Low Carb is LEKKER Aug 19 2021 Low carb is lekker is the brainchild of Inè Reynierse, who embarked on a mission to make the benefits of a low-carb lifestyle an achievable, budget-friendly reality for her friends and family. Her 'decarb'd' versions of South Africa's most popular and well-loved recipes soon caught the attention of various social networks and the growing need for a basic Low carb is lekker recipe collection. There are easy low-carb, wheat-free and sugar-free alternatives to some alltime family favourites (think bobotie, mac 'n cheese and curry and 'rice'), quick comfort foods (gnocchi and chicken pie) as well as decadent treats (malva pudding, chocolate brownies and milk tart spring to mind). Written by a mom for moms who want to feed their loved ones back to health, Low carb is lekker is also a celebration for fellow South Africans who love the tastes of home without compromising health and wellness.

Optical Coherence Tomography Apr 02 2020 Optical Coherence Tomography gives a broad treatment of the subject which will include 1) the optics, science, and physics needed to understand the technology 2) a description of applications with a critical look at how the technology will successfully address actual clinical need, and 3) a discussion of delivery of OCT to the patient, FDA approval and comparisons with available competing technologies. The required mathematical rigor will be present where needed but be presented in such a way that it will not prevent non-scientists and non-engineers from gaining a basic understanding of OCT and the applications as well as the issues of bringing the technology to the market. Optical Coherence Tomography is a new medical high-resolution imaging technology which offers distinct advantages over current medical imaging technologies and is attracting a large number of researchers. Provides non-scientists and non-engineers basic understanding of Optical Coherence Tomography applications and issues.

Hornchurch Offensive Apr 26 2022 The author of Hornchurch Scramble continues the fascinating study of the RAF airfield and its pilots after the Battle of Britain in World War II. Volume Two of this account begins when Hornchurch was at the forefront in taking the fight to the enemy, being heavily involved in the Sweeps and Circuses of 1941. Next came the Dieppe raid in 1942 by which time Hornchurch was truly international with Czechs, Belgians, French and New Zealanders all flying from there. Action was continuous and famous characters abounded, people like Harry Broadhurst and Paddy Finucane, and as with the first book, the author is particularly adept at expressing their views, experiences and recollections. Other events during the war where the base was predominant include the audacious German Channel Dash, Operation "Starkey" with the Americans, forming Mobile Radar Units for D-Day, and countering the V-1 menace. Post-war it served as an Air Crew Selection Center, from 1948-1956, and thousands of people passed through, some famous like Max Bygraves and Norman Tebbit, who tell their stories. With numerous photographs from private collections, this second volume maintains the excellence of the first to give the complete history through the eyes of those who were there.

Pharmaceutical Supply Chains - Medicines Shortages Jul 18 2021 This book provides an insight of relevant case studies and updated practices in "Pharmaceutical Supply Chains" (PharmSC) while addressing the most relevant topics within the COST Action "Medicines Shortages" (CA15105). The volume focuses on the most recent developments in the design, planning and scheduling of PharmSC, broadening from the suppliers' selection to the impact on patients and healthcare systems, addressing uncertainty and risk mitigation, and computational issues. It is directed at MSc/PhD students and young researchers (Post-Docs) in Pharmaceutics/Pharmaceutical sciences, Engineering fields, Economics/Management, as well as pharmaceutical decision makers, managers, and practitioners, and advanced readers demanding a fresh approach to decision making for PharmSC. The contributed chapters are associated with the homonymous COST Training Schools (TS), and the book creates a better understanding of the Action "Medicines Shortages" challenges and opportunities.

Personnel and Administration Training and Readiness Manual Jan 30 2020 This Training and Readiness (T&R) Manual establishes training standards, regulations and policies regarding the training of Marines in the Personnel and Administration occupational field. The T&R Program is the Corps' primary tool for planning, conducting and evaluating training and assessing training readiness. Subject matter experts (SEMs) from the operating forces developed core capability Mission Essential Task Lists (METLs) for ground communities derived from the Marine Corps Task List (MCTL). This T&R Manual is built around these METLs and other related Marine Corps Tasks (MCT). All events contained in the manual relate directly to these METLs and MCTs. This comprehensive T&R Program will help to ensure the Marine Corps continues to improve its combat readiness by training more efficiently and effectively. Ultimately, this will enhance the Marine Corps' ability to accomplish real-world missions.

Lessons on Synthetic Bioarchitectures May 28 2022 This textbook discusses the new relationship between artificial, synthetic material and living matter, and presents defined examples of approaches aiming for the creation of artificial cells. It also offers insights into the world of synthetic biology from its origins to the present day, showing what is currently possible in this discipline. Furthermore, it examines the ethical concerns and potential threats posed by this new field. The textbook is based on a lecture of the same title, held for master's students at the University of Natural Resources and Life Sciences (BOKU), Vienna, and is primarily intended for students of synthetic biology, biotechnology and bioengineering. It is also of interest to research scientists from other disciplines wishing to learn more about the state of the art of synthetic biology and its future.
