"Written with enthusiasm and dedication, Analysis for Financial Management, 9th edition, presents Financial Management in a clear and conversational style that both business students and non-financial executives comprehend." --Book Jacket. EBOOK: Analysis for Financial Management Corporate Finance, by Ross, Westerfield, and Jaffe emphasizes the modern fundamentals of the theory of finance, while providing contemporary examples to make the theory come to life. The authors aim to present corporate finance as the working of a small number of integrated and powerful intuitions, rather than a collection of unrelated topics. They develop the central concepts of modern finance: arbitrage, net present value, efficient markets, agency theory, options, and the trade-off between risk and return, and use them to explain corporate finance with a balance of theory and application. The fourth edition of Corporate Finance takes an applied approach to cover all the latest research and topic areas important to students taking Finance courses. The new edition provides an international perspective on all areas of corporate finance and has been updated to include discussion on current trends such as the rise of populism and trade barriers on international finance, the advent of Financial Technology, and key regulatory changes impacting the sector. Understanding and Application • Clear, user-friendly style • Example boxes in every chapter provide hypothetical examples to illustrate theoretical concepts such as cash flow timing, dividend smoothing and differential growth. • Real World Insight boxes use real companies like Siemens, Avast and Adidas to show how they have applied corporate finance theories and concepts to their businesses and business decisions. • Chapter links in the margin provide quick cross-referencing to show students the connections between topics. Practice and Proficiency • Mini and Practical cases present scenarios and questions to practice applying what you have learnt. • Rigorous testing: between 30 and 40 Questions and Problems per chapter are categorised by topic and level of difficulty. • Numbered maths equations and key notation boxes listing the variables and acronyms that will be encountered in each chapter, designed to encourage mastery of Maths. • Exam Questions designed to take 45 minutes and test you on material learned in a more formal exam style. • Connect® resources include algorithmic questions designed to ensure equations and calculations are not learned by rote but by thorough understanding and practice New to This Edition • Updated discussions on peer-to-peer trading, cash flow forecasting methods, import/export partners and additional investment appraisal methods • Updated chapters on corporate governance to reflect global changes, efficient markets and mergers and acquisition to reflect new research, financial distress to reflect new data with discussion on trends and insolvencies and fully updated chapter on Leasing to reflect new IFRS standards • New section on Modified Internal Rate of Return and Margin of Safety in Investment Appraisal, Net Asset Value, Islamic Financing, and alternatives to CAPM to reflect research developments • NEW: This edition has now been updated with 8 new videos that covers a worked example from the text and each video has associated concept check questions. The videos are now available on Connect® and cover: • Chapter 1 & 2: Introduction to Finance and Corporate Governance • Chapter 5: Long-Term Financing • Chapter 6: Investment Appraisal • Chapter 9 & 10: Risk and Return • Chapter 15 and 16: Equity and Debt Valuation • Chapter 20: Advanced Capital Budgeting • Chapter 21: Dividends • Chapter 22: Options David Hillier is Associate Principal and Executive Dean of the University of Strathclyde Business School. A Professor of Finance, David was recognized as being in the top 3 per cent of the most prolific finance researchers in the world over the past 50 years (Heck and Cooley, 2009) and appears regularly in the media as a business commentator. In Global Risk Agility and Decision Making, Daniel Wagner and Dante Disparte, two leading authorities in global risk management, make a compelling case for the need to bring traditional approaches to risk management and decision making into the twenty-first century. Based on their own deep and multi-faceted experience in risk management across numerous firms in dozens of countries, the authors call for a greater sense of urgency from corporate boards, decision makers, line managers, policymakers, and risk practitioners to address and resolve the plethora of challenges facing today's private and public sector organizations. Set against the era of manmade risk, where transnational terrorism, cyber risk, and climate change are making traditional risk models increasingly obsolete, they argue that remaining passively on the side-lines of the global economy is dangerous, and that understanding and actively engaging the world is central to achieving risk agility. Their definition of risk agility taps into the survival and risk-taking instincts of the entrepreneur while establishing an organizational imperative focused on collective survival. The agile risk manager is part sociologist, anthropologist, psychologist, and quant. Risk agility implies not treating risk as a cost of doing business, but as a catalyst for growth. Wagner and Disparte bring the concept of risk agility to life through a series of case studies that cut across industries, countries and the public and private sectors. The rich, real-world examples underscore how once mighty organizations can be brought to their knees—and even their demise by simple miscalculations or a failure to just do the right thing. The reader is offered deep insights into specific risk domains that are shaping our world, including terrorism, cyber risk, climate change, and economic resource nationalism, as well as a frame of reference from which to think about risk management and decision making in our increasingly complicated world. This easily digestible book will shed new light on the often complex discipline of risk management. Readers will learn how risk management is being transformed from a business prevention function to a values-based framework for thriving in increasingly perilous times. From tackling governance structures and the tone at the top to advocating for greater transparency and adherence to value systems, this book will establish a new generation of risk leader, with clarion voices calling for greater risk agility. The rise of agile decision makers coincides with greater resilience and responsiveness in the era of manmade risk. The source of competitive advantage has shifted in many organizations from reliability to innovation and flexibility. But what does it take for an organization that innovates to then manage effectively? In this follow-up to Built to Change, Ed Lawler argues that it is a combination of the right structure and the right people. First, organizations must decide what structure they are: are you a high-involvement organization that has products and services that require a high level of coordination and cooperation among employees? Or do you have a more global competitor structure in which you are constantly bringing in new talent and technological expertise? Are you a mixture of both? Lawler outlines the unique human capital strategy for each approach, shows what it looks like in action, and provides the foundation and tools for creating competitive and innovative organizations. Fundamentals of Investments was written to: 1. Focus on students as investment managers, giving them information they can act on instead of concentrating on theories and research without the proper context. 2. Offer strong, consistent pedagogy, including a balanced, unified treatment of the main types of financial investments as mirrored in the investment world. 3. Organize topics in a way that makes them easy to apply--whether to a portfolio simulation or to real life--and support these topics with hands-on activities. The approach of this text reflects two central ideas. First, there is a consistent focus on the student as an individual investor or investments manager. Second, a consistent, unified treatment of the four basic types of financial instruments--stocks, bonds, options, and futures--focusing on their characteristics and features, their risks and returns, and the markets in which they trade.
