A cryptic murder pulls a former soldier turned
financial analyst deep into the corruption and
menace that prowl beneath the opulent world
of finance, in this #1 New York Times
bestselling thriller from David Baldacci. Every
day without fail, Travis Devine puts on a cheap
suit, grabs his faux-leather briefcase, and
boards the 6:20 commuter train to Manhattan,
where he works as an entry-level analyst at the
city's most prestigious investment firm. In the
mornings, he gazes out the train window at the
lavish homes of the uberwealthy, dreaming
about joining their ranks. In the evenings, he
listens to the fiscal news on his phone, already
preparing for the next grueling day in the
cutthroat realm of finance. Then one morning
Devine's tedious routine is shattered by an
anonymous email: She is dead. Sara Ewes,
Devine's coworker and former girlfriend, has

been found hanging in a storage room of his
office building—presumably a suicide, at least
for now—prompting the NYPD to come calling
on him. If that wasn't enough, before the day is
out, Devine receives another ominous visit, a
confrontation that threatens to dredge up grim
secrets from his past in the army unless he
participates in a clandestine investigation into
his firm. This treacherous role will take him
from the impossibly glittering lives he once saw
only through a train window, to the darkest
corners of the country's economic halls of
power . . . where something rotten lurks. And
apart from this high-stakes conspiracy, there's
a killer out there with their own agenda, and
Devine is the bull's-eye. Volume 7. "Report of
the Dominion fishery commission on the
fisheries of the province of Ontario, 1893",

Packed with spectacular superlatives, shocking stats, fantastic facts and fun figures, *Science and Stuff* celebrates the simple joy in finding things out. What can cats teach us about the laws of physics? Why was cabbage banned on the International Space Station? (Can you fart in space?) And would a penny dropped from the

Empire State Building really kill someone? (Short answer: No!) But it's not all facts and stats. The feature chapter just for Makers, introduced by our very own mad professor Burnaby Q. Orbax, challenges you to attempt record-breaking science experiments at home, from the fastest Mentos & Soda rocket car to the most slime thrown and caught in a minute! Join us as we rise from the deepest depths of the ocean, where weird glowing fish hunt in the darkness, to the mountaintop observatories where scientists unravel the secrets of the universe.
