Strawberry Fields Jan 22 2022 Strawberry Fields is one of the most visited spots in Central Park and one of the most popular tourist attractions in New York City. This keepsake volume is a celebration of the 2.5-acre teardrop-shaped living memorial to John Lennon's life and work. The year 2010 marks the 25th anniversary of its dedication, as well as what would have been Lennon's 70th birthday. Located in the park directly across the street from the Dakota, the building where John and Yoko lived for several years before his untimely death, Strawberry Fields was originally conceived as a "peace garden." Yoko invited the entire world to donate trees, shrubs, and stones to fill this parcel of land, and today, the garden flourishes with contributions from 121 countries. A rich and lively patchwork of text and imagery will tell the story of John and Yoko's love affair with the park and of the creation of this unique corner of the park through an unprecedented collaborative effort between Yoko Ono, the Central Park Conservancy, and city officials.

Agent Running in the Field May 26 2022 "[Le Carré's] novels are so brilliant because they're emotionally and psychologically absolutely true, but of course they're novels." —New York Times Book Review A thrilling tale for our times from the undisputed master of the spy genre Nat, a 47 year-old veteran of Britain's Secret Intelligence Service, believes his years as an agent runner are over. He is back in London with his wife, the long-suffering Prue. But with the growing threat from Moscow Centre, the office has one more job for him. Nat is to take over The Haven, a defunct substation of London General with a rag-tag band of spies. The only bright light on the team is young Florence, who has her eye on Russia Department and a Ukrainian oligarch with a finger in the Russia pie. Nat is not only a spy, he is a passionate badminton player. His regular Monday evening opponent is half his age: the introspective and solitary Ed. Ed hates Brexit, hates Trump and hates his job at some soulless media agency. And it is Ed, of all unlikely people, who will take Prue, Florence and Nat himself down the path of political anger that will ensnare them all. *Agent Running in the Field* is a chilling portrait of our time, now heartbreaking, now darkly humorous, told to us with unflagging tension by the greatest chronicler of our age.

Elitism (Routledge Revivals) Dec 29 2019 First published in 1980, this book presents an important critique of prevailing political doctrine in Western societies at a time of major change in circumstances of Western civilization. G. Lowell Field and John Higley stress the importance of a more realistic appraisal of elite and mass roles in politics, arguing that political stability and any real degree of representative democracy depend fundamentally on the existence of specific kinds of elites.

Reconstruction in the Cane Fields May 14 2021 In *Reconstruction in the Cane Fields*, John C. Rodrigue examines emancipation and the difficult transition from slavery to free labor in one enclave of the South -- the cane sugar region of southern Louisiana. In contrast to the various forms of sharecropping and tenancy that replaced slavery in the cotton South, wage labor dominated the sugar industry. Rodrigue demonstrates that the special geographical and environmental requirements of sugar production in Louisiana shaped the new labor arrangements. Ultimately, he argues, the particular demands of Louisiana sugar production accorded freedmen formidable bargaining power in the contest with planters over free labor. Rodrigue addresses many issues pivotal to all post-emancipation societies: How would labor be reorganized following slavery's demise? Who would wield decision-making power on the plantation? How were former slaves to secure the fruits of their own labor? He finds that while freedmen's working and living conditions in the postbellum sugar industry resembled the prewar status quo, they did not reflect a continuation of the powerlessness of slavery. Instead, freedmen converted their skills and knowledge of sugar production, their awareness of how easily they could disrupt the sugar plantation routine, and their political empowerment during Radical Reconstruction into leverage that they used in disputes with planters over wages, hours, and labor conditions. Thus, sugar planters, far from being omnipotent overlords who dictated terms to workers, were forced to adjust to an emerging labor market as well as to black political power. The labor arrangements particular to postbellum sugar plantations not only propelled the freedmen's political mobilization during Radical Reconstruction, Rodrigue shows, but also helped to sustain black political power -- at least for a few years -- beyond Reconstruction's demise in 1877. By showing that freedmen, under the proper circumstances, were willing to consent to wage labor and to work routines that strongly resembled those of slavery, *Reconstruction in the Cane Fields* offers a profound interpretation of how former slaves defined freedom in slavery's immediate aftermath. It will prove essential reading for all students of southern, African American, agricultural, and labor history.

Field Trip to the Ocean Deep Apr 12 2021 Come join the fun as students take a submarine bus on a field trip to explore the ocean deep, in this wordless picture book from the creator of *Field Trip to the Moon!* Students dressed in deep sea helmets travel to the ocean deep in a yellow school-bus submarine. When they get there, they frolic with fish, chase luminescent squid, and discover an old shipwreck. But when it's time to return to the submarine bus, one student lingers to take a photo of a treasure chest and falls into a deep ravine. Luckily, the child makes an unexpected friend-- a maybe-not-so-extinct sea creature called a Pleiosaur- that's happy to entertain the young explorer until the teacher returns. In his follow-up to *Field Trip to the Moon*, John Hare's rich, atmospheric art in this wordless picture book invites all children to imagine themselves in the story- a tale full of mysteries, surprises, and adorable aquatic friends. A Prelude to Quantum Field Theory Jun 02 2020 "A Prelude to Quantum Field Theory offers a short introduction to quantum field theory (QFT), a powerful framework for understanding particle behavior that is an essential tool across many subfields of physics. A subject that is typically taught at the graduate level in most physics departments, quantum field theory is a unification of standard quantum theories and special relativity, which depicts all particles as "excitations" that arise in underlying fields. It extends quantum mechanics, the modern theory of one or few particles, in a way that is useful for the analysis of many-particle systems in the real world. As it requires a different style of thinking from quantum mechanics, which is typically the undergraduate physics student's first encounter with the quantum world, many beginners struggle with the transition to quantum field theory, especially when working with traditional textbooks. Existing books on the subject often tend to be large, sophisticated, and complete; and an overwhelming wealth of information and technical detail makes it difficult for the novice to discern what is most important. This book is a concise, friendly entrée for QFT-beginners, guiding the reader from the style of quantum mechanical thinking to that of QFT, and distilling the key ideas without a welter of unnecessary detail. In contrast with standard texts, which are predominantly particle physics-centric, this book is designed to be "subfield-neutral" - usable by students of any background and interest, and easily adaptable in a course setting according to instructors' preferences. The authors' conviction is that QFT is a core element of physics that should be understood by all PhD physicists-but that developing an appreciation for it does not require digesting a large, encyclopedic volume"--

Battle in the Mind **Fields** Aug 05 2020 "We frequently see one idea appear in one discipline as if it were new, when it migrated from another discipline, like a mole that had dug under a fence and popped up on the other side." Taking note of this phenomenon, John Goldsmith and Bernard Laks embark on a uniquely interdisciplinary history of the genesis of linguistics, from nineteenth-century currents of thought in the mind sciences through to the origins of structuralism and the ruptures, both political and intellectual, in the years leading up to World War II. Seeking to explain where contemporary ideas in linguistics come from and how they have been justified, *Battle in the Mind* Fields investigates the porous interplay of concepts between psychology, philosophy, mathematical logic, and linguistics. Goldsmith and Laks trace theories of thought, self-consciousness, and language from the machine age obsession with mind and matter to the development of analytic philosophy, behaviorism, Gestalt psychology, positivism, and structural linguistics, emphasizing throughout the synthesis and continuity that has brought about progress in our understanding of the human mind. Arguing that it is impossible to understand the history of any of these fields in isolation, Goldsmith and Laks suggest that the ruptures between them arose chiefly from social and institutional circumstances rather than a fundamental disparity of ideas.

Social Capital Mar 24 2022 The term 'social capital' is a way of conceptualizing the intangible resources of community, shared values and trust upon which we draw in daily life. It has achieved considerable currency in the social sciences through the very different work of Bourdieu in France, and James Coleman and Robert Putnam in the States, and has been taken up within politics and sociology as a means of explaining the decline of social cohesion and community values in many Western societies. This concise introduction, the only one currently available, explains the theoretical underpinning of the subject, the empirical work that has been done to explore its operation, and the effect that it has had on policy-making particularly within such international governmental bodies as the World Bank and the European Commission. With genuine cross-disciplinary appeal, this exceptional book will be of great interest to students of sociology, politics and social policy.

The Great Field Jun 14 2021 Science has proven that vast domains of energy exist within the material world of our senses. In this book, therapeutic experience is combined with scientific evidence to create a general theory of how this Great Field is the foundation of everything in the universe-including the personal energy we call soul.

Tales of the Field Oct 07 2020 Once upon a time ethnographers returning from the field simply sat down, shuffled their note cards, and wrote up their descriptions of the exotic and quaint customs they had observed. Today scholars in all disciplines are realizing how their research is presented is at least as important as what is presented. Questions of voice, style, and audience--the classic issues of rhetoric--have come to the forefront in academic circles. John Van Maanen, an experienced ethnographer of modern organizational structures, is one who believes that the real work begins when he returns to his office with cartons of notes and tapes. In *Tales of the Field* he offers readers a survey of the narrative conventions associated with writing about culture and an analysis of the strengths and weaknesses of various styles. He introduces first the matter-of-fact, realistic report of classical ethnography, then the self-absorbed confessional tale of the participant-observer, and finally the dramatic vignette of the new impressionistic style. He also considers, more briefly, literary tales, jointly told tales, and the theoretically focused formal and critical tales. Van Maanen illustrates his discussion of each style with excerpts from his own work on the police. *Tales of the Field* offers an informal, readable, and lighthearted treatment of the rhetorical devices used to present the results of fieldwork. Though Van Maanen argues ultimately for the validity of revealing the self while representing a culture, he is sensitive to the differing methods and aims of sociology and anthropology. His goal is not to establish one true way to write ethnography, but rather to make ethnographers of all varieties examine their assumptions about what constitutes a truthful cultural portrait and select consciously and carefully the voice most appropriate for their tales. Written with grace and humor, *Tales of the Field* will be an invaluable introduction to novices just learning the fieldwork trade and provocative stimulant to veteran ethnographers. "Engaging and well written."--H. Ottenheimer, Choice

A Lily of the Field Mar 31 2020 Spanning the tumultuous years 1934 to 1948, John Lawton's *A Lily of the Field* is a brilliant historical thriller from a master of the form. The book follows two characters—Méret Voytek, a talented young cellist living in Vienna at the novel's start, and Dr. Karel Szabo, a Hungarian physicist interned in a camp on the Isle of Man. In his seventh Inspector Troy novel, Lawton moves seamlessly from Vienna and Auschwitz to the deserts of New Mexico and the rubble-strewn streets of postwar London, following the fascinating parallels of the physicist Szabo and musician Voytek as fate takes each far from home and across the untraditional battlefields of a destructive war to an unexpected intersection at the novel's close. The result, *A Lily of the Field*, is Lawton's best book yet, an historically accurate and remarkably written novel that explores the diaspora or two Europeans from the rise of Hitler to the post-atomic age.

Old Fields Dec 21 2021 Glamour subverts convention. Models, images, and even landscapes can skew ordinary ways of seeing when viewed through the lens of photography, suggesting new worlds imbued with fantasy, mystery, sexuality, and tension. In *Old Fields*, John Stilgoe—one of the most original observers of his time—offers a poetic and controversial exploration of the generations-long effort to portray glamour. Fusing three forces in contemporary American culture—amateur photography after 1880; the rise of glamour and fantasy; and the often-mysterious quality of landscape photographs—Stilgoe provides a wide-ranging yet concentrated take on the cultural

legacy of our photographic history. Through the medium of "shop theory"—the techniques, tools, and purpose-made equipment a maker uses to realize intent—Stilgoe looks at the role of Eastman Kodak in shaping the ways photographers purchased cameras and films, while also mapping the divisions that were created by European-made cameras. He then goes on to argue that with the proliferation of digital cameras, smart phones, and Instagram, young people's lack of knowledge about photographic technique is in direct correlation to their lack of knowledge of the history of glamour photography. In his exploration of the rise of glamour and fantasy in contemporary American culture, Stilgoe offers a provocative and very personal look into his enduring fascination with, and the possibilities inherent in, creating one's own images.

Fields of Battle Jul 04 2020 At once a grand tour of the battlefields of North America and an unabashedly personal tribute to the military prowess of an essentially unwarlike people, *Fields of Battle* spans more than two centuries and the expanse of a continent to show how the immense spaces of North America shaped the wars that were fought on its soil. of photos.

Hollywood's Hellfire Club Jan 28 2020 They made fans go crazy and censors apoplectic, spent fortunes faster than they made them, forged Rembrandts and hung them in major museums, went on trial for committing statutory rape with necrophiliac teenage girls, reinterpreted Hamlet as an incestuous mama's boy, and swilled immeasurable quantities of spirits during week-long parties on wobbly yachts. They were "The Bundy Drive Boys," and they made the Rat Pack look like Cub Scouts. Their self-destructiveness was spectacular, the misanthropy profound, but behind the boozy bravado was a devoted mutual affection. The Bundy Drive Boys' un-bowdlerized stories have never been illustrated so well or told so completely as within Hollywood's Hellfire Club. Author Gregory William Mank also wrote *It's Alive!: The Classic Cinema Saga of Frankenstein and Hollywood Cauldron*.

John McCrae Jul 28 2022 Shortlisted, 2018 Forest of Reading Golden Oak Award Most Canadians are familiar with John McCrae through his iconic poem "In Flanders Fields," which was penned on the battlefields of the First World War and remains a symbol of remembrance to this day. Although he will always be remembered as a war poet, the Guelph, Ontario, native was a physician, a university professor, and a veteran of the Second Boer War before he ever laid eyes on the carnage at Flanders Fields. Citing rarely seen diary entries and letters, as well as never-before-published photos of McCrae's early life, military historian and McCrae enthusiast Susan Raby-Dunne tells the complete story of John McCrae—a man whose final chapter of life made him immortal, but who accomplished so much and helped so many in the decades before.

Field of Prey Dec 09 2020 #1 New York Times bestselling author John Sandford continues his phenomenal Prey series—and "for those who think they know everything they need to know about Lucas Davenport, [Field of Prey] proves them wrong..." (Huffington Post) On the night of the fifth of July, in Red Wing, Minnesota, a boy smelled death in a cornfield off an abandoned farm. When the county deputy took a look, he found a body stuffed in a cistern. Then another. And another. By the time Lucas Davenport was called in, it was fifteen and counting, the victims killed over just as many summers, regular as clockwork. How could this happen in a town so small without anyone noticing? And with the latest victim only two weeks dead, Davenport knows the killer is still at work, still close by. Most likely someone the folks of Red Wing see every day. Won't they be surprised.

Getting Off at Elysian Fields Sep 17 2021 No city in America knows how to mark death with more funerary panache than New Orleans. The pageants commemorating departed citizens are often in themselves works of performance art. A grand obituary remains key to this Stygian passage. And no one writes them like New Orleanian John Pope. Collected here are not just simple, mindless recitations of schools and workplaces, marriages, and mourners bereft. These pieces in *Getting Off at Elysian Fields* are full-blooded life stories with accounts of great achievements, dubious dabblings, unavoidable foibles, relationships gone sour, and happenstances that turn out to be life-changing. To be sure, there are stories about Carnival monarchs, great philanthropists, and a few politicians. But because New Orleans embraces eccentric behavior, there are stories of people who colored way outside the lines. For instance, there was the doctor who used his plasma to make his flowers grow, and the philanthropist who took money she had put aside for a fur coat to underwrite the lawsuit that desegregated Tulane University. A letter carrier everyone loved turned out to have been a spy during World War II, and a fledgling lawyer changed his lifelong thoughts about race when he saw blind people going into a Christmas party through separate doors—one for white people and another for African Americans. Then there was the punctilious judge who got down on his hands and knees to edge his lawn—with scissors. Because New Orleans funerals are distinctive, the author includes accounts of four that he covered, complete with soulful singing and even some dancing. As a popular, local bumper sticker indisputably declares, "New Orleans--We Put the Fun in Funeral."

Cyclotomic Fields and Zeta Values Aug 17 2021 Written by two leading workers in the field, this brief but elegant book presents in full detail the simplest proof of the "main conjecture" for cyclotomic fields. Its motivation stems not only from the inherent beauty of the subject, but also from the wider arithmetic interest of these questions.

From the reviews: "The text is written in a clear and attractive style, with enough explanation helping the reader orientate in the midst of technical details." --ZENTRALBLATT MATH

Up from the Fields Apr 24 2022 Although John H. Bailey II's father attained only a third-grade education, he imparted an important message to his son: you only fail when you stop trying. This is a piece of advice that Bailey II followed diligently throughout his life. In *Up from the Fields*, Bailey narrates his life story against the backdrop of his unflappable faith in God—following him from his birth on a Mississippi plantation, where as a boy, he watched the crop dusters and dreamed of flying a plane one day. This memoir recalls running in the fields of Mississippi, playing football in Texas, being stationed at various military bases in the United States and abroad, and running the Texas State Guard. It provides insight into the life of one man who spent thirty-two years in uniform. A motivational story with photos included, *Up from the Fields* follows Bailey's journey from a lieutenant in the Vietnam War to a rank of major general.
