This is a two-volume work with entries on individuals who made some contribution to philosophy in the period 1900 to 1960 or soon after. The entries deal with the whole philosophical work of an individual or, in the case of philosophers still living, their whole work to date. Typically the individuals included have been born by 1935 and by now have made their main contributions. Contributions to the subject typically take the form of books or journal articles, but influential teachers and people otherwise important in the world of philosophy may also be included. The dictionary includes amateurs as well as professional philosophers and, where appropriate, thinkers whose main discipline was outside philosophy. There are special problems about the term "British" in the twentieth century, partly because of human migration, partly because of decolonialization and the changing denotation of the term. The intention has been to include not only those who were British subjects at least for a significant part of their lives (even if they mostly lived outside what is now the U.K.) but also people who spent a significant part of their lives in Britain itself, irrespective of their nationality or country of origin. In the first category are included, for instance, a number of people who were born and educated in Britain but who subsequently taught in universities abroad. In the second category are

included those who were born elsewhere but who came to Britain and contributed to its philosophical culture. Loosely based on the Odyssey, this landmark of modern literature follows ordinary Dubliners in 1904. Capturing a single day in the life of Dubliner Leopold Bloom, his friends Buck Mulligan and Stephen Dedalus, his wife Molly, and a scintillating cast of supporting characters, Joyce pushes Celtic lyricism and vulgarity to splendid extremes. Captivating experimental techniques range from interior monologues to exuberant wordplay and earthy humor. A major achievement in 20th century literature. Hewitt enters the scene in The Lenton Croft Robberies, in which he is called upon to

solve three successive jewel robberies whose only clues are three half-burnt wooden matches. In *The Case of the Dixon Torpedo*, he must figure out how mechanical drawings for a new weapon could have vanished from an office that no one entered or left. In other cases, Hewitt examines the theft of a valuable cameo from a locked desk in a guarded house, the plunder of gold bullion from the hold of a sinking ship, and the disappearance of a will right from under the noses of the dying man's family. The final four stories concern a suicide that may be a murder, a marital case that isn't as simple as it seems, a clue to a treasure in a piece of music, and the robbery of a sacred relic. Soon to be an Apple TV+ animated series starring Golden Globe nominee Beanie Feldstein and Emmy Award winner Jane Lynch, it's no secret that *Harriet the Spy* is a timeless classic that kids will love!

Will Harriet find a way to put her life and her friendships back together? "What the novel showed me as a child is that words have the power to hurt, but they can also heal, and that it's much better in the long run to use this power for good than for evil."—New York Times bestselling author Meg Cabot

Baynard Kendrick was the first American to enlist in the Canadian Army during World War I. While in London, he met a blind English soldier whose observational skills inspired the character of Capt. NATIONAL BESTSELLER • From the bestselling author of *The Drunkard's Walk*, a startling, eye-opening examination of how the unconscious mind shapes our experience of the world. "Mlodinow plunges into the realm of the unconscious mind accompanied by the latest scientific research ... [with] plenty of his trademark humor." —Los Angeles Times Over the past two decades of neurological research, it has become increasingly clear that the way we experience the world—our perception, behavior, memory, and social judgment—is largely driven by the mind's subliminal processes and not by the conscious ones, as we have long believed. In *Subliminal*, Leonard Mlodinow employs his signature concise, accessible explanations of the most obscure scientific subjects to unravel the complexities of the subliminal mind. In the process he shows the many ways it influences how we misperceive our relationships with family, friends, and business associates; how we misunderstand the reasons for our investment decisions; and how we misremember important events—along the way, changing our view of ourselves and the world around us. Now the news was that he had been found one morning murdered in his smoking-room, while the room itself, with others, was in a state of confusion. His pockets had been rifled, and his watch and chain were gone, with one or two other small articles of value. On the night of the tragedy a friend had sat smoking with him in the room where the murder took place, and he had been the last person to see Mr Kingscote alive. A jobbing gardener, who kept the garden in order by casual work from time to time, had been arrested in consequence of footprints, exactly corresponding with his boots, having been found on the garden beds near the French window of the smoking-room. A triumphant tale of a young woman and her difficult childhood, *The Glass Castle* is a remarkable memoir of resilience, redemption, and a revelatory look into a family at once deeply dysfunctional and wonderfully vibrant. Jeannette Walls was the second of four children raised by anti-institutional parents in a household of extremes. The enchanting international bestseller with bonus back matter and a beautiful new cover! Two orphaned brothers, Prosper and Bo, have run away to Venice, where crumbling canals and misty alleyways shelter a secret community of street urchins. Leader of this motley crew of lost children is a clever, charming boy with a dark history of his own: He calls himself the Thief

Lord Propser and Bo relish their new "family" and life of petty crime. But their cruel aunt and a bumbling detective are on their trail. And posing an even greater threat to the boys' freedom is something from a forgotten past: a beautiful magical treasure with the power to spin time itself. There has been a philosophical upheaval recently in our understanding of the metaphysics of the mind. The philosophy of mind and action has traditionally treated its subject matter as consisting of states and events, and completely ignored the category of ongoing process. So the mental things that happen - experiences and actions - have been taken to be completed events and not ongoing processes. But events by their very nature as completed wholes are never present to the agent or subject; only ongoing processes can be present to a subject in the way required for conscious experience and practical self-knowledge. This suggests that a proper understanding of processes is required to understand subjective experience and agency. This volume explores the possibility and advantages of taking processes to be the subject matter of the philosophy of mind and action. The central defining feature of the process argument is its use of the progressive (as opposed to perfective) aspect. But beyond this, philosophers working on the metaphysics of processes do not agree. The contributors to this volume take up this argument in the metaphysics of processes. Are processes continuants? Are they particulars at all, or should we rather be thinking of process activity as a kind of stuff? Process, Action, and Experience considers whether practical reasoning and practical self-knowledge require thinking of action in process terms, and it considers arguments for the processive nature of conscious experience. The Neverending Story is Michael Ende's best-known book, but Momo—published six years earlier—is the all-ages fantasy novel that first won him wide acclaim. After the sweet-talking gray men come to town, life becomes terminally efficient. Can Momo, a young orphan girl blessed with the gift of listening, vanquish the ashen-faced time thieves before joy vanishes forever? With gorgeous new drawings by Marcel Dzama and a new translation from the German by Lucas Zwirner, this all-new 40th anniversary edition celebrates the book's first U.S. publication in over 25 years. Turtle lives in a beautiful little pond with everything a happy turtle needs. But one spring, Turtle awakes from hibernation to discover that her lovely home has been invaded! Turtle's beloved pond and refuses to share. Instead, he challenges her to a race to determine who can stay. But how can a little turtle outswim a big, powerful beaver? This charming fable of brains versus brawn is a great read for all the young readers in the forest to share! Larry Darrell is a young American in search of the absolute. The progress of this spiritual odyssey involves him with some of Maugham's most brilliant characters - his fiancée Isabel, whose choice between love and wealth have lifelong repercussions, and Elliot Templeton, her uncle, a classic expatriate American snob. The most ambitious of Maugham's novels, this is also one in which Maugham himself plays a considerable part as he wanders in and out of the story, to observe his characters struggling with their fates. "The Circular Study" is a 1900 detective novel by Anne Katherine Green. The story revolves around a cryptic message received by Detective Gryce that takes him to a quiet house in up-market New York City where he discovers a dead body laid out delicately in the study. With an apparently insane, deaf, and dumb butler and a bird in a cage as the only witnesses, Gryce must employ the aid of Miss Amelia Butterworth to uncover the mystery of this heinous crime. The third instalment of Green's female detective series "The Amelia Butterworth Mysteries" and also number ten in the "Mr Gryce Series", "The Circular Study" is a riveting murder mystery not to be missed by fans and collectors of classic detective fiction. Anna Katharine Green (1846–1935) was an American novelist and poet. Among the first writers of detective fiction in America, she is considered to be the "mother" of the genre for her legally-accurate and well-thought-out plots. Other notable works by this author include: "The Leavenworth Case" (1878), "A Strange Disappearance" (1880), and "The Sword of Damocles: A Story of New York Life" (1881). Read & Co.
