Revised and updated edition that analyses how the Office of National Drug Control Policy employs statistics to misleadingly claim the War on Drugs is a success. First published in 2007, Lies, Damned Lies, and Drug War Statistics critically analyzed claims made by the Office of National Drug Control Policy (ONDCP), the White House agency of accountability in the nation's drug war since 1989, as found in the six editions of the annual National Drug Control Strategy between 2000 and 2005. In this revised and updated second edition of their critically acclaimed work, Matthew B. Robinson and Renee G. Scherlen examine seven more recent editions (2006-2012) to once again

determine if ONDCP accurately and honestly presents information or intentionally distorts evidence to justify continuing the drug war. They uncover the many ways in which ONDCP manipulates statistics and visually presents that information to the public. Their analysis demonstrates a drug war that consistently fails to reduce drug use, drug fatalities, or illnesses associated with drug use; fails to provide treatment for drug-dependent users; and drives up the prices of drugs. They conclude with policy recommendations for reforming ONDCP's use of statistics, as well as how the nation fights the war on drugs. At Appalachian State University, Matthew B. Robinson is Professor of Criminal Justice and Criminology. Robinson is the author of several books, including *Media Coverage of Crime and Criminal Justice*. Renee G. Scherlen, is Professor of Political Science at Appalachian State University. This book encourages more professors of education, sociology, psychology, and related fields to prepare the next generation of education professionals to understand and implement programs and practices of family and community involvement to increase student success in school.

The Benchbook for Family Courts on Substance Use Disorders, Second Edition, is an important reference work that provides every family court professional with valuable information to guide decision-making in family law cases. Substance use disorders (SUDs) are some of

the most critical and pervasive public health problems of our time. A traditional family law decision-making process issues a judgment on legal issues, but often courts do not account for the nonlegal issue of addiction, which may be a root cause of a family's legal problems. Judges, attorneys, court staff, and other professionals working with families may not have a complete and current understanding of SUDs, their causes, the symptoms and available treatments. Without that understanding, both the families and the court system are destined to a revolving door of repeat court appearances and unresolved family crises. The Benchbook is an essential reading and reference book that provides valuable insights into the science of addiction, the treatment of SUDs, how SUDs affect children and families in many family law cases, and how family courts can intervene in ways that lead to better outcomes. The good news is that with a recognized neurobiological basis for substance use disorders, there is potential for recovery. Evidence-based interventions can prevent harmful substance use and related problems, and the courts have considerable power to influence individuals suffering from these disorders. The collections of the Advocates Library, with the exception of its legal books and manuscripts, were given by the Advocates to the National Library of Scotland in 1925. In Florida, private-pay costs at nursing facilities can exceed \$6,000 per month. Many families

cannot afford to pay such excessive amounts, which can total more than \$70,000 per year. The Florida Medicaid program can offer a solution to the high cost of nursing home and assisted living care. But Medicaid has such strict asset-and-income limitations that most people believe it can be used by only the very poor. Fortunately, the U.S. Congress and Florida law provide opportunities to help families receive financial assistance through Medicaid and protect hard-earned assets. With proper planning, even those whose assets and income greatly exceed the limits for Medicaid can qualify for benefits.
