Pests in the City Oct 21 2022 From tenements to alleyways to latrines, twentieth-century American cities created spaces where pests flourished and people struggled for healthy living conditions. In *Pests in the City*, Dawn Day Biehler argues that the urban ecologies that supported pests were shaped not only by the physical features of cities but also by social inequalities, housing policies, and ideas about domestic space. Community activists and social reformers strived to control pests in cities such as Washington, DC, Chicago, Baltimore, New York, and Milwaukee, but such efforts fell short when authorities blamed families and neighborhood culture for infestations rather than attacking racial segregation or urban disinvestment. Pest-control campaigns tended to target public or private spaces, but pests and pesticides moved readily across the porous boundaries between homes and neighborhoods. This story of flies, bedbugs, cockroaches, and rats reveals that such creatures thrived on lax code enforcement and the marginalization of the poor, immigrants, and people of color. As Biehler shows, urban pests have remained a persistent problem at the intersection of public health, politics, and environmental justice, even amid promises of modernity and sustainability in American cities. The Country in the City May 24 2020 Winner of the Western History Association's 2009 Hal K. Rothman Award Finalist in the Western Writers of America Spur Award for the Western Nonfiction Contemporary category (2008). The San Francisco Bay Area is one of the world's most beautiful cities. Despite a population of 7 million people, it is more greensward than asphalt jungle, more open space than hardscape. A vast quilt of countryside is tucked into the folds of the metropolis, stitched from fields, farms and woodlands, mines, creeks, and wetlands. In *The Country in the City*, Richard Walker tells the story of how the jigsaw geography of this greenbelt has been set into place. The Bay Area's civic landscape has been fought over acre by acre, an arduous process requiring popular mobilization, political will, and hard work. Its most cherished environments--Mount Tamalpais, Napa Valley, San Francisco Bay, Point Reyes, Mount Diablo, the Pacific coast--have engendered some

of the fiercest environmental battles in the country and have made the region a leader in green ideas and organizations. This book tells how the Bay Area got its green grove: from the stirrings of conservation in the time of John Muir to origins of the recreational parks and coastal preserves in the early twentieth century, from the fight to stop bay fill and control suburban growth after the Second World War to securing conservation easements and stopping toxic pollution in our times. Here, modern environmentalism first became a mass political movement in the 1960s, with the sudden blooming of the Sierra Club and Save the Bay, and it remains a global center of environmentalism to this day. Green values have been a pillar of Bay Area life and politics for more than a century. It is an environmentalism grounded in local places and personal concerns, close to the heart of the city. Yet this vision of what a city should be has always been informed by liberal, even utopian, ideas of nature, planning, government, and democracy. In the end, green is one of the primary colors in the flag of the Left Coast, where green enthusiasms, like open space, are built into the fabric of urban life. Written in a lively and accessible style, *The Country in the City* will be of interest to general readers and environmental activists. At the same time, it speaks to fundamental debates in environmental history, urban planning, and geography.

Events in the City Mar 02 2021 Cities are staging more events than ever. Within this macro-trend, there is another less acknowledged trend: more events are being staged in public spaces. Some events have always been staged in parks, streets and squares, but in recent years events have been taken out of traditional venues and staged in prominent urban spaces. This is favoured by organisers seeking more memorable and more spectacular events, but also by authorities who want to animate urban space and make it more visible. This book explains these trends and outlines the implications for public spaces. Events play a positive role in our cities, but turning public spaces into venues is often controversial. Events can denigrate as well as animate city space; they are part of the commercialisation, privatisation and securitisation of public space noted by commentators in recent years. The book focuses on examples from London in particular, but it also covers a range of other cities from the developed world. Events at different scales are addressed and, there is dedicated coverage of sports events and cultural events. This topical and timely volume provides valuable material for higher level students, researchers and

academics from events studies, urban studies and development studies.

[Holy Hip Hop in the City of Angels](#) Aug 27 2020 A free ebook version of this title is available through Luminos, University of California Press's Open Access publishing program for monographs. Visit www.luminosoa.org to learn more. In the 1990s, Los Angeles was home to numerous radical social and environmental eruptions. In the face of several major

earthquakes and floods, riots and economic insecurity, police brutality and mass incarceration, some young black Angelenos turned to holy hip hop—a movement merging Christianity and hip hop culture—to “save” themselves and the city. Converting street corners to open-air churches and gangsta rap beats into anthems of praise, holy hip hoppers used gospel rap to navigate complicated social and spiritual realities and to transform the Southland’s fractured terrains into musical Zions. Armed with beats, rhymes, and bibles, they journeyed through black Lutheran congregations, prison ministries, African churches, reggae dancehalls, hip hop clubs, Nation of Islam meetings, and Black Lives Matter marches. Zanfagna’s fascinating ethnography provides a contemporary and unique view of black LA, offering a much-needed perspective on how music and religion intertwine in people's everyday experiences.

The Death and Life of Great American Cities Jan 20 2020 Thirty years after its publication, *The Death and Life of Great American Cities* was described by *The New York Times* as "perhaps the most influential single work in the history of town planning....[It] can also be seen in a much larger context. It is first of all a work of literature; the descriptions of street life as a kind of ballet and the biting satiric account of traditional planning theory can still be read for pleasure even by those who

long ago absorbed and appropriated the book's arguments." Jane Jacobs, an editor and writer on architecture in New York City in the early sixties, argued that urban diversity and vitality were being destroyed by powerful architects and city planners. Rigorous, sane, and delightfully epigrammatic, Jacobs's small masterpiece is a blueprint for the humanistic management of cities. It is sensible, knowledgeable, readable, indispensable. The author has written a new foreword for this Modern Library edition.

But this is a border crossing like no other, a journey as psychic as it is physical, a seeing of the unseen. With Ul Qoman detective Qussim Dhatt, Borlú is enmeshed in a sordid underworld of nationalists intent on destroying their neighboring city, and unificationists who dream of dissolving the two into one. As the detectives uncover the dead woman's secrets, they begin to suspect a truth that could cost them more than their lives. What stands against them are murderous powers in Beszel and in Ul Qoma: and, most terrifying of all, that which lies between these two cities. **BONUS:** This edition contains a *The City & The City* discussion guide and excerpts from China Miéville's *Kraken* and *Embassytown*.

Narrating the City Nov 29 2020 An analysis of the ways film and media create topographies of cities, architecture, and metropolitan experiences. *Narrating the City* examines how film and related visual media offer insights and commentary on the city as both a constructed object and a lived social experience. It brings together filmmakers, architects, digital artists, designers, and media journalists who critically read, reinterpret, and create narratives of the city. Analyzing a variety of international films and placing them in dialogue with video art, photographic narratives, and emerging digital image-based technologies, the authors explore the expanding range of "mediated" narratives of contemporary architecture and urban culture from both a media and a sociological standpoint. The authors explore how moving-image narratives can create cinematic topographies, presenting familiar cities and modes of seeing in unfamiliar ways. The

authors then turn to the new age of digital image making and consumption, revealing new techniques of representation, mediation, and augmentation of sensorial reality for city dwellers. The book's emphasis on narrative also offers insights into critical societal issues including cultural identity, diversity, memory, and spatial politics, as they are both informed by and represented in various media.

Safe Cycling in the City Sep 27 2020 This is an urban and commuting cyclist's handbook, both inspirational and practical, showing us how to live safer, more enjoyable and healthier lives, both physically and mentally, while reducing our impact on the planet. Author of numerous bestselling bike books, Chris Sidwells, begins with a brief introduction which shows how cycling is already forming a crucial part of future urban transport, good for the environment as well as our health. Current urban transport models, heavily dependent as they are on cars, are unsustainable both in terms of our health and the environment. Cycling offers the perfect mass transport, health and wellbeing solution. As well as being an easy way to improve the fitness of the whole family, with some simple know-how, which Chris shares in this book, it can be perfectly safe even in busy cities. Increasingly, local authorities are seeing the essential role that cycling has to play in transport infrastructure; Chris looks at the many different schemes, both financial and infrastructural, to encourage people onto bikes. Commuting by bike also offers a financial benefit to individuals and societies. Chris shows how to get the right bike for you for commuting and urban cycling, whether that's an electric-assisted bike or pedal-powered only, and how to adjust it properly for your unique build. He looks at cycling clothing and accessories, including helmets, masks, locks and safety equipment. Chris explains how to keep cycling safely despite inclement weather

and the different ways to transport what you need to and from work. A chapter on bike care and maintenance shows how to carry out basic repair jobs like adjusting gears, mending punctures and adjusting brakes. Chris explains cycling skills to give you confidence when cycling, including bike control, braking and how to make the most of your gears. He shows when and how to use the extra power provided by an electric bike and offers encouragement to new and returning cyclists. An extended chapter covers road safety, perhaps the biggest barrier to people commuting by bike. Chris shows how to co-exist safely with other road users and the potential hazards that every cyclist should be aware of. He explains the rules that every cyclist must follow and gives step-by-step guidance on how to carry out manoeuvres on the road. Chris shows how to choose the best route to and from work. He gives details of the various schemes to encourage commuting by bike, including insurance and where to find information. Cycling is regarded by many as the best way to regain and maintain fitness. As well as improving both physical and mental wellbeing, cycling can boost our immune system. Cycling also gives self-sufficiency and enhances self esteem.

Animals in the City Oct 09 2021 This book presents interdisciplinary research to examine the ongoing debates around nonhuman animals in urban spaces. It explores how we can better appreciate and accommodate animals in the city, while also exploring the ecological, health, ethical, and cultural implications of the same. The book addresses seven interrelated themes such as blurred boundaries between the human and the nonhuman, the right of nonhuman species to the city, interactions between the human and nonhuman animals, the fabric of urban space, human and nonhuman complex systems,

and collective welfare that forms the basis of a transspecies urban theory. It explains how a holistic understanding of the city requires that these blurred boundaries are acknowledged and critically examined. Chapters analytically consider the need to bring interspecies relationships to the fore to tackle questions of legitimacy and who has the "right" to the city. These also consider important intersections between the economic, political, social, and cultural aspects of the urban experience. The research contained in this book focuses on the development of an urban theory that would eradicate the divide between humans and other species in cities, and it depicts nonhuman animals as social actors that have voices within urban spaces. With global insights on human–animal relationships in a contemporary context, this book will be useful reading for scholars and students of urban studies, animal sciences, animal law, animals and public policy, anthropology, and environmental studies who are interested in the study of animals in cities.

Drawing on a range of analytical perspectives, the contributions examine spatial practices in Muslim societies from an interdisciplinary perspective, an approach which has been widely neglected both in Islamic studies and social sciences.

An Echo in the City Jul 06 2021 Two star-crossed teenagers fall in love during the 2019 Hong Kong protests in this searing YA contemporary debut about coming of age in a time of change. Sixteen-year-old Phoenix bombs her SATs, jeopardizing her dream of attending Yale in the United States. But when she goes to a Hong Kong protest with her brother and begins to document the growing movement, she realizes there might be more to life than grades and test scores. Kai is a seventeen-year-old artist from mainland China. When his mother dies, he's forced to move back to Hong Kong and trains to become a police officer, just like his estranged father. When he accidentally swaps phones with Phoenix and discovers she's part of a secret protest network, he's given an assignment: infiltrate the group and report their plans back to the police. As Kai and Phoenix join the struggle for the future of Hong Kong, a spark forms between them, pulling them together even as their separate worlds try to force them apart. Yet their relationship, built on secrets and deception, is on a collision course for disaster. When the lies fall away, will they still love the person left behind?

Small in the City Nov 10 2021 It can be a little scary to be small in a big city, but this child has some good advice for a very special friend in need. Winner of the Ezra Jack Keats Award A New York Times/New York Public Library Best Illustrated Book of the Year Winner of the CILIP Kate Greenaway Medal It can be a little scary to be small in a big city, but it helps to know you're not alone. When you're small in the city, people don't see you, and loud sounds can scare you, and knowing what to do is sometimes hard. But this little kid knows what it's like, and knows the neighborhood. And a little friendly advice can go a long way. Alleys can be good shortcuts, but some are too dark. Or, there are lots of good hiding places in the city, like under a mulberry bush or up a walnut tree. And, if the city gets to be too much, you're always welcome home, where it's safe and quiet. In the first book that he has both written and illustrated, award-winning artist Sydney Smith spins a quiet, contemplative tale about seeing a big world through little eyes.
