Radio Nov 15 2021 The purpose of this work is to provide scholars and students of popular culture with an evaluative survey of research materials about radio. . . . An interesting introduction provides an overview of radio's history in the U.S. The bibliographic essays throughout the work will hold the attention of readers and cover topics such as networks and station histories, radio drama, news, music, comedy and variety, and sports. All users will discover important sources of information and will appreciate the well-written bibliographic essays. Booklist Following a brief historical overview on radio and its role in American life, chapters offer informative and, within the confines of the format, lively and enjoyable bibliographic essays on individual facets of radio as an entertainment and information medium. . . . Highly recommended. Choice Intended to be an evaluative survey of bibliographical material on the history and development of radio and radio programming in America, this guide identifies and discusses more than 500 written sources relating to radio music, drama, comedy and variety, news, sports and more. An introductory chapter thoroughly analyzes the historical development of the medium--from its inception during the pioneer era, to the network era (radio's Golden Age), to the decline of radio in the 1950s, and finally to the radio renaissance--based largely, on narrowcasting--that began in the 1960s and continues to the present. Greenfield also examines the formation of the FCC, focuses on radio's losing battle with television--the main reason for its decline beginning in 1949--and provides a cogent analysis of the creative thinking underlying not only the concept of today's narrowcasting, but of the current ascendancy of the local station as well. Also addresses are the Press/Radio war of the 1930s, the rise of radio drama, and the enormous influence of rock and roll music on the evolution of radio programming after World War II. A chapter is devoted to networks and station histories and another to issues such as women in radio, advertising, religious broadcasting, and armed forces radio. A list of selected archival collections, radio organizations and associations, and an index complete the volume. Primarily designed for students, scholars, and researchers in the fields of broadcasting and popular culture, this reference deserves a place in university libraries but also has a wealth of information of interest to radio and television professionals. And, because its resources include popular and fan materials as well as standard academic and professional publications, Radio: A Reference Guide provides an insightful overview for any informed generalist with an interest in

this important facet of American popular culture.

The A to Z of Old Time Radio Nov 03 2020 The term Old Time Radio refers to the relatively brief period from 1926, when the National Broadcasting Company first began network broadcasting, until approximately 1960, when television became the dominant communication medium in the United States. During this time, radio was as popular and ubiquitous as television

is today. It was amazingly varied in the types of programming it offered; many characters and programs were so popular that virtually everyone was familiar with them. Even today, recorded versions of these programs are still extremely popular and widely available, both from commercial outlets and from hobbyists. Behind the production of these programs was a complex technological and financial infrastructure that had to be developed virtually from scratch in a world unaccustomed to the rapid communication and technological marvels that we take for granted today. The A to Z of Old Time Radio provides essential facts and information on the Golden Age of Radio. This is accomplished through the use of a chronology, an introductory essay, a bibliography, and hundreds of cross-referenced dictionary entries on the radio networks, programs, directors, producers, writers, actors, radio series, and radio stations. Entries on your favorite shows-The Lone Ranger, The Shadow, Dragnet, and Suspense-and actors-Bob Hope, George Burns, Gracie Allen, and Edgar Bergen-will have you jumping from one entry to the next as you relive old favorites and discover hidden treasures from the Golden Age of Radio.
