Lexicography in Africa Mar 21 2022 Lexicography in Africa is a new book in the invaluable series Exeter Linguistic Studies and one of three volumes dedicated to lexicography to mark the fifth anniversary of the Dictionary Research Centre in the University of Exeter. It is the first attempt to fill a niche in our knowledge of lexicography on this continent. It does not pretend to be a complete survey of lexicography in Africa but a tentative one which conveys the most important trends in the field and a wealth of exemplary material. It investigates the lexicographic situation in different parts of Africa (Central Africa paper 3; Northern Africa paper 4 and Southern Africa paper 6) and the linguistic and historical background (paper 1 and 2). It also concerns itself with the user of the dictionary and his needs, types of dictionaries available and the hopes pinned on computer technology.

Nakambale Feb 05 2021 The book is a gripping description of South-West African history (1869-1926) describing the time Martin Rautanen, a young Finnish man, came to work in the Northern part of the country as one of the first Finnish missionaries. He lived and worked in the country for 56 years. The book describes the meeting and interaction of the two very different cultures.

The Mystery of the Myrmidon's Journey Aug 02 2020

Telecommunications Law and Regulation in Nigeria May 11 2021 The Nigerian telecommunications industry has continued to grow in a phenomenal manner following market liberalization reforms that commenced in the 1990s. As of 2017, the telecommunications industry was one of the fastest-growing economic sectors in Nigeria and the fourth largest contributor to the country's Gross Domestic Product. The telecommunications industry, however, remains a highly technical and naturally dynamic industry that has not been a usual area for legal research in developing countries such as Nigeria. This book bridges that gap in knowledge by providing an analysis of the legal and policy instruments that regulate the industry. It comprises eleven chapters that discuss the historical evolution of telecommunications and its regulation; the development of the Nigerian telecommunications industry from 1886 to 2017; the legal basis for the regulation of the industry; the licensing and duties of service providers; the regulation of network infrastructure; the protection of consumers; the regulation of competition, interconnection, universal access, and environmental protection; and the resolution of industry disputes. This book will be useful to policy makers, legislators, regulators, lawyers, law students, investors, operators, and consumers, as well as any person interested in the Nigerian telecommunications industry.

Strengthening Postgraduate Supervision Apr 29 2020 An excellent collection of diverse and deeply reflective perspectives. All offer insights into the multiple challenges confronted in improving the quality and depth of postgraduate supervision, increasing throughput, and dealing with complexity. What is also affirmed is the importance of individual capability in supervision that is developed and nurtured over time, and through arduous effort. The book will be of value to novice supervisors and to more experienced ones. Policy makers, planners and administrators looking to enlarge their understanding of the postgraduate terrain in all its complexities will find the mix of theoretical and practical lenses through which the topic is approached particularly illuminating. - Professor Narend Bajinath, Chief Executive Officer, Council on Higher Education

National Media Policy Jul 13 2021 Papers presented at a seminar organized by Asian Mass Communication Research and Information Center (AMIC).

Media Freedom and Pluralism Nov 04 2020 Addresses a critical analysis of major media policies in the European Union and Council of Europe at the period of profound changes affecting both media environments and use, as well as the logic of media policy-making and reconfiguration of traditional regulatory models. The analytical problem-related approach seems to better reflect a media policy process as an interrelated part of European integration, formation of European citizenship, and exercise of communication rights within the European communicative space. The question of normative expectations is to be compared in this case with media policy rationales, mechanisms of implementation (transposing rules from EU to national levels), and outcomes.

Data Protection in the Internet Dec 30 2022 This book identifies and explains the different national approaches to data protection – the legal regulation of the collection, storage, transmission and use of information concerning identified or identifiable individuals – and determines the extent to which they could be harmonised in the foreseeable future. In recent years, data protection has become a major concern in many countries, as well as at supranational and international levels. In fact, the emergence of computing technologies that allow lower-cost processing of increasing amounts of information, associated with the advent and exponential use of the Internet and other communication networks and the widespread liberalization of the trans-border flow of information have enabled the large-scale collection and processing of personal data, not only for scientific or commercial uses, but also for political uses. A growing number of governmental and private organizations now possess and use data processing in order to determine, predict and influence individual behavior in all fields of human activity. This inevitably entails new risks, from the perspective of individual privacy, but also other fundamental rights, such as the right not to be discriminated against, fair competition between commercial enterprises and the proper functioning of democratic institutions. These phenomena have not been ignored from a legal point of view: at the national, supranational and international levels, an increasing number of regulatory instruments – including the European Union's General Data Protection Regulation applicable as of 25 May 2018 – have been adopted with the purpose of preventing personal data misuse. Nevertheless, distinct national approaches still prevail in this domain, notably those that separate the comprehensive and detailed protective rules adopted in Europe since the 1995 Directive on the processing of personal data from the more fragmented and liberal attitude of American courts and legislators in this respect. In a globalized world, in which personal data can instantly circulate and be used simultaneously in communications networks that are ubiquitous by nature, these different national and regional approaches are a major source of legal conflict.

Xhosa Poets and Poetry Jul 25 2022 Xhosa oral poetry has defied the threats to its integrity over two centuries, to take its place in a free South Africa. This volume establishes the background to this poetic re-emergence, preserving and transmitting the voice of the Xhosa poet.

Data Protection in a Profiled World May 23 2022 One of the most challenging issues facing our current information society is the accelerating accumulation of data trails in transactional and communication systems, which may be used not only to profile the behaviour of individuals for commercial, marketing and law enforcement purposes, but also to locate and follow things and actions. Data mining, convergence, interoperability, ever- increasing computer capacities and the extreme miniaturisation of the hardware are all elements which contribute to a major contemporary challenge: the profiled world. This interdisciplinary volume offers twenty contributions that delve deeper into some of the complex but urgent questions that this profiled world addresses to data protection and privacy. The chapters of this volume were all presented at the second Conference on Privacy and Data Protection (CPDP2009) held in Brussels in January 2009 (www.cpdpconferences.org). The yearly CPDP conferences aim to become Europe's most important meeting where academics, practitioners, policy-makers and activists come together to exchange ideas and discuss emerging issues in information technology, privacy and data protection and law. This volume reflects the richness of the conference, containing chapters by leading lawyers, policymakers, computer, technology assessment and social scientists. The chapters cover generic themes such as the evolution of a new generation of data protection laws and the constitutionalisation of data protection and more specific issues like security breaches, unsolicited adjustments, social networks, surveillance and electronic voting. This book not only offers a very close and timely look on the state of data protection and privacy in our profiled world, but it also explores and invents ways to make sure this world remains a world we want to live in.

European Data Protection: Coming of Age Sep 14 2021 On 25 January 2012, the European Commission presented its long awaited new “Data protection package”. With this proposal for a drastic revision of the data protection framework in Europe, it is fair to say that we are witnessing a rebirth of European data protection, and perhaps, its passage from an impulsive youth to a more mature state. Technology advances rapidly and mobile devices are significantly changing the landscape. Increasingly, we carry powerful, connected, devices, whose location and activities can be monitored by various stakeholders. Very powerful social network sites emerged in the first half of last decade, processing personal data of many millions of users. Updating the regulatory network was imminent and the presentation of the new package will initiate a period of intense debate in which the proposals will be thoroughly commented upon and criticized, and numerous amendments will undoubtedly be proposed. This volume brings together some 19 chapters offering conceptual analyses, highlighting issues, proposing solutions, and discussing practices regarding privacy and data protection. In the first part of the book, conceptual analyses of concepts such as privacy and anonymity are provided. The second section focuses on the contrasted positions of digital natives and ageing users in the information society. The third section provides four chapters on privacy by design, including discussions on roadmapping and concrete techniques. The fourth section is devoted to surveillance and profiling, with illustrations from the domain of smart metering, self-surveillance and the benefits and risks of profiling. The book concludes with case studies pertaining to communicating privacy in organisations, the fate of a data protection supervisor in one of the EU member states and data protection in social network sites and online media. This volume brings together some 19 chapters offering conceptual analyses, highlighting issues, proposing solutions, and discussing practices regarding privacy and data protection. In the first part of the book, conceptual analyses of concepts such as privacy and anonymity are provided. The second section focuses on the contrasted positions of digital natives and ageing users in the information society. The third section provides four chapters on privacy by design, including discussions on roadmapping and concrete techniques. Conjectures and Refutations Sep 02 2020 Conjectures and Refutations is one of Karl Popper's most wide-ranging and popular works, notable not only for its acute insight into the way scientific knowledge grows, but also for applying those insights to politics and to history. It provides one of the clearest and most accessible statements of the fundamental idea that guided his work: not only our knowledge, but our aims and our standards, grow through an unending process of trial and error.

Understanding African Music Jan 19 2022

Literary Studies in English Apr 21 2022 This book aims to examine multiple literary texts and works by applying various cultural and literary theories & criticism. The application of these theories helps in deciphering novel meanings and understanding of the textual elements. The book encompasses texts and articles from the literary canon as well as contemporary literature from around the world which offer a broader perspective on the interaction between various socio-cultural elements that shape literary works. It aims to understand the formation of new meanings and paradigms that emerge out these literary analyses and reviews. This book is a great resource for all the students, academicians and critics who are looking for recent perspectives on different literary texts and works.

Dugard's International Law Aug 26 2022 This fifth edition of International Law: A South African Perspective is now titled Dugard's International Law: A South African Perspective, in recognition of the fact that this work is a continuation of the earlier editions written by John Dugard. The substance of the work has undergone major changes to take account of new developments both on the international legal scene and in South Africa. Dugard's International Law: A South African Perspective presents a South African perspective of international law. The basic principles of international law are described and examined with reference to the principal sources of international law. This examination, however, takes place within the context of South African law. South African state practice, judicial decisions and legislation on international law receive equal treatment with international law as it is practised and taught abroad. The present work is designed to assist judicial officers and practitioners, educate students, and guide diplomats in the intricacies of international law both at home in South Africa and abroad.

The Emergence of Private Authority in Global Governance Jul 01 2020 The emergence of private authority has become increasingly a feature of the post-Cold War world. In The Emergence of Private Authority in Global Governance, leading scholars explore the sources, practices and implications of this erosion of the power of the state. They analyse and compare actors as diverse as financial institutions, multinational corporations, religious terrorists and organised criminals, and assess the potential for reversal of the situation. The themes of the book relate directly to debates concerning globalization and the role of international law, and will be of interest to scholars and students of international relations, politics, sociology and law.

Cyberlaw @ SA III Mar 01 2023

CyberBRICS May 03 2023 This book stems from the CyberBRICS project, which is the first major attempt to produce a comparative analysis of Internet regulations in the BRICS countries – namely, Brazil, Russia, India, China, and South Africa. The project has three main objectives: 1) to map existing regulations; 2) to identify best practices; and 3) to develop policy recommendations in the various areas that compose cybersecurity governance, with a particular focus on the strategies adopted by the BRICS countries to date. Each study covers five essential dimensions of cybersecurity: data protection, consumer protection, cybercrime, the preservation of public order, and cyberdefense. The BRICS countries were selected not only for their size and growing economic and geopolitical relevance but also because, over the next decade, projected Internet growth is expected to occur predominantly in these countries. Consequently, the technology, policy and governance arrangements defined by the BRICS countries are likely to impact not only the 3.2 billion people living in them, but also the individuals and businesses that choose to utilize increasingly popular applications and services developed in BRICS countries according to BRICS standards. Researchers, regulators, start-up innovators and other Internet stakeholders will find this book a valuable guide to the inner workings of key cyber policies in this rapidly growing region.

Barbarism in Higher Education Nov 28 2022

Fighting Cross-Border Cartels Jun 23 2022 This book is the first detailed treatment of the approaches taken to enforce competition laws against cross-border cartels (CBCs) from the perspective of young and small competition authorities (more than 70% of the total number of authorities worldwide). No other legal or inter-disciplinary scholarship exists in the market that deals with the issue of a taxonomy of CBCs combined with young/small competition authorities' problems. The book looks at the extent of the harms caused by CBCs and issues associated with tackling them at a transnational level. It explains why past solutions to problems with cooperation have failed and proposes novel ideas on how to improve cooperation and coordination in certain types of CBC investigations (transnational and regional CBCs). The proposals are based on primary-source information and observations made by the author as part of his work in the UN, and interviews with leading enforcers from young, small, old and large jurisdictions. Young/small competition authorities, competition lawyers and economists, scholars and students within the fields of competition law and international law, and those interested in international cooperation and coordination in the area of cartel enforcement in emerging markets will greatly benefit from this book. It is clearly structured and extensively referenced, providing a valuable guide to the topic.

The Ovambofahrt Jan 25 2020

China's Cyber Power Mar 28 2020 China's emergence as a major global power is reshaping the cyber domain. The country has the world's largest internet-user community, a growing economic footprint and increasingly capable military and intelligence services. Harnessing these assets, it is pursuing a patient, assertive foreign policy that seeks to determine how information and communications technologies are governed and deployed. This policy is likely to have significant normative impact, with potentially adverse implications for a global order that has been shaped by Western liberal democracies. And, even as China goes out into the world, there are signs that new technologies are becoming powerful tools for domestic social control and the suppression of dissent abroad. Western policymakers are struggling to meet this challenge. While there is much potential for good in a self-confident China that is willing to invest in the global commons, there is no guarantee that the country's growth and modernisation will lead inexorably to democratic political reform. This Adelphi book examines the political, historical and cultural development of China's cyber power, in light of its evolving internet, intelligence structures, military capabilities and approach to global governance. As China attempts to gain the economic benefits that come with global connectivity while excluding information seen as a threat to stability, the West will be forced to adjust to a world in which its technological edge is fast eroding and can no longer be taken for granted.

The Economics of Nationalized Industries Apr 09 2021

Ungodongwana Mar 09 2021

Vanishing Cultures of South Africa Feb 26 2020 Ten major ethnic groups are featured - including the San, Zulu, Ndebele, Basotho, and Venda - as well as several smaller sub-groups. This book describes the individual personality and history of each, their education, laws, languages, medicine and magic, and their religion. Over 200 photographs capture the vibrant color of ceremonial and everyday dress and ornamentation, musical instruments, dances and rites of passage, art, homes, and work. The remarkable metal neck rings and the geometrically beaded wire hoops worn by Ndebele and Ntwana women, the sacrificial ceremonies of the Zulu, the long pipes smoked by the Xhosa, and the traditional hunter-gatherer weapons of the San, deep in the Kalahari Desert - the details of today's way of life are recorded here in evocative pictures, while former traditions, now lost, fill the text with the intriguing, vital history of each group.

Annual Report Apr 02 2023

Introduction to Criminal Investigation May 30 2020 The manner in which criminal investigators are trained is neither uniform nor consistent, ranging from sophisticated training protocols in some departments to on-the-job experience alongside senior investigators in others. Ideal for students taking a first course in the subject as well as professionals in need of a refresher, Introduction to Crimin

The Dream House Aug 14 2021 A farmhouse is being reproduced a dozen times, with slight variations, throughout a valley. Three small graves have been dug in the front garden, the middle one lying empty. A woman in a wheelchair sorts through boxes while her husband clammers around the old demolished buildings, wondering where the animals have gone. A young woman - called 'the barren one' behind her back - dreams of love, while an ageing headmaster contemplates the end of his life. At the entrance to the long dirt driveway, a car appears and pauses - pointed towards the house like a silver bullet, ticking with heat. So begins The Dream House, Craig Higginson's riveting and unforgettable novel set in the Midlands of KwaZulu-Natal. Written with dark wit, a stark poetic style and extraordinary tenderness, this is a story about the state of a nation and a deep meditation on memory, ageing, meaning, family, love and loss. This updated 2016 edition contains new content, with Craig Higginson exploring the background to The Dream House, his varied experiences in a farmhouse in KwaZulu-Natal and the subsequent and poignant motivations for this moving novel.

South African national bibliography Oct 28 2022 Classified list with author and title index.

Post-Western World Nov 16 2021 With the United States' superpower status rivalled by a rising China and emerging powers like India and Brazil playing a growing role in international affairs, the global balance of power is shifting. But what does this mean for the future of the international order? Will China dominate the 21st Century? Will the so-called BRICS prove to be a disruptive force in global affairs? Are we headed towards a world marked by frequent strife, or will the end of Western dominance make the world more peaceful? In this provocative new book, Oliver Stuenkel argues that our understanding of global order and predictions about its future are limited because we seek to imagine the post-Western world from a parochial Western-centric perspective. Such a view is increasingly inadequate in a world where a billions of people regard Western rule as a temporary aberration, and the rise of Asia as a return to normalcy. In reality, China and other rising powers that elude the simplistic extremes of either confronting or joining existing order are quietly building a "parallel order" which complements today's international institutions and increases rising powers' autonomy. Combining accessibility with expert sensitivity to the complexities of the global shift of power, Stuenkel's vision of a post-Western world will be core reading for students and scholars of contemporary international affairs, as well as anyone interested in the future of global politics. "A fascinating interpretation of our understanding of politics and global affairs, which demonstrates the evolving nature of power today. Oliver Stuenkel presents a compelling argument - not just about the "Rise of the Rest", but also the overlooked power and influence of the non-Western world. Highly engaging and instructive." Dr Shashi Tharoor, India's Minister of State for External Affairs (2009-10) "Oliver Stuenkel is one of the best new voices in the field of international politics. In Post-Western World, he explores the primary challenges of the global order and critiques the parochial, Eurocentric vision which conforms to international power structures. This book is essential reading for anyone seeking to understand what a multipolar world order would look like and how it might be effectively realized." Celso Amorim, Brazil's Minister of External Relations (1993-5, 2003-11) and Minister of Defence (2011-15)

Governing European Communications Dec 18 2021 Governing European Communications provides a comprehensive and up-to-date account of the emergence, dynamics, and evolution of European-level communications governance in the post-war era, focusing on telecommunications and television policies and regulation, and their technological convergence. Concentrating on the EU, the book embeds governance within broader economic and political developments in a global context and demonstrates that European governance has been more about the character rather than the level of regulation.

Edhina Ekogidho - Names as Links Jan 31 2023 What are the most popular names of the Ambo people in Namibia? Why do so many Ambos have Finnish first names? What do the African names of these people mean? Why is the namesake so important in Ambo culture? How did the nation's long struggle for independence affect personal naming, and what are the latest name-giving trends in Namibia? This study analyses the changes in the personal naming system of the Ambo people in Namibia over the past 120 years, starting with 1883, when the first Ambos received biblical and European names on baptism. The central factors in this process were the German and South African colonisation and European missionary work on the one hand, and the rise of African nationalism on the other. Eventually, this clash between African and European naming practices led to a new, dynamic naming system which includes elements of both African and European origin. "Within the field of onomastics, i.e. the scientific study of names, this study is a remarkable and extremely important one. ... I suspect that it will become a major and standard reference work in the future, not only regarding Ambo anthroponymy, but anthroponymy in general, particularly where cultures interact." Professor S. J. Neethling, University of the Western Cape, South Africa

South Africa's 'Border War' Dec 26 2019 South Africa's 'Border War' provides a timely study of the 'war of words' waged by retired South African Defence Force (SADF) generals and other veterans against critics and detractors. The book explores the impact of the 'Border War' on South African culture and society during apartheid and in the new dispensation and discusses the lasting legacy or 'afterlife' of the war in great detail. It also offers an appraisal of the secondary literature of the 'Border War', supplemented by archival research, interviews and an analysis of articles, newspaper reports, reviews and blogs. Adopting a genuinely multidisciplinary approach that borrows from the study of history, literature, visual culture, memory, politics and international relations, South Africa's 'Border War' is an important volume for anyone interested in the study of war and memory or the modern history of South Africa.

International Telecommunications Law and Policy Oct 16 2021 Since the revolution in modern telecommunications that followed the invention of the telegraph, telecommunication networks have provided channels for the fast delivery of communications across national borders. This transnational nature of telecommunication networks have led to the establishment of international regulatory regimes on the subject. On the other hand, developing countries consider regional economic integration as a major strategy for promoting trade and development, telecommunications have been seen within this context as a strategic tool for facilitating regional economic integration. This has also led to the establishment of regional telecommunication regulatory regimes that aim to promote regional integration and regulatory harmonization. This book discusses telecommunication regimes established by international and regional organizations such as the United Nations, the International Telecommunication Union, the World Trade Organization, the African Union, the Economic Community of West African States, and the Southern African Development Community, among a number of others. It will be relevant to policy makers, regulators, lawyers, law students, investors and telecommunication operators, as well as any person interested in international and African regional telecommunication regimes.

AIDS, Intimacy and Care in Rural KwaZulu-Natal Feb 17 2022 This book describes how HIV/AIDS became part of the lives of the people of the mountainous Okhahlamba in the South African province of KwaZulu-Natal. Based on extensive research in the area between 2003 and 2006, the author shows what impact the disease had - and still does - for adults and children, and the different ways people tried to find answers to the devastating presence of HIV / AIDS. Henderson focuses on informal care by family members and volunteers at a time when anti-retroviral drugs were not yet available. She also shows what it meant to the community once the drugs became available.

The House of Phalo Jan 07 2021 "In this first modern history of the Xhosa, J.B. Peires relates the story of one of the most numerous and important indigenous peoples in contemporary South Africa from their consolidation, through an era of cooperation and conflict with whites (whom the Xhosa regarded as uncivilized), to the frontier wars that eventuated in their present position as a subordinate group in the modern South African state"--Back cover.

Intshuntshe Oct 04 2020 Le ncwadi yemibongo izele yimibonga eyahlukahlekeneyo nenika umdla kakhulu. Le mibongo iveza izinto ngezinto abafundi abadibana nazo imihla nezolo. This poetry book covers various types of poems. Readers will find these poems very interesting.

Computers, Privacy and Data Protection: an Element of Choice Sep 26 2022 This timely interdisciplinary work on current developments in ICT and privacy/data protection, coincides as it does with the rethinking of the Data Protection Directive, the contentious debates on data sharing with the USA (SWIFT, PNR) and the judicial and political resistance against data retention. The authors of the contributions focus on particular and pertinent issues from the perspective of their different disciplines which range from the legal through sociology, surveillance studies and technology assessment, to computer sciences. Such issues include cutting-edge developments in the field of cloud computing, ambient intelligence and PETs; data retention, PNR-agreements, property in personal data and the right to personal identity; electronic road tolling, HIV-related information, criminal records and teenager's online conduct, to name but a few.

Cybersecurity Law and Regulation Dec 06 2020 This book discusses the legal and regulatory aspects of cybersecurity, examining the international, regional, and national regulatory responses to cybersecurity. The book particularly examines the response of the United Nations and several international organizations to cybersecurity. It provides an analysis of the Council of Europe Convention on Cybercrime, the Commonwealth Model Law on Computer and Computer Related Crime, the Draft International Convention to Enhance Protection from Cybercrime and Terrorism, and the Draft Code on Peace and Security in Cyberspace. The book further examines policy and regulatory responses to cybersecurity in the US, the UK, Singapore, India, China, and Russia. It also looks at the African Union's regulatory response to cybersecurity and renders an analysis of the Draft African Union Convention on the Establishment of a Credible Legal Framework for Cybersecurity in Africa. The book considers the development of cybersecurity initiatives by the Economic Community of West African States, the Southern African Development Community, and the East African Community, and further provides an analysis of national responses to cybersecurity in South Africa, Botswana, Mauritius, Senegal, Kenya, Ghana, and Nigeria. It also examines efforts to develop policy and regulatory frameworks for cybersecurity in 16 other African countries (Algeria, Angola, Cameroon, Egypt, Ethiopia, Gambia Lesotho, Morocco, Namibia, Niger, Seychelles, Swaziland, Tanzania, Tunisia, Uganda, and Zambia). Nigeria is used as a case study to examine the peculiar causes of cyber-insecurity and the challenges that hinder the regulation of cybersecurity in African states, as well as the implications of poor cybersecurity governance on national security, economic development, international relations, human security, and human rights. The book suggests several policy and regulatory strategies to enhance cybersecurity in Africa and the global information society with emphasis on the collective responsibility of all states in preventing trans-boundary cyber harm and promoting global cybersecurity. It will be useful to policy makers, regulators, researchers, lawyers, IT professionals, law students, and any person interested in seeking a general understanding of cybersecurity governance in developed and developing countries.Ā?Ā?Ā?Ā?Ā?

Access to Information in Africa Jun 11 2021 As a new praxis emerges, in Access to Information in Africa for the first time African scholars and practitioners reflect on recent advances on the continent, as well as the obstacles that must still be overcome if greater public access to information is to make a distinctive contribution to Africa's democratic and socio-economic future.
