This book presents a synchronic investigation of variation and change processes in Carlisle English, a variety spoken in the far north-west of England. The dataset is based on sociolinguistic interviews and the variation in the variables Goose, Goat and Foot, (T), (R) and (TH) is analysed quantitatively in order to detect diffusion and levelling processes as outcomes of dialect contact scenarios in Carlisle. Listing user groups, newsgroups, and Web sites dedicated solely to Windows 95, this book includes guidance on finding the best free stuff from all the online services, inside information on where to find the incredible free things on Microsoft Network, Microsoft's online service, tips on using and taking advantage of Microsoft's new Windows 95, and more. This detailed study is the first exploration of rural consumption of clothing in early nineteenth-century Britain. Drawing on evidence from a range of sources including newspapers, trade directories, court records, visual sources and surviving garments, Toplis investigates how the apparel of the mass of the British population was acquired. This study is devoted to the analysis of Italian idioms with either ordinary or support verbs (also called light verbs). The research focuses on the exhaustive description of idioms, and is based on their systematic classification according to the principles of the Lexicon-Grammar methodology developed by Maurice Gross (1975, 1979 and further). A thorough examination of the literature shows strong disagreement on the acceptability of some idiomatic constructions. For this reason, the Web was used as a corpus to verify judgments on the supposed ungrammatical constructions. This approach showed that idiomatic constructions which have always been considered ungrammatical are instead perfectly acceptable if contextualized. The results obtained include the following: passive is not a "special case" when it concerns idioms, and idiomatic constructions show the same complexity as non-idiomatic constructions. This book charts the experiences, pitfalls and knowledge behind leading scientific ideas to successful startups. Written by one of Switzerland's top serial entrepreneurs, this book is a must-read for scientists and academicians who want to see

their idea turn into a product and change the market. It is also pertinent for finance and business professionals who aspire to become technology entrepreneurs. Starting with personal qualities of an entrepreneur, Anil Sethi discusses successful ideas, technology evaluation, team formation, patents and investor expectations. To guide the entrepreneur, this book also analyzes deal closing, equity conversion and ideal exit strategies to follow. Ultimately Anil Sethi reveals the 'inside track' which helps understand what drives entrepreneurs and what they wouldn't admit. Why attractive things work better and other crucial insights into human-centered design Emotions are inseparable from how we humans think, choose, and act. In Emotional Design, cognitive scientist Don Norman shows how the principles of human psychology apply to the invention and design of new technologies and products. In The Design of Everyday Things, Norman made the definitive case for human-centered design, showing that good design demanded that the user's must take precedence over a designer's aesthetic if anything, from light switches to airplanes, was going to work as the user needed. In this book, he takes his thinking several steps farther, showing that successful design must incorporate not just what users need, but must address our minds by attending to our visceral reactions, to our behavioral choices, and to the stories we want the things in our lives to tell others about ourselves. Good human-centered design isn't just about making effective tools that are straightforward to use; it's about making affective tools that mesh well with our emotions and help us express our identities and support our social lives. From roller coasters to robots, sports cars to smart phones, attractive things work better. Whether designer or consumer, user or inventor, this book is the definitive guide to making Norman's insights work for you. This book reflects intersection between the lives, commitments, and strategies of two highly respected figures Dr. Paul Farmer and Fr. Gustavo Gutierrez joined in their option for the poor, their defense of life, and their commitment to liberation. Farmer has credited liberation theology as the inspiration for his effort to do "social justice medicine," while Gutierrez has recognized Farmer's work as particularly compelling example of the option for the poor, and the impact that theology can have outside the church. Draws on their respective writings, major addresses by both at Notre Dame, and a transcript of a dialogue between them.

As with most dynamic activities that are based on social and cultural contexts and rely on interactions, education is a complex and often ambiguous endeavor. Despite this complexity, scholars and educators are often required to find ways of defining and explaining what "good" teaching is and to incorporate these conclusions into teacher education. This book contains eight scholarly articles from various countries around the world and offers unique and up-to-date perspectives on relevant practices and pedagogies for teachers' professional education and development. In this international book, it is argued that there is a significant inspiration and enrichment to be gained by investigating the policies and practices of teacher education systems from all over the world. This report reviews engineering's importance to human, economic, social and cultural development and in addressing the UN Millennium Development Goals. Engineering tends to be viewed as a national issue, but engineering knowledge, companies, conferences and journals, all demonstrate that it is as international as science. The report reviews the role of engineering in development, and covers issues including poverty reduction, sustainable development, climate change mitigation and adaptation. It presents the various fields of engineering around the world and is intended to identify issues and challenges facing engineering, promote better understanding of engineering and its role, and highlight ways of making engineering more attractive to young people, especially women.--Publisher's description. A visit to Washington, DC's National Portrait Gallery forever alters Parker Curry's young life when she views First Lady Michelle Obama's portrait. When Parker Curry came face-to-face with Amy Sberald's transcendent portrait of First Lady Michelle Obama at the National Portrait Gallery, she didn't just see the First Lady of the United States. She saw a queen—one with dynamic self-assurance, regality, beauty, and truth who captured this young girl's imagination. When a nearby museum-goer snapped a photo of a mesmerized Parker, it became an internet sensation. Inspired by this visit, Parker, and her mother, Jessica Curry, tell the story of a young girl and her family, whose trip to a museum becomes an extraordinary moment, in a moving picture book. Parker Looks Up follows Parker, along with her baby sister and her mother, and her best friend Gia and Gia's mother, as they walk the halls of a museum, seeing paintings of everyone and everything from George Washington Carver to Frida Kahlo, exotic flowers to graceful ballerinas. Then, Parker walks by Sberald's portrait of Michelle Obama...and almost passes it. But she stops...and looks up! Parker saw the possibility and promise, the hopes and dreams of herself in this powerful painting of Michelle Obama. An everyday moment became an extraordinary one...that continues to resonate its power, inspiration, and indelible impact. Because, as Jessica Curry said, " anything is possible regardless of race, class, or gender. " **FOREWORD
