PTSD Jan 22 2020 This book is designed for those who work with trauma/shock survivors or those who are trauma/shock victims themselves and who have not yet found a way to collapse and clear any images/memories and resultant fears, anxieties, depression or addictions as a result of ongoing emotional and physical disturbances. You will learn about helping others or oneself in FINDING FREEDOM from addictions, obsessions, compulsions, fears, phobias, anxieties and trauma. It is an easy guide to understanding the nature of PTSD and potentially quick and simple solutions to releasing the impacts of same. You will be able to discover the means by which an understanding of the origins, impact and nature of shock and trauma in people's lives can be dissipated, cleaned and cleared at a pace and in a manner that is safe and healthy for the sufferer. Discover new, practical, and easy-to-apply tools and techniques for collapsing trauma triggers and reactions. This book has both academic content and experiential and practical components, with techniques to attain closure. This is a companion book to the author's online Udemy course on PTSD which contains video and audio lectures as well as resource material, references and links. It is written for Professionals such as Counsellors, Clinicians, Therapists, Critical Incident Stress Debriefers, Psychologists, Psychiatrists, Mental Health Practitioners, Trauma specialists, Students of Psychology/Psychiatry/Criminology and for the clients and patients of the above, including: Military veterans, victims of crime or abuse, victims of terror, those who suffer from trauma and shock, sufferers who have not sought treatment, sufferers who are getting treatment but have not yet been successful in processing their traumatic histories, those who have repeated nightmares or images that haunt them, those who have had emotional, sexual or physical trauma from accidents or deliberate acts of violence or have been witness to same, those who have had vicarious trauma, those who have been 'uncomfortably spotlighted' - which could include having been bullied, those with 'stuck/frozen' memories/images and loved ones who wish to share new possibilities with victims of shock and trauma

Homeland Security Jan 26 2023 Homeland Security: Principles and Practice of Terrorism Response is the definitive resource on all aspects of homeland security, including incident management, threat assessment, planning for and response to terrorism and other forms of violence, the federal response plan, and weapons of mass effect. Ideal as a textbook for college-level homeland security courses or as a training text for first responders and government officials, Homeland Security: Principles and Practices of Terrorism Response explains key concepts of national security and applies them to real-world operations.

[The Psychology of Peacekeeping](#) May 06 2021 Langholtz examines how psychology and other social sciences can offer both theoretical explanations and practical applications in the resolution and amelioration of potentially violent international conflicts. Since the end of the Cold War and bipolar ideologies, the international community has been willing to intervene using approaches that are founded as much in psychology as in force and these remedies have not been confined to the violent periods of conflicts. This book examines psychological interventions and issues during three phases of conflicts. First, the book examines measures available in advance of a threatening conflict through early intervention and an examination of ethno-political issues, economic problems, and potential diplomatic solutions. Second, psychological facets of peacekeeping are examined: the selection of peacekeepers, psychological ambiguities of peacekeeping, and the numbing that comes with widespread suffering. Finally the book examines the psychological measures available to strengthen a cease-fire, deal with mines and related after-effects of war, encourage reconciliation, and hasten the return to a stable and durable peace.

The Paul Cleave Collection #2 Nov 24 2022 Critics and writers are raving about Paul Cleave's outstanding, internationally bestselling crime thrillers. Now experience three of them in this second ebook-only collection. The Cleaner: Joe isn't bothered by the daily news reports of the Christchurch Carver, who, they say, has murdered seven women. Joe knows for a fact that the Carver only killed six, and he's determined to find the copycat killer. He'll punish him for the one, then frame him for the other six. It's the perfect plan because he already knows he can outwit the police. A finalist for the prestigious Ned Kelly Award for Best Fiction in Cleave's native New Zealand, *The Cleaner* is a chilling and darkly funny thriller that will leave you clamoring for his next. *The Killing Hour*: Imagine waking up covered in blood—but it's not your blood. You can't remember a thing about the night before. The morning paper reports that two young women were brutally murdered. You recognize their names. Pieces of the night before come back to you through the haze. And now you're the suspect in their grisly deaths. Welcome to Charlie's world. In this heart-pounding thriller, only the dead know what happened last night. Combining gruesome thrills with clever twists and a heavy dose of devilish humor, Cleave keeps us guessing until the last page of this fantastic psychological thriller. *Cemetery Lake*: In a cold and rainy graveyard, private detective Theodore Tate is overseeing a routine exhumation. When doubts are raised about the identity of the body found in the coffin, the case takes a sinister turn, and dark, personal secrets that Tate thought were buried for good threaten to come to the surface. The first novel to feature Theodore Tate, the "quintessential flawed hero" (Kirkus Reviews), *Cemetery Lake* is at once a totally entertaining crime novel and an unforgettable drama about the universal battle against the darkness within.

[Environmental Crime and its Victims](#) Feb 15 2022 Environmental crime is one of the most profitable and fastest growing areas of international criminal activity. These types of crime, however, do not always produce an immediate consequence, and the harm may be diffused. As such, the complexity of victimization - in terms of time, space, impact, and who or what is victimized - is one of the reasons why governments and the enforcement community have trouble in finding suitable and effective responses. This book provides a diverse and provocative array of arguments, critiques and recommendations from leading researchers and scholars in the field of green criminology. The chapters are divided into three main sections: the first part deals with specific characteristics of some of the major types of environmental crime and its perpetrators; the second focuses explicitly on the problem of victimization in cases of environmental crime; and the third addresses the question of how to tackle this problem. Discussing these topics from the point of view of green criminological theory, sociology, law enforcement, community wellbeing, environmental activism and victimology, this book will be of great interest to all those concerned about crime and the environment.

Come Clean Jan 02 2021

[Clean Energy: Hydrogen/fuel Cells Laboratory Manual](#) Mar 16 2022 This manual is designed for the use of hydrogen as a fuel in the fuel cells. The turn of the century has seen a realization of moving towards clean energy due to a variety of considerations ranging from global warming, anxiety to living in a healthy atmosphere, depletion of fossil fuels, oil slick in Gulf of Mexico resulting in disasters and so forth. Innumerable debates in the literature has led to the identification of hydrogen as the safest and efficient fuel over the other available fuels. This fuel can be used in two ways: a) direct combustion like gasoline and b) fuel cells. The use of it by the first method requires pure oxygen to be used for combustion; it is an expensive method involving oxygen storage and transportation. If oxygen is substituted by air in the combustion, it produces nitrogen oxides that are defying the definition of clean energy. The other method is to use it as a fuel cell for easy emission free transportation. Here chemical energy is converted to electrical energy directly in a fuel cell. To illustrate principles of related fuel cells, methanol and borohydride fuel cells are included in this manual. The nine experiments described here are designed for illustrating the concepts for the beginners and those motivated to go for clean energy. Contents: Hydrogen Safety Gaseous Properties of Hydrogen Determination of Fuel Value Performance Characteristics of Polymer Electrolyte Fuel Cell Properties of Proton Exchange Membranes Used in Fuel Cells Performance Characteristics of a Dissolved Methanol Fuel Cell Borohydride Fuel Cell Performance Characteristics Solar Electrolyzer Fueled Polymer Electrolyte Membrane Fuel Cell Hydrogen Storage Capacity of Hydrogen-Containing Compounds Readership: General audience interested in clean energy, global warming solutions, fuel cells, hydrogen gas safety tests; undergraduate students taking general chemistry course or energy as minor; graduate students who wish to learn the basic

fuel cells, mechanical and electrical engineering students.

Advances in Databases and Information Systems Oct 23 2022 This volume contains the best papers presented at the 14th East-European Conference on Advances in Databases and Information Systems (ADBIS 2010), held during September 20-24, 2010, in Novi Sad, Serbia. ADBIS 2010 continued the ADBIS series held in St. Petersburg (1997), Poznan (1998), Maribor (1999), Prague (2000), Vilnius (2001), Bratislava (2002), Dresden (2003), Budapest (2004), Tallinn (2005), Thessaloniki (2006), Varna (2007), Pori (2008), and Riga (2009). The main objective of the ADBIS series of conferences is to provide a forum for the dissemination of research accomplishments and to promote interaction and collaboration between the database and information systems research communities from Central and East European countries and the rest of the world. The ADBIS conferences provide an international platform for the presentation of research on database theory, development of advanced DBMS technologies, and their advanced applications. ADBIS 2010 spans a wide area of interests, covering all major aspects related to theory and applications of database technology and information systems. Two different submission lines were considered for ADBIS 2010, one within the classic track and another one within a special track organization. ADBIS comprised five tracks: 1. Conceptual Modeling in Systems Engineering (CMSE) 2. Data Mining and Information Extraction (DMIE) 3. Business Processes in E-Commerce Systems (e-commerce) 4. Personal Identifiable Information: Privacy, Ethics, and Security (PIIPES) 5.

Victims and the Criminal Trial Dec 25 2022 This book addresses the idea that victims remain contested and controversial participants of justice in the twenty-first century adversarial criminal trial. Victims are increasingly participating in all phases of the criminal trial, with new substantive and procedural rights, many of which may be enforced against the state or defendant. This movement to substantive rights has been contentious, and evidences a contested terrain between lawyers, defendants, policy-makers and even victims themselves. Bringing together substantial source materials from law and policy, this book sets out the rights and powers of the victim throughout the phases of the modern adversarial criminal trial. It examines the role of the victim in pre-trial processes, alternative pathways and restorative intervention, the jury trial, sentencing, appeal and parole. Preventative detention, victim registers, criminal injuries compensation and victim assistance, restitution and reparations, and extra-curial rights and declarations are examined to set out the rights of victims as they impact upon and constitute aspects of the modern criminal trial process. The adversarial criminal trial is also assessed in the context of the increased rights of victims in international law and procedure, and with reference to policy transfer between civil and common law jurisdictions. This timely and comprehensive book will be of great interest to scholars of criminology, criminal law and socio-legal studies.

Handbook of Autopsy Practice Aug 21 2022 Handbook of Autopsy Practice, Fourth Edition is divided into three parts. Part I contains six new chapters in which the reader will find an assortment of tools that will increase the value of the autopsy. Included in the section are valuable resources and tools such as a sample next-of-kin letter, a quality assurance worksheet, new discourse on the dissection procedure which is accompanied by a worksheet and template for the gross description. There is also a new, detailed discussion of the safe handling of sharps, complete with photographs and the reader will also find the updated requirements of the Eye Bank of America and the U.S. Food and Drug Administration for ocular tissue transplantation. Part II has been updated with new diseases and recent references added. Practicing autopsy pathologists, residents and students are invited to review this alphabetical listing of disorders before each autopsy in order to re-acquaint themselves with what they might encounter. Part III provides a series of tables providing organ weights and body measurements for fetuses, children and adults. Handbook of Autopsy Practice Fourth Edition is an essential resource for clinicians, pathologists, residents and students who strive to hone their trade and increase the value of the autopsies they perform.

The Cleaner Apr 29 2023 Surprising and compelling this powerfully written novel is a terrifyingly vivid rendering inside the mind of a serial killer. Meet Joe. He's a nice guy out to catch a copycat killer. The one copying himself. Joe is in control of everything in his simple life, including both his day job at the police department and his 'night work'. He remembers to feed his fish twice a day and visit his mother at least once a week, although he occasionally peppers her coffee with rat poison. He is not bothered by the reports of The Christchurch Carver, who - they say - murdered seven women. Joe knows the carver has killed only six. He knows that for a fact. And Joe is going to find that copy-cat killer, punish him for the one murder and then frame him for the rest. It's a perfect plan because he already knows he can outwit the police. All he has to do now is take care of all the women who keep getting in his way - his domineering mother for one. Then there is Sally, the maintenance worker who sees him as a replacement for her dead brother, and the mysterious Melissa, the only woman to have ever understood him, but whose fantasies of blackmail and torture no longer have any place in Joe's investigation... The Carver Series: Book 1: The Cleaner Book 2: Joe Victim

The Cleaner Sep 29 2020 Detective Gagon is called to the sewers of Toronto, an unusual location for a homicide. In less than 24hrs, another person is murdered miles away, inside their home. Both victim's eyes were removed, connecting them regardless of the distance. Needing to focus on the case at hand, she's distracted by secrets she's keeping from her girlfriend, Dr. Krista Jones, Toronto's lead coroner. Meanwhile, a young police cadet offers his help, and she gets him involved in a way that risks her own career. On a race to stop a serial killer, and desperately trying to help Dr. Jones shed her past, Gagon traps herself in a web of deceit. Overworked and stretched thin, ultimate choices have to be made before more people die. Can she solve the case, help Dr. Jones, and keep her career intact? Ride along with Detective Marcy Gagon and find out.

Sweet and Clean? Apr 05 2021 Sweet and Clean? challenges the widely held beliefs on bathing and cleanliness in the past. For over thirty years, the work of the French historian, George Vigarello, has been hugely influential on early modern European social history, describing an aversion to water and bathing, and the use of linen underwear as the sole cleaning agent for the body. However, these concepts do not apply to early modern England. Sweet and Clean? analyses etiquette and medical literature, revealing repeated recommendations to wash or bathe in order to clean the skin. Clean linen was essential for propriety but advice from medical experts was contradictory. Many doctors were convinced that it prevented the spread of contagious diseases, but others recommended flannel for undergarments, and a few thought changing a fever patient's linens was dangerous. The methodology of material culture helps determine if and how this advice was practiced. Evidence from inventories, household accounts and manuals, and surviving linen garments tracks underwear through its life-cycle of production, making, wearing, laundering, and final recycling. Although the material culture of washing bodies is much sparser, other sources, such as the Old Bailey records, paint a more accurate picture of cleanliness in early modern England than has been previously described. The contrasting analyses of linen and bodies reveal what histories material culture best serves. Finally, what of the diseases-plague, smallpox, and typhus-that cleanliness of body and clothes were thought to prevent? Did following early modern medical advice protect people from these illnesses?

Crime Victims: An Introduction to Victimology Jun 07 2021 A first in the field when initially published and now a true classic, CRIME VICTIMS: AN INTRODUCTION TO VICTIMOLOGY, Ninth Edition offers the most comprehensive and balanced exploration of victimology available today. The author examines the victims' plight, carefully placing statistics from the FBI's Uniform Crime Report and Bureau of Justice Statistics National Crime Victimization Survey in context. At the same time, he humanizes victims' stories through compelling case studies. The text systematically investigates how victims are currently handled by the criminal justice system, analyzes the goals of the victims' rights movement, and discusses what the future is likely to hold. This Ninth Edition presents current coverage of the seriousness of intimate partner violence, child abuse, sexual assaults in the U.S. military, acquaintance rapes on college campuses, shootings on campuses, whether arming for self-protection is an effective strategy, and similar high-profile issues. It also includes new information about survivorology and bystanderology as well as new material on practical issues facing victims. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Relief and Rehabilitation of War Victims in Indochina Aug 09 2021

Industrial Cleaning Technology Jul 08 2021 The word cleaning covers a wide range of activities from good housekeeping and janitorial duties to clinical

process cleaning applications that form part of our everyday lives, most people are not aware of their existence, and yet without them, many of the services and products we take for granted would not be available. Most chapters include case studies of various cleaning problems together with the solutions offered. Emphasis is placed on the practical aspects of designing, manufacturing and operating cleaning equipment, this includes a detailed examination of traditional cleaning methods, and considers a number of lesser known techniques that have been developed over recent years together with a glimpse of the future trends in the industry. In addition to the actual cleaning techniques, the book examines the effect, of increasing international health, safety, training, and environmental legislation together with regulations that control cleaning standards in the pharmaceuticals, cosmetics, food and drinks manufacturing industries. In this respect, the book is not intended to be a definitive reference book. Legislation and regulations are continually being upgraded, particularly those relating to European Directives. No apologies are given for the fact that the reader will be continually reminded of the need to obtain up to date copies of the various documents referred to, and to secure expert advice on those issues that are crucial in terms of health, safety and hazardous conditions. To assist the reader, useful information sources are listed in the reference section following each chapter. jkljk

Justice for Victims of Crime Jul 28 2020 This book analyses the rights of crime victims within a human rights paradigm, and describes the inconsistencies resulting from attempts to introduce the procedural rights of victims within a criminal justice system that views crime as a matter between the state and the offender, and not as one involving the victim. To remedy this problem, the book calls for abandoning the concept of crime as an infringement of a state's criminal laws and instead reinterpreting it as a violation of human rights. The state's right to punish the offender would then be replaced by the rights of victims to see those responsible for violating their human rights convicted and punished and by the rights of offenders to be treated as accountable agents.

Basic Electronics Dec 13 2021

Disaster Victim Identification in the 21st Century Jun 26 2020 A comprehensive examination of all critical aspects of Disaster Victim Identification (DVI) As the frequency of both natural and man-made mass fatality disasters increases worldwide, the establishment of clear standards and best practices within the field of Disaster Victim Identification (DVI) is of vital importance. Whereas most countries assign jurisdiction to law enforcement agencies following Interpol guidelines, DVI is the responsibility of the medical examiner and coroner in the United States. Disaster Victim Identification in the 21st Century is the first book of its kind to directly address the needs of DVI practitioners in the United States, covering the full spectrum of DVI from traditional methods such as fingerprints, odontology, and anthropology to advanced DNA identification technology. Approaching DVI from three perspectives—academic, government, and private industry—this comprehensive volume examines the history and current state of the discipline, the ongoing formation of national standards, the various methods of human identification, and the key challenges and future of DVI. In-depth chapters are written by leaders in the field with personal experience in human identification and mass fatality events. Provides practitioners with practical guidance on planning and taking part in DVI based on current national standards and best practices Discusses continued improvement in both traditional and emerging DVI methods Includes non-region-specific case studies and recommendations that can be easily adapted for international use Examines ethical and legal considerations in DVI, including suggestions for standardizing the victim identification process Describes the critical role of the Victim Information Center (VIC) in providing the comparative information required to go beyond presumptive identifications Part of the American Association for Forensic Sciences (AAFS) series, Disaster Victim Identification in the 21st Century: A US Perspective is an indispensable resource for forensic scientists, disaster planners, policymakers, medical examiners and coroners, law enforcement and emergency personnel, and upper-level undergraduate and graduate students in forensic sciences and emergency management.

California. Court of Appeal (2nd Appellate District). Records and Briefs Feb 27 2023

Joe Victim Mar 28 2023 The long-awaited sequel to the acclaimed thriller *The Cleaner* The internationally best-selling author of *Collecting Cooper* and *The Laughterhouse* brings back one of his most infamous characters, the Christchurch Carver, in this gripping new thriller. Joe Middleton, aka the Christchurch Carver, is in jail awaiting trial for a slew of murders he says he didn't commit. His only way out is to convince the psychiatrists assessing him that he wasn't of sound mind and can't be blamed for what he did. But that's the least of his worries. That's because there's no shortage of people who like the idea of seeing Joe dead, some of whom are in prison with him. To get himself out of this mess, Joe has a desperate plan involving the disgraced ex-detective who put him away and a TV psychic who's looking to get rich. It's a long shot, but it had better work - because there's talk of bringing back the death penalty, and the Christchurch Carver is just the poster boy to make it happen. Also available as an eBook

Homicide: The Hidden Victims Jan 14 2022 The author of this groundbreaking volume is not only a social scientist and victim advocate; she is also the mother of a murder victim. Deborah Spungen illustrates how and why family members become co-victims when a loved one is murdered, and she poignantly addresses the emotional, physical, spiritual and psychological effects of such traumatic events. These "invisible victims" often find their wounds compounded by confusion and a sense of aloneness in the aftermath of such a tragic event. The author draws on research, personal insight and case examples to illuminate critical issues that surround: family notification of a loved one's murder, effects of murder on family and friends of the victim, media influences, traumatic grief, circumstantial influences, the criminal justice system and reconstruction and healing. The book will be invaluable for mental health practitioners and victim advocates.
