house, it is a chilling tale of the supernatural. "The Aspern Papers" is a tale of Americans in Europe, cleverly evoking the drama of comedie humaine against the settings of a Venetian palace.

The Papers of James Monroe: Selected correspondence and papers, 1776-1794 Mar 25 2022
"All major founders of the American nation have modern documentary collections - with the notable exception of James Monroe. Yet Monroe was not a minor figure,

having served as Minister to France, Minister to Great Britain, Secretary of State, and Secretary of War. Despite his major role in early American history, James Monroe has been the subject of limited scholarship, due largely to the difficulty of locating his papers, especially in a published collection. Most Monroe scholarship is based on only 25% of his papers and a great mass of material - over 25,000 items - remains mostly unknown and unused ... until now. The 8-volume Papers of James Monroe project will fill a major gap in American history. Compiled and edited by Daniel Preston, the project will provide access to the massive and widely scattered Monroe Papers, enabling scholars to revisit Monroe's role in the birth and infancy of the United States"--Page [4] of volume 1 cover.

The Scientific Papers of James Clerk Maxwell May 03
2020 One of the greatest theoretical physicists of the
19th century, James Clerk Maxwell is best known for his
studies of the electromagnetic field. The 101 scientific
papers of this two-volume set, arranged chronologically,
testify to Maxwell's profound scientific legacy and include
the preliminary explorations that culminated in his most
famous work, *A Treatise on Electricity and Magnetism*.
One of the nineteenth century's most significant papers,
"A Dynamical Theory of the Electromagnetic Field,"
appears here, along with similarly influential expositions
of Maxwell's dynamical theory of gases. The author's
extensive range of interests is well represented, from his
discussions of color blindness and the composition of
Saturn's rings to his essays on geometrical optics, ether,
and protecting buildings from lightning. His less technical
writings are featured as well, including items written for
the *Encyclopedia Britannica* and *Nature* magazine, book
reviews, and popular lectures. Striking in their originality,
these papers offer a wealth of stimulating and inspiring
reading to modern students of mathematics and physics.

The Constitutional Convention Apr 01 2020 In 1787, the American union was in disarray. The incompatible demands of the separate states threatened its existence; some states were even in danger of turning into the kind

of tyranny they had so recently deposed. A truly national government was needed, one that could raise money, regulate commerce, and defend the states against foreign threats—without becoming as overbearing as England. So thirty-six-year-old James Madison believed. That summer, the Virginian was instrumental in organizing the Constitutional Convention, in which one of the world's greatest documents would be debated, created, and signed. Inspired by a sense of history in the making, he kept the most extensive notes of any attendee. Now two esteemed scholars have made these minutes accessible to everyone. Presented with modern punctuation and spelling, judicious cuts, and helpful notes—plus fascinating background information on every delegate and an overview of the tumultuous times—here is the great drama of how the Constitution came to be, from the opening statements to the final votes. This Modern Library Paperback Classic also includes an Introduction and appendices from the authors.

The Anti-slavery Papers of James Russell Lowell Jun 03 2020

The Papers of James Madison: 25 October 1813-30 June 1814 Jun 27 2022 "The Papers of James Madison project, housed at the University of Virginia, was established in 1956 to publish annotated volumes of the correspondence and writings of James Madison, the Virginia statesman most often remembered for his public service as "Father of the Constitution" and as fourth president of the United States. The published volumes

provide accurate texts of Madison's incoming and outgoing correspondence, informative notes on textual and subject matters, and comprehensive indexes. They are incomparably rich sources for students of Madison's life and valuable research tools for those interested in the general history of the period in which Madison lived (1751-1836). The project has collected more than 27,000 copies of documents related to Madison's life, including letters, essays, notes, diaries, account books, ledgers, wills, legal papers, and inventories. The project serves the public by translating into print these decaying and often nearly illegible manuscripts, thereby preserving them for future generations and making them easier to use. The published volumes also make the contents of Madison-related documents the originals of which are housed in some 250 archives worldwide easily accessible to libraries and interested individuals anywhere books travel. The Presidential Series, covering the years 1809 to early 1817, centers largely on Madison's record as commander-in-chief during the War of 1812, the first full-scale conflict to be waged under the U.S. Constitution of 1787. Madison's correspondence as president deals with a particularly wide range of concerns national politics, international diplomacy and war, Indian affairs, the construction of the nation's capital, even petitions from ordinary citizens for charity and mercy to which Madison responded."--

The Secretary of State Series documents Madison's diplomatic and political career in the two administrations of Thomas Jefferson, 1801-9, during which he oversaw the negotiations for the Louisiana Purchase and the integration of those territories into the United States and attempted to maintain a viable neutrality for the United States vis-à-vis warring France and Great Britain. As secretary of state, Madison presided over one of the busiest offices in Washington. He was responsible for the Patent Office, issued all federal commissions, saw that the public laws were put into print, and served as the official liaison between the president and the governors of states and territories. Most important for these volumes, Madison

was the addressee of diplomatic pouches and letters from five ministers and over fifty consuls worldwide, as well as about a dozen commissioners. -- Publisher.

The Papers of James Monroe, Volume 7 Apr 25 2022
Volume 7 opens in the midst of the War of 1812, documenting Monroe's role as military adviser to President Madison during an ill-fated defense of Washington in August 1814, his appointment as secretary of war in September 1814, and his return to the State Department in March 1815, when he began the work of normalizing relations with the European nations after the end of the Napoleonic wars. Relations with Great Britain remained uneasy, but Monroe reduced friction between the two nations by negotiating the 1817 Rush-Bagot Treaty, which led to disarmament of the Great Lakes. Numerous documents detail the ill will between the U.S. and Spain caused by the war, disagreement over possession of Florida, and the revolutions in Spain's American colonies. The volume also addresses the presidential election of 1816. Monroe, in line with the accepted practice at the time, avoided any overt acts that would indicate he was seeking the office. Correspondence with friends and confidants and several campaign essays written by Monroe nevertheless reveal a strategy of a quiet campaign to garner support for his candidacy.
