Yale Law Journal: Volume 123, Number 2 - November 2013 UK Chart Yearbook 2013 Congressional Record Surveillance in Europe Building the Impact Economy Normative Change and Security Community Disintegration Club and Prescription Drug Abuse International Journal of Innovation, Creativity and CHange, Volume 1, Issue 2, November 2013 Zoonoses - Infections Affecting Humans and Animals International Public Procurement Tales of an Ecotourist Minimally Invasive Foregut Surgery for Malignancy xREF: System x Reference Interplanetary Mission Analysis and Design Edible Wild Plants: An alternative approach to food security International Handbook of Early Childhood Education Contemporary Quality TV Bullying Proceedings of the 1st AAGBS International Conference on Business Management 2014 (AiCoBM 2014) Un Anno di Luce Importing EU Norms Handbook of Ocean Container Transport Logistics Jimmie Lee & James The Kidnapping of Journalists Language Choice in Postcolonial Law Managing Water Resources under Climate Uncertainty The Little Penguin Handbook The Well-Founded Rubyist Handbook of Anticancer Drugs from Marine Origin A Guide to Integrative Pediatrics for the Healthcare Professional The Emergence of Israeli-Greek Cooperation World Class to World Best 2013 Data and Goliath: The Hidden Battles to Collect Your Data and Control Your World Women in Literature Contraception for the Medically Challenging Patient DK Eyewitness Travel Guide: Bali and Lombok Cyberspace Security: A Primer How the Light Bulb Changed History Information Literacy: Moving Toward Sustainability A Mexican State of Mind

This book develops a theoretical and empirical argument about the disintegration of security communities, and the subsequent breakdown of stable peace among nations, through a process of norm degeneration. It draws together two key bodies of contemporary IR literature - norms and security communities - and brings their combined insights to bear on the empirical phenomenon of disintegration. The investigation of normative change in IR is becoming increasingly popular. Most studies, however, focus on its progressive connotation. The possibility of a weakening or even disappearance of an established peaceful normative order, by contrast, tends to be often either neglected or implicitly assumed. Normative Change and Security Community Disintegration: Undoing Peace advances the contemporary body of research on the important role of norms and ideas by analytically extending recent Constructivist arguments about international norm degeneration to the regional level and by applying them to a particular type of regional order - a security community. Cyberspace has become a playground for everyone. Financial institutions, online shopping, e-commerce, e-governance, communication networks and almost all agencies - civil, military and private make continuous use of cyberspace. At the same time spying by certain agencies on daily life of all seems to resurface the fears of George Orwellian's 1984 classic. While the internet is an essential means for most to conduct their daily lives, the Deep Web, nearly 395 times the size of internet permits untraceable activities to normal and evil doers with similar ease. The ease and efficiency provided by the cyberspace, alas comes with the risk of cyber criminals threatening its very benefits. It has already provided undreamt reach to terrorists to launch their attacks worldwide. Even Nation States have not shied away from extensive use of cyberspace for unethical purposes. Attribution - an essential precondition to initiate retaliatory measures is extremely difficult in cyberspace. It is like the Wild West with no Sherriff to enforce law and order. How does then One ensure safety in cyber space operations? This Primer is the basic step towards cyberspace security. It offers suggestions at all the levels of cyberspace in simple language minus the jargon. The present impetus to drive down the overall cost of space missions is leading to ever-increasing demands for more efficient design techniques over a wide range of interplanetary missions, and the methods now being utilised to do this

are described in this timely and authoritative work. *The International Journal of Innovation, Creativity and Change* publishes scholarly work that promotes and fosters innovation, creativity and change in all fields of endeavour. The focus is on papers that will be influential in their field or across fields and will significantly advance understanding in those fields. All submission are peer reviewed. In the early months of 1965, the killings of two civil rights activists inspired the Selma-to-Montgomery marches, which became the driving force behind the passage of the Voting Rights Act. This is their story. "Bloody Sunday"—March 7, 1965—was a pivotal moment in the civil rights struggle. The national outrage generated by scenes of Alabama state troopers attacking peaceful demonstrators fueled the drive toward the passage of the Voting Rights Acts later that year. But why were hundreds of activists marching from Selma to Montgomery that afternoon? Days earlier, during the crackdown on another protest in nearby Marion, a state trooper, claiming self-defense, shot Jimmie Lee Jackson, a 26-year-old unarmed deacon and civil rights protester. Jackson's subsequent death spurred local civil rights leaders to make the march to Montgomery; when that day also ended in violence, the call went out to activists across the nation to join in the next attempt. One of the many who came down was a minister from Boston named James Reeb. Shortly after his arrival, he was attacked in the street by racist vigilantes, eventually dying of his injuries. Lyndon Johnson evoked Reeb's memory when he brought his voting rights legislation to Congress, and the national outcry over the brutal killings ensured its passage. Most histories of the civil rights movement note these two deaths briefly, before moving on to the more famous moments. *Jimmie Lee and James* is the first book to give readers a deeper understanding of the events that galvanized an already-strong civil rights movement to one of its greatest successes, along with the herculean efforts to bring the killers of these two men to justice—a quest that would last more than four decades. Using a comparative framework, this volume presents case studies of issues of public procurement and discusses how procurement professionals and policy makers in different regions are responding to these challenges. This book discusses current issues in public procurement. Over the past few decades, public procurement has had to evolve conceptually and organizationally in the face of unrelenting budget constraints, government downsizing, public demand for increased transparency in public procurement, as well as greater concerns about efficiency, fairness and equity. Procurement professionals have also had to deal with a changeable climate produced by emerging technology, environmental concerns, and ongoing tension between complex regional trade agreements and national socioeconomic goals. The first section discusses innovation and reforms in public procurement and how practitioners are adapting to and making use of new technologies. The second section addresses the challenges of maintaining transparency, equity, and fairness in public procurement. The final section discusses preferential public procurement and introduces strategies for building sustainable public procurement systems. By combining theory and analysis with evidence from the real world, this book is of equal use to academics, policy makers, and procurement professionals. This book offers a detailed account of the recent Israeli-Greek rapprochement. For more than six decades, relations between Greece and Israel were characterized by suspicion, mutual recriminations and hostility. However, in 2009, Greek policy was unexpectedly overturned. This volume examines this new relationship in detail and explores its theoretical and regional consequences. The Introduction provides a general framework of Greek foreign policy within which the rapprochement with Israel was pursued. Chapter I presents the book's theoretical framework, focusing on balance of power theory and emphasizing the arguments of Morgenthau, Waltz, and Mearsheimer. Chapter II delineates the fraught relations between the Greeks and the Jews, despite their cultural and historical commonalities, and analyzes the reasoning behind decades of antagonistic foreign policy. Chapter III describes how the rise of Turkey during Greece's economic crisis and the gradual deterioration of the strategic partnership between Israel and Turkey combined to create a climate open to Israeli-Greek cooperation. Chapter IV examines the beginning of the rapprochement between

Israel and Greece, highlighting Netanyahu's historic 2010 visit to Greece. Chapter V explores the intensification of Israeli-Greek cooperation. Chapter VI discusses energy cooperation in the Eastern Mediterranean, another key factor in the deterioration of Israeli-Turkish relations and the strengthening of ties between Greece and Israel. The book concludes with a return to theory, reiterating the Realist approach and using that framework to hypothesize about the future of the relationship between the two nations. This book is appropriate for graduate students and academics studying international relations and foreign policy in the Eastern Mediterranean, as well as policymakers, activists and journalists who want to have a clearer understanding of the Israeli-Greek rapprochement and other developments in the region. This title examines how inhalants and club, prescription, and over-the-counter (OTC) drugs affect individuals and society, investigates how people are working to put an end to drug abuse, and analyzes the controversies and conflicting viewpoints surrounding the issue. Features include a glossary, selected bibliography, websites, source notes, and an index, plus a timeline and essential facts. Aligned to Common Core standards and correlated to state standards. Essential Library is an imprint of Abdo Publishing, a division of ABDO. DK Eyewitness Bali & Lombok travel guide will lead you straight to the best attractions these beautiful islands have on offer. Packed with photographs, illustrations and clear maps the guide explores these Indonesian islands in detail; from the noisy, colorful and glamorous bustle of Bali to the quiet and tranquil retreats of Lombok. The guide provides all the insider tips every visitor needs including the best beaches, volcanoes diving and snorkelling destinations and comprehensive listings of the best places to stay in Bali and Lombok from hotels and spa resorts to local homestays. Discover the best restaurants, bars and nightlife in Bali and Lombok for all budgets and unearth where the locals go with tips on everything from where to enjoy the best suckling pig and local beer to how to experience the most memorable culture, customs, crafts, beaches and ceremonies. You'll find 3D cutaways and floorplans of all the major sites from holy temples to Buddhist shrines plus features on surfing in Bali and Lombok, rice cultivation, landscape, wildlife and shopping with sights, beaches, resorts and festivals are listed town by town. Don't miss a thing on your holiday with DK Eyewitness Bali & Lombok This book discusses multilingual postcolonial common law, focusing on Malaysia's efforts to shift the language of law from English to Malay, and weighing the pros and cons of planned language shift as a solution to language-based disadvantage before the law in jurisdictions where the majority of citizens lack proficiency in the traditional legal medium. Through analysis of legislation and policy documents, interviews with lawyers, law students and law lecturers, and observations of court proceedings and law lectures, the book reflects on what is entailed in changing the language of the law. It reviews the implications of societal bilingualism for postcolonial justice systems, and raises an important question for language planners to consider: if the language of the law is changed, what else about the law changes? This book develops a comprehensive framework for creating sustainable new business approaches on a massive scale. It relates the power of entrepreneurship, investment and technology to four areas in which progress is urgently needed to get out of the world's current impasse. These are: game-changing innovations in companies; a way forward for the global fashion industry that reconciles competitiveness and worker dignity; turning around the energy crisis; and restoring capital markets to being the funders of human progress and prosperity that they once were—the pieces of the puzzle that is our future. Numerous case studies and actionable guidelines show how to concretely get the job done. Ever since HBO's slogan "It's Not TV, It's HBO" launched in 1996, so-called quality television has reached a new level of marketing, recognition, and indeed quality. With other networks imitating the formula, the "HBO effect" triggered a wave of creative output. This turn to quality set off two shifts: (a) Contemporary television staged an international resurgence of the auteur, and (b) America transformed into an "on-demand nation." The chapters in this volume analyze new television lifestyles including marginalized perspectives, fan participation, and an emerging nostalgia correlated with trash aesthetics. A Mexican State of Mind:

New York City and the New Borderlands of Culture explores the cultural and creative lives of the largely young undocumented Mexican population in New York City since September 11, 2001. Inspired by a dialogue between the landmark works of Paul Gilroy and Gloria Anzaldúa, it develops a new analytic framework, the Atlantic Borderlands, which bridges Mexican diasporic experiences in New York City and the black diaspora, not as a comparison but in recognition that colonialism, interracial and interethnic contact through trade, migration, and slavery are connected via capitalist economies and technological developments. This book is based on ten years of fieldwork in New York City, with members of a vibrant community of young Mexican migrants who coexist and interact with people from all over the world. It focuses on youth culture including hip hop, graffiti, muralism, labor activism, arts entrepreneurship and collective making. This book is focused on the impact of ocean transport logistics on global supply chains. It is the first book solely dedicated to the topic, linking the interaction of parties along this chain, including shippers, terminal operators and line carriers. While ocean container transport logistics has been greatly studied, there are many important issues that have yet to receive the attention they deserve. The editors and contributing authors of Ocean Container Transport Logistics: Making Global Supply Chain Effective seek to address these topics and shed new light on the subject. The book is divided into three parts. Part I examines the innovation, trends, competition and business model of container terminal operations. In Part II, the book looks at how tactical and operational management is used in shipping liners. The chapters cover topics such as empty container repositioning, slow steaming, routing, network design and disruption management. Finally Part III explores at shippers and global supply chain management, with chapters on transportation service procurement, hinterland transportation, green corridors, as well as competition and co-operation in maritime logistics operations. The eighteen chapters of the book all highlight the immediate effect of ocean transport logistics on global supply chain. Women with chronic medical problems are at higher risk for complications during pregnancy and therefore, they are especially in need of appropriate preconception and contraception care. Furthermore, many women with chronic medical problems do not obtain adequate preconception and contraception care. Despite published guidelines by the Centers for Disease Control and Prevention, there is a substantial gap in medical practice regarding the use of contraception in women with co-existing medical problems. Contraception for the Medically Challenging Patient fills the gap that currently exists in the knowledge of correct contraceptive prescribing practice and shows that inappropriate contraindications can easily become a barrier to effective contraception use among women. Chapters highlight obsolete views about appropriate candidates for contraception and address the complex contraceptive needs of today's medically challenging patients with HIV/AIDS, uterine fibroids or cardiac, neurologic or thyroid disease. The book gives attention to recommendations on the use of contraception in women with medical problems such as diabetes, obesity, epilepsy, and lupus, among others and provides comprehensive information regarding the effects that certain drugs may have on contraceptive hormone levels. While national guidelines do exist for contraceptive eligibility, this book discusses in more detail the evidence behind the guideline recommendations and the nuances that clinicians confront in daily practice. The vulnerability of journalists to kidnappings was starkly illustrated by the killing of James Foley and Steven Sotloff by Islamic militants in 2014. Their murder underscored the risks taken by journalists and news organisations trying to cover developments in dangerous regions of the world and has forced news enterprises to more clearly prepare for and confront issues of safety. This book explores the complex organisational issues surrounding the capture or kidnapping of journalists in areas of conflict and risk. It explores how journalists 'becoming news' is covered and the implications of that coverage, how news organisations prepare for and respond to such events, and how kidnapping and ransom insurers, victim recovery firms, journalists' families, and governments influence the actions of news enterprises. It considers how and why journalists are kidnapped, how employers and journalists' organisations respond to

kidnappings and why freelancers are particularly at risk as well as suggesting best practices for preventing and responding to kidnappings. This international handbook gives a comprehensive overview of findings from longstanding and contemporary research, theory, and practices in early childhood education in the Northern and Southern hemispheres. The first volume of the handbook addresses theory, methodology, and the research activities and research needs of particular regions. The second volume examines in detail innovations and longstanding programs, curriculum and assessment, and conceptions and research into child, family and communities. The two volumes of this handbook address the current theory, methodologies and research needs of specific countries and provide insight into existing global similarities in early childhood practices. By paying special attention to what is happening in the larger world contexts, the volumes provide a representative overview of early childhood education practices and research, and redress the current North-South imbalance of published work on the subject. The proceedings of the 1st AAGBS International Conference on Business Management 2014 (AiCoBM 2014), held in Penang, Malaysia, gathers 57 refereed papers. They cover areas relating to various aspects of business management and reflect the conference's three main themes (management and marketing, economics and finance, and entrepreneurship) and present original papers contributed by researchers, scholars, professionals and postgraduate students. They address a range of disciplines that encompass each of the main themes. Using basic and applied research findings together with case studies they provide valuable information on current research trends in business management, international business, marketing, economics, finance, Islamic finance and economics, and entrepreneurship. This text focuses on underutilized wild plants that can help to reduce food deficiency in developing nations. Edible wild plants are viewed as a potential solution for overcoming food insecurity for families in these regions, with a specific focus on sustainable production and conservation measures. Detailed analysis of specific wild plants is provided, including the nutritional contents of each plant. A full list of edible wild plants is included for the benefit of researchers, plus a pictorial guide for easy identification of these plants. Specific case studies are provided in which edible wild plants are used to reduce food insecurity, and the diversity of edible wild plants is studied from a global perspective. In developing countries, a significant obstacle to human survival is the increasing gap between food availability and the growing human population. Food insecurity results in less consumption of fruits and vegetables and leads to mineral and vitamin deficiency for individuals in these regions. Edible Wild plants: An alternative approach to food security focuses on growing and using wild plants in order to reduce food insecurity and malnutrition. Wild edible plants are inexpensive and are a rich source of antioxidants, vitamins, fiber, and minerals. As the first book to specifically focus on edible wild plants and their vital role in food security and nutrition, this text is incredibly valuable to any researcher studying innovative potential solutions to food deficiency in the developing world. The Little Penguin Handbook: Australasian edition 3e is a handy full-colour reference guide that gives students just what they need to know about the writing and research processes, while providing coverage of documentation and grammar. It offers student-friendly features and includes coverage of the most current Harvard, APA, MLA and CMS citation, documentation and style guidelines. Associate Lecturer and Professional Writing Consultant Angela Shetler, from University of Sydney, has reviewed and further adapted the book specifically for the Australasian context. Angela's expertise has ensured the handbook reflects the needs of Australasian students. This book aims to come up with views to address the queries of planners, policymakers, and general people for water resources management under uncertainty of climate change, including examples from Asia and Europe with successful adaptive measures to change the challenge of climate change into opportunities. The availability of clean water is a major global challenge for the future due to a rapidly growing population and urbanization where further stress in water resources is expected due to the impact of climate change. The wide range of impacts includes for example changes in hydrology, moisture availability, spatial and

temporal variations in magnitude of stream flow, and dwindling of water levels with adverse effect on wetlands and ecosystem. As a consequence, water management has become a serious issue and was identified as a global societal challenge, and climate change forecasting has become one of the key issues in recent research on sustainable water resources management. Combining humor and memorable anecdotes, five famous ecotourist destinations offer a breathtaking backdrop to better understanding climate change. Crossing the far corners of the globe, Tales of an Ecotourist showcases travel, from the hot and humid Amazon jungle to the frozen but dry Antarctic, as a simple yet spellbinding lens to better understand the complex issue of climate change. At its core, climate change is an issue few truly understand, in large part due to its dizzying array of scientific, economic, cultural, social, and political variables. Using both keen humor and memorable anecdotes, while weaving respected scientific studies along the way, Mike Gunter Jr. transports the reader to five famous ecodestinations, from the Galapagos Islands to the Great Barrier Reef, revealing firsthand the increasing threats of climate change. Part travelogue, part current events exposé, with a healthy dose of history, ecology, and politics, these tales of ecoadventure tackle such obstacles head on while fleshing out much-needed personal context to perhaps society's greatest threat of all. Gunter takes us to the far corners of the globe to understand the lived experience of climate change. More than a travelogue, Tales of an Ecotourist explains how getting outside our houses, immediate surroundings, and comfort zones can awaken all of us to the realities and urgency of a warming world. This is a rich, beautifully written, and compelling book.

Paul Wapner, author of Living Through the End of Nature: The Future of American Environmentalism In Tales of an Ecotourist Mike Gunter Jr. takes you on a remarkable journey, both figuratively and literally, as he recounts his experiences visiting some of the most amazing places on our planet. As a genuine, true-to-principles ecotourist, he has an important lesson for us: If we are to veer from our current path of global environmental degradation, we will have to come to appreciate firsthand its remarkable wonder and beauty.

Michael E. Mann, coauthor of The Madhouse Effect: How Climate Change Denial Is Threatening Our Planet, Destroying Our Politics, and Driving Us Crazy This title examines how traditional bullying and cyberbullying affect individuals and society, investigates how people are working to put an end to all bullying, and analyzes the controversies and conflicting viewpoints surrounding the issue. Features include a glossary, selected bibliography, websites, source notes, and an index, plus a timeline and essential facts. Aligned to Common Core standards and correlated to state standards. Essential Library is an imprint of Abdo Publishing, a division of ABDO. Lenovo System x® and BladeCenter® servers and Lenovo Flex System™ compute nodes help to deliver a dynamic infrastructure that provides leadership quality and service that you can trust. This document (simply known as xREF) is a quick reference guide to the specifications of the currently available models of each System x and BladeCenter server. Each page can be used in a stand-alone format and provides a dense and comprehensive summary of the features of that particular server model. Links to the related Product Guide are also provided for more information. An easy-to-remember link you can use to share this guide: <http://lenovopress.com/xref> Also available is xREF for Products Withdrawn Prior to 2012, a document that contains xREF sheets of System x, BladeCenter, and xSeries servers, and IntelliStation workstations that were withdrawn from marketing prior to 2012. Changes in the May 18 update: Added the Flex System Carrier-Grade Chassis See the Summary of changes in the document for a complete change history. Summary The Well-Grounded Rubyist, Third Edition is a beautifully written tutorial that begins with your first Ruby program and takes you all the way to sophisticated topics like reflection, threading, and recursion. Ruby masters David A. Black and Joe Leo distill their years of knowledge for you, concentrating on the language and its uses so you can use Ruby in any way you choose. Updated for Ruby 2.5. Purchase of the print book includes a free eBook in PDF, Kindle, and ePub formats from Manning Publications. About the Technology Designed for developer productivity, Ruby is an easy-to-learn dynamic language perfect for creating virtually any kind of software.

Its famously friendly development community, countless libraries, and amazing tools, like the Rails framework, have established it as the language of choice for high-profile companies, including GitHub, SlideShare, and Shopify. The future is bright for the well-grounded Rubyist! About the Book In The Well-Grounded Rubyist, Third Edition, expert authors David A. Black and Joseph Leo deliver Ruby mastery in an easy-to-read, casual style. You'll lock in core principles as you write your first Ruby programs. Then, you'll progressively build up to topics like reflection, threading, and recursion, cementing your knowledge with high-value exercises to practice your skills along the way. What's Inside Basic Ruby syntax Running Ruby extensions FP concepts like currying, side-effect-free code, and recursion Ruby 2.5 updates About the Reader For readers with beginner-level programming skills. About the Authors David A. Black is an internationally known Ruby developer and author, and a cofounder of Ruby Central. Ruby teacher and advocate Joseph Leo III is the founder of Def Method and lead organizer of the Gotham Ruby Conference. Table of Contents PART 1 RUBY FOUNDATIONS Bootstrapping your Ruby literacy Objects, methods, and local variables Organizing objects with classes Modules and program organization The default object (self), scope, and visibility Control-flow techniques PART 2 BUILT-IN CLASSES AND MODULES Built-in essentials Strings, symbols, and other scalar objects Collection and container objects Collections central: Enumerable and Enumerator Regular expressions and regexp-based string operations File and I/O operations PART 3 RUBY DYNAMICS Object individuation Callable and runnable objects Callbacks, hooks, and runtime introspection Ruby and functional programming This book lists every record that reached the top 100 of the singles chart and the top 100 of the albums chart of the United Kingdom between 5 January 2013 and 28 December 2013. The charts are (c) The Official UK Charts Company Limited and taken from <http://www.officialcharts.com>. The chart dates are the Saturday of each week and the charts are published on Sunday, 6 days before How the Light Bulb Changed History examines the invention of the light bulb, how it works, and how electric light changed the way people live and work. Features include essential facts, a glossary, selected bibliography, websites, source notes, and an index, plus a timeline and maps, charts, and diagrams. Aligned to Common Core Standards and correlated to state standards. Essential Library is an imprint of Abdo Publishing, a division of ABDO. In response to the rise in chronic medical conditions--and the growing use of complementary and alternative therapies--among pediatric and adolescent patients, healthcare practitioners are taking a serious look at pediatric integrative medicine (PIM). Although it dovetails with current concepts of preventive medicine, wellness, and patient control, PIM is still an evolving field with its own particular challenges and opportunities. A Guide to Integrative Pediatrics for the Healthcare Professional explores its subject through the more familiar lens of integrative medicine. This concise comprehensive resource synthesizes the knowledge base on a range of therapies commonly associated with PIM, such as acupuncture, herbal remedies, clinical hypnosis, yoga, homeopathy, and therapeutic massage, with findings on their effective use with children. Case examples illustrate uses of PIM modalities with allopathic medicine to treat young patients at various developmental stages, and the authors pinpoint safety and appropriateness concerns, answer licensing questions, and note clinical areas requiring further study. The wide-ranging information contained here will help support interest in PIM at the research, training, and practice levels. Features of the Guide: An introduction to basic concepts in PIM. Trends in IM/PIM education. A survey of complementary and alternative therapies, including biologically-based, body-based, mind-body, energy-based, and alternative whole systems. Current evidence for IM in treating common pediatric conditions. The future of integrative pediatrics. References and links for further information. Offering a front-row seat to the continued expansion of the field, A Guide to Integrative Pediatrics for the Healthcare Professional is a salient text not only for pediatricians but for all healthcare practitioners tasked with improving children's wellbeing. "/p> This November issue of The Yale Law Journal (the second of Volume 123, academic year 2013-2014) features new articles and essays on law and legal theory by

internationally recognized scholars. Contents include: * Article, "Leviathan and Interpretive Revolution: The Administrative State, the Judiciary, and the Rise of Legislative History, 1890-1950," by Nicholas R. Parrillo * Essay, "Reconsidering Citizens United as a Press Clause Case," Michael W. McConnell * Note, "The Mens Rea of Accomplice Liability: Supporting Intentions" * Comment, "A First Amendment Approach to Generic Drug Manufacturer Tort Liability" * Comment, "The EU General Data Protection Regulation: Toward a Property Regime for Protecting Data Privacy" Quality ebook formatting includes fully linked footnotes, active Table of Contents (including linked Contents for individual articles), active URLs in notes, and properly presented tables and graphs throughout. This book provides detailed, comprehensive and illustrative content to the surgical community in the areas of foregut oncologic surgery. The text contains an in depth review of all surgical aspects of oncologic diseases involving the stomach and esophagus. The main focus is on the minimally invasive techniques including potential complications and their management. The text also includes an online link for the videos for all minimally invasive foregut surgical procedures including animation content which provide a more comprehensive learning experience. Minimally Invasive Foregut Surgery for Malignancy: Principles and Practice is structured in a way that makes it useful at every level of training and will be of great utility to practicing surgeons, fellows in surgical subspecialty training and surgical residents. The book will cover the most important zoonoses with a public health impact and debate actual developments in this field from a One Health perspective. The outline of the book follows a "setting" approach, i.e. special settings of zoonoses with a public health aspect, rather than presenting a simple textbook of an encyclopedic character. Main chapters will deal with zoonoses in the food chain including a special focus on the emerging issue of antibiotic resistance, with zoonoses in domestic and pet animals, in wildlife animal species (including bats as an important infectious agent multiplier), influenza and tuberculosis as most prominent zoonoses, and zoonotic pathogens as bioterroristic agents. Special interest chapters debate non-resolved and currently hotly debated zoonoses (e.g. M. Crohn/paratuberculosis, chronic botulism) as well as the economic and ecological aspects of zoonoses. Women have made a difference in every field imaginable, and they continue to do so today. Women's Lives in History introduces readers to dozens of these remarkable people. Women in Literature features groundbreaking figures in literary fiction, genre fiction, science fiction, nonfiction and memoir, feminist writing, poetry, and young adult literature. Compelling text and vivid photographs bring these women to life. Features include essential facts, a timeline, a glossary, additional resources, source notes, and an index. Aligned to Common Core Standards and correlated to state standards. Essential Library is an imprint of Abdo Publishing, a division of ABDO. Surveillance in Europe is an accessible, definitive and comprehensive overview of the rapidly growing multi-disciplinary field of surveillance studies in Europe. Written by experts in the field, including leading scholars, the Companion's clear and up to date style will appeal to a wide range of scholars and students in the social sciences, arts and humanities. This book makes the case for greater resilience in European society in the face of the growing pervasiveness of surveillance. It examines surveillance in Europe from several different perspectives, including: the co-evolution of surveillance technologies and practices the surveillance industry in Europe the instrumentality of surveillance for preventing and detecting crime and terrorism social and economic costs impacts of surveillance on civil liberties resilience in Europe's surveillance society. the consequences and impacts for Europe of the Snowden revelations findings and recommendations regarding surveillance in Europe Surveillance in Europe's interdisciplinary approach and accessible content makes it an ideal companion to academics, policy-makers and civil society organisations alike, as well as appealing to top level undergraduates and postgraduates. "Bruce Schneier's amazing book is the best overview of privacy and security ever written."—Clay Shirky "Bruce Schneier's amazing book is the best overview of privacy and security ever written."—Clay Shirky Your cell phone provider tracks your location and knows who's with you. Your

*online and in-store purchasing patterns are recorded, and reveal if you're unemployed, sick, or pregnant. Your e-mails and texts expose your intimate and casual friends. Google knows what you're thinking because it saves your private searches. Facebook can determine your sexual orientation without you ever mentioning it. The powers that surveil us do more than simply store this information. Corporations use surveillance to manipulate not only the news articles and advertisements we each see, but also the prices we're offered. Governments use surveillance to discriminate, censor, chill free speech, and put people in danger worldwide. And both sides share this information with each other or, even worse, lose it to cybercriminals in huge data breaches. Much of this is voluntary: we cooperate with corporate surveillance because it promises us convenience, and we submit to government surveillance because it promises us protection. The result is a mass surveillance society of our own making. But have we given up more than we've gained? In *Data and Goliath*, security expert Bruce Schneier offers another path, one that values both security and privacy. He brings his bestseller up-to-date with a new preface covering the latest developments, and then shows us exactly what we can do to reform government surveillance programs, shake up surveillance-based business models, and protect our individual privacy. You'll never look at your phone, your computer, your credit cards, or even your car in the same way again.*

This timely desk reference focuses on marine-derived bioactive substances which have biological, medical and industrial applications. The medicinal value of these marine natural products are assessed and discussed. Their function as a new and important resource in novel, anticancer drug discovery research is also presented in international contributions from several research groups. For example, the potential role of Spongistatin, Apratoxin A, Eribulin mesylate, phlorotannins, fucoic acid, as anticancer agents is explained. The mechanism of action of bioactive compounds present in marine algae, bacteria, fungus, sponges, seaweeds and other marine animals and plants are illustrated via several mechanisms. In addition, this handbook lists various compounds that are active candidates in chemoprevention and their target actions. The handbook also places into context the demand for anticancer nutraceuticals and their use as potential anti-cancer pharmaceuticals and medicines. This study of advanced and future types of natural compounds from marine sources is written to facilitate the understanding of Biotechnology and its application to marine natural product drug discovery research. This interdisciplinary work presents a conceptual framework and brings together constructivist and rationalist accounts of how EU norms are adopted, adapted, resisted or rejected. These chapters provide empirical cases and critical analysis of a rich variety of norm-takers from EU member states, European and non-European states, including the rejection of EU norms in Russia and Africa as well as adaptation of EU practices in Australia and New Zealand. Chapters on China, ASEAN and the Czech Republic demonstrate resistance to EU norm export. This volume probes differences in willingness to adopt or adapt norms between various actors in the recipient state and explores such questions as: How do norm-takers perceive of the EU and its norms? Is there a 'normative fit' between EU norms and the local normative context? Similarly, how do EU norms impact recipients' interests and institutional arrangements? First, the authors map EU norm export strategies and approaches as they affect norm-takers. Second, the chapters recognize that norm adoption, adaptation, resistance or rejection is a product of interaction and a relationship in which interdependence, asymmetry and power play a role. Third, we see that domestic circumstances within norm-takers condition the reception of norms. This book's focus on norm-takers highlights the reflexive nature of norm diffusion and that nature has implications for the EU itself as a norm exporter. Anyone with an interest in the research agenda on norm diffusion, normative power and the EU's normative dialogue with the world will find this book highly valuable, including scholars, policy makers and students of subjects including political science, European studies, international relations and international and EU law. This book constitutes the refereed proceedings of the Third European Conference on Information Literacy, ECIL 2015, held in Tallinn, Estonia, in

October 2015. The 61 revised full papers presented were carefully reviewed and selected from 226 submissions. The papers are organized in topical sections on information literacy, environment and sustainability; workplace information literacy and knowledge management; ICT competences and digital literacy; copyright literacy; other literacies; information literacy instruction; teaching and learning information literacy; information literacy, games and gamification; information need, information behavior and use; reading preference: print vs electronic; information literacy in higher education; scholarly competencies; information literacy, libraries and librarians; information literacy in different context.
