SAP is the world leader in Enterprise Resource Planning (ERP) software; of the software's modules, the FI (Finance) and CO (Controlling) are by far the most popular and are widely implemented. This book has no competition?it is the only book on the

market on how to configure and implement SAP's FI and CO modules to maximize functionality and features hands-on, step-by-step instructions and real-world examples that provide immediate and practical solutions. Updated for SAP's ECC 6.0, the book covers FI enterprise structure, general ledger, substitutions and validations, automatic account assignments, accounts payable and receivable, asset accounting, accrual engine, closing entries, credit management, lockbox, CO enterprise structure, profitability analysis (CO-PA), and more. With SAP Fiori, SAP S/4HANA offers a modern user interface and a simplified new technical data model. The objectives are faster closing and improved performance for reconciliation activities. Using an example manufacturing company, this book presents the resulting new features for the area of Controlling. In addition to the process-related view of the workflows within the company, the book takes a practical look at the SAP Fiori apps in Controlling. You quickly get an overview of the most important innovations, changed Customizing settings, and current developments in all subcomponents in SAP S/4HANA Controlling. Readers who do not have much experience with HANA yet can first familiarize themselves with the new SAP Fiori interface before turning to the new (simplified) data structures of S/4HANA in Financials and Controlling, as well as the changes to master data and processes. You then follow the example company SPEED GmbH through central structures and processes in Product Cost Controlling. The author also looks at the integration of processes, allocations in SAP Controlling, current developments in Profitability Analysis, and planning and reporting with SAP S/4HANA. - New features in Controlling with SAP S/4HANA - Overview of the functions of all subcomponents - Effects of S/4HANA on your business processes - Practical explanations using a continuous example SAP ERP modules are notoriously hard to configure and use effectively without a lot of practice and experience. But as SAP ERP Financial Accounting and Controlling: Configuration and Use Management shows, it doesn't have to be so difficult. The book takes a systematic approach that leads SAP Financial Accounting and Controlling (FICO) users step by step through configuring and using all the program's facets. This approach makes configuration complexities manageable. The book's author—SAP expert, trainer, and accountant Andrew Okungbowa—ensures that both you and your end users are up and running quickly and confidently with FICO. He also provides sound and tested procedures that ensure your implementation works without error. SAP ERP Financial Accounting and Controlling: Configuration and Use Management is in fact the most comprehensive and easy-to-follow SAP FICO configuration book in the market. It incorporates a hands-on approach, with hundreds of screen shots and practical examples, that allows a person without prior configuration training to make SAP FICO ready for use in the enterprise. You'll find that you don't need to be a rocket scientist to grasp the concepts explained and apply them to your work—even when the finances are complicated, such as with the ins and outs of taxes, currency conversions, or special general ledger entries such as down payments or bills of exchange. Providing an in-depth coverage of both

configuration and end user procedures, the book covers most aspects of the SAP FICO certification syllabus—SAP’s view of the module’s key tasks and procedures—including: Configuring and using the general ledger and accounts payable and receivable screens Configuring and completing closing procedures, asset accounting, and financial reporting Configuring global settings and enterprise variables Accounting for both profit and cost centers Creating a house bank Integrating FICO with other SAP modules Taking a jargon-free tone and providing an abundance of examples, Andrew Okungbowa provides a clear understanding of configuration techniques and the breadth of functionalities encompassed by SAP FICO. And as an accountant, Okungbowa understands the needs of end users as well as of those answering to the CIO. Abstracts of II International Scientific and Practical Conference This book provides an overview of Financial Accounting in SAP S/4HANA across the key process areas — General Ledger, Accounts Payable, Accounts Receivable, and Fixed Assets. Explore the user experience in SAP S/4HANA and learn how to navigate the SAP Fiori front-end and obtain details on the various reporting methods available in SAP S/4HANA. Explore Financial Accounting Master Data to obtain an overview of the core master data elements a user needs to understand within Financial Accounting. Dive into each of the core process areas of Financial Accounting for an overview of what is included in the end-to-end business process, how SAP S/4HANA has improved upon these processes, and which SAP Fiori applications can be utilized to facilitate both day-to-day tasks and closing tasks for accountants. - Explore key process areas in Financial Accounting in SAP S/4HANA - Delve into key SAP Fiori applications - Look at key SAP S/4HANA concepts such as master data, SAP Fiori screens, the universal journal, Central Finance, and reporting tools - Learn how to tailor the user experience in SAP Fiori This course kit is simple and takes typically mundane subjects of accounting and business finance the Balance Sheets, the Income Statement and the Cash Flow Statement and makes them something you can easily learn, understand, remember and use. The book starts with steps and procedures for performing simple calculations in Microsoft Excel and proceeds to an exclusive coverage on computing payroll, TDS, VAT, Service Tax, FBT and other types of taxes in Tally 9.0, a well known and preferred financial accounting software. Maximize on the power of WebSphere Portal to build and deploy portals If you use, develop, manage, or administer WebSphere applications, you are probably already building or managing Web portals-or well on your way to doing so. With this comprehensive book, you'll discover how these portals bring together important functions such as integration, presentation, organization, and customizations-functions needed in every complex application environment. The unparalleled author team of experts offers you in-depth insight on mastering the complex aspects of WebSphere Portal, walking you through every facet from installing to deployment. Mastering IBM WebSphere Portal focuses on not only the portal as a server, but also how it interacts with components such as LDAP servers, enterprise applications, mobile devices, and even other portals. The

authors begin with an introduction to the WebSphere product family and then explore such topics as:

- * Installing and customizing the portal, as well as migrating existing environments to version 5
- * Defining portlets, pages, and user interface properties
- * Applying personalization, collaboration, search, and document and content management within WebSphere Portal v. 5
- * Using high availability, security and single sign-on, identity management, Web services, and enterprise applications
- * Setting up a portal in a high-availability environment and integrating external applications into WebSphere Portal

The companion Web site, www.wiley.com/compbooks/ben-natan, presents all the code in the book as well as links to vendors and sources of information pertaining to WebSphere Portal. This book constitutes the thoroughly refereed postproceedings of the 14th International Symposium on Logic Based Program Synthesis and Transformation, LOPSTR 2004, held in Verona, Italy in August 2004. The 17 revised full papers presented were carefully selected and revised from 23 full paper and 11 extended abstract submissions. The papers are organized in topical sections on verification and analysis, theory and security, transformations, program development, termination, and program development and synthesis. Capturing global market using sap tools, techniques & best practices

DESCRIPTION The book has been written in such a way that the concepts are explained in detail, giving adequate emphasis on examples. To make clarity of the programming examples, logic is explained properly as well discussed using comments in program itself. The book covers the topics right from the start of the software using snapshots of starting the software and writing programs into it. The real-time examples are discussed in detail from simple to complex taking into consideration the requirement of IT consultants. Various sample projects are included in the Book and are written in simple language so as to give IT consultants the basic idea of developing projects in SAP. The examples given in book are user-focused and have been highly updated including topics, figures and examples. The book features more on practical approach with more examples covering topics from simple to complex one addressing many of the core concepts and advance topics also.

KEY FEATURES Comprehensive coverage of SAP UI5, Fiori, Webdynpro, Object oriented ALV with SALV Factory method laying more stress on Realtime case studies. The Book also covers numerous practical examples on LSMW tool, ALE, IDOC, SAP Query tool, SAP Quick viewer tool, SAP Report Painter tool, BAPI, Web services, DME tool, SAP MDM data conversion

Simple language, crystal clear approach, straight forward comprehensible presentation. Adopting user-friendly classroom lecture style. The concepts are duly supported by several examples. The Book cover the topics in a manner which fulfil the skill gap among industry and academia. Examples discussed on SAP tools, methodologies and techniques are helpful for developing projects for IT consultants.

"Introduction: Each table below represents the list of Cost Centers associated with each APT Subfamily at the time the data for this report was gathered from APT in April 2016. The 701 Capital Family is not included as it does not have Cost Centers in a traditional sense. Please see section 6.6 in the main report for a full discussion of the codes used in the Capital Family. For each Cost Center, its Subcategory is listed as well as the business types to which it allocated costs at the time the data were gathered. APT is a dynamic system and the nature or function of the individual Cost Centers may change and Cost Centers may shift from one Subfamily to another or its name may change. Accordingly, the specific Cost Centers and the Business Types they allocated costs to will change subsequent to the April 2016 time period represented here. This Appendix will be updated periodically to reflect for these changes."--PDF cover page.

This book comprises of 115 top consulting scenarios which you should know when you start to work in any procurement module but specifically in SRM Module in SAP. I have added these easy to understand in the one-page format which makes it easy to refer back, Keep as a side note and should be a guide for you to help you in handling most of the scenarios in SRM As per what happens in any consulting environment the issues you actually get from your client may not be included in here but after you have read through this guide, it would give you a very good base in the terms of helping you to experiment and try things out in the system directly to come closer to a resolution.

These are prepared based on my notes from hundreds of meetings, being part of multiple projects, brainstorming with my colleagues and lastly to be able to provide ongoing support to my clients to manage their procurement landscape. Please note that this book focuses on building basic concepts for both Technical as well as functional people, so I recommended you go through all the pages to have a good understanding of the SRM system. If you have basic ABAP knowledge, it would be easier if not, it can be a good learning which can also be applied to other SAP modules. Although this book is geared more towards SRM as a product having worked in other modules as well, I also include some general SAP concepts which help you to apply the same knowledge in multiple other modules like MM, PM, HR and other areas. SRM has a tight integration with all the above modules, and hence it is important to have a good understanding, so you can work effectively in a collaborative environment with other team members by knowing how the other module work rather than just passing the buck. Below are the details of what the book contains - Understand the basics and best practices of procurement - Understand basics of SAP system in general for troubleshooting and support - Added scenarios from real time case studies and client specific issues - Each section is concluded with additional blog and reference links which help to understand the problem in detail - Includes ABAP technical and Functional details - Includes consulting scenarios - Includes Audit specific information - Include any relevant notes and other material - Includes some of my previously written blogs - Some code snippets which you can reuse if you implement the same scenarios In the last 2 chapters, I also try to talk about the next step for SRM and how you can transition to Ariba or other S/4 Modules in the cloud. There is also a detailed blog which I posted on SDN to help you prepare for Ariba certification. This book is written for SAP Controlling (CO) professionals who want to learn expert tips to optimize their system performance for configuration, reconciliation, and reporting. Using a fictional chocolate manufacturing case study, each tip provides detailed information on aspects of the functionality, how it can help you, why you should use it, and how to use it including SAP configuration steps. Obtain best practices for optimizing cost allocation methods, expediting material ledger close, and utilizing cost center overhead charges. Troubleshoot product costing messages and find out how to prevent GL account overrides during inventory posting transactions. Walk through best practices for effectively maintaining master data and standard costing methods. By using an integrated practical example and screenshots, the author informs readers on how to get the most out of their SAP ERP system. - Optimize SAP ERP Controlling configuration, reconciliation, and reporting - Transaction processing tips to ensure accurate data capture - Instructions for avoiding common month-end close pain points - Reporting and reconciliation best practices "The Encyclopedia of Library and Information Science provides an outstanding resource in 33 published volumes with 2 helpful indexes. This thorough reference set--written by 1300 eminent, international experts--offers librarians, information/computer scientists, bibliographers,

documentalists, systems analysts, and students, convenient access to the techniques and tools of both library and information science. Impeccably researched, cross referenced, alphabetized by subject, and generously illustrated, the Encyclopedia of Library and Information Science integrates the essential theoretical and practical information accumulating in this rapidly growing field." Integration of processes and supporting IT tools is a key factor for successful Facility Management. After a review of the present situation of Facility Management the author describes an integrated" process model for the conception, planning and construction processes of facilities, providing integration into the whole life cycle. The target costing method is presented as a means to grant proper conception, planning and construction in accordance with the needs of the investor, the user and the operator. To be able to provide figures for the target costing methodology, a concept for efficient IT process support during the utilisation phase is developed. This includes two levels: the operative level and the controlling level based on the data of the operative processes. The concept is based on standard reference models of the key FM processes of the utilisation phase and on an analysis of the existing functionality of the relevant IT tools. A concept for the integration of existing IT tools is presented, that provides the necessary interaction and data exchange to support the newly introduced parts of the workflow. Based on this integration unified objects are defined, combining the distributed information of the FM business objects. This results in a joint FM database structure. The support of the operative processes and the joint data structure enable standardised calculation of benchmarks for controlling purposes. Finally, these benchmarks are the basis for a statistical method that allows the calculation of the utilisation costs in the conception phase. This publication, initiated by the Korean Society of Medical Informatics (KOSMI) and its Nursing Informatics Specialist Group, and the Special Interest Group in Nursing Informatics of the International Medical Informatics Association (IMIA-NI), is published for nurses and informatics experts working with informatics applications in nursing care, administration, research and education, bringing together the worlds of nursing informatics community. Korea is well known for having the highest level of Information and Communication Technology (ICT) accessibility in the world. Advances in ICT in Korea have lead Korean health care sectors to fully utilize the benefit of ICT for health care. The theme of the book, 'Consumer-Centered Computer-Supported Care for Healthy People', emphasizes the central role of the consumer and the function of information technology in health care. It reflects the major challenge in our time, which is developing and using information technology for the improvement of consumer oriented health care. "I would seriously recommend that this book – in text form – should be available in all nursing libraries as a resource for study and reference in the expanding area of nursing and health care."--Paula M. Procter, Reader in Informatics and Telematics in Nursing, The University of Sheffield, United Kingdom. communication and collaboration solution. Author Tay Kratzer, a Novell Premium Service-Primary Support Engineer, will provide you with insider tips on administration solutions, proven information on how to work with GroupWise 7, and techniques for troubleshooting this latest release of GroupWise not available in the standard GroupWise 7 documentation. Amongst many other things, this guide will cover: GroupWise Architecture Using GroupWise System Operations Installing and Configuring the GroupWise Internet Agent Moving Resources, Distribution Lists and Libraries Troubleshooting Message Flow Securing your GroupWise System via SSL Creating a Backup Solution for GroupWise Creating a Solution to Administer a GroupWise System from a Linux Workstation Master the management and administration of GroupWise 7 with Novell GroupWise 7 Administrator's Guide. Includes case studies for assignments and classroom discussion Covers NP practice financial management Comprehensive instructor's manual available including presentation slides, chapter guides, and grading rubrics This textbook is designed for students preparing as advanced practice clinicians, including APRNs, DNPs, DPTs, DOTs, and physician assistants. The book covers both health policy issues and practice financial management issues. It is organized into seven sections in two parts. The first part is focused on macro issues in healthcare finance, and the second part is focused on healthcare financing management in professional practice. This approach provides the context necessary for the clinician to understand how to manage reimbursement requirements and preferred provider contracting as health care financial policy drives these payment and contracting strategies. Each section features a case study to facilitate classroom discussion on key points. This book is suitable for healthcare finance courses in the curriculum for MSN and DNP programs and also for schools of social work, medicine, occupational, and physical therapy. Das Buch führt in verständlicher Weise in die praktische Nutzung der Business Application Programming Interfaces (BAPIs) ein und klärt zunächst die wesentlichen Begriffe, die hinter dieser neuen SAP®-Technologie stehen. Das Buch zeigt eine empfehlenswerte Vorgehensweise für die Einführung und Realisierung der System-Kopplung zwischen R/3® am Beispiel von Lotus Notes. An Hand eines in nahezu jedem Unternehmen relevanten Ablaufs wird exemplarisch die Umsetzung eines Geschäftsprozesses der Kundenauftragsabwicklung gezeigt. Das neue Wissen wird mit Hilfe der beigelegten CD, die auch ScreenCams beinhaltet, plastisch und leicht verständlich vermittelt. Das Buch verfolgt im wesentlichen zwei Ziele: Es zeigt, welchen Nutzen die BAPIs bieten, um externe Systeme an ein R/3® System anzubinden, und wie hoch der Realisierungsaufwand ist. Es versetzt den Leser in die Lage, die Funktionsweise von R/3® und die angebotenen BAPIs und Lotus Notes nicht nur schnell zu verstehen, sondern auch Geschäftsprozesse schnell und zuverlässig in die Praxis umzusetzen. Management Control is the process by which managers at all hierarchical levels ensure that their strategic intentions are realized. This requires a management control system that enables managers to map external developments to the internal planning and control

processes and to improve the coordination between all actors. The book offers concrete guidance on how to build an integrated planning and control system. The requirements are derived from management models and from corporate management practice. The book presents the fundamentals and models, while also guiding readers through a comprehensive simulation model programmed in Excel. Using this model, readers can trace the dependencies, structures and calculation methods used in detail, and identify the effects on other areas. The goal is to provide a design template for the implementation of a decision-relevant management accounting system as well as for winning internal piloting indicators and early warning information that readers can use at their own organizations. Given its focus, the book will be a valuable asset for managers and specialists, service providers, project developers, producers and traders, public enterprises, NGOs, consultants and lecturers in the fields of management, controllership and information technology.
