Democratic Citizenship and the Free Movement of People Jul 18 2022 Democratic states guarantee free movement within their territory to all citizens, as a core right of citizenship. Similarly, the European Union guarantees EU citizens and members of their families the right to live and the right to work anywhere within EU territory. Such rights reflect the project of equality and undifferentiated individual rights for all who have the status of citizen, but they are not uncontested. Despite citizenship's promise of equality, barriers, incentives, and disincentives to free movement make some citizens more equal than others. This book challenges the normal way of thinking about freedom of movement by identifying the tensions between the formal ideals that governments, laws, and constitutions expound and actual practices, which fall short.

Movement for Citizens Voice and Action (MOVE). Sep 27 2020 Summary of activities and financial

statement for MOVE, a coalition of a variety of community groups from the Halifax-Dartmouth region created to aid in regional planning by providing and exchanging information and services.

Bicycle Citizens Jun 24 2020 "A gem of a book. LeBlanc brings the women she studies to life, leading us down the side streets and back alleys of Tokyo suburbia, trundling along on a clunker bicycle, and exploring how homemakers get involved in the grassroots level of politics."--Glenda Roberts, author of *Staying on the Line*

The Citizen Solution Mar 22 2020 A hands-on guide to effecting change in America by taking action in your community.

Woman Into Citizen Oct 29 2020 Monograph on the historical evolution of women's rights from 1902 to 1978 - describes various campaigns for achieving civil rights for women, rights for political participation, equal opportunities for the woman worker, etc., and considers the contributions made to the emancipation of women by the international alliance of women (interest group), the League of Nations, the UN (role of UN) and other international organizations, the international women's year, etc. ILO mentioned. Bibliography pp. 312 to 314, chronology of major events and photographs.

EU Citizenship and Free Movement Rights May 16 2022 EU citizenship and Free Movement Rights examines how EU citizenship reconstructs in

unexpected ways what citizenship as a status means and stands for in relation to family reunification, social rights, expulsion and discusses the effects of Brexit for EU citizens.

Citizens at Last Dec 19 2019 "There is so much to be learned from the documents collected here. . . . Where better than in this record to find the inspiration to achieve another high point of women's political history?" --from the foreword by Anne Firor Scott *Citizens at Last* is an essential resource for anyone interested in the history of the suffrage movement in Texas. Richly illustrated and featuring over thirty primary documents, it reveals what it took to win the vote.

Citizenship Rights and Freedom of Movement in the European Union Dec 11 2021 Although EU citizenship may appear to be a straightforward and unproblematic matter - each citizen of a Member State is a citizen of the Union - there are in fact situations in which EU citizenship status can become a thorny issue, at times even determining the outcome of a case. Because the rights automatically recognized with nationality most clearly involve the fundamental right of moving and residing freely, the case law relating freedom of movement with EU citizenship status is extensive and reaches into many areas of practice at every level. Prompted by the declaration of 2013 as the 'Year of Citizens', the author of this book offers a

detailed analysis of the rationales underlying the development of the EU citizenship concept, the directives and regulations that define citizen status, and the cases that have so far worked to clarify the meaning and limits of such status, all with particular attention to the obstacles that still come between the actual exercise of rights in everyday life. The multifarious issues raised include the following: the Charter of Fundamental Rights and the EU citizen's status; changes introduced by the Treaty of Lisbon; limitations on Member States with regard to granting and revoking nationality; participation of EU citizens in the decision making processes governing the EU; right to recourse to the European Ombudsman; right of access to documents; registration at a host Member State's competent public offices; limitations of entry due to reasons of public policy, public security, and public health; procedural safeguards in the case of measures limiting freedom of movement; the condition of migrant workers; restrictions to freedom of movement for 'employment in the public sector'; and the condition of family members of EU citizens. An appendix gathers legislative documents most often cited in the case law. Closely examining the various institutions concerned, case law (Member State as well as Court of Justice), and legislative innovations, the author concentrates on identifying and overcoming those obstacles that

still prevent full enjoyment of EU citizenship rights. While the clear demarcation of issues will be of especial practical value in anti-discrimination cases, legal academics and jurists will appreciate the book's signal new contribution to a classic theme of the European Union.

**The Immigrant Rights Movement Oct 21 2022
Walter Nicholls's new book traces the story of the immigrant rights movement from its grassroots origins through its meteoric rise to the national stage.**

Handbook of Political Citizenship and Social Movements Nov 22 2022 This Handbook uniquely collates the results of several decades of academic research in these two important fields. The expert contributions successively address the different forms of political citizenship and current approaches and recent developments in social movement studies. Salient social movements in recent history are explored in depth, covering the environmental, women's, international human rights, urban, Tea Party, and animal rights movements. Social movements and political citizenship in the 'global South' China, India, Africa, and the Arab World, are discussed, presenting a novel empirical insight into these fields of study.

Sovereign Citizens May 04 2021 The sovereign citizen movement combines radical anti-government activism with well-placed lies and

carefully structured conspiracy theories about the origins of the United States. Inside, the author exposes the strange, the interesting, and the dangerous, and deconstructs, decodes and deflates the global sovereign citizen movement. The most elaborate conspiracy theories often contain a morsel of truth. This is certainly the case when it comes to the sovereign citizen movement. This movement is not structured, and it has no leader. Yet its ideas have spread around the world in the past thirty years. From the United States to the United Kingdom and all the way to Singapore, you can find instances of sovereign citizen activists splashing the headlines and popping up on YouTube. Most often, sovereign citizens defy the police when they are pulled over for breaking traffic laws. A sovereign citizen will tell the police that they have no lawful authority, no rightful jurisdiction and that they work for a "corporation" known as the United States. Usually, this does not end well for the sovereign citizen. Sovereign citizens will also spread their anti-government activism in YouTube videos, in fraudulent court filings and through elaborate moneymaking schemes where they pose as lawyers and judges. These con artists have swindled millions of dollars from the United States government and perhaps much more money from regular citizens. This book explores the origins of the movement, the

conspiracies that form the foundation of the movement and the common words and actions that sovereign citizens adopt and use. Joe Pometto is a licensed attorney in Pittsburgh, PA and a United States Air Force veteran. He also has a YouTube channel called "Attorney Audits Agitators" where he analyzes encounters with sovereign citizens and other movements that brush up against the law.

Fragile Migration Rights Apr 22 2020 The Soviet Union comprehensively governed the mobility of its citizens by barring emigration and strictly regulating internal migration. In the aftermath of the Soviet collapse, the constitution and laws of the new Russian Federation appeared to herald a complete break with the repressiveness of the previous government. Russian law now proclaims the right of Russian citizens and residents to move around their country freely. This book examines how and why this post-Soviet legal promise of internal freedom of movement has been undermined in practice by both federal and regional policies. It thereby adds a new dimension to scholarly understanding of the nature of rights, citizenship, and law enforcement in contemporary Russia. Most contemporary works focus on the attempts of developed Northern countries to regulate migration from the global South to the global North: here Matthew Light examines the restriction of migration within Soviet and post-

Soviet Russia, providing a comprehensive view into an area rarely explored within migration scholarship. Fragile Migration Rights develops a comprehensive theoretical framework to analyse this complex subject. It is essential reading for students and academics from a range of disciplines including criminology, human rights, migration studies, and political science.

Making Democratic Citizens in Spain Jan 20 2020 A fascinating study of the contribution of ordinary men and women to Spain's democratic transition of the 1970s. Radcliff argues that participants in neighbourhood and other associations experimented with new practices of civic participation that put pressure on the authoritarian state and made the building blocks of a future democratic citizenship

If Your Back's Not Bent Apr 03 2021 Director of the Citizenship Education Program, Dorothy Cotton, recounts the accomplishments of the program and her experiences in the civil rights movement.

Youth Movements, Citizenship and the English Countryside Jun 17 2022 This book explores the significance and meaning of the countryside within mid-twentieth century youth movements. It examines the ways in which the Boy Scouts, Girl Guides, Woodcraft Folk and Young Farmers' Club organisations employed the countryside as a space within which 'good citizenship' - in leisure, work,

the home and the community - could be developed. Mid-century youth movements identified the 'problem' of modern youth as a predominantly urban and working class issue. They held that the countryside offered an effective antidote to these problems: being a 'good citizen' within this context necessitated a respectful and mutually beneficial relationship with the rural sphere. Avenues to good citizenship could be found through an enthusiasm for outdoor recreation, the stewardship of the countryside and work on the land. However, models of good citizenship were intrinsically gendered.

Woman Into Citizen Sep 08 2021

Performing Citizenship Feb 25 2023 In this book, Tamar Groves and Inbal Ofer explore the effects of social movements' activism on the changing practices and conceptions of citizenship.

Presenting empirically rich case studies from Latin America, Asia and Europe, leading experts analyze the ways in which the shifting balance of power between nation-state, economy and civil society over the past half century affected social movements in their choice of addressees and repertoires of action. Divided into two parts, the first part focuses on citizenship as a form of political and cultural participation. The three case studies that make up this section look into the ways in which social movements' activism prompted a critical re-evaluation of two central

questions: Who can be considered a citizen? And what forms of political and cultural participation effectively enable citizens to exercise their rights? The second section focuses on citizenship as a form of community building. The three case studies that are included in this section address the ways in which activism fosters new forms of advocacy and communication, leading to the emergence of new communities and assigning qualities of fraternity to the status of citizenship. Throughout most of the 20th century social movements' literature focused on the challenges these entities posed to the state, since it was the state that had the capacity and willingness to grant social and economic concessions. This situation started to shift in the late 1960s. By the 1980s the existing configuration between the state, civil society and the economy was increasingly challenged by market penetration. Accordingly, we witness a proliferation of social movements that no longer target state institutions, or do so only partially. Their repertoires of action interact continuously with everyday practices, re-shaping demands within specific organizational, legislative and political contexts. As a result, such activism expands the understanding of the concept of citizenship so as to include demands relating to livelihood; division of resources; the production and dissemination of knowledge; and forms of civic participation and solidarity. Written for scholars

who study social movements, citizenship and the relationship between the state and civil society over the past half century, this book provides a fresh insight on the nature of citizenship; increasingly framing the condition of being a citizen in terms of performance and on-going practices, rather than simply in relation to the attainment of a formal status.

Mobilising Citizens Feb 19 2020

How Smart Growth Can Stop Sprawl Jan 24 2023

Environmental Protest and Citizen Politics in Japan Jul 06 2021 This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1981.

Public Citizens: The Attack on Big Government and the Remaking of American Liberalism Nov 29 2020 The story of the dramatic postwar struggle over the proper role of citizens and government in American society. In the 1960s and 1970s, an insurgent attack on traditional liberalism took shape in America. It was built on new ideals of citizen advocacy and the public interest.

Environmentalists, social critics, and consumer

advocates like Rachel Carson, Jane Jacobs, and Ralph Nader crusaded against what they saw as a misguided and often corrupt government. Drawing energy from civil rights protests and opposition to the Vietnam War, the new citizens' movement drew legions of followers and scored major victories. Citizen advocates disrupted government plans for urban highways and new hydroelectric dams and got Congress to pass tough legislation to protect clean air and clean water. They helped lead a revolution in safety that forced companies and governments to better protect consumers and workers from dangerous products and hazardous work conditions. And yet, in the process, citizen advocates also helped to undermine big government liberalism—the powerful alliance between government, business, and labor that dominated the United States politically in the decades following the New Deal and World War II. Public interest advocates exposed that alliance's secret bargains and unintended consequences. They showed how government power often was used to advance private interests rather than restrain them. In the process of attacking government for its failings and its dangers, the public interest movement struggled to replace traditional liberalism with a new approach to governing. The citizen critique of government power instead helped clear the way for their

antagonists: Reagan-era conservatives seeking to slash regulations and enrich corporations. *Public Citizens* traces the history of the public interest movement and explores its tangled legacy, showing the ways in which American liberalism has been at war with itself. The book forces us to reckon with the challenges of regaining our faith in government's ability to advance the common good.

***Sovereign Citizens* Aug 27 2020 This brief serves to educate readers about the sovereign citizen movement, presenting relevant case studies and offering suggestions for measures to address problems caused by this movement. Sovereign citizens are considered by the Federal Bureau of Investigation (FBI) to be a prominent domestic terrorist threat in the United States, and are broadly defined as a loosely-affiliated anti-government group who believes that the United States government and its laws are invalid and fraudulent. Because they consider themselves to be immune to the consequences of American law, members identifying with this group often engage in criminal activities such as tax fraud, "paper terrorism", and in more extreme cases, attempted murder or other acts of violence. *Sovereign Citizens* is one of the first scholarly works to explicitly focus on the sovereign citizen movement by explaining the movement's origin, interactions with the criminal justice system, and ideology.**

The EU Citizenship Directive Oct 09 2021 The EU Citizenship Directive defines the right of free movement for citizens of the European Economic Area. It applies to EU citizens and their family members who move to another Member State. This might at first seem like a straightforward definition, but immediately questions arise. Who determines if a person is an EU citizen at all? What about dual citizens of two Member States, or of one Member State and a non-Member State (a 'third State')? What is the position of EU citizens who move to one Member State, and then return to their home Member State? This book provides a comprehensive commentary of the EU's Citizens' Directive tracing the evolution of the Directive's provisions, placing each article in its historical and legislative context. Special emphasis is placed on highlighting the connections and interactions between the Directive's constituent provisions so as to permit a global appreciation of the system of free movement rights to which the Directive gives effect. Each provision is annotated containing a detailed analysis of the case-law of the Court of Justice as well as of related measures impacting upon the Directive's interpretation including European Commission reports and guidelines on the Directive's implementation. The authors have drawn on their combined experience in academia, practice and the EU institutions to provide an

engaging and critical account of the Citizenship Directive, approaching it directly from an EU law perspective.

EU Citizenship at the Edges of Freedom of Movement Dec 23 2022 This book critically analyses the case law on EU citizenship in relation to its personal free movement rights, its status on the primary law level, and EU fundamental rights protection. The book exposes the legal space where EU citizenship variably loses or gains legal relevance, and questions how this space can be overcome. Through a thorough analysis of the core personal free movement rights of residence, family reunification, equal treatment and equal political participation, the book demonstrates how the development of the case law of the Court of Justice of the European Union has generated a two-tiered legal concept of EU citizenship. Depending on the nature of the legal claim at hand, EU citizenship may appear as a poor legal personhood for exercising free movement rights; sometimes pushing the individual who is in a factual cross-border situation out of the scope of Union law. Contrastingly, in other strands of the jurisprudence, we see EU citizenship and its primary law levelled-rights stretch the jurisdictional scope of Union law, triggering the EU's Charter of Fundamental Rights for review of the individual case. The book enhances the

understanding of the legal concept of EU citizenship in Union law and contributes to the debate on the future development of EU citizenship, its relationship to the Charter, and the strength of its legal position for the person who exercises freedom of movement.

Citizenship, Migrant Activism and the Politics of Movement Aug 19 2022 Migration is an inescapable issue in the public debates and political agendas of Western countries, with refugees and migrants increasingly viewed through the lens of security. This book analyses recent shifts in governing global mobility from the perspective of the politics of citizenship, utilising an interdisciplinary approach that employs politics, sociology, anthropology, and history. Featuring an international group of leading and emerging researchers working on the intersection of migrant politics and citizenship studies, this book investigates how restrictions on mobility are not only generating new forms of inequality and social exclusion, but also new forms of political activism and citizenship identities. The chapters present and discuss the perspectives, experiences, knowledge and voices of migrants and migrant rights activists in order to better understand the specific strategies, tactics, and knowledge that politicized non-citizen migrant groups produce in their encounters with border controls and security technologies. The book

focuses the debate of migration, security, and mobility rights onto grassroots politics and social movements, making an important intervention into the fields of migration studies and critical citizenship studies. Citizenship, Migrant Activism and the Politics of Movement will be of interest to students and scholars of migration and security politics, globalisation and citizenship studies.

Activist Citizenship in Southeast Europe Feb 01 2021 This volume explores recent episodes of progressive citizen-led mobilisation that have spread across Southeast Europe over the past decade. These protests have allowed citizens the opportunity to challenge prevailing notions of citizenship and provided the chance to redress what is perceived to be the unjust balance of power between elites and the masses. Each contribution debunks the myth of inherently passive post-socialist populations imitating West European forms of civil society activism. Rather, we gain a deeper sense of progressive and innovative forms of activist citizenship that display essentialist and particular forms of protest in combination with the antics of global protest networks. Through richly detailed case study research, the authors illustrate that whilst the catalysts for protest in Southeast Europe were invariably familiar (the expanse of private ownership into urban public spaces; the impact of austerity), the pathology of such protests

were undoubtedly indigenous in origin, reflecting the particular post-socialist/post-authoritarian trajectories of these societies. The chapters in this book were originally published as a special issue in *Europe-Asia Studies*.

The Citizen Movement Nov 10 2021

Citizen Environmentalists Mar 02 2021 A telling look at the lives and strategies of women environmental activists in the long 1960s, solidly grounded in a national context

The Routledge Encyclopedia of Citizen Media Jul 26 2020 This is the first authoritative reference work to map the multifaceted and vibrant site of citizen media research and practice, incorporating insights from across a wide range of scholarly areas. Citizen media is a fast-evolving terrain that cuts across a variety of disciplines. It explores the physical artefacts, digital content, performative interventions, practices and discursive expressions of affective sociality that ordinary citizens produce as they participate in public life to effect aesthetic or socio-political change. The seventy-seven entries featured in this pioneering resource provide a rigorous overview of extant scholarship, deliver a robust critique of key research themes and anticipate new directions for research on a variety of topics. Cross-references and recommended reading suggestions are included at the end of each entry to allow scholars from different disciplinary

backgrounds to identify relevant connections across diverse areas of citizen media scholarship and explore further avenues of research. Featuring contributions by leading scholars and supported by an international panel of consultant editors, the Encyclopedia is essential reading for undergraduate and postgraduate students as well as researchers in media studies, social movement studies, performance studies, political science and a variety of other disciplines across the humanities and social sciences. It will also be of interest to non-academics involved in activist movements and those working to effect change in various areas of social life.

Citizenship Rights and Social Movements Apr 27 2023 This is the first comparative study of the relationship between social movements and citizenship rights. It identifies the main connections made between collective action and individual rights, in theory and history, and tests them in the context of modern authoritarian regimes. It does so by measuring both social mobilization and the presence of rights over time, and by analysing their mutual impact statistically - both within and across national cases. The results create a new perspective on democratic struggles in authoritarian conditions, and on processes of democratic transitions. The selected cases of Brazil, Chile, Mexico and Spain are similar enough

to make comparisons possible, and different enough to make them interesting. Measuring mobilization and rights provides a comparative description of their forms and fluctuations, just as the statistical results promote a comparative analysis of their influence and interactions. The study uses statistical techniques, but employs them to illuminate historical processes. In sum, its quantitative methods work to enhance the qualitative inquiry, and together they come to constitute a robust defense of democracy as the direct result of collective struggles for individual rights.

Free Movement for Citizens Mar 26 2023

Free Movement of Persons in the European Union Aug 07 2021 Drawing extensively on the entire body of applicable case law, this in-depth study analyses what the free movement of persons provisions of the EC Treaty have come to mean in today's Europe. The author posits the emergence of a new constitutional dimension whereby the Member States bear considerable duties towards Union citizens qua citizens rather than just qua economic actors and—a duty not to interfere with individual rights, a duty to respect individual rights, and a duty to protect individual rights and—duties to be understood in the context of Union citizenship. Among the relevant issues scrutinised in the course of the analysis are the

following: and• the refinement of the concept of discrimination; and• the notion of and‘non-discriminatory barrierand’ and remuneration in relation to the free movement of services; and• non-discriminatory barriers to the freedom of establishment and the movement of workers; and• the inadequacy of the market access test; and• the notion of Union citizenship and its impact on the economic free movement provisions; and• the right to pursue an economic activity free of disproportionate market regulation. The book contains a detailed and extensive analysis of the relevant case law. As a deeply-informed assessment of the conceptual underpinnings and normative potentialities of these fundamental Community rights, *Free Movement of Persons in the European Union* will be of inestimable value to academics, as well as to postgraduate students and others concerned with the ongoing process of European integration.

***Citizenship and Mental Health Dec 31 2020* More than 50 years ago, President Kennedy gave an address to Congress that launched the community mental health movement in the U.S. This movement involved a vast and complex effort to replace the wholesale institutionalization of people with serious mental illnesses with community mental health centers, public education on mental illness, and prevention efforts. The mission and main**

thrust of this new movement, however, were quite simple: we would provide effective mental health treatment to people in their home communities and provide the conditions for them to have 'a life in the community.' Starting in the 1990s with Jim, a person who was homeless and initially refused help from outreach workers, Citizenship & Mental Health tells a 20-year story of practice, theory, and research to support the full participation of persons with mental illnesses who, in many cases, have also been homeless, have criminal charges in their past, and are poor. As the first of its kind, this book addresses the concept of citizenship as an applied theory for fulfilling the promise of the community mental health center movement. Citizenship is defined as a strong connection to the 5 R's of rights, responsibilities, roles, resources, and relationships that society offers to its members, and a sense of belonging that comes from others' recognition of one's valued membership in society. The citizenship model supports the strengths, hopes, and aspirations of people with mental illnesses to become neighbors, community members, and citizens.

***Citizenship and Social Movements Feb 13 2022
Past debates over social movements have suffered from a focus on Anglo-America and Europe, often neglecting the significance of collective actions of citizens in the Global South. This authoritative new***

title redresses this imbalance with case study material from movements for change in Brazil, India, Bangladesh, Mexico, South Africa, Kenya and Nigeria. In these examples, social movements have formed without the benefits of the structural or institutional resource base found in the North, and have persevered even when the state does not have the resources to effectively respond to collective demands. Each expert contribution points to the complexity of relationships that influence mobilization and social movements; unsettling the notion that social activism leads inexorably to democracy and development and questioning what motivates collective action and what does it achieve?

The Citizen Solution Jan 12 2022 Nationally known community organizer and activist Harry C. Boyte incites readers to join today's "citizen movement," offering practical tools for how we can change the face of America by focusing on issues close to home. Targeting useful techniques for individuals to raise public consciousness and effectively motivate community-based groups, Boyte grounds his arguments in the country's tradition of "populism," demonstrating how mobilized citizens can be far more powerful than our frequently paralyzed politicians. He offers practical tips on identifying potential citizen leaders and working through cultural differences without sacrificing

identities. Each point is illustrated by inspiring real-life examples of Minnesotans who have prompted change: An immigrant community that created a cultural wellness center. An organization of multiracial, multifaith congregations that is tackling tough social problems. A cluster of suburban neighborhoods that came together to take back Sundays from overzealous youth-sports organizations. For readers doubting their ability to make a significant difference in our world, this how-to book will show the way.

The Handbook of the Girl Citizen Movement Mar 14 2022

A History of Citizen Movements Jun 05 2021

Citizenship, Identity and Social Movements in the New Hong Kong Sep 20 2022 Hong Kong's

'Umbrella Revolution' has been widely regarded as a watershed moment in the polity's post-1997

history. While public protest has long been a routine part of Hong Kong's political culture, the

preparedness of large numbers of citizens to participate in civil disobedience represented a new

moment for Hong Kong society, reflecting both a very high level of politicisation and a deteriorating

relationship with Beijing. The transformative processes underpinning the dramatic events of

autumn 2014 have a wide relevance to scholarly debates on Hong Kong, China and the changing

contours of world politics today. This book provides

an accessible entry point into the political and social cleavages that underpinned, and were expressed through, the Umbrella Movement. A key focus is the societal context and issues that have led to growth in a Hong Kong identity and how this became highly politically charged during the Umbrella Movement. It is widely recognised that political and ethnic identity has become a key cleavage in Hong Kong society. But there is little agreement amongst citizens about what it means to 'be Hong Konger' today or whether this identity is compatible or conflicting with 'being Chinese'. The book locates these identity cleavages within their historical context and uses a range of theories to understand these processes, including theories of nationalism, social identity, ethnic conflict, nativism and cosmopolitanism. This theoretical plurality allows the reader to see the new localism in its full diversity and complexity and to reflect on the evolving nature of Hong Kong's relationship with Mainland China.

Citizens' Activism and Solidarity Movements Apr 15 2022 This book explores the activism and solidarity movements formed by contemporary European citizens in opposition to populism, which has risen significantly in reaction to globalization, European integration and migration. It makes the counterforces to neo-nationalisms visible and re-envisions key concepts such as democracy/public

sphere, power/empowerment, intersectionality and conflict/cooperation in civil society. The book makes a theoretical and empirical contribution to citizenship studies, covering several forms such as contestatory, solidary, everyday and creative citizenship. The chapters examine the diverse movements against national populism, othering and exclusion in various parts of the European Union, such as Denmark, Finland, the UK, Austria, Germany, France, Bulgaria, Slovenia and Italy. The national case studies focus on counterforces to ethnic and religious divisions, as well as genders and sexualities, various expressions of anti-migration, Romanophobia, Islamophobia and homophobia. The book's overall focus on local, national and transnational forms of resistance is premised on values of respect and tolerance of diversity in an increasingly multi-cultural Europe.

Winning the Vote for Women May 24 2020 The campaign for women's votes in Ireland coincided with the nationalist movement, the First World War, the rise of the trade union movement, the cultural revival and, of course, the 1916 Rising. It culminated in 1918, with Ireland electing the first woman to parliament in London. However, the Irish suffrage movement was not a single-issue group. It did not merely campaign for votes, but also presented a feminist critique of the plight of Irish women in early twentieth-century society. The Irish

Citizen newspaper, as the voice of the suffrage movement, provides an important insight into the various campaigns and concerns of this fascinating movement. The paper was self-consciously feminist, and, in addition to covering the major events of this tumultuous period, it addressed taboo subjects like rape, domestic violence, and child abuse. This book brings together extracts from the paper with analysis, commentary, and informative contextual background. First published in 1996 by Folena as "Irish Feminism and the Vote", this new edition has been comprehensively updated and revised. [Subject: Gender Studies, Suffrage Movement, Irish Studies, 20th C.
