This vitally important new title provides criminal practitioners and others involved in Scots criminal law with an in-depth narrative guide to the law of criminal defences in Scotland. The comprehensive coverage considers defences in the widest sense, examining not only those which form part of substantive criminal law but also procedural matters such as pleas in bar of trial, abuse of process, delay, entrapment and prejudicial publicity. Pamela Ferguson describes and critiques the commonly prosecuted crime of 'breach of the peace'. She traces the development of the crime from the mid-19th century to the present day, and also considers related statutory offences. The latter include those offences created by the Criminal Justice and Licensing (Scotland) Act 2010, and the

Offensive Behaviour at Football and Threatening Communications (Scotland) Act 2012. It is argued that breach of the peace remains an overly broad and ill-defined crime - despite the appeal court's attempts at narrowing its definition. Inchoate crimes - attempts, incitement and conspiracy - are a complex area of law, affected by both common law doctrine and statutory regimes. Inchoate Crimes provides much needed guidance on the subject. The author draws on developed doctrines in other relevant jurisdictions to suggest alternative approaches for Scots law. This title also combines substantive material with discussion on the nature and justification for the punishment of such crimes. It should assist criminal lawyers in everyday practice by explaining the current state of Scots law surrounding inchoate crimes and suggesting alternative approaches where Scottish authority is deficient or entirely absent. This book provides the most in-depth study of capital punishment in Scotland between the mid-eighteenth and early nineteenth century to date. Based upon an extensive gathering and analysis of previously untapped resources, it takes the reader on a journey from the courtrooms of Scotland to the theatre of the gallows. It introduces them to several of the malefactors who faced the hangman's noose and explores the traditional hallmarks of the spectacle of the scaffold. It demonstrates that the period between 1740 and 1834 was one of discussion, debate and fundamental change in the use of the death sentence and how it was staged in practice. In addition, the study provides an innovative investigation of the post-mortem punishment of the criminal corpse. It offers the reader an insight into the scene at the foot of the gibbets from which criminal bodies were displayed and around the dissection tables of Scotland's main universities where criminal bodies were used as cadavers for anatomical demonstration. In doing so it reveals an intermediate stage in the long-term disappearance of public bodily punishment. Reprint of the original, first published in 1867.
