Narratives of East Asian Women Teachers of English Nov 15 2021 This book is a powerful narrative of how six women experienced their lives alongside their desire to overcome the challenging and empowering nature of the English language. The volume shares who they are as transnational and mobile women living in the midst of linguistic privilege and marginalization. It is one outcome of a research project and the lived experiences which surround and influence (and were influenced by) it. The author documents how she and her research partners began studying what had drawn them to US TESOL programs, and how English was and is a symbol of power and privilege, a symbol of educational access and a pursuit of equity, yet, at times, is also a symbol of linguistic marginalization.

Description and Narrative in Middle English Alliterative Poetry Aug 01 2020 The characteristic alliterative poem of the 14th and 15th centuries tells a story of incident and adventure: it is pre-eminently the poetry of narrative. Yet it is also, more than any other kind of medieval verse, remarkable for passages of vivid description, taking advantage of the extraordinary rich verbal resources of the alliterative poets and the characteristic strengths of the alliterative line. Memorable examples are the green chapel in Sir Gawain and the Green Knight, the storm at sea in Patience, the dream-landscape in Pearl, and the mysterious tomb in St Erkenwald; there are violent battle-scenes, descriptions of hunting and hawking, beautiful meadows and terrifying mountains, purling streams and wild rivers. Here is a seeming contradiction, or at least a tension that needs to be explored. The descriptive passages are digressions that interrupt the narrative; the story must pause to take in a visual effect. In Description and Narrative in Middle English Alliterative Poetry, Thorlac Turville-Petre explores this relationship between description and narrative, and the contribution of description to the narrative. Passages from all the major alliterative poems are analysed, and translated as necessary, so that the book may meet the needs of students as well as scholars familiar with the language and the topics discussed.

Everyday Saints and the Art of Narrative in the South English Legendary Dec 05 2020 Anne Thompson here gives the fullest account and explanation to date of the diversity of the more than sixty manuscripts of the South English Legendary, a late thirteenth-century collection of lively verse lives of saints, in a southern English dialect. The importance of the SEL to hagiographic and cultural studies has been increasingly acknowledged in recent years. Without denying the legendaries' religious purpose, this book looks at the way SEL narratives reflect and address the complex, intertwined tapestry”political, social, religious”of Edward I's England, while retaining a strong emphasis on the craft of story-telling. Thompson shows the SEL to be a fresh and exciting early example of popular vernacular literature. Firmly grounded in rural and small town life of the 1270s to 1290s in the west of England, it is uniquely significant for any understanding of that culture.

The Stories of English May 02 2023 A groundbreaking history of worldwide English in all its dialects, differences, and linguistic delights: "Informative . . . distinctive . . . a spirited celebration." —The Guardian In this "well-informed and appealing" work (Publishers Weekly), David Crystal puts aside the usual focus on "standard" English, and instead provides a startlingly original view of where the richness, creativity, and diversity of the language truly lies—in the accents and dialects of nonstandard English users all over the world. Whatever their regional, social, or ethnic background, each group has a story worth telling, whether it is in Scotland or Somerset, South Africa or Singapore. He reminds us that for several hundred wonderful years, there was no such thing as "incorrect" English—and traces the evolution of the language from a few thousand Anglo-Saxons to the 1.5 billion people who speak it today. Moving from Beowulf to Chaucer to Shakespeare to Dickens and the present day, Crystal puts regional speech and writing at center stage, giving a sense of the social realities behind the development of English. This significant shift in perspective enables us to understand for the first time the importance of everyday, previously marginalized, voices in our language—and provides an argument too for the way English should be taught in the future. "A work of impeccable scholarship [that] could easily serve as a standard textbook for students of linguistics, but Mr. Crystal, reaching out to a more general audience, recognizes that even the most avid reader might flinch at the sections on Old Norse grammatical influence. Cleverly, he has sprinkled the book with little digressions, set apart in boxes, that address historical mysteries, strange loanwords, interesting etymologies and the like." —The New York Times "Learned and often provocative . . . demonstrates repeatedly that common conceptions about language are often historically inaccurate—split infinitives bothered no one until recently (likewise sentence-ending prepositions)." —Kirkus Reviews (starred review) "Simply the best introductory history of the English language family that we have. The plan of the book is ingenious, the writing lively, the exposition clear, and the scholarly standard uncompromisingly high." —J.M. Coetzee, winner of the Nobel Prize in Literature

Narrative in English Conversation Aug 13 2021 Storytelling is a fundamental mode of everyday interaction. This book is based upon the Narrative Corpus (NC), a specialized corpus of naturally occurring narratives, and provides new paths for its study. Christoph Rühlemann uses the NC's narrative-specific annotation and XPath and XQuery, query languages that allow the retrieval of complex data structures, to facilitate large-scale quantitative investigations into how narrators and recipients collaborate in storytelling. Empirical analyses are validated using R, a programming language and environment for statistical computing and graphics. Using this unique data and methodological base, Rühlemann reveals new insights, including the discovery of turntaking patterns specific to narrative, the first investigation of textual colligation in spoken data, the unearthing of how speech reports, as discourse units, form striking patterns at utterance level, and the identification of the story climax as the sequential context in which recipient dialogue is preferentially positioned.

Narrative and Critical History of America: The English and French in North America 1689-1763 Dec 25 2019 THE story of the French occupation in America is not that of a people slowly moulding itself into a nation. In France there was no state but the king; in Canada there could be none but the governor. Events cluster around the lives of individuals. According to the discretion of the leaders the prospects of the colony rise and fall. Stories of the machinations of priests at Quebec and at Montreal, of their heroic sufferings at the hands of the Hurons and the Iroquois, and of individual deeds of valor performed by soldiers, fill the pages of the record. The prosperity of the colony rested upon the fate of a single industry,—the trade in peltries. In pursuit of this, the hardy trader braved the danger from lurking savage, shot the boiling rapids of the river in his light bark canoe, ventured upon the broad bosom of the treacherous lake, and patiently endured sufferings from cold in winter and from the myriad forms of insect life which infest the forests in summer. To him the hazard of the adventure was as attractive as the promised reward. The sturdy agriculturist planted his seed each year in dread lest the fierce war-cry of the Iroquois should sound in his ear, and the sharp, sudden attack drive him from his work. He reaped his harvest with urgent haste, ever expectant of interruption from the same source, always doubtful as to the result until the crop was fairly housed. The brief season of the Canadian summer, the weary winter, the hazards of the crop, the feudal tenure of the soil,—all conspired to make the life of the farmer full of hardship and barren of promise. The sons of the early settlers drifted to the woods as independent hunters and traders. The parent State across the water, which undertook to say who might trade, and where and how the traffic should be carried on, looked upon this way of living as piratical. To suppress the crime, edicts were promulgated from Versailles and threats were thundered from Quebec. Still, the temptation to engage in what Parkman calls the “hardy, adventurous, lawless, fascinating fur-trade” was much greater than to enter upon the dull monotony of ploughing, sowing, and reaping. The Iroquois, alike the enemies of farmer and of trader, bestowed their malice impartially upon the two callings, so that the risk was fairly divided. It was not surprising that the life of the fur-trader “proved more attractive, absorbed the enterprise of the colony, and drained the life-sap from other branches of commerce.” It was inevitable, with the young men wandering off to the woods, and with the farmers habitually harassed during both seed-time and harvest, that the colony should at times be unable to produce even grain enough for its own use, and that there should occasionally be actual suffering from lack of food. It often happened that the services of all the strong men were required to bear arms in the field, and that there remained upon the farms only old men, women, and children to reap the harvest. Under such circumstances want was sure to follow during the winter months. Such was the condition of affairs in 1700. The grim figure of Frontenac had passed finally from the stage of Canadian politics. On his return, in 1689, he had found the name of Frenchman a mockery and a taunt. The Iroquois sounded their threats under the very walls of the French forts. When, in 1698, the old warrior died, he was again their “Onontio,” and they were his children. The account of what he had done during those years was the history of Canada for the time. His vigorous measures had restored the self-respect of his countrymen, and had inspired with wholesome fear the wily savages who threatened the natural path of his fur-trade. The tax upon the people, however, had been frightful. A French population of less than twelve thousand had been called upon to defend a frontier of hundreds of miles against the attacks of a jealous and warlike confederacy of Indians, who, in addition to their own sagacious views upon the policy of maintaining these wars, were inspired thereto by the great rival of France behind them.

Chinese Language Narration Aug 25 2022 Chinese Language Narration: Culture, cognition, and emotion is a collection of papers presenting original research on narration in Mandarin, especially as it contrasts to what is known regarding narration in English. One chapter addresses dinner table conversation between Chinese immigrant parents and children in the United States compared to non-immigrant peers. Other chapters consider evaluation patterns in Mandarin versus English, referencing strategies, coherence patterns, socioeconomic differences among Taiwanese Mandarin-speaking children, and differences in narration due to Specific Language Impairment and schizophrenia. Several chapters address developmental concerns. Distinctive aspects of narration in Mandarin are linked to larger issues of autobiographical memory. Mandarin is spoken by far more people than any other language, yet narration in this language has received notably less attention than narration in Western languages. This collective effort is a critical addition to our understanding of cross-cultural similarities and differences in how people make sense of experiences through narrative.

World Building in Spanish and English Spoken Narratives Nov 27 2022 Text World Theory is a powerful framework for discourse analysis that, thus far, has only been used in monolingual Anglophone stylistic analyses. This work adapts Text World Theory for the analysis of Spanish discourse, and in doing so suggests some improvements to the way in which it deals with discourse - in particular, with direct speech and conditional expressions. Furthermore, it applies Text World Theory in a novel way, searching not for style in language, but for the style of a language. Focusing principally on deixis and modality, the author examines whether Spanish speakers and English speakers construct the narrative text-world in any patterned ways. To do so, the 'frog story' methodology is employed, eliciting spoken narratives from native adult speakers of both languages by means of a children's picture book. These narratives are transcribed and subjected to a qualitative text-world analysis, which is supported with a quantitative corpus analysis. The results reveal contrasts in Spanish and English speakers' use of modality and deixis in building the same narrative text-world, and are relevant to scholars working in language typology, cross-cultural pragmatics and translation studies. These novel applications of the Text World Theory push the boundaries of stylistics in new directions, broadening the focus from monolingual texts to languages at large.
