Religious Education in the Secondary School Feb 11 2021 Religious Education in the Secondary School is a comprehensive, straightforward introduction to the effective teaching of Religious Education in the secondary classroom. Acknowledging the highly valuable yet often misunderstood contribution of RE, this text shows how the subject can be taught in a way that explores the impact of religion on the lives of people and society, engaging pupils and preparing them to become individuals who celebrate and respect diversity. It is illustrated throughout with ideas for teaching at different key stages and offers expert chapters introducing you to both the World Religions and the core aspects of effective teaching and learning. With an emphasis on developing an understanding of the importance - and different ways - of meeting the learning needs of all pupils, key chapters cover: -Understanding different pedagogies of RE -Spirituality and RE -Tips on effective planning and assessment -An approach to teaching across the Key Stages -Core subject knowledge in Buddhism, Christianity, Hinduism, Islam, Judaism and Sikhism Written by an experienced teacher, teacher educator and examiner, Religious Education in the Secondary School is a succinct compendium and has a real classroom applicability offering all trainee RE teachers, as well as those teaching Religious Education as specialists or non-specialists a wealth of support and inspiration.

John Catt's Which School? 2012 Jun 05 2020 First published in 1924, 'Which School?' brings together in one volume a wide range of information and advice, updated annually, on independent education for children up to the age of 18 years.

Youth and Inequality in Education Aug 20 2021 The transition to adulthood for many is mediated by class, culture, and local/global influences on identity. This volume analyzes the global injustices that create inequities and restrict future opportunities for young people during this transitional time, including poverty, unemployment, human rights, race, ethnicity and location. It critically examines global instances of youth discrimination, offering positive strategies and practices such as youth work that successfully remediate these injustices. With international contributions from Aotearoa New Zealand, Australia, England, Malaysia, Peru, Philippines, Portugal, Morocco, Jordan and the U.S., this volume is particularly important to researchers and scholars in the fields of youth studies, education, and social work.

Learning to Teach Citizenship in the Secondary School Apr 03 2020 Praise for previous editions... 'A comprehensive and illuminating resource on both citizenship and citizenship education.' – David Hicks, Times Educational Supplement What is the role of citizenship? How can it be taught effectively? Learning to Teach Citizenship in the Secondary School is an essential resource for students training to teach citizenship in the secondary school as well as teachers of citizenship looking for fresh ideas and guidance. Written by leading experts in the field, the book is underpinned by the latest research and theory and explores a variety of inspirational approaches to teaching and learning in a subject which provides a critical underpinning to the whole school curriculum. This new, third edition has been comprehensively updated and restructured to emphasise the role of citizenship across the curriculum, exploring a wider range of subjects including geography, modern foreign languages, mathematics and science. Key topics include: historical origins and contemporary contexts developing subject knowledge and skills of enquiry effective lesson plans, schemes of work and assessment citizenship beyond the classroom: community-based work and learning outdoors citizenship across the curriculum: English, drama and media; history, geography and religious education; modern foreign languages; mathematics and science; and RE research in citizenship. Including key objectives and chapter summaries, together with carefully developed tasks to support your own professional development, Learning to Teach Citizenship in the Secondary School is designed to develop theoretically informed good practice in citizenship education. It is a source of support, guidance and creative ideas for all training citizenship teachers and those teaching the subject as non-specialists, and offers specialists new insight into this crucial subject.

Teaching and Learning in the Early Years Jan 01 2020 This best-selling text book provides a broad-ranging and up-to-date review of thinking and best practice within nursery and infant education. Written around the basic truth that an effective early years curriculum must start with the children, their needs and their potential, the contributors to this classic text acknowledge that learning must have a strong element of fun, wonder and excitement. Fully revised and updated in light of recent changes to the Early Years curriculum, with brand new chapters on assessment, communication, writing, creativity and diversity, the contributors address a range of fundamental issues and principles, including: an analysis of research into how children learn; discussions of issues such as classroom organisation,

curriculum management, and assessment; a detailed section on play and language; chapters covering individual curriculum areas, including new chapters on music and PSHE. Each chapter combines a review of important principles with practical and inspiring classroom examples throughout. It is essential reading for all Foundations Stage and KS1 trainee teachers, their tutors and mentors, and serving teachers working in the 3-7 age range who wish to reflect upon and develop their practice.

Learning to Teach English in the Secondary School Mar 15 2021 How do you approach teaching English in the contemporary classroom? What is expected of a would-be English teacher? The fourth edition of this best-selling text combines theory and practice to present an indispensable introduction to the opportunities and challenges of teaching English in the secondary classroom. It offers insight into the history, policies and definitions surrounding the subject, together with innovative and practical strategies which can be used for effective teaching and learning. Already a major text for many university teacher education courses, the new edition reflects the extent and impact of current reforms whilst retaining its focus on what is of enduring value for English teaching. With an emphasis on developing your own values and on stimulating approaches that underpin English teaching, it will help you navigate your way through changing curriculum requirements, assessment practice and the demands of professional development. Key topics explored include: Reading, writing and speaking and listening Teaching language and grammar Drama in English teaching Poetry Working with digital technologies Post-16 English language and literature Developing as a critically reflective practitioner. Written particularly with the new and student teacher in mind, *Learning to Teach English in the Secondary School* aims to equip readers with the tools to make critically informed judgements about how to teach, develop principled practice and most importantly, be mindful of pupils and their experience of English in the secondary classroom.

Michael Gove Nov 22 2021 Michael Gove is one of the most recognisable faces in British politics – and one of the most divisive. Whether it's taking on the education 'blob', acting as a frontman for the Brexit campaign or orchestrating one of the bloodiest political assassinations in the history of British politics, Gove is a man who makes things happen. But it was almost so different, and his story, from being born into care to standing for the leadership of the Conservative Party, could have come straight from the pages of a Charles Dickens novel. A charming man to his friends, and a cold-blooded zealot to his enemies, Gove provokes a reaction from everyone, be it loyalty, anger, respect or fury. Love him or hate him, it's impossible to deny Gove's impact on the UK over the past ten years, and, with Brexit still up in the air, he will continue to play a key role in the future of the country. Political journalist Owen Bennett's groundbreaking biography takes in original research as well as interviews with current and former Cabinet ministers, ex-colleagues from the BBC and The Times, and numerous other key players in Gove's life story. Lively and insightful in equal measure, *Michael Gove: A Man in a Hurry* reveals what turned the adopted son of an Aberdeen fishing family into one of the key political figures of the decade.

Listening for Democracy Nov 10 2020 Although much prized in daily conversation, good listening has been almost completely ignored in that form of political conversation we know as democracy. This book examines the reasons why so little attention has been

paid to the listening aspect of democratic conversation, explores the role that listening might play in democracy, and outlines some institutional changes that could be made to make listening more central to democratic processes. The focus on listening amounts to a reorientation of democratic theory and practice, providing novel perspectives on enduring themes in democracy such as recognition, representation, power and legitimacy—as well as some new ones, such as silence. Eschewing the pessimism of the 'realist' turn in democratic theory, the book shows how attention to listening can breathe life into the democratic project and help us to realise some of its objectives. Drawing on practical examples and multidisciplinary sources, the book shows how listening should be at the heart or representative and deliberative democracy rather than peripheral to them. It develops a notion of dialogic democracy based on structured, 'apophatic', listening, and meets the challenge of showing how this could be incorporated in parliamentary democracies. What should we be listening out for? This book addresses the question of political noise and uses the idea of recognition to develop an account of politics that takes us beyond the Aristotelian speaking being towards a Deweyan notion of the 'event' around which publics coalesce.

CCEA GCSE Physics Third Edition Mar 07 2023 Build your students' scientific thinking and practical skills with this Third Edition textbook, developed specifically for the 2017 GCSE specifications, from the No. 1 publisher for CCEA GCSE Science. - Develop understanding with clear Examples, Tips and Practical activities. - Prepare students for assessment with Test Yourself questions, Maths practice and Exam-style questions throughout. - Provides everything you need for GCSE Physics and the Physics content of GCSE Double Award Science. - Supports Foundation and Higher-tier students in one book.

Successful Study Apr 15 2021 Successful Study is an essential guide for students embarking upon an education related Foundation Degree without previous study experience. The world of study at university can be a daunting and bewildering place for new students unfamiliar with the academic processes such as writing essays and presenting portfolios. This book offers clear and straight-forward explanations of how to prepare for study, how to work at higher education level and how to tackle assignments. Covering all aspects of educational study, and based on the experiences of real education professionals, this new edition has been fully updated to include: Clear links to work-based practices throughout Advice for students with disability Guidance on using e-resources Tips for managing your learning and increasing motivation How to think critically Reflective practice With case studies, tasks and opportunities for reflection, this accessible book has been specifically designed for those on Teaching Assistant, Early Years or related Foundation Degrees and will be an essential resource for those wanting to find the answers to study questions quickly and easily.

The Old Boys Apr 08 2023 To many in the United Kingdom, the British public school remains the disliked and mistrusted embodiment of privilege and elitism. They have educated many of the country's top bankers and politicians over the centuries right up to the present, including the present Prime Minister. David Turner's vibrant history of Great Britain's public schools, from the foundation of Winchester College in 1382 to the modern day, offers a fresh reappraisal of the controversial educational system. Turner argues that public schools are, in fact, good for the nation and are presently enjoying their true “Golden Age,” countering the long-held

belief that these institutions achieved their greatest glory during Great Britain's Victorian Era. Turner's engrossing and enlightening work is rife with colorful stories of schoolboy revolts, eccentric heads, shocking corruption, and financial collapse. His thoughtful appreciation of these learning establishments follows the progression of public schools from their sometimes brutal and inglorious pasts through their present incarnations as vital contributors to the economic, scientific, and political future of the country.

Business Ethics Apr 27 2022 Business Ethics introduces students to ethical issues and decision-making in a variety of contemporary contexts. It develops an awareness of the many ways in which ethical considerations can manifest in commercial domains, thereby helping prepare students for their professional careers. Business Ethics shows how theory works in practice. It includes hundreds of real-world examples that will help engage students. Examples draw on recent and emerging concerns, such as the moral implications of social media and the enforcement of codes of behaviour within industries. The book also addresses corporate social responsibility, stakeholder management and sustainability, reflecting the broad scope of business ethics today. Comprehensive online resources are available at www.cambridge.edu.au/academic/businessethics. Student resources include additional review questions and case studies, with answer guides, to help students reinforce learning and prepare for assessment tasks. Instructor resources include an extensive set of tutorial exercises, PowerPoint slides and a test bank of assessment resources.

Jilted Generation Jun 29 2022 ‘Should be read as a strident call to arms for a partially disenfranchised generation that is burdened with debt.’ The Times ‘No parent can dismiss this argument about our collective failure to invest in the future’ The Guardian Why are so many adult children living still living with mum and dad? Why do young people seem so disinterested in politics? And what are the hidden threats to Britain’s long-term prosperity lurking in the next few decades? First published in 2010, Ed Howker and Shiv Maik’s Jilted Generation answers fundamental questions about the society you thought you knew. It identified, for the first time, the perilous position of Britain’s young adults and, with a title brandished by everyone from Ed Miliband to student protesters, the book’s thesis has formed a controversial but essential part of Britain’s political debate. With significant additional material, this edition updates the argument and explains the real effects of austerity policies and the recession. And, crucially, it explains what must be done to protect a vital and underestimated national asset – Britain’s newest adults.

GCSE Mathematics for Edexcel Foundation Student Book May 17 2021 A new series of bespoke, full-coverage resources developed for the 2015 GCSE Mathematics qualifications. Endorsed for the Edexcel GCSE Mathematics Foundation tier specification for first teaching from 2015, this Student Book provides full coverage of the new GCSE Mathematics qualification. With a strong focus on developing problem-solving skills, reasoning and fluency, it helps students understand concepts, apply techniques, solve problems, reason, interpret and communicate mathematically. Written by experienced teachers, it also includes a solid breadth and depth of quality questions set in a variety of contexts. GCSE Mathematics Online - an enhanced digital resource incorporating progression tracking - is also available, as well as a free Teacher's Resource, Problem-solving Books and Homework Books.

The Birmingham Book Nov 03 2022 The Trojan Horse affair sent shock waves across England's education system in 2014. The affair

centred around an anonymous letter that contained instructions on how to take over schools with a majority Muslim population by influencing their governing bodies and undermining head teachers. The authenticity of the letter remains hotly disputed, yet its publication generated huge turbulence - not only in Birmingham's schools and communities, but also in both Parliament and the national news. The book offers fresh perspectives based on unique access to information from within the city, written by respected educationalists who have worked successfully in Birmingham for many years both during the Trojan Horse era and since. It explains what led to the publication of the letter, its profound consequences for education in Birmingham, and how it influenced events in the city since. Crucially the book also opens up an informed discussion around the issues raised during Trojan Horse, such as delivering a well-rounded curriculum suitable for a diverse school community, developing working partnerships in the local area, and boosting the attainment and aspirations of children from disadvantaged backgrounds. Colin shares case studies of school improvement in local and national MATs in tough, multicultural urban environments, and how schools worked to develop pupils' social capital. The Birmingham Book reveals how the Trojan Horse affair was handled by the Department for Education as their academies and free schools policies underwent their first major stress tests. Furthermore, the book provides an up-to-date appraisal of the interrelationship between education in England's schools and the cultural and religious practice of the local communities the schools serve - and of the underachievement levels of the different ethnic groups in Birmingham. Suitable for teachers, school leaders, governors and policymakers.

J-Reading n. 1-2013 Sep 01 2022

Creating Curricula: Aims, Knowledge and Control Jan 05 2023 Knowledge has been a defining focus for the curriculum studies field. In the early part of the 21st century convincing arguments were mounted that knowledge needed to be 'brought back in', both to the curriculum of schools and to the attention of curriculum researchers. This book is a result of these arguments, and what some regarded as a 'crisis' in curriculum study related to the growing emphasis on international comparisons between education systems. The book's most important contribution is to build on seminal work in the sociology and philosophy of education in order to develop new foundations for curriculum study, using the importance of 'transactions' as the context for understanding knowledge in the curriculum. The contributors build on this importance to suggest a rapprochement in the field around the idea of curriculum knowledge as both constructed and real. This book was originally published as a special issue of *The Curriculum Journal*.

OECD Reviews of Evaluation and Assessment in Education: Northern Ireland, United Kingdom Jan 13 2021 This comprehensive review of Northern Ireland's educational evaluation and assessment framework finds a programme that is thoughtfully designed and which stands out internationally.

The Coalition Effect, 2010–2015 Sep 20 2021 The essential verdict on Britain's first coalition government since the Second World War delivered by an unrivalled team of experts.

Censored Mar 27 2022 When Henry Vizetelly was imprisoned in 1889 for publishing the novels of Émile Zola in English, the problem

was not just Zola's French candour about sex – it was that Vizetelly's books were cheap, and ordinary people could read them. *Censored* exposes the role that power plays in censorship. In twenty-five chapters focusing on a wide range of texts, including the Bible, slave narratives, modernist classics, comic books, and Chicana/o literature, Matthew Fellion and Katherine Inglis chart the forces that have driven censorship in the United Kingdom and the United States for over six hundred years, from fears of civil unrest and corruptible youth to the oppression of various groups – religious and political dissidents, same-sex lovers, the working class, immigrants, women, racialized people, and those who have been incarcerated or enslaved. The authors also consider the weight of speech, and when restraints might be justified. Rich with illustrations that bring to life the personalities and the books that feature in its stories, *Censored* takes readers behind the scenes into the courtroom battles, legislative debates, public campaigns, and private exchanges that have shaped the course of literature. A vital reminder that the freedom of speech has always been fragile and never enjoyed equally by all, *Censored* offers lessons from the past to guard against threats to literature in a new political era.

Geoscience Research and Outreach Sep 08 2020 From energy and water resources to natural disasters, and from changing climatic patterns to the evolution of the Earth's deep interior, geoscience research affects people's lives in many ways and on many levels. This book offers a stimulating cross-disciplinary perspective on the important relationship between geoscience research and outreach activities for schools and for the general public. The contributors – academics, research scientists, science educators and outreach program educators – describe and evaluate outreach programs from around the world. A section entitled Field-based Approaches includes a chapter describing an initiative to engage Alaskan communities and students in research, and another on problem-based learning in the field setting. The Online Approaches section discusses ways to connect students and scientists using online forums; use of the web and social media, including the United Nations University and its experience with the design of a web magazine featuring geoscience research; and video clips on marine geoscience created by students and scientists. The section on Workshop and Laboratory-based Approaches includes a chapter on teaching geochronology to high school students, and another describing an extracurricular school activity program on meteorology. The Program Design section presents chapters on Integrating Geoscience Research in Primary and Secondary Education, on ways to bridge research with science education at the high school level, and on use of online geoscience data from the Great Lakes. The concluding section, Promoting Research-enhanced Outreach, offers chapters on Geoscience Outreach Education with the local community by a leading research-intensive university, and on the use of research to promote action in Earth science professional development for schoolteachers. *Geoscience Research and Outreach: Schools and Public Engagement* will benefit geoscience researchers who wish to promote their work beyond academia. It offers guidance to those seeking research funding from agencies, which increasingly request detailed plans for outreach activities in research proposals. Policymakers, educators and scientists working in museums, learned societies and public organizations who wish to widen participation will also find this book useful. Together with the companion volume *Geoscience Research and Education: Teaching at Universities*, this book showcases the key role that geoscience research plays in a wide spectrum of educational settings.

Muslim Active Citizenship in the West Oct 02 2022 Muslim Active Citizenship in the West investigates the emergence and nature of Muslims' struggle for recognition as full members of society in Australia, Great Britain and Germany. What actions have been taken by Muslims to achieve equal civic standing? How do socio-political and socio-economic factors impact on these processes? And how do Muslims negotiate their place in a society that is often regarded as sceptical – if not hostile – towards Muslims' desire to belong? This book sheds new light on Muslims' path towards citizenship in Australia, Great Britain and Germany. Existing research and statistics on Muslims' socio-economic status, community formation, claim-making and political responses, and the public portrayal of Islam are systematically examined. These insights are tested 'through the eyes of Muslims', based on in-depth interviews with Muslim community leaders and other experts in all three countries. The findings offer unique perspectives on Muslim resilience to be recognised as equal citizens of Islamic faith in very different socio-political national settings. Pursuing an interdisciplinary and comparative approach, this book examines the country-specific interplay of historical, institutional, political, and identity dimensions of Muslims' active citizenship and will be invaluable for students and researchers with an interest in Sociology, Religious Studies and Political Science.

The Gove Legacy Dec 24 2021 Michael Gove was, unquestionably, a pivotal figure in British educational reform during his time as the coalition's Secretary of State for Education. This team of experts, drawn from academia, think-tanks and trade unions, offer an unrivalled early assessment of the impact of Gove, and his reforms, on the British educational landscape.

Educating Tomorrow's Engineers Jun 17 2021 In the UK we teach young people to become computer users and consumers rather than programmers and software engineers. This is creating a chronic skills gap in ICT. We need around 82,000 engineers and technicians just to deal with retirements up to 2016 and 830,000 SET professionals by 2020. On the plus side, the Government's proposal to include computer science as a fourth science option to count towards the EBac is welcomed. The Committee also welcomes the EBac's focus on attainment of mathematics and science GCSEs but is concerned that subjects such as Design and Technology (D&T) might be marginalised. A Technical Baccalaureate (TechBac) is being designed but if it is to be a success, schools should be incentivised to focus on the TechBac by making it equivalent to the EBac. Reforms to vocational education following the Wolf Review meant that Level 2 of the Engineering Diploma, a qualification highly regarded, would count as equivalent to one GCSE despite requiring curriculum time and effort equivalent to several GCSEs. The Engineering Diploma, however, is currently being redesigned as four separate qualifications. The Committee also expressed concerns over the Department for Education's (DfE) lack of clarity on its research budget, and use of evidence in decision-making. The DfE needs to place greater focus on gathering evidence before changes to qualifications are made, and must leave sufficient time for evidence to be gathered on the effectiveness of policies before introducing further change. The possibility of gathering evidence from randomised controlled trials (RCTs) should be seriously considered

OCR GCSE (9–1) Citizenship Studies Feb 06 2023 An OCR endorsed textbook. Association for Citizenship Teaching Quality Mark

resource. Encourage students of all abilities to develop an enthusiastic interest in contemporary UK society with knowledge-boosting activities and assessment support for the changed content and assessment criteria; produced by the leading Citizenship publisher and OCR's Publishing Partner. - Equip students with the knowledge and skills they need to fulfil their potential by working through a variety of developmental activities that are suitable for all ability levels - Provide opportunities for students to learn and practise the research, analytical, interpretative and evaluative skills required under the 2016 specification - Bring the key issues and concepts in Citizenship Studies to life using a bank of real-life case studies to enrich students' learning experience - Build students' confidence approaching assessment with targeted assessment preparation, guidance on crafting successful responses and practice questions that include plenty of source analysis tasks - Deliver high-quality lessons that meet the differing needs of your students, following an engaging teaching pathway created by a skilled teacher with extensive examining experience

2012 GCSE English results May 09 2023 The 2012 GCSE English results prompted significant controversy, which ultimately resulted in an application for judicial review. This report sets out the background to these events and identifies lessons to be learned. The problems with GCSE English can be traced back to the 2007-09 development phase of the qualification- in particular the turbulence which resulted from the shift away from a mostly linear to a modular system, combined with a high proportion of controlled assessment and generous marking tolerances. Exam board experts raised concerns at the time, but these were not acted upon by the regulator (the then-interim Ofqual). Further difficulties arose because of pressures from the school accountability system. The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening, with consequences for grade awarding. The current status of Ofqual, as an independent regulator accountable to Parliament, is the right one. However, the Coalition Government is bringing in wholesale changes to GCSEs and A levels, to a tight timetable and at the same time. Ofqual must have systems in place. The Committee is also concerned that there is a rush towards separate exam systems for England, Wales and Northern Ireland, without careful reflection on what might be lost, or consensus that this is the right thing to do.

Learning to Teach Using ICT in the Secondary School Jul 31 2022 Learning to Teach Using ICT in the Secondary School offers teachers of all subjects a comprehensive, practical introduction to the extensive possibilities that ICT offers pupils, teachers and schools. Under-pinned by the latest theory and research, it provides practical advice and guidance, tried-and-tested examples, and covers a range of issues and topics essential for teachers using ICT to improve teaching and learning in their subject. The third edition has been fully updated in light of rapid changes in the field of both ICT and education and includes six brand new chapters. Key topics covered include: Theories of learning and ICT Effective pedagogy for effective ICT Using the interactive whiteboard to support whole class dialogue Special needs and e-inclusion Literacy and new literaciesNEW Multi-play digital games and on-line virtual worldsNEW Mobile learningNEW e-Safety Supporting international citizenship through ICTNEW Linking home and school ICT tools for administration and monitoring pupil progressNEW Tools for professional development. Including case studies and tasks to support your own learning, as well as ideas and activities to use with all your students, Learning to Teach Using ICT in the Secondary School

is a vital source of support and inspiration for all training teachers as well those looking to improve their knowledge. If you need a guide to using ICT in the classroom or for professional support, start with this book.

Surviving and Thriving in the Secondary School Jan 25 2022 With an emphasis on developing a reflective, resilient approach that will ensure both effective teaching and teacher well-being, *Surviving and Thriving in the Secondary School* covers key issues that may be encountered in the day-to-day practice of teaching in the secondary school. With evidence-based practice at the forefront, this volume allows new teachers to avoid common pitfalls of teaching and it will help provide a new-found confidence within the classroom. Including a wide range of tasks that will help guide and demonstrate successful practice, this book covers topics and concerns such as: Building relationships within teaching Managing and responding to change Becoming an inclusive educator Working to improve classroom climate and pupil behaviour Assessment, homework and marking Inclusion of digital technologies and ICT Looking after yourself and your professional development *Surviving and Thriving in the Secondary School* can be utilised to help support and provide ideas on specific areas of concern, or it can be read as a continuing professional development (CPD) companion, allowing practice to be developed and refined. Written by world-renown experts in the field, this volume provides support for all newly qualified teachers and is an essential resource for the first year of teaching and beyond.

Welcome to the Jilted Generation May 29 2022 This the 44-page Preface to the 2013 edition of Ed Howker and Shiv Malik's *Jilted Generation: How Britain Bankrupted Its Youth*. In 2010, 'Jilted Generation: How Britain Bankrupted It's Youth' revealed the plight of Britain's youngest adults for the first time while a new coalition government set out to solve them. The Tories said they would "fulfil a solemn promise to the next generation". The Liberal Democrats said they were "absolutely determined that we will be able to look our children and grandchildren in the eye and say we did the best we could for them". So how has that been working out? In this trailblazing new analysis, the authors of *Jilted Generation* reveal the canyon between Britain's next generation and the politicians claiming to help them. In unemployment and homelessness rates, through the riots, student protests and workfare battles, a picture emerges of a generation in crisis, a government in stasis and an unprecedented opportunity to solve both problems. Published here as an eBook Short, as well as in the fully updated new edition of *Jilted Generation*, this essay offers an insight into the issues - a clear and hard-hitting view of the situation in 2013 for Britain's young adults.

Inequalities in the UK Jan 31 2020 This book addresses the question of the extent of and responses to inequalities in the UK in 2017 in the wake of the 2008 Great Recession and provides an up-to-date account of the distribution of inequalities, the evolving ways they are measured/addressed as well as the changing perception of inequalities by the general public and policy-makers.

Early Childhood Education Jul 19 2021 This accessible introduction to the history of early childhood education emphasises the role of history and philosophy in early childhood practice today. Firmly grounded in current policy from across the UK, the text features a series of imagined conversations with key figures and pioneers, which exemplify various philosophical positions in early childhood. This second edition has been fully updated and revised in line with recent policy changes, and contains new and updated biographies of

key pioneers as well as three brand new conversations with historical figures. The book is useful for a range of students of Early Childhood Education or History of Education, from first year undergraduates to PhD students. It will also be incredibly valuable to Early Years trainee teachers, practitioners and policy makers.

Challenge and Change for the Early Years Workforce Jul 07 2020 The early years sector is going through a period of unprecedented change. This has resulted in significant challenges for the early years workforce and it is crucial that settings, teams, leaders and individual practitioners respond to these if they wish to continue to provide the best care and education for young children. This timely text identifies and addresses the key challenges for those working with young children from managing personal and professional change, adapting to new legislation and considering new ways of thinking about children's early learning. It considers the core knowledge and understanding of good practice that enables practitioners to respond appropriately and with confidence to issues they face on daily basis. Covering a wide range of diverse topics including professional identity, neuroscience, outdoor education, literacy, special educational needs, the family and the 'risk' factor, the book encourages the reader to reflect upon their own views and attitudes towards change practice and includes: Chapter overviews and summary boxes Case studies to highlight good practice Questions to promote debate Annotated further reading Aimed specifically at those that are studying and working with children from birth to 8, this book will be a core text for Foundation Degrees in early years, early childhood studies and those working towards Early Years Teacher Status.

Routledge Encyclopedia of Translation Technology Dec 04 2022 The Routledge Encyclopedia of Translation Technology provides a state-of-the-art survey of the field of computer-assisted translation. It is the first definitive reference to provide a comprehensive overview of the general, regional and topical aspects of this increasingly significant area of study. The Encyclopedia is divided into three parts: Part One presents general issues in translation technology, such as its history and development, translator training and various aspects of machine translation, including a valuable case study of its teaching at a major university; Part Two discusses national and regional developments in translation technology, offering contributions covering the crucial territories of China, Canada, France, Hong Kong, Japan, South Africa, Taiwan, the Netherlands and Belgium, the United Kingdom and the United States Part Three evaluates specific matters in translation technology, with entries focused on subjects such as alignment, bitext, computational lexicography, corpus, editing, online translation, subtitling and technology and translation management systems. The Routledge Encyclopedia of Translation Technology draws on the expertise of over fifty contributors from around the world and an international panel of consultant editors to provide a selection of articles on the most pertinent topics in the discipline. All the articles are self-contained, extensively cross-referenced, and include useful and up-to-date references and information for further reading. It will be an invaluable reference work for anyone with a professional or academic interest in the subject.

Assessment Policy Reform May 05 2020 This book highlights the impact of policy and politics on assessment across the globe. With contributions from England, the Irish Republic, Northern Ireland, Norway, Sweden, Switzerland, and Wales, it explores state-led

assessment policies and practices that have been the subject of much debate. We are experiencing a shift from using assessments — especially national tests — as measurement instruments designed to produce information, to a reliance on tests to influence policy and instruction. Once tests become high stakes — for students, teachers, and schools — even those that might have been reasonable monitors of educational success can lose dependability and credibility. However, not all countries' assessment policies follow the same model and the contributors explore and analyse a range of different national (and supra-national) assessment policy approaches and perspectives. The chapters identify the impetus behind changing assessment policies and practices and analyse ways forward and innovative approaches. Readers can draw their own conclusions about which model(s) can provide the best outcomes for learners — surely the most important part of the equation. This book was originally published as a special issue of *Assessment in Education: Principles, Policy & Practice*.

Digital contention in a divided society Dec 12 2020 How are platforms such as Facebook and Twitter used by citizens to frame contentious parades and protests in 'post-conflict' Northern Ireland? What do these contentious episodes tell us about the potential of information and communication technologies to promote positive intergroup contact in the deeply divided society? These issues are addressed in what is the first in-depth qualitative exploration of how social media were used during the union flag protests (December 2012-March 2013) and the Ardoyne parade disputes (July 2014 and 2015). The book focuses on the extent to which affective publics, mobilised and connected via expressions of solidarity on social media, appear to escalate or de-escalate sectarian tensions caused by these hybrid media events. It also explores whether citizen activity on these online platforms has the potential to contribute to peacebuilding in Northern Ireland.

British Travellers and the Encounter with Britain, 1450-1700 Feb 23 2022 Encounters with a 'multicultural' Britain in the Tudor and Stuart periods written with an eye to debates about immigration and ethnicity in today's Britain.

Geography Education's Potential and the Capability Approach Mar 03 2020 This book explores the pivotal role that geography as a school subject plays in helping every young person achieve their educational potential. Expressed as 'GeoCapabilities', this concept draws on the the capabilities approach developed by Amartya Sen and Martha Nussbaum applied to curriculum thinking in schools. While traditional subjects have often been deemed irrelevant and outdated in an overcrowded secondary school curriculum, subjects like geography have often been lost or combined with others to fulfil a broad skills agenda. More recent talk of a 'knowledge led' curriculum can often lead to the recitation of facts at the expense of developing deeper understanding. This book argues the concept of powerful geographical knowledge, based on the work of Michael Young and David Lambert, invests the subject of geography with its educational potential: this forms the basis of GeoCapabilities. GeoCapabilities focuses on both what is being taught and why, and as such provides a framework of curriculum thinking which will be of interest and value to geography teachers, school leaders with curriculum development responsibilities and all those interested in the capability approach and the moral imperative of education.

Conquering the material world Oct 22 2021 This is a story of two modern people who have a traditional mindset. Robert, has chosen a

slightly offbeat career. Let's see the challenges he faces in this ever-changing material world and how he deals with those with the help of his friend Alisa who is a student of AI and has a deep interest in Indian philosophy. Robert is on a quest, a quest to be as successful as possible. What does success mean to him? Will both of them manage to land on top of the world? Can they unleash the lucrative layer of qualitative life? Let's find out!

The 'R' Word Oct 10 2020 Race and racism remain an inescapable part of the lives of black people. Daily slights, often rooted in fears and misperceptions of the 'other', still damage lives. But does race matter as much as it used to? Many argue that the post-racial society is upon us and racism is no longer a block on opportunity - Kurt Barling doubts whether things are really that simple. Ever since, at the age of four, he wished for 'blue eyes and blond hair', skin colour has featured prominently as he, like so many others, navigated through a childhood and adolescence in which 'blackness' defined and dominated so much of social discourse. But despite the progress that has been made, he argues, the 'R' word is stubbornly resilient. In this powerful polemic, Barling tackles the paradoxes at the heart of anti-racism and asks whether, by adopting the language of the oppressor to liberate the oppressed, we are in fact paralysing ourselves within the false mythologies inherited from raciology, race and racism. Can society escape this so-called 'race-thinking' and re-imagine a Britain that is no longer 'Black' and 'White'? Is it yet possible to step out of our skins and leave the colour behind?
