America is at a pivotal crossroads. The soul of our nation is at stake and in peril. A new public narrative is needed to unite Americans around common values and to counter the increasing discord and acrimony in our politics and culture. The process of healing and creating a more perfect union in our nation must start now. The moral vision of Martin Luther King Jr.'s Beloved Community, which animated and galvanized the civil rights movement of the 1950s and 1960s, provides a hopeful way forward. In A More Perfect Union, Adam Russell Taylor, president of Sojourners, reimagines a contemporary version of the Beloved Community that will inspire and unite Americans across generations, geographic and class divides, racial and gender differences, faith traditions, and ideological leanings. In the Beloved Community, neither privilege nor

punishment is tied to race, gender, religion, sexual orientation, or economic status, and everyone is able to realize their full potential and thrive. Building the Beloved Community requires living out a series of commitments, such as true equality, radical welcome, transformational interdependence, E Pluribus Unum ("out of many, one"), environmental stewardship, nonviolence, and economic equity. By building the Beloved Community we unify the country around a shared moral vision that transcends ideology and partisanship, tapping into our most sacred civic and religious values, enabling our nation to live up to its best ideals and realize a more perfect union. The essential Pelican introduction to the European Union - its history, its politics, and its role today For most of us today, 'Europe' refers to the European Union. At the centre of a seemingly never-ending crisis, the EU remains a black box, closed to public understanding. Is it a state? An empire? Is Europe

ruled by Germany or by European bureaucrats? Does a single European economy exist after all these years of economic integration? And should the EU have been awarded the Nobel peace prize in 2012? Critics tell us the EU undermines democracy. Are they right? In this provocative volume, political scientist Chris Bickerton provides an answer to all these key questions and more at a time when understanding what the EU is and what it does is more important than ever before. Longlisted for the Carnegie Medal! A dazzling collection of short fiction Zadie Smith has established herself as one of the most iconic, critically respected, and popular writers of her generation. In her first short story collection, she combines her power of observation and her inimitable voice to mine the fraught and complex experience of life in the modern world. Interleaving eleven completely new and unpublished stories with some of her best-loved pieces from The New Yorker and elsewhere, Smith presents a dizzyingly rich and varied collection of fiction. Moving exhilaratingly across genres and perspectives, from the historic to the vividly current to the slyly dystopian, Grand Union is a sharply alert and prescient collection about time and place, identity and rebirth, the persistent legacies that haunt our present selves and the uncanny futures that rush up to meet us. Nothing is off limits, and everything—when captured by Smith’s brilliant gaze—feels fresh and relevant. Perfectly paced and utterly original, Grand Union highlights the wonders Zadie Smith can do. From one of the most prestigious nonprofit organizations devoted to environmental issues comes a clear, practical, and rational overview of the relationship between consumers and the environment. Paper or plastic? Bus or car? Old house or new? Cloth diapers or disposables? Some choices have a huge impact on the environment; others are of negligible importance. To those of us who care about our quality of life and what is happening to the earth, this is a vastly important issue. In these pages, the Union of Concerned Scientists help inform consumers about everyday decisions that significantly affect the environment. For example, a few major decisions--such as the choice of a house or vehicle--have such a disproportionately large affect on the environment that minor environmental infractions shrink by comparison. This book identifies the 4 Most Significant Consumer-Related Environmental Problems, the 7 Most Damaging Spending Categories, 11 Priority Actions, and 7 Rules for Responsible Consumption.
