derivatives situations, such as raising financing through commodity-linked loans, derivatives on own shares and convertible bonds. Cases are used extensively throughout the book, simulating a specific hedging strategy from its inception to maturity following a common pattern. Coverage includes instruments such as forwards, swaps, cross-currency swaps, and combinations of standard options, plus more complex derivatives like knock-in forwards, KIKO forwards, range accruals, and swaps in arrears. Under IFRS, derivatives that do not qualify for hedge accounting may significantly increase earnings volatility. Compliant application of hedge accounting requires expertise across both the standards and markets, with an appropriate balance between derivatives expertise and accounting knowledge. This book helps bridge the divide, providing comprehensive IFRS

coverage from a practical perspective. Become familiar with the most common hedging instruments from an IFRS 9 perspective
Examine FX risk and hedging of dividends, earnings, and net assets of foreign subsidiaries
Learn new standards surrounding the hedge of commodities, equity, inflation, and foreign and domestic liabilities
Challenge the qualification for hedge accounting as the ultimate objective
IFRS 9 is set to replace IAS 39, and many practitioners will need to adjust their accounting policies and hedging strategies to conform to the new standard. *Accounting for Derivatives* is the only book to cover IFRS 9 specifically for the derivatives practitioner, with expert guidance and practical advice. Curriculum can be defined in a variety of ways. It might be viewed as a body of knowledge, a product, or a process. Curricula can differ as they are conceptualized from various theoretical perspectives to address the needs of teachers, students, and the context of schooling. One reason to study curriculum is

“to reveal the expectations, processes and outcomes of students’ school learning experiences that are situated in different cultural and system contexts. ... further studies of curriculum practices and changes are much needed to help ensure the success of educational reforms in the different cultural and system contexts” (Kulm & Li, 2009, p. 709). This volume highlights international perspectives on curriculum and aims to broaden the wider mathematics education community’s understandings of mathematics curriculum through viewing a variety of ways that curricula are developed, understood, and implemented in different jurisdictions/countries. Within this volume, we define curriculum broadly as the set of mathematics standards or outcomes, the messages inherent in mathematics curriculum documents and resources, how these standards are understood by a variety of stakeholders, and how they are enacted in classrooms. The focus is on the written, implied, and enacted curriculum

in various educational settings throughout the world. Study & Master Agricultural Sciences Grade 12 has been especially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and, to a much lesser extent, Afrikaans, but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools, which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students, not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative

solutions designed by South African educators to a wider international audience. Start your physical therapy career path on the right foot with *Introduction to Physical Therapy, 5th Edition*. Updated photos throughout depict the content that is current and applicable to today's practicing PT or PTA. Plant improvement has shifted its focus from yield, quality and disease resistance to factors that will enhance commercial export, such as early maturity, shelf life and better processing quality. Conventional plant breeding methods aiming at the improvement of a self-pollinating crop, such as wheat, usually take 10-12 years to develop and release of the new variety. During the past 10 years, significant advances have been made and accelerated methods have been developed for precision breeding and early release of crop varieties. This edited volume summarizes concepts dealing with germplasm enhancement and development of improved varieties based on innovative methodologies that include doubled haploidy, marker assisted selection, marker

assisted background selection, genetic mapping, genomic selection, high-throughput genotyping, high-throughput phenotyping, mutation breeding, reverse breeding, transgenic breeding, shuttle breeding, speed breeding, low cost high-throughput field phenotyping, etc. It is an important reference with special focus on accelerated development of improved crop varieties. In this remarkable book, costumer and researcher Marianne Burke presents a richly illustrated study of headwear in the twenty-year period between 1855-1875. Her detailed discussion of

the development of hair and headwear styles throughout this era is accompanied by period photographs known as cartes de visite, as well as numerous illustrations from fashion periodicals of the time such as Godey's Lady's Book, Harper's Bazar and Peterson's Magazine. It was during these years that the luxurious French lady dolls, so ardently collected today, assumed their great popularity. Collectors of these dolls have long been frustrated by the lack of accessible instructions and patterns for headwear for their elegant models. This is the first book to teach methods of constructing historically correct hats, caps and bonnets for French fashion dolls of the mid-to-late nineteenth century. The methods of assembly taught pertain to styles for dolls of more contemporary periods, as well. Ms. Burke offers instruction in the practical matters of millinery construction; chapters on tools, materials, making bonnet frames and working with straw and felt provide step-by step directions and

culminate in the presentation of twelve fully illustrated patterns for making hats, caps and bonnets for lady dolls. Doll costumers, restorers and collectors will find this invaluable compendium an essential resource, while lovers of fashion history will revel in its visual delights. This Technical Note discusses the findings and recommendations made in the Financial Sector Assessment Program for the Russian Federation in the area of macroprudential policy. Financial stability oversight responsibilities are currently shared between the Central Bank of Russia (CBR) and the high-level interagency National Council on Ensuring Financial Stability. In recent years, the CBR has used a number of macroprudential tools to deal with risks, mainly those stemming from retail lending. The CBR has tightened provisioning requirements and increased capital risk weights to curb excessive growth of unsecured consumer lending, which has helped banks better handle credit risk that

materialized. However, the CBR law should be amended to provide for a more comprehensive set of macroprudential tools. This paper discusses recent trends, constraints, and opportunities for the future of Tunisia's economy. Tunisia enjoyed solid GDP growth rates in the run-up to the revolution of 2011, driven by the manufacturing and service sectors. A stable macroeconomic environment and a gradual liberalization of trade and investment facilitated growth. Labor has been gradually overshadowed by capital accumulation as the main growth driver, while productivity has been lagging. The existing gap in factors of production can be filled by appropriate financial and banking policies to increase access to finance and boost physical capital accumulation, a sound business environment to attract investors and boost long-term productivity, and a reduction in macroeconomic risks. The revival of major world power rivalry is a striking feature of the current international affairs. In the year

gone by, Europe, supported by the US, vied with Russia for influence in Ukraine—a race that led to the annexation of Crimea by Russia and a pro-Russian insurgency in that region. In Asia, while the US is gradually drawing down in Afghanistan, it is also seeking to counter the growing influence of China. The sole Super Power is garnering support from China's neighbours, India included, to balance the resurgent Dragon. Meanwhile, the rapid growth of ISIS has disturbed the world peace. The progress made in the negotiations on Iran's nuclear programme is likely to affect calculations and equations all over the world. No region is impervious to the happenings in another part of the world. Competition (read rivalries) and geopolitical shifts pose myriad challenges to the peace-loving nations of the world—quite often, they are faced with the difficulty of evading armed conflicts. It requires conscious and sustained effort to do so. In order to work towards such goals, it is necessary to

look at geopolitical, security and military-related issues objectively. The Centre for Air Power Studies has been publishing the Asian Defence Review to fulfill this need. This volume, a resource base for both the professional and the general readers, is the eighth in the series under this title. It aims to add to the pool of information and knowledge in the current strategic discourse dealing with military strategy, defence, politics and trends in military capabilities that impact Asia. In particular, it covers some of the important issues related to Air Power, Tactical Nuclear Weapons, Cyber Security, Network-Centric Warfare, Environmental Degradation, Iran, Pakistan and China. Contains the reports of state departments and officials for the preceding fiscal biennium. SBI & IBPS Bank PO SOLVED PAPERS consists of past solved papers of SBI, IBPS and other Nationalised Bank Exams from 2010 to 2016. In all there are 32 Question papers from 2010 to 2016 which have been provided year-wise along

with detailed solutions. Practicing these questions, aspirants will come to know about the pattern and toughness of the questions asked in the examination. In the end, this book will make the aspirants competent enough to crack the uncertainty of success in the Entrance Examination. The strength of the book lies in the originality of its question papers and Errorless Solutions. The solution of each and every question is provided in detail (step-by-step) so as to provide 100% concept clarity to the students. "In The Sports Strategist: Developing Leaders for a High-Performance Industry, authors Irving Rein, Ben Shields, and Adam Grossman demonstrate that relying too much on winning is a losing long-term strategy for dealing with these challenges. Instead, they argue that sports organizations must focus on identifying and maximizing key factors that, unlike winning, can be controlled and shaped. By building a more well-rounded business, sports strategists will position themselves and their organizations for

sustainable success in the industry." -- Inside Cover In the desert sands of southern Jordan lies a once-hidden conflict landscape along the Hejaz Railway. Built at the beginning of the twentieth-century, this narrow-gauge 1,320 km track stretched from Damascus to Medina and served to facilitate participation in the annual Muslim Hajj to Mecca. The discovery and archaeological investigation of an unknown landscape of insurgency and counter-insurgency along this route tells a different story of the origins of modern guerrilla warfare, the exploits of T. E. Lawrence, Emir Feisal, and Bedouin warriors, and the dramatic events of the Arab Revolt of 1916-18. Ten years of research in this prehistoric terrain has revealed sites lost for almost 100 years: vast campsites occupied by railway builders; Ottoman Turkish machine-gun redoubts; Rolls Royce Armoured Car raiding camps; an ephemeral Royal Air Force desert aerodrome; as well as the actual site of the Hallat Ammar railway ambush. This unique and

richly illustrated account from Nicholas Saunders tells, in intimate detail, the story of a seminal episode of the First World War and the reshaping of the Middle East that followed. The Bible prophesies the Queen of the South will rise at the judgment, but did not give her name or any other detail about her. The Queen of the South in Matthew 12:42, authored by Soleilmavis Liu, is a strong and well-reasoned piece that demonstrates who the Queen of the South is, by using plenty of historical facts. It lets readers understand where the Ends of the Earth are, how the Queen of the South will come from the Ends of the Earth and what the judgment is. Ultimately, readers will come to know God's great plan regarding the Queen of the South. Soleilmavis hopes that her presentation sheds new light on this important person, who will play a decisive role in the history. This book is a step in that direction. *European Glacial Landscapes: Maximum Extent of Glaciations* brings together relevant experts

on the history of glaciers and their impact on the landscape of the main regions of Europe. In some regions the largest recorded glaciations occurred before the Last Glacial Cycle, in one of the major glacial cycles of the Middle Pleistocene. However, the best-preserved evidence of glaciation in the landscape is from the Last Glacial Cycle (Late Pleistocene). The book also analyses these older glacial landforms that can sometimes still be seen in the landscape today. This analysis provides a better understanding of the succession of Pleistocene glaciations and the intervening interglacial periods, examining their possible continental synchrony or asynchrony of past glacier behaviour. The result of this analysis gives important new insights and information on the origin and effects of climatic and geomorphological variability across Europe. *European Glacial Landscapes: Maximum Extent of Glaciations* examines the landscapes produced by glaciers throughout Europe, the

geomorphological effects of glaciations, as well as the chronology and evolution of the past glaciers, with the aim of understanding the interrelationship between glacial expansion and climate changes on this continent. This book is a valuable tool for geographers, geologist, environmental scientists, researchers in physics and earth sciences. Provides a synthesis that highlights the main similarities or differences, through both space and time, during the

maximum recorded expansions of Pleistocene glaciers in Europe Features research from experts in glacial geomorphology, palaeo-glaciology, palaeo-climatology and palaeo-oceanography on glacial expansion in Europe Includes detailed color figures and maps, providing a comprehensive comparison of the glacial landscapes of European Pleistocene glaciers
