Desire is a central concept in Aristotle's ethical and psychological works, but he does not provide us with a systematic treatment of the

notion itself. This book reconstructs the account of desire latent in his various scattered remarks on the subject and analyses its role in his moral psychology. Topics include: the range of states that Aristotle counts as desires (*orexeis*); objects of desire (*orekta*) and the relation between desires and envisaging prospects; desire and the good; Aristotle's three species of desire: *epithumia* (pleasure-based desire), *thumos* (retaliatory desire) and *boulêsis* (good-based desire - in a narrower notion of 'good' than that which connects desire more generally to the good); Aristotle's division of desires into rational and non-rational; Aristotle and some current views on desire; and the role of desire in Aristotle's moral psychology. The book will be of relevance to anyone interested in Aristotle's ethics or psychology. This classic work by one of the most important philosophers and critics of our time charts the genesis and trajectory of the desiring subject from Hegel's formulation in *Phenomenology of Spirit* to its appropriation by

Kojève, Hyppolite, Sartre, Lacan, Deleuze, and Foucault. Judith Butler plots the French reception of Hegel and the successive challenges waged against his metaphysics and view of the subject, all while revealing ambiguities within his position. The result is a sophisticated reconsideration of the post-Hegelian tradition that has predominated in modern French thought, and her study remains a provocative and timely intervention in contemporary debates over the unconscious, the powers of subjection, and the subject. Be swept away by passion... with intense drama and compelling plots, these emotionally powerful reads will keep you captivated from beginning to end. Despite his fiancée's betrayal, developer Ryan Beardsley provided for Kelly when he sent her packing. Sexually enlightened embryologist, Savarna, is in a complicated relationship, with two different women, when she is told that she MUST have a baby. Her conservative East Indian American parents are desperate for her to conceive, in

spite of her "not being married". They insist that she is the last in line of a great spiritual lineage. In the process of choosing her lover and having doubts about her ability, or desire to conceive, Savarna begins to question the necessity of biology and lineage within her parents' beliefs and becomes forever fascinated with the process of conception and the definition of family. Threads of Dan Brown (DaVinci Code), Chitra Banerjee Divakaruni (Sister of My Heart) and The L Word (TV series) flavor this colorful tale of awakening, romance and mystery. Drawing from cognitive theories about the metaphorical nature of thought, Gillian Knoll traces the contours of three conceptual metaphors - motion, space and creativity - that shape desire in plays by John Lyly and William Shakespeare. This thesis analyzes medical manuals published in England between 1500 and 1770 to trace developing medical understandings and prescriptive approaches to conception, pregnancy, and childbirth. While there have been plenty of

books written regarding social and religious changes in the reproductive process during the early modern era, there is a dearth of scholarly work focusing on the medical changes which took place in obstetrics over this period. Early modern England was a time of great change in the field of obstetrics as physicians incorporated newly-discovered knowledge about the male and female body, new fields and tools, and new or revived methods into published obstetrical manuals. As men became more prominent in the birthing chamber, instructions in the manuals began to address these men as well. Overall these changes were brought about by changes in the medical field along with changes in culture and religion and the emergence of print culture and rising literacy rates. A dazzling treatise, as erudite and eloquent as Simone de Beauvoir's *The Second Sex* and considerably more sound in its conclusion - TLS "He is an eloquent and practised writer" - *The Independent* (UK) When John desires Mary or Mary desires John, what

does either of them want? What is meant by innocence, passion, love and arousal, desire, perversion and shame? These are just a few of the questions Roger Scruton addresses in this thought-provoking intellectual adventure. Beginning from purely philosophical premises, and ranging over human life, art and institutions, he surveys the entire field of sexuality; equally dissatisfied with puritanism and permissiveness, he argues for a radical break with recent theories. Upholding traditional morality - though in terms that may shock many of its practitioners - his argument gravitates to that which is candid, serene and consoling in the experience of sexual love. Traditional Christian theology has generally treated desire as a dark and negative force intimately related to sin something to be restricted and repressed, closeted and controlled. But, according to LeRon Shults and Jan-Olav Henriksen's *Saving Desire*, we see only part of the picture if we do not also perceive that

desire can be a powerful force for great good. Grounding their work firmly in the experiential realm of human life, the eight eminent theologians contributing to this volume celebrate together the positivity, the sociality, and the physicality of saving desire that is, humankind's innate desire not only for the good life but also, more vitally, for the life-transforming goodness of God. This book examines the various encounters between Jean-Luc Marion and Jacques Derrida on "the gift," considers their many differences on "desire," and demonstrates how these topics hold the keys to some of phenomenology's most pressing structural questions, especially regarding "deconstructive" approaches within the field. The book claims that the topic of desire is a central lynchpin to understanding the two thinkers' conflict over the gift, for the gift is reducible to the "desire to give," which initiates a turn to the topic of "generosity." To what degree might loving also imply giving? How far

might it be suggested that love is reducible to desire and intentionality? It is demonstrated how Derrida (the generative “father” of deconstruction) rejects the possibility of any potential relation between the gift and desire on the account that desire is bound to calculative repetition, economical appropriation, and subject-centered interests that hinder deconstruction. Whereas Marion (a representative of the phenomenological tradition) demands a unique union between the gift and desire, which are both represented in his “reduction to givenness” and “erotic reduction.” The book is the first extensive attempt to contextualize the stark differences between Marion and Derrida within the phenomenological legacy (Husserl, Heidegger, Kant), supplies readers with in-depth accounts of the topics of the gift, love, and desire, and demonstrates another means through which the appearing of phenomena might be understood, namely, according to the generosity of things.

Most philosophers working in moral psychology and practical reason think that either the notion of "good" or the notion of "desire" have central roles to play in our understanding of intentional explanations and practical reasoning. However, philosophers disagree sharply over how we are supposed to understand the notions of "desire" and "good", how these notions relate, and whether both play a significant and independent role in practical reason. In particular, the "Guise of the Good" thesis -- the view that desire (or perhaps intention, or intentional action) always aims at the good - has received renewed attention in the last twenty years. Can one have desire for things that the desirer does not perceive to be good in any, or form intentions to act in way that one does not deem to be good? Does the notion of good play any essential role in an account of deliberation or practical reason? Moreover, philosophers also disagree about the relevant notion of good. Is it a purely formal notion, or does it involve a substantive

conception of the good? Is the primary notion, the notion of the good for a particular agent, or the notion of good simpliciter? Does the relevant notion of good make essential appeal to human nature, or would it in principle extend to all rational beings? While these questions are central in contemporary work in ethics, practical reason, and philosophy of action, they are not new; similar issues were discussed in the ancient period. This volume of essays aims to bring together "systematic" and more historically-oriented work on these issues. Consuming Desire investigates why a science of sex emerged when it did at the turn of the twentieth century and delivers a provocative account of the role of sexology in our contemporary culture. Examining key texts in the theories of sexuality, psychoanalysis, evolution, and economics, Lawrence Birken illuminates the intellectual heritage of sexology and the ways in which it is now being pressed into the service of sexual counterrevolutionaries from both the right and

the left. Desires matter. What are desires? Many believe that desire is a motivational state: desiring is being disposed to act. This conception aligns with the functionalist approach to desire and the standard account of desire's role in explaining action. According to a second influential approach, however, desire is first and foremost an evaluation: desiring is representing something as good. After all, we seem to desire things under the guise of the good. Which understanding of desire is more accurate? Is the guise of the good even right to assume? Should we adopt an alternative picture that emphasizes desire's deontic nature? What do neuroscientific studies suggest? Essays in the first section of the volume are devoted to these questions, and to the puzzle of desire's essence. In the second part of the volume, essays investigate some implications that the various conceptions of desire have on a number of fundamental issues. For example, why are inconsistent desires problematic? What is

desire's role in practical deliberation? How do we know what we want? This volume will contribute to the emergence of a fruitful debate on a neglected, albeit crucial, dimension of the mind. They married for the sake of the baby. Will they stay together for love? Bryony fell for hotelier Rafael when he courted her for her beachfront real estate. Then he disappeared. Now, a very pregnant Bryony's in New York looking for answers - but Rafael has none and he doesn't remember Bryony! Their solution: return to the island where they met and relive the nights in question - until he remembers everything... What's riskier to a good girl's career, a fling with a bad boy or having his baby? Pippa should have known better. She knew that Cameron had built a fortress around his feelings. Yet here she was, pregnant, after an evening of passion with the enigmatic entrepreneur. He would surely offer her a financial arrangement. But given his tragic past would he ever want more? This book focuses on

a problem frequently encountered by sex and family therapists, psychologists and primary care physicians: women's sexual desire or lack thereof. The book covers both research and clinical interventions, and outlines factors that contribute to the decline in sexual desire in women of various ages. The text describes therapeutic steps which can be undertaken with the guidance of a therapist or by the woman herself. "This sheikh must marry the mother of his child! Twenty-four hours before he's to formally announce his engagement to the bride his father has chosen, Sheikh Kadin Gabriel ben Kadir gives in to a rare moment of temptation. But when one night with Sarah Duval leads to pregnancy, he vows he'll be part of mother and child's life. His plan: replace one political marriage for another. He'll wed the captivating history teacher who arouses such powerful desire and keep his heart out of the bargain. But Sarah wants a soul mate. How can she promise forever to a man who has sworn never to be

ruled by love?"--Page 4 of cover. Finally, I consider Hobbes's attempt to ground his psychological concept of desire for power in his scientific-metaphysical concept of motion-power. The Conception is a novel based on the real-life desire of young people in Nigeria to travel outside their country by any means necessary to become rich. Some forcefully seize control and sell off their parents' properties to fulfill their desires. But the results can leave aged parents homeless. Frank is one such ambitious young man. Tall and handsomely built he is the youngest child of Pa Edomwonyi. Frank has a strong desire to succeed, convincing himself that he can lift his family out of a life of poverty and no longer just be seen as the baby of the family. Through his best friend, Frank hears of an easy way to travel from Nigeria to Europe without fear of repatriation or imprisonment. But the snag in their plans is how to raise the money to embark on the journey. The only way is to convince their fathers to sell off their homes to

raise the money for the trip. However, the path to Europe is strewn with young men's blood and young women immigrants being forced into prostitution. The Conception is an extraordinary story that shows the dreams and desires of the young cannot always be fulfilled. First-time author Omoragbon Osasumwen Egbe is now writing the book's sequel. He works for the government in Nigeria and hopes his book's legacy will reduce the scourge of illegal immigrants as well as women and child trafficking. Publisher's Website: <http://SBPRA.com/OmoragbonOsasumwenEgb> She'd almost made him believe she was innocent In an 1828 letter to his partner, Nicéphore Niépce, Louis Daguerre wrote, "I am burning with desire to see your experiments from nature." In this book, Geoffrey Batchen analyzes the desire to photograph as it emerged within the philosophical and scientific milieus that preceded the actual invention of photography. Recent accounts of photography's identity tend

to divide between the postmodern view that all identity is determined by context and a formalist effort to define the fundamental characteristics of photography as a medium. Batchen critiques both approaches by way of a detailed discussion of photography's conception in the late eighteenth and early nineteenth centuries. He examines the output of the various nominees for "first photographer," then incorporates this information into a mode of historical criticism informed by the work of Michel Foucault and Jacques Derrida. The result is a way of thinking about photography that persuasively accords with the medium's undeniable conceptual, political, and historical complexity. A billionaire, a baby—and a family secret that changes everything! In *Read My Desire*, Joan Copjec stages a confrontation between the theories of Jacques Lacan and those of Michel Foucault, protagonists of two powerful modern disciplines—psychoanalysis and historicism. Ordinarily, these modes of thinking only cross

paths long enough for historicists to charge psychoanalysis with an indifference to history, but here psychoanalysis, via Lacan, goes on the offensive. Refusing to cede history to the historicists, Copjec makes a case for the superiority of Lacan's explanation of historical processes and generative principles. Her goal is to inspire a new kind of cultural critique, one that is "literate in desire," and capable of interpreting what is unsaid in the manifold operations of culture. A major work in the philosophy of religion, this book interprets the Jesus story in terms of postmodern philosophy - particularly using Jacques Derrida's categories of "desire," "gift," and "recognition." Author Jan-Olav Henriksen also attempts to reformulate Christology without resorting to such metaphysical concepts as substance, transcendence, etc. While not denying traditional doctrines, Henriksen explicates the meaning of Jesus' life and death in ways that engage contemporary philosophy and challenge

contemporary (academic) Christians to rethink the basics of their faith; and he outlines the possibility of a "post-metaphysical Christology." / Henriksen's book is a clearly reasoned guide not only to the argument that Christology still has something to say to contemporary believers but also to ways in which theologians must learn to reconnect to everyday human experience. A philosophical analysis of the work of one of the most iconoclastic thinkers in Chinese history, Li Zhi, whose ethics prized spontaneous expression of genuine feelings. Mallory O'Brien wanted a child more than anything. And smart, devastatingly sexy Whit Manning was just the man for the job. Seducing him would be a pleasure...for both of them. But Whit wasn't a forever kind of man. Giving in to the heat she'd always felt between them came at a price Mallory wasn't sure she wanted to pay. Because once their steamy affair ended, and she was pregnant with his child, how could Mallory never touch Whit again? The Fate of Desire examines

the problems of living in a decentered world. Assuming that the poststructuralist declaration of the end of man is an essential aspect of our current ways of thinking, the book focuses on the positive values inherent in this shift. In substituting multiplicity and fields of play for identity and hierarchy, and in distinguishing between desire as fullness and desire as lack, Hans argues for a vision of existence that is based on the difficulties Nietzsche posited as an inevitable part of fully affirming the rich but tragic nature of life. These reconceptions of the human scene redefine self-discipline in terms of understanding and loving one's fate. Instead of providing yet one more critique of the flawed values through which the Western world has constituted itself, *The Fate of Desire* takes up the task of weighing the things of the world anew, revaluing them in terms of our present understanding of our positions in the world. Hans suggests that if we are fated to be driven by desire, and if we are led to accept the ways in

which our desire manifests itself according to our own individual fates, there is still every reason to believe that humans can find a productive way of understanding and fully occupying their place in the world. Ashley Carter's dreams of true love are crushed by the discovery that her marriage to Devon Carter is another of Daddy's business deals. Her strategy: act the part of perfect wife and make Devon love her! After all, she will be the mother of his child... This book discusses the concept of desire as a positive factor in human growth and flourishing. All human decision-making is preceded by some kind of desire, and we act upon desires by either rejecting or following them. It argues that our views on and expressions of desire in various facets of life and through time have differed according to how human beings are taught to desire. Therefore, the concept has tremendous potential to affect human beings positively and to enable personal growth. Though excellent research has been

done on the concepts of flourishing, character education and positive psychology, no other work has linked the concept of desire to all of these topics. Featuring key references, explanations of central concepts, and significant practical applications of desire to various fields of human thought and action, the book will be of interest to students and researchers in the fields of positive psychology, positive education, moral philosophy, and virtue ethics. Presents Kamadeva, the Hindu god of desire, in tales, art, and ritual. Also covers Kamadeva's appearance in Buddhist lore. In Algorithmic Desire, Matthew Flisfeder shows that social media is a metaphor that reveals the dominant form of contemporary ideology: neoliberal capitalism. The preeminent medium of our time, social media's digital platform and algorithmic logic shape our experience of democracy, enjoyment, and desire. Weaving between critical theory and analyses of popular culture, Flisfeder uses examples from The King's Speech, Black Mirror, Gone Girl, The

Circle, and Arrival to argue that social media highlights the antisocial dimensions of twenty-first-century capitalism. He counters leading critical theories of social media—such as new materialism and accelerationism—and thinkers such as Gilles Deleuze and Michel Foucault, proposing instead a new structuralist account of the ideology and metaphor of social media. Emphasizing the structural role of crises, gaps, and negativity as central to our experiences of reality, Flisfeder interprets the social media metaphor through a combination of dialectical, Marxist, and Lacanian frameworks to show that

algorithms may indeed read our desire, but capitalism, not social media, truly makes us antisocial. Wholly original in its interdisciplinary approach to social media and ideology, Flisfeder's conception of "algorithmic desire" is timely, intriguing, and sure to inspire debate. Wade Collins has longed for revenge on the spoiled rich girl who toyed with his affections. So he blackmails her back into his bed; if she bears his child, he'll forgive her debt. The proposal is unthinkable, unimaginable...yet not entirely unappealing.
