Cold War Energy Dec 28 2019
This book examines the role of Soviet energy during the Cold War. Based on hitherto little known documents from Western and Eastern European archives, it combines the story of Soviet oil and gas with general Cold War history. This volume breaks new ground by framing Soviet energy in a multi-national context, taking

into account not only the view from Moscow, but also the perspectives of communist Eastern Europe, the US, NATO, as well as several Western European countries - namely Italy, France, and West Germany. This book challenges some of the long-standing assumptions of East-West bloc relations, as well as shedding new light on relations within the blocs regarding the issue of energy. By bringing together a range of junior and senior historians and specialists from Europe, Russia and the US, this book represents a pioneering endeavour to approach the role of Soviet energy during the Cold War in transnational perspective.

L'Azerbaijani nei documenti diplomatici italiani

(1919-1920) Apr 11 2021 La raccolta presentata in questo volume consiste di una scelta di documenti presenti nell'archivio storico diplomatico del Ministero degli Affari Esteri italiano (ASDMAE) relativi alla Repubblica democratica dell'Azerbaijani (Azərbaycan Xalq Cümhuriyyəti), uno Stato sorto dalla dissoluzione dell'Impero zarista ed esistente per un breve arco cronologico, dal 28 maggio 1918 al 27 aprile 1920, quando viene conquistato e assorbito dalla Russia bolscevica. I documenti pubblicati in questo lavoro sono per la maggior parte

inediti e raccontano la storia di un rapporto molto intenso, politico ed economico, tra l'Italia uscita vincitrice dalla Grande Guerra e l'Azerbaijani che compie in quei mesi i primi passi proprio come nazione indipendente. Vengono inoltre pubblicati per la prima volta i documenti della delegazione azerbaijani alla conferenza della pace di Parigi, che inutilmente cerca di richiamare l'attenzione delle grandi potenze sulla perdita della propria indipendenza. Tra le potenze dell'Intesa l'Italia è forse quella che più si spende per garantire la libertà del giovane Stato caucasico, la prima democrazia parlamentare nel mondo

musulmano. Il volume di Pommier Vincelli e Carteny continua la pubblicazione delle fonti italiane in un periodo cruciale come quello del 1918-1920, in cui si sono gettate le basi di una partnership profonda e solida tra i due Paesi, che dura ancora oggi.

Handbook of OPEC and the Global Energy Order Feb 07 2021 The Organization of the

Petroleum Exporting Countries (OPEC), celebrating its 60th anniversary in 2020, is one of the most recognizable acronyms in international politics. The organization has undergone decades of changing importance, from political irrelevance to the spotlight of world attention and back; and from economic boom for its members to deep political and financial crisis. This handbook, with chapters provided by scholars and analysts from different backgrounds and specializations, discusses and analyzes the history and development of OPEC, its global importance, and the role it has played, and still plays, in the global energy market. Part

I focuses on the relationship between OPEC and its member states. Part II examines the relationship between OPEC and its customers, the consuming countries and their governments, while Part III addresses the relationship between OPEC and its competitors and potential partners, the non-OPEC producers, and the international oil companies. The final section, Part IV, looks at OPEC and the governance of international energy.

IL GRANDE NIDO che ha dato ORIGINE al BIG BANG DEI BUCHI NERI DI STEPHEN

HAWKING Aug 04 2020

Stephen Hawking avrebbe dovuto passare più tempo ad aiutare la scienza medica a risolvere i problemi, compreso il suo, anziché cercare buchi neri nelle profondità della sua "mente brillante", criticando aspramente quella che lo ha creato. Il dramma che lo ha reso disabile avrebbe potuto spingerlo a usare la sua "mente brillante" per aiutare gli altri sulla terra, invece di cercare buchi neri e inseguire l'infinitesimo, lasciando che se ne occupino quelli che non sono in condizioni fisiche come la sua. Avrebbe potuto divertirsi con un telescopio a casa sua, come facevo io quando abitavo a Miami, North

Miami Beach, e poi a Oakland Park, mentre lo scorrere del tempo scandiva la mia vita. A quanto ne so, l'orgoglio di essere l'uomo dei buchi neri non lo sta aiutando, perché avrebbe dovuto spiegarci come difenderci da questi mostri anti Dio. Se uno di loro va fuori orbita e ci viene addosso, lui e la sua famiglia diventano cibo per buchi neri, poiché non hanno un Dio che li difende. Questi divoratori della galassia terrorizzano angeli e demoni, e turbano i sogni dei bambini.

Italy and the Middle East Nov 06 2020 Italy played a vital role in the Cold War dynamics that shaped the Middle East in the latter part of the 20th century. It was a junior partner in the

strategic plans of NATO and warmly appreciated by some Arab countries for its regional approach. But Italian foreign policy towards the Middle East balanced between promoting dialogue, stability and cooperation on one hand, and colluding with global superpower manoeuvres to exploit existing tensions and achieve local influence on the other. Italy and the Middle East brings together a range of experts on Italian international relations to analyse, for the first time in English, the country's Cold War relationship with the Middle East. Chapters covering a wide range of defining twentieth century events - from the Arab-Israeli

conflict and the Lebanese Civil War, to the Iranian Revolution and the Soviet invasion of Afghanistan - demonstrate the nuances of Italian foreign policy in dealing with the complexity of Middle Eastern relations. The collection demonstrates the interaction of local and global issues in shaping Italy's international relations with the Middle East, making it essential reading to students of the Cold War, regional interactions, and the international relations of Italy and the Middle East.

Oil Exploration, Diplomacy, and Security in the Early Cold War May 25 2022 The importance of oil for national military-industrial complexes

appeared more clearly than ever in the Cold War. This volume argues that the confidential acquisition of geoscientific knowledge was paramount for states, not only to provide for their own energy needs, but also to buttress national economic and geostrategic interests and protect energy security. By investigating the postwar rebuilding and expansion of French and Italian oil industries from the second half of the 1940s to the early 1960s, this book shows how successive administrations in those countries devised strategies of oil exploration and transport, aiming at achieving a higher degree of energy autonomy and

setting up powerful oil agencies that could implement those strategies. However, both within and outside their national territories, these two European countries had to confront the new Cold War balances and the interests of the two superpowers.

Italy and Libya Jun 13 2021

This volume proposes a historical analysis of Italian-Libyan relations in contemporary times. After examining the colonialism of liberal Italy, which in 1911 culminated in the military campaign for the conquest of the Libyan regions, it evaluates the impact of fascism in Libya and the attempt to launch a broader pro-Arab policy. The third section analyzes the construction of the so-called 'special relationship' between Rome and Tripoli since the 50s

when an economic interdependence between the Libyan oil producer and the Italian industrial power was pursued despite political differences. Finally, the volume also focuses on the dramatic implosion of Libya and the loss of its political unity following the fall of the Gaddafi regime, which on the one hand, scaled back Italy's regional role, on the other, spread instability throughout the Euro-Mediterranean area. The volume uses a historiographical methodology focused on primary sources and updated scientific literature but also includes specialized analyses of the most current scenarios. This is the first systematic

work on the Italian-Libyan relationship produced in English, accessible to area scholars, specialists, analysts and students, who intend to deepen their understanding of one of the pivotal factors of the Euro-Mediterranean balance, which is currently missing. Italy from Crisis to Crisis
Dec 08 2020 Italy from Crisis to Crisis seeks to understand Italy's approach to crises by studying the country in regional, international, and comparative context. Without assuming that the country is abnormal or unusually crisis-prone, the authors treat Italy

as an example from which other countries might learn. The book integrates the analysis of domestic politics and foreign policy, including Italy's approach to military interventions, energy security, economic relations with the European Union (EU), and to the NATO alliance, and covers a number of issues that normally receive little attention in studies of "high politics," such as information policy, national identity, immigration, youth unemployment, and family relations. Finally, it puts Italy in a comparative perspective - with other European states, naturally - but also with Latin America, and even the United States, all

countries that have experienced similar crises to Italy's and similar - often populist - responses. This text will be of key interest to scholars and students of, and courses on, Italian politics and history, European politics and, more broadly, comparative politics and democracy.

History of the European Oil and Gas Industry Feb 19 2022 The history of the European oil and gas industry reflects local as well as global political events, economic constraints and the personal endeavours of individual petroleum geoscientists as much as it does the development of

technologies and the underlying geology of the region. The first commercial oil wells in Europe were drilled in Poland in 1853, Romania in 1857, Germany in 1859 and Italy in 1860. The 23 papers in this volume focus on the history and heritage of the oil and gas industry in the key European oil-producing countries from the earliest onshore drilling to its development into the modern industry that we know today. The contributors chronicle the main events and some of the major players that shaped the industry in Europe. The volume also marks several important anniversaries, including 150 years of oil exploration in

Poland and Romania, the centenary of the drilling of the first oil well in the UK and 50 years of oil production from onshore Spain.
