"Do you believe in ghosts?" Annette just sort of blurted out. Sara and Seth both looked up with surprise. "Well," Sara stalled, "I guess I do." She remembered the night Solomon had visited her in her bedroom after Jason and Jimmy had shot him, but she hadn't really thought about him being a ghost that night; she'd just been so glad to see her beloved feathered friend. Sara and Seth looked at each other. Both of them knew that if anything would fall into the category of ghosts, Solomon would most likely be it, but they didn't say anything, uncertain about telling their new friend their special secret. "Well, do you believe in ghosts?" Seth asked, looking intently at Annette's serious face. Annette looked at Seth and then at Sara, who both sat quietly, each waiting to hear the answer. "No, I just wondered if you did," Annette answered abruptly. "Hey, let's swing." And without taking the time to execute a perfectly calculated leap from the platform as she usually did, Annette grabbed the swinging rope and jumped off as if she couldn't do so fast enough. . . .Get ready for an exciting new adventure in joy with Sara, Seth, Solomon, and their new friend! A Woman's World Book Club pick. When Jackson St. James decided that six weeks in Vermont's Green Mountains would help him get his life together, he didn't anticipate replacing his craving for whiskey with a craving for his alluring new landlord, Gabby. Now, instead of prioritizing his sobriety and the resolution of the lawsuit threatening his business, he's making excuses to spend time with the spunky young landscaper whose candor is more than a little addictive. Gabby Decouteau refuses to let her pill-popping mother and unreliable baby daddy turn her into a cynic, so she doesn't fight her attraction to her enigmatic new tenant. Although Jackson's smile rarely reaches his eyes, his generosity and dependability make her willing to overlook his demons. But once she convinces Jackson to give in to temptation, Gabby's jealous ex threatens to disrupt the life Gabby has built for herself and her son. With so

much at stake, Gabby and Jackson must decide if love is worth the risk. In their bestselling MATHEMATICAL STATISTICS WITH APPLICATIONS, premiere authors Dennis Wackerly, William Mendenhall, and Richard L. Scheaffer present a solid foundation in statistical theory while conveying the relevance and importance of the theory in solving practical problems in the real world. The authors' use of practical applications and excellent exercises helps students discover the nature of statistics and understand its essential role in scientific research. She and her man, Nard, haven't had it easy and she wants nothing more to live the life she once lived. When someone comes and visits her, it could be either pleasant or deadly. Mezzie and Reshawn go from sugar to shit within a couple months. He blames Mezzie for the hit Victor put on Moses's head. Will Mezzie find comfort back on the pole when Reshawn walks out on her? Tiffany is living her life with Marquise and about to welcome a new child into their life. She couldn't be happier. She's finally happy and in love. That is, until Tyrisha pops back in her life. With so much anger, Tiffany can't find it in her to forgive her for what she caused in New York. Tyrisha is finally in a good place with her man and son. She wants nothing more than to raise her son and be a good wife to Moses, finally. When Tyrisha finds out something about Moses she never knew, will her life change or become better? Follow these women on their last ride as they still struggle to find their worth. They say men like a lady in the living room and a whore in the bedroom. I never knew the sentiment was reciprocal. Until I met Jax Knight. A gentleman in public, a commanding, dirty talking rogue in the bedroom. Daughter of legendary fighter "The Saint," Lily St. Claire knows firsthand how fighters can be. As the owner of a chain of MMA gyms, she's no stranger to aggressive, dominating, and possessive men. That's why she's always kept her distance. But the day Jax Knight walks through her door she's captivated by his charm. Stunningly handsome, well mannered, Ivy League educated, and confident, he shatters all the preconceived notions she'd come to think were true about men who trained to fight. But falling for someone so soon after her breakup wasn't something she'd planned on. And definitely not something her ex plans to allow. Captain Grayson Hunter knows the battle to complete the first worldwide telegraphic network will be fierce, and he intends to win it by any means necessary. When he hears about a reclusive genius who has figured out how to slash the cost of telegraphic transmissions, he vows to do whatever it takes to get the man in his employ. Except the reclusive genius is not a man, and she's not looking for employment. Amelia Smith was taken in by English missionaries as a child. She's not interested in Captain Hunter's promises or his ambitions. But the harder he tries to convince her, the more she realizes that there is something she wants from him. She wants everything. And she'll have to crack the frozen shell he's made of his heart to get it. "Hulihia" refers to massive upheavals that change the landscape, overturn the normal, reverse the flow, and sweep away the prevailing or assumed. We live in such days. Pandemics. Threats to ?ina. Political dysfunction, cultural appropriation, and disrespect. But also powerful surges toward sustainability, autonomy, and sovereignty. The first two volumes of The Value of Hawai'i (Knowing the Past, Facing the Future and Ancestral Roots, Oceanic Visions) ignited public conversations, testimony, advocacy, and art for political and social change. These books argued for the value of connecting across our different expertise and experiences, to talk about who we are and where we are going. In a world in crisis, what does Hawai'i's experience tell us about how to build a society that sees opportunities in the turning and changing times? As islanders, we continue to grapple with experiences of racism, colonialism, environmental damage, and the costs of modernization, and bring to this our own striking creativity and histories for how to live peacefully and productively together. Steered by the four scholars who edited the previous volumes, The Value of Hawai'i 3: Hulihia, the Turning offers multigenerational visions of a Hawai'i not defined by the United States. Community leaders, cultural practitioners, artists, educators, and activists share exciting paths forward for the future of Hawai'i, on topics such as education, tourism and other economies, elder care, agriculture and food, energy and urban development, the environment, sports, arts and culture, technology, and community life. These visions ask us to recognize what we truly value about our home, and offer a wealth of starting points for critical and productive conversations together in this time of profound and permanent change. The Cycladic Islands of Greece played a central role in Aegean prehistory, and many new discoveries have been made in recent years at sites ranging in date from the Mesolithic period to the end of the Bronze Age. In the well-illustrated chapters of this book, based on the recent conference held at the McDonald Institute for Archaeological Research in Cambridge, international scholars including leading Greek archaeologists offer new information about recent developments, many arising from hitherto unpublished excavations. The book contains novel theoretical insights into the workings of culture process in the prehistoric cultures of the islands. It will be an indispensable resource for students and scholars interested in the prehistory of the Aegean and in the contributions made to its development by the prehistoric inhabitants of the Cyclades. Value theory is a new theory the "value mechanics" that extends w.r.t. quantum mechanics, general relativity, the unified theory of everything, and the string theory into "abstract mechanics" the abstract theory. Thus hypothetically a perfect level when human knowledge becomes ideal to realize teleportation, telepathizing to control dash boards and consoles of digitized machines with the brain. A hypothetical time for AI to reach its peak and perfect robots emergency, time travel possibility, complete understanding of the black/white/worm holes could be engineered as a program to the highest levels and the theory of infinite universe(s) becoming functionally abstract. Great theories of anti-aging would be established, thanks to "time mechanics, light and information mechanics". Time

is flexible and entangles, light photon is sensitive, and information-idea the powerhouse of the universe(s). A time when the black hole could be used to assist the universe instead of fears of it as the most powerful natural machine of destruction. The model of flexibility universality fluidity was hypothesized and tested through various experiments with figures and found to rationally agreeing with value cores and characteristics of a system. The universe(s) is itself a natural intelligent computer and at the same time a printer with time 1. To every intelligent conscious value added on a basic, there is a valuable to be further enhanced:  $[(v + b u + s)]$ , ... 2. To every abstract universe, there is its exact reality with gravity and energy:  $[f(n) = 1/(n-1) = 1/(1-n) - n^2 n^3 - n^2 - 1]$ , ... 3. Entropy physically actualizes abstract intelligence of natural printers “vice versa or negates” its results: (The black hole and the white hole: The universe(s) is a natural abstract computer that works digitally back and forth, and it is at the same time a natural printer that prints)  $[F = GMm/r(\wedge^2 - \wedge^2/[\wedge^2 - (1/n)\wedge^2]]$ , ... 4. Nature is made up of boundaries, barriers and gate constrictions in all things, everywhere, and at all levels, and wherever these barriers exist, there is a transition governed by time, or a time machine:  $[(A) = (t^2/e) +]$ , ...
