**SARS** May 26 2020 The severe acute respiratory syndrome virus (SARS) first emerged in southern China in November 2002 and in the following months spread to 12 other countries in the Western Pacific region (where 95 per cent of the global cases took place) with devastating force. By July 2004, when the epidemic was finally declared over, it had killed nearly 800 people including many healthcare workers. Although by some standards, this first emerging and readily transmissible disease of the 21st century was not a big killer, it caused more fear and social disruption than any other outbreak of our time. Written largely by the public health experts and scientists involved in efforts to control the epidemic, this publication examines the emergence and spread of SARS, the public health measures taken to deal with it, the epidemiology of the SARS coronavirus (SAR-CoV) and vaccine development, and its impact on people and economies in individual countries, in the region and around the world.

When most people hear the word "witches," they think of horror films and Halloween, but to the nearly one million Americans who practice Paganism today, witchcraft is a nature-worshipping, polytheistic, and very real religion. So Alex Mar discovers when she sets out to film a documentary and finds herself drawn deep into the world of present-day magic. *Witches of America* follows Mar on her immersive five-year trip into the occult, charting modern Paganism from its roots in 1950s England to its current American mecca in the San Francisco Bay Area; from a gathering of more than a thousand witches in the Illinois woods to the New Orleans branch of one of the world's most influential magical societies. Along the way she takes part in dozens of rituals and becomes involved with a wild array of characters. This sprawling magical community compels Mar to confront what she believes is possible--or hopes might be. With keen intelligence and wit, Mar illuminates the world of witchcraft while grappling in fresh and unexpected ways with the question underlying every faith: Why do we choose to believe in anything at all?--Adapted from book jacket. (BT) Managerial Imperative and the Practice of Leadership in Schools, The Sep 10 2021 With this significant new work, Larry Cuban provides a unique and insightful perspective on the bridging of the long-standing and well-known gap between teachers and administrators. Drawing on the literature of the field as well as personal experience, Cuban recognizes the enduring structural relationship within school organizations inherited by teachers, principals, and superintendents, and calls for a renewal of their sense of common purpose regarding the role of schooling in a democratic society. Cuban analyzes the dominant images (moral and technical), roles (instructional, managerial, and political), and contexts (classroom, school, and district) within which teachers, principals, and superintendents have worked over the last century. He concludes that when these powerful images and roles are wedded to the structural conditions in which schooling occurs, [managerial behavior] results, thus narrowing the potential for more thoughtful, effective, and appropriate leadership. Cuban then turns to consider this situation with respect to the contemporary movement for school reform, identifying significant concerns both for policymakers and practitioners. This honest, thought-provoking book by a leading scholar, writer, and practitioner in the field represents an invaluable resource[an insightful introduction for those just entering the field and a fresh, new perspective for those long-familiar with its complexities. Cuban's ethnographic approach to the development of his own career and viewpoint, as well as his highly readable style, make this a work of lasting value.

*Gender and Transgender in Modern Paganism* Jan 02 2021 The events at Pantheon 2011 caused a storm that reverberated across the planet, with discussion on many web sites and mailing lists, and even a mention in the UK's Guardian newspaper. This book was created in the hope of extending the debate and bringing it to a wider audience. We have included articles from people in both major camps, who have explained their positions powerfully and sincerely. This book is not an easy read -- much of it will be painful, and there is probably no one in the wider pagan community who will not be offended by at least something in here. Articles have been edited only for grammar and typography -- you will find honest words, entirely uncensored. This, however, is the point of the exercise. When nothing is said, nothing will be heard, and nothing can change.

*Downsizing the Federal Government* Apr 24 2020 The federal government is running huge budget deficits, spending too much, and heading toward a financial crisis. Federal spending soared under President George W. Bush, and the costs of programs for the elderly are set to balloon in coming years. Hurricane Katrina has made the federal budget situation even more desperate. In *Downsizing the Federal Government* Cato Institute budget expert Chris Edwards provides policymakers with solutions to the growing federal budget mess. Edwards identifies more than 100 federal programs that should be terminated, transferred to the states, or privatized in order to balance the budget and save hundreds of billions of dollars. Edwards proposes a balanced reform package of cuts to entitlements, domestic programs, and excess defense spending. He argues that these cuts would not only eliminate the deficit, but also strengthen the economy, enlarge personal freedom, and leave a positive fiscal legacy for the next generation. *Downsizing the Federal Government* discusses the systematic causes of wasteful spending, and it overflows with examples of federal programs that are obsolete and mismanaged. The book examines the budget process and shows how policymakers act contrary to the interests of average Americans by favoring special interests.

*National Science Education Standards* Apr 17 2022 Americans agree that our students urgently need better science education. But what should they be expected to know and be able to do? Can the same expectations be applied across our diverse society? These and other fundamental issues are addressed in *National Science Education Standards*—a landmark development effort that reflects the contributions of thousands of teachers, scientists, science educators, and other experts across the country. The *National Science Education Standards* offer a coherent vision of what it means to be scientifically literate, describing what all students regardless of background or circumstance should understand and be able to do at different grade levels in various science categories. The standards address: The exemplary practice of science teaching that provides students with experiences that enable them to achieve scientific literacy. Criteria for assessing and analyzing students' attainments in science and the learning opportunities that school science programs afford. The nature and design of the school and district science program. The support and

resources needed for students to learn science. These standards reflect the principles that learning science is an inquiry-based process, that science in schools should reflect the intellectual traditions of contemporary science, and that all Americans have a role in improving science education. This document will be invaluable to education policymakers, school system administrators, teacher educators, individual teachers, and concerned parents.

*The Two First Books Concerning the Life of Apollonius Tyaneus. Now Published in English Together with Philological Notes ...* by Charles Blount Apr 05 2021

**Wicca** Feb 27 2023 The past century has born witness to a growing interest in the belief systems of ancient Europe, with an array of contemporary Pagan groups claiming to revive these old ways for the needs of the modern world. By far the largest and best known of these Paganisms has been Wicca, a new religious movement that can now count hundreds of thousands of adherents worldwide. Emerging from the occult milieu of mid twentieth-century Britain, Wicca was first presented as the survival of an ancient pre-Christian Witch-Cult, whose participants assembled in covens to venerate their Horned God and Mother Goddess, to celebrate seasonal festivities, and to cast spells by the light of the full moon. Spreading to North America, where it diversified under the impact of environmentalism, feminism, and the 1960s counter-culture, Wicca came to be presented as a Goddess-centred nature religion, in which form it was popularised by a number of best-selling authors and fictional television shows. Today, Wicca is a maturing religious movement replete with its own distinct world-view, unique culture, and internal divisions. This book represents the first published academic introduction to be exclusively devoted to this fascinating faith, exploring how this Witches' Craft developed, what its participants believe and practice, and what the Wiccan community actually looks like. In doing so it sweeps away widely-held misconceptions and offers a comprehensive overview of this religion in all of its varied forms. Drawing upon the work of historians, anthropologists, sociologists, and scholars of religious studies, as well as the writings of Wiccans themselves, it provides an original synthesis that will be invaluable for anyone seeking to learn about the blossoming religion of modern Pagan Witchcraft.

**Multi-Disciplinary Approaches to Romany Studies** Feb 21 2020 A collection of essays on a wide range of aspects of the Roma communities, cultures, social and political conditions across Europe. The scholarly field of Romany studies is trapped by the history of Roma in a unique and peculiar position in Europe. The investigation of Roma was in the past marginal to academic concerns because most of its practitioners were amateur folklorists interested in treating the Roma as paragons of a lost world and not as citizens of modern nation-states. Today the field is hemmed in by two different power fields: the emotionally understandable, though intellectually debilitating, concern to turn the plight of the Roma into a matter of human rights and the difficulty that academics experience in dealing with people who are not a people in the sense that nation states constitute and make peoples.
