And more More than 100,000 entrepreneurs rely on this book for detailed, step-by-step instructions on building successful, scalable, profitable startups. The National Science Foundation pays hundreds of startup teams each year to follow the process outlined in the book, and it's taught at Stanford, Berkeley, Columbia and more than 100 other leading universities worldwide. Why? The Startup

Owner's Manual guides you, step-by-step, as you put the Customer Development process to work. This method was created by renowned Silicon Valley startup expert Steve Blank, co-creator with Eric Ries of the "Lean Startup" movement and tested and refined by him for more than a decade. This 608-page how-to guide includes over 100 charts, graphs, and diagrams, plus 77 valuable checklists that guide you as you drive your company toward profitability. It will help you:

- Avoid the 9 deadly sins that destroy startups' chances for success**
- Use the Customer Development method to bring your business idea to life**
- Incorporate the Business Model Canvas as the organizing principle for startup hypotheses**
- Identify your customers and determine how to "get, keep and grow" customers profitably**
- Compute how you'll drive your startup to repeatable, scalable profits.**

The Startup Owner's Manual was originally published by K&S Ranch Publishing Inc. and is now available from Wiley. The cover, design, and content are the same as the prior release and should not be considered a new or updated product. Get the best out of your AMAZON KINDLE PAPERWHITE. This software package seeks to improve waveguide filter and diplexer design and decrease performance variations without creating overly stringent manufacturing tolerances. The accompanying manual helps the reader to cut design time and improve accuracy by quickly and easily predicting performance parameters before building costly prototypes. Using the mode-matching method as a foundation, the software supplies a full-wave solution for filter discontinuities, aiding you in the design of E-plane waveguide filters specifically intended for microwave and millimeter-wave applications. This means you can substantially

reduce development and production costs, reduce time-to-market, and effectively increase circuit performance.
