After surveying England's evolving theories of representative politics and individual and collective secretive practices, Pionke traces the intersection of democracy and secrecy through a series of case histories. Using works by Thomas Carlyle, Wilkie Collins, Charles Dickens, Benjamin Disraeli, John Henry Newman, and others, along with periodicals, histories, and parliamentary documents of the period, he shows the rhetorical prominence of groups such as the Freemasons, the Thugs, the Carbonari, the Fenians, and the Jesuits in Victorian democratic discourse. --book cover. The New Cambridge English Course is a course teachers and students can rely on to cover the complete range and depth of language and skills needed from beginner to upper-intermediate level. Each level is designed to provide at least 72 hours of class work using the Student's Book, with additional self-study material provided in the Practice Book. The course has a proven multi-syllabus approach which integrates work on all the vital aspects of language study: grammar, vocabulary, pronunciation, skills, notions and functions. How do schools worldwide treat the Holocaust as a subject? In which countries does the Holocaust form part of classroom teaching? Are representations of the Holocaust always accurate, balanced and unprejudiced in curricula and textbooks? This study, carried out by UNESCO and the Georg Eckert Institute for International Textbook Research, compares for the first time representations of the Holocaust in school textbooks and national curricula. Drawing on data which includes countries in which there exists no or little information about representations of the Holocaust, the study shows where the Holocaust is established in official guidelines, and contains a close textbook study, focusing on the comprehensiveness and accuracy of representations and historical narratives. The book highlights evolving practices worldwide and thus provides education stakeholders with comprehensive documentation about current trends in curricula directives and textbook representations of the Holocaust. It further formulates recommendations that will help policy-makers provide the educational means by which pupils may develop Holocaust literacy. The S. Chand NCERT Companion Series is a set of Practice Books designed to provide additional practice to the users of the NCERT textbooks. The NCERT English Practice Books 1-8 serve as companions to NCERT's English Textbooks: Marigold (classes 1-5), Honeysuckle, Honeycomb and Honeydew textbooks (classes 6, 7 and 8 respectively). The practice material has been placed in the form of worksheets. These worksheets are designed to provide ample opportunities to the learner to think, analyze and appreciate the English language independently. The present book is specially published for the aspirants of 'SSCCGL (Finance and Economics) TIERII Exam (PaperIV)'. Based on the Latest Pattern of Exam, the book also comprises a Previous Year's Solved Paper for aspirants to be familiar with the exam pattern and the type of questions asked and their answers. Detailed Explanatory Answers have also been provided for the Selected Questions for Better Understanding of readers. The book contains Specialised Study and Practice Material with numerous Multiple Choice Questions/Answers on specific subjects with all the chapters & topics important from the point of view of the exam. All the practice questions in the book have been modelled on previous exam questions and solved by respective subject experts. The book is highly recommended for the aspirants to Sharpen their Problem Solving Skills with thorough practice of actual exam style questions and numerous practice questions provided in the book, and prepare them to face the exam with Confidence, Successfully. While the specialised study and practice material of this book Paves the Way for your Success, your own diligent study and practice with it will ensure you a Successful Career. This Dictionary of Language Testing contains some 600 entries on language assessment The title of the book is 3 D PLATFORM UPLIFTS STUDENTS COMPETENCY FOR PLACEMENT. This is a simple, systematic and logical technique which is applicable to MBA and BBA students who undergo management courses with an aim to be suitably placed. In keeping with the drastic changes, a sort of revolution in the fields of management and technology, and wide range of opportunities available for students to learn has led to a high degree of competition and dynamic and challenging environment which poses direct impact on students' placement opportunities. In this book, a unique approach is applied, which initially introduces managerial skills to students with the view to clear the fundamental concepts. The students are subsequently put into the next process of adding value in these skills to understand the practical application in business operations. This book introduces new methods like, classroom learning, self-development, knowledge folder, group formation, looking beyond syllabus, creating own library, summer training projects, etc. These activities create a positive environment, inducing a self-motivation culture among the students to put in their best. Distinguishing features of this book: Various managerial skills and business operations are explained on different 3D platforms. The student has to select the appropriate platform which automatically guides the student through the complete process of developing competency. The method of selecting the platform is provided in this book. In addition, this book explains the placement process, student placement strategy, interview management and how a student can justify competency level in the interview for the applied job profile. A world list of books in the English language. These essays and papers constitute a first comprehensive and authoritative stock-taking of German-Australian relations since the end of the Second World War. Studies by scholars, diplomats, artists and public servants address themselves to a wide range of subjects, including German-Australian Political Relations, Foreign Policy Perspectives on the Australia-Germany Partnership, German Migration to Australia, German-born Artists and Academics on the Fifth Continent, The Reception of Aboriginal Art in Germany, German-Australian Academic Relations, Comparisons of the Political Economies of Germany and Australia, German Business and Business German in Australia, Images of Australia in German Cinema and a Critical Review of the Role and Future of Germanistik at Australian Universities. One of the greatest challenges for English language arts teachers today is the call to engage students in more complex texts. Tim Gillespie, who has taught in public schools for almost four decades, has found the lenses of literary criticism a powerful tool for helping students tackle challenging literary texts. Tim breaks down the dense language of critical theory into clear, lively, and thorough explanations of many schools of critical thought---reader response, biographical, historical, psychological, archetypal, genre based, moral, philosophical, feminist, political, formalist, and postmodern. Doing Literary Criticism gives each theory its own chapter with a brief, teacher-friendly overview and a history of the approach, along with an in-depth discussion of its benefits and limitations. Each chapter also includes ideas for classroom practices and activities. Using stories from his own English classes--from alternative programs to advance placement and everything in between--Tim provides a wealth of specific classroom-tested suggestions for discussion, essay and research paper topics, recommended texts, exam questions, and more. The accompanying CD offers abbreviated overviews of each theory (designed to be used as classroom handouts, examples of student work, collections of quotes to stimulate discussion and writing, an extended history of women writers, and much more. Ultimately, Doing Literary Criticism offers teachers a rich set of materials and tools to help their students become more confident and able readers, writers, and critical thinkers. THE idea of collecting these essays occurred to me when, in the leisure of retirement, I scanned some of my own books and found that two of the more widely read show a startling change of attitude to some of the fundamental concepts of science. These are Einstein's Theory of Relativity of 1921 and the American edition of The Restless Universe of 1951. I have taken the introduction of as the former the first item of this collection, the postscript to the latter as its last. These books agree in the relativistic concept of space and time, but differ in many other fundamental notions. In 1921 I believed--and I shared this belief with most of my contemporary physicists--that science produced an objective knowledge of the world, which is governed by deterministic laws. The scientific method seemed to me superior to other, more subjective ways of forming a picture of the world philosophy, poetry, and religion; and I even thought the unambiguous language of science to be a step towards a better understanding between human beings. In 1951 I believed in none of these things. The border between object and subject had been blurred, deterministic laws had been replaced by statistical ones, and although physicists understood one another well enough across all national frontiers they had contributed nothing to a better understanding of nations, but had helped in inventing and applying the most horrible weapons of destruction. This book offers explanations of grammatical terms and functions as they apply to English and German. It illustrates the similarities and differences between the two languages and stresses the common linguistic pitfalls for English speakers. It includes review exercises with answers at the back. The Enrich English is a modern and challenging course, designed to expose learners to real-life situations that enable them to experience and respond to language in different scenarios. The books aim at the development of communicative proficiency through a graded syllabus of structural patterns, and the rich and varied contexts of English literature. Social Sciences For Class IX Building on his award-winning research, Christian Mauder's In the Sultan's Salon constitutes the first detailed study of the intellectual, religious, and political culture of the court of the Mamluk Sultanate (1250–1517), one of the most important polities in Islamic history. Each chapter in the syllabus is divided into 3 main categories of cards; Revise, Memorize & Test. The Revision Cards will provide a quick recap of the key facts in a systematic manner. The Memorize Cards will help in better retention of important formulae, definitions, equations, scientific term and much more. The Test Card will help you with quick evaluation of each topic based on the trending Typologies of Questions. It's important to be aware of your strong & weak subject areas. There is a specific 4th category of Practical Cards (Science & Math) & Map Cards (Social Science) included. Annotation Focusing on the English language, this comprehensive and accessible introduction to semantics explores how languages organize and express meaning through words, parts of words and sentences. This title available in eBook format. Click here for more information. Visit our eBookstore at: www.ebookstore.tandf.co.uk. What is the current state of discussion in Cultural History? Which European institutions engage exclusively in Cultural History and which topics do they address? And how will Cultural History develop in the future? These and other questions are raised by European scholars in the

discussion of Institutions, Themes and Perspectives of Cultural History in this volume. It provides a profound overview of contemporary developments in Scandinavia, Finland, Great Britain, Latvia, Poland, Hungary, Austria, Switzerland, Germany, Italy and Spain. Story-based exam preparation material for students taking the Cambridge Young Learners Movers Tests. This book contains ten stories with accompanying activities that check learners' comprehension, provide grammar and vocabulary practice, and let them try out exam-style questions.--From back cover. "This book provides the first ever overview of the history and development of Islam in Afghanistan. It covers every era from the conversion of Afghanistan through the medieval and early modern periods to the present day. Based on primary sources in Arabic, Persian, Pashto, Urdu and Uzbek, its depth and scope of coverage is unrivalled by any existing publication on Afghanistan. As well as state-sponsored religion, the chapters cover such issues as the rise of Sufism, Sharia, women's religiosity, transnational Islamism and the Taliban. Islam has been one of the most influential social and political forces in Afghan history. Providing idioms and organizations for both anti-state and anti-foreign mobilization, Islam has proven to be a vital socio-political resource in modern Afghanistan. Even as it has been deployed as the national cement of a multi-ethnic 'Emirate' and then 'Islamic Republic,' Islam has been no less a destabilizing force in dividing Afghan society. Yet despite the universal scholarly recognition of the centrality of Islam to Afghan history, its developmental trajectories have received relatively little sustained attention outside monographs and essays devoted to particular moments or movements. To help develop a more comprehensive, comparative and developmental picture of Afghanistan's Islam from the eighth century to the present, this edited volume brings together specialists on different periods, regions and languages. Each chapter forms a case study 'snapshot' of the Islamic beliefs, practices, institutions and authorities of a particular time and place in Afghanistan"--Provided by publisher

The second edition of this text presents an overview of power generation and discusses the different types of equipment used in a steam thermal power generation unit. The book describes various conventional and non-conventional energy sources. It elaborates on the instrumentation and control of water-steam and fuel-air flue gas circuits along with optimization of combustion. The text also deals with the power plant management system including the combustion process, boiler efficiency calculation, and maintenance and safety aspects. In addition, the book explains Supervisory Control and Data Acquisition (SCADA) system as well as turbine monitoring and control. This book is designed for the undergraduate students of electronics and instrumentation engineering and electrical and electronics engineering.

New To This Edition

- A new chapter on Nuclear Power Plant Instrumentation is added, which elaborates how electricity is generated in a Nuclear Power Plant.
- Includes numerous figures to clarify the concepts.
- Gives a number of worked-out problems to help students enhance their learning skills.
- Provides chapter-end exercises to enable students to test their understanding of the subject.

This third edition of **Wedding Planning and Management: Consultancy for Diverse Clients** provides students, consultants, engaged couples, vendors and scholars with a comprehensive introduction to the business of weddings. Looking through an event management lens, this is the only book to thoroughly explore the fundamentals of weddings, including historical and cultural foundations, practice and the business of wedding planning, in one volume. Diversity and inclusivity are emphasized through the integration of wedding traditions from cultures around the globe and international case studies that inspire and set standards for best practice. Key features of the third edition include: Updated research reflecting trends in areas such as technology, social media, marriage equality legislation, LGBTQ+ weddings, celebrity influences, destination weddings, DIY essentials and planning eco-friendly weddings. Cutting-edge innovations in areas such as "green" venues, themed menus, fusion stationery, sustainable floral décor and distinctive site layout, all of which are highlighted by top wedding vendors. Budget management tips, timeline specifics and guidelines for starting and marketing a wedding consulting business. Over 100 international case studies exploring cultural traditions, vendor relations and best practice. A companion website for instructors, including updated PowerPoint slides, syllabus guidelines, real-world assignments and a comprehensive test bank. This full-color book is visually stunning, with over 150 images by top wedding photojournalist Rodney Bailey. End-of-chapter checklists, review questions and practical scenarios support readers' knowledge as they progress. Maggie Daniels and Carrie Wosicki bring a combination of over 45 years of industry practice and teaching experience. They have written a book that is the ideal guide to successful wedding planning and management.

The Acquisition of German: Introducing Organic Grammar brings together work on the acquisition of German from over four decades of child L1 and immigrant L2 learner studies. The book's major feature is new longitudinal data from three secondary school students who began an exchange year in Germany with no German knowledge and attained fluency. Their naturalistic acquisition process — with a succession of stages described for the first time in L2 acquisition — is highly similar to that of younger learners. This has important implications for German teaching and for the theory of Universal Grammar and acquisition. Organic Grammar, a variant of generative syntax, is offered as a practical alternative to Chomsky's Minimalism. The analysis focuses on extensive monthly samples of the three students' German development in an input-rich environment. Similar to previous studies, the teenagers build syntactic structure from the bottom up. Two acquired correct word order by the end of the year, the third, who had greater conscious awareness of German grammar, had a divergent route of development, suggesting that language awareness can alter a natural developmental path. The results are addressed in light of recent debates in child-adult differences.

Friends of the Earth is a carefully graded Environmental Studies series for classes 1 to 5. The series adheres to the National Curriculum Framework 2005 and the books have been designed in accordance with the latest guidelines laid down by the NCERT. This practical book grows out of a recent report written by the RAND Reading Study Group (RRSG), which proposed a national research agenda in the area of reading comprehension. Here, RRSg members have expanded on their findings and translated them into clear recommendations to inform practice. Teachers gain the latest knowledge about how students learn to comprehend texts and what can be done to improve the quality of instruction in this essential domain. From leading literacy scholars, the book explains research-based ways to:

- *Plan effective instruction for students at all grade levels
- *Meet the comprehension needs of English-language learners
- *Promote adolescents' comprehension of subject-area texts
- *Understand the complexities of comprehension assessment
- *Get optimal benefits from instructional technologies
- *And much more!
