World-renowned researcher and New York Times bestselling author Marcus Buckingham helps us discover where we're at our best—both at work and in life. You've long been told to "Do what you love." Sounds simple, but the real challenge is how to do this in a world not set up to help you. Most of us actually don't know the real

truth of what we love—what engages us and makes us thrive—and our workplaces, jobs, schools, even our parents, are focused instead on making us conform. Sadly, no person or system is dedicated to discovering the crucial intersection between what you love to do and how you contribute it to others. In this eye-opening, uplifting book, Buckingham shows you how to break free from this conformity—how to decode your own loves, turn them into their most powerful expression, and do the same for those you lead and those you love. How can you use love to reveal your unique gifts? How can you pinpoint what makes you stand out from anyone else? How can you choose roles in which you'll excel? Love + Work unlocks answers to these questions and others, so you can: Choose the right role on the team. Describe yourself compellingly in job interviews. Mold your existing role so that it calls upon the very best of you. Position yourself as a leader in such a way that your followers quickly come to trust in you. Make lasting change for your team, your company, your family, or your students. Love, the most powerful of human emotions, the source of all creativity, collaboration, insight, and excellence, has been systematically drained from our lives—our work, teams, and classrooms. It's time we brought love back in. Love + Work shows you how. #1 NEW YORK TIMES BESTSELLER • Brené Brown has taught us what it means to dare greatly, rise strong, and brave the wilderness. Now, based on new

research conducted with leaders, change makers, and culture shifters, she's showing us how to put those ideas into practice so we can step up and lead. Don't miss the five-part HBO Max docuseries Brené Brown: Atlas of the Heart! NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BLOOMBERG Leadership is not about titles, status, and wielding power. A leader is anyone who takes responsibility for recognizing the potential in people and ideas, and has the courage to develop that potential. When we dare to lead, we don't pretend to have the right answers; we stay curious and ask the right questions. We don't see power as finite and hoard it; we know that power becomes infinite when we share it with others. We don't avoid difficult conversations and situations; we lean into vulnerability when it's necessary to do good work. But daring leadership in a culture defined by scarcity, fear, and uncertainty requires skill-building around traits that are deeply and uniquely human. The irony is that we're choosing not to invest in developing the hearts and minds of leaders at the exact same time as we're scrambling to figure out what we have to offer that machines and AI can't do better and faster. What can we do better? Empathy, connection, and courage, to start. Four-time #1 New York Times bestselling author Brené Brown has spent the past two decades studying the emotions and experiences that give meaning to our lives, and the past seven years working with transformative leaders and teams spanning the

globe. She found that leaders in organizations ranging from small entrepreneurial startups and family-owned businesses to nonprofits, civic organizations, and Fortune 50 companies all ask the same question: How do you cultivate braver, more daring leaders, and how do you embed the value of courage in your culture? In this new book, Brown uses research, stories, and examples to answer these questions in the no-BS style that millions of readers have come to expect and love. Brown writes, “One of the most important findings of my career is that daring leadership is a collection of four skill sets that are 100 percent teachable, observable, and measurable. It’s learning and unlearning that requires brave work, tough conversations, and showing up with your whole heart. Easy? No. Because choosing courage over comfort is not always our default. Worth it? Always. We want to be brave with our lives and our work. It’s why we’re here.” Whether you’ve read *Daring Greatly* and *Rising Strong* or you’re new to Brené Brown’s work, this book is for anyone who wants to step up and into brave leadership. You aspire to lead with greater impact. The problem is you’re busy executing on today’s demands. You know you have to carve out time from your day job to build your leadership skills, but it’s easy to let immediate problems and old mind-sets get in the way. Herminia Ibarra—an expert on professional leadership and development and a renowned professor at INSEAD, a leading international business

school—shows how managers and executives at all levels can step up to leadership by making small but crucial changes in their jobs, their networks, and themselves. In *Act Like a Leader, Think Like a Leader*, she offers advice to help you:

- Redefine your job in order to make more strategic contributions
- Diversify your network so that you connect to, and learn from, a bigger range of stakeholders
- Become more playful with your self-concept, allowing your familiar—and possibly outdated—leadership style to evolve

Ibarra turns the usual “think first and then act” philosophy on its head by arguing that doing these three things will help you learn through action and will increase what she calls your *outsight*—the valuable external perspective you gain from direct experiences and experimentation. As opposed to *insight*, *outsight* will then help change the way you think as a leader: about what kind of work is important; how you should invest your time; why and which relationships matter in informing and supporting your leadership; and, ultimately, who you want to become. Packed with self-assessments and practical advice to help define your most pressing leadership challenges, this book will help you devise a plan of action to become a better leader and move your career to the next level. It’s time to learn by doing. Imagine sitting down with an old-school Dallas Cowboy and hearing tales about the early days - the plays, the teammates, Coach Landry, the Ice Bowl, Super Bowl V, and much more.

Then imagine if other players weighed in and gave you an insider view from the field. THIS is precisely what you can expect in Pettis Norman's autobiography, filled with stories that capture the blood, sweat, and tears that built a legacy on and off the field. Beyond football, Pettis didn't rest on his laurels or sit idly by during the Civil Rights Movement. He wasn't a bystander during the tense decades of the '70s and '80s when race relations dominated our country. Rather, Pettis was a navigator -- the North Star -- who forged political alliances with U.S. Presidents and emerged as an altruistic leader pioneering ground-breaking initiatives in Dallas that serve as models across the nation. Untold philanthropies and organizations welcomed him to their boards. His businesses were successful, and he never failed to help others by sharing his entrepreneurial spirit along the way. Pettis was involved - sometimes a lone voice of reason. A trusted voice. People listened and the community is better for it. From the cotton fields of his youth to the academic halls of North Carolina and the skyscrapers of Dallas, Pettis Norman's journey is filled with love and loss, inspirational coaches and mentors, and a sense of duty that transcends multiple challenges. He begins life on a big stage and selflessly takes us by the hand and leads us through each era, teaching us so that history won't repeat itself. His greatest dream? That we can all achieve the oneness, the goodness, that we as a people deserve. Supercharge your leadership skills and become a better

Diversity and inclusion expert Jennifer Brown provides a step-by-step guide for the personal and emotional journey we must undertake to create an inclusive workplace where everyone can thrive. Human potential is unleashed when we feel like we belong. That's why inclusive workplaces experience higher engagement, performance, and profits. But the reality is that many people still feel unable to bring their true selves to work. In a world where the talent pool is becoming increasingly diverse, it's more important than ever for leaders to truly understand how to support inclusion. Drawing on years of work with many leading organizations, Jennifer Brown shows what leaders at any level can do to spark real change. She guides readers through the Inclusive Leader Continuum, a set of four developmental stages: unaware, aware, active, and advocate. Brown describes the hallmarks of each stage, the behaviors and mind-sets that inform it, and what readers can do to keep progressing. Whether you're a powerful CEO or a new

employee without direct reports, there are actions you can take that can drastically change the day-to-day reality for your colleagues and the trajectory of your organization. Anyone can—and should—be an inclusive leader. Brown lays out simple steps to help you understand your role, boost your self-awareness, take action, and become a better version of yourself in the process. This book will meet you where you are and provide a road map to create a workplace of greater mutual understanding where everyone's talents can shine. Today's kids are in a devastating emotional state. Many come to school emotionally unprepared to learn. There are many factors that cause this condition in our modern lifestyle. This condition of today's children is common, and for many parents, it is worrisome. Every parent who cares about their children's future tries different paths, but often fails to realize what goes wrong between school, work life and daily hustle and bustle. At the end of the day, parents who are tired in the middle of all this rush are often filled with anxiety. Most modern parents go further and look for new ways to find out how to raise interesting, approachable and moral children in today's world. So, what are Modern Parents most worried about? What challenges do today's children face? What can we do to overcome these concerns and challenges? For years, I have been giving leadership, behavior, communication, motivation and management trainings and courses to many listeners

and students in the public, private sector, and universities. In the modern world, which is getting more complicated and expertise levels increase day by day, I see that the solutions of the past are mostly insufficient. In this book, I try to compile common complaints and concerns based on my observations from life and heard from many parents and suggest a different solution to them. Examines the life of the Super Bowl Champion quarterback, from his childhood, college career, and time with the Green Bay Packers where he replaced Brett Farve. The last lecture on leadership by the NFL's greatest coach: Bill Walsh Bill Walsh is a towering figure in the history of the NFL. His advanced leadership transformed the San Francisco 49ers from the worst franchise in sports to a legendary dynasty. In the process, he changed the way football is played. Prior to his death, Walsh granted a series of exclusive interviews to bestselling author Steve Jamison. These became his ultimate lecture on leadership. Additional insights and perspective are provided by Hall of Fame quarterback Joe Montana and others. Bill Walsh taught that the requirements of successful leadership are the same whether you run an NFL franchise, a fortune 500 company, or a hardware store with 12 employees. These final words of 'wisdom by Walsh' will inspire, inform, and enlighten leaders in all professions. Finally in paperback: the New York Times bestseller by the acclaimed, bestselling author of Start With Why and Together is Better. Now with an expanded

chapter and appendix on leading millennials, based on Simon Sinek's viral video "Millenials in the workplace" (150+ million views). Imagine a world where almost everyone wakes up inspired to go to work, feels trusted and valued during the day, then returns home feeling fulfilled. This is not a crazy, idealized notion. Today, in many successful organizations, great leaders create environments in which people naturally work together to do remarkable things. In his work with organizations around the world, Simon Sinek noticed that some teams trust each other so deeply that they would literally put their lives on the line for each other. Other teams, no matter what incentives are offered, are doomed to infighting, fragmentation and failure. Why? The answer became clear during a conversation with a Marine Corps general. "Officers eat last," he said. Sinek watched as the most junior Marines ate first while the most senior Marines took their place at the back of the line. What's symbolic in the chow hall is deadly serious on the battlefield: Great leaders sacrifice their own comfort--even their own survival--for the good of those in their care. Too many workplaces are driven by cynicism, paranoia, and self-interest. But the best ones foster trust and cooperation because their leaders build what Sinek calls a "Circle of Safety" that separates the security inside the team from the challenges outside. Sinek illustrates his ideas with fascinating true stories that range from the military to big business, from government to

investment banking. Leadership is hard. How can you balance compassion for your people with effectiveness in getting the job done? A global pandemic, economic volatility, natural disasters, civil and political unrest. From New York to Barcelona to Hong Kong, it can feel as if the world as we know it is coming apart. Through it all, our human spirit is being tested. Now more than ever, it's imperative for leaders to demonstrate compassion. But in hard times like these, leaders need to make hard decisions—deliver negative feedback, make difficult choices that disappoint people, and in some cases lay people off. How do you do the hard things that come with the responsibility of leadership while remaining a good human being and bringing out the best in others? Most people think we have to make a binary choice between being a good human being and being a tough, effective leader. But this is a false dichotomy. Being human and doing what needs to be done are not mutually exclusive. In truth, doing hard things and making difficult decisions is often the most compassionate thing to do. As founder and CEO of Potential Project, Rasmus Hougaard and his longtime coauthor, Jacqueline Carter, show in this powerful, practical book, you must always balance caring for your people with leadership wisdom and effectiveness. Using data from thousands of leaders, employees, and companies in nearly a hundred countries, the authors find that when leaders bring the right balance of compassion and wisdom to

the job, they foster much higher levels of employee engagement, performance, loyalty, and well-being in their people. With rich examples from Netflix, IKEA, Unilever, and many other global companies, as well as practical tools and advice for leaders and managers at any level, *Compassionate Leadership* is your indispensable guide to doing the hard work of leadership in a human way. A groundbreaking new approach to leadership promotes a pragmatic philosophy based on empowering individuals to lead themselves. By the authors of *Business Without Bosses*. 25,000 first printing. In this much-needed book, powerhouse Carla A. Harris examines the journey from individual contributor to leader. She targets the essential skills necessary to succeed, such as the importance of taking risks, creating a vision, and leveraging assets like relationships and partnerships. At the heart of this book are

the eight things you must be intentional about every day—authenticity, building trust, creating other leaders, clarity, diversity, innovation, inclusivity, and voice—qualities that you need to hone and manifest to become a powerful, impactful leader no matter where you work. She also examines the key traits of being a transformational leader, focusing on the gaps she has seen in leadership that could impede or damage any leader’s effectiveness. Draws on biblical principles to offer insights into the key

concepts of mentor leadership, focusing on the importance of building meaningful relationships with others to significantly impact team performance. In this offbeat approach to leadership, college president Steven B. Sample—the man who turned the University of Southern California into one of the most respected and highly rated universities in the country—challenges many conventional teachings on the subject. Here, Sample outlines an iconoclastic style of leadership that flies in the face of current leadership thought, but a style that unquestionably works, nevertheless. Sample urges leaders and aspiring leaders to focus on some key counterintuitive truths. He offers his own down-to-earth, homespun, and often provocative advice on some complex and thoughtful issues. And he provides many practical, if controversial, tactics for successful leadership, suggesting, among other things, that leaders should sometimes compromise their principles, not read everything that comes across their desks, and always put off decisions. From the New York Times bestselling author of *Start With Why* and *Leaders Eat Last*, a bold framework for leadership in today's ever-changing world. How do we win a game that has no end? Finite games, like football or chess, have known players, fixed rules and a clear endpoint. The winners and losers are easily identified. Infinite games, games with no finish line, like business or politics, or life itself, have players who come and go. The rules of an infinite game are changeable

while infinite games have no defined endpoint. There are no winners or losers—only ahead and behind. The question is, how do we play to succeed in the game we're in? In this revelatory new book, Simon Sinek offers a framework for leading with an infinite mindset. On one hand, none of us can resist the fleeting thrills of a promotion earned or a tournament won, yet these rewards fade quickly. In pursuit of a Just Cause, we will commit to a vision of a future world so appealing that we will build it week after week, month after month, year after year. Although we do not know the exact form this world will take, working toward it gives our work and our life meaning. Leaders who embrace an infinite mindset build stronger, more innovative, more inspiring organizations. Ultimately, they are the ones who lead us into the future. Leadership is a commodity that is always rising in value. **INVEST HEAVILY IN IT!** As an Army football player, West Point graduate, Army officer, and Super Bowl champion, Tony Coaxum has been surrounded by great leadership and culture his entire adult life. As I fondly look back at the memories of my parents, I am in awe of them and am greatly inspired by them. Owen and Clara Moore had minimal formal education, but they were able to recognize the special gift in me. They saw that I was unafraid to take charge of any situation, even at a young age. My parents nurtured, guarded, and encouraged me to cultivate my gifts. They were careful about who they exposed me to. I never spent the night at a friend's house. Instead, I spent most of my time with my parents learning how to become an active listener and learning the art of conversation. For example, they

allowed me to ask questions. I was careful to be very respectful when asking a question; however, I always wanted to know why. As I think about it now, I remember how often the conversation would go on for hours. I have to pause and ask myself, Did they ever really answer my questions? Or did they just humor me? Those conversations helped me develop the confidence to talk to adults with amazing poise and confidence. In some homes, asking questions is called talking back, having a smart mouth, or having a stubborn spirit. However, my parents and family members knew that it was not the case with me. I simply wanted to know why! Although I had a strong desire to be a leader, there was a major hurdle in my path. I had a severe speech impediment. I stuttered so bad that I could not answer the telephone. In the 1960s, Mattel created the Pull String Talking Porky Pig Doll. I got one for Christmas that year because I sounded just like him. Eh beh, beu ehthats all, folks. Well, that went on for the next fifteen years. However, I never lost sight of my dream to be a leader. To this day, I cannot tell you when I stopped stuttering. I never had a formal speech class nor had a speech tutor. My parents believed in the power of prayer. They also believed in me! They knew that with prayer, love, and support, my desire to be a leader would one day come true. I am entering my forty-fifth year as an educator, mentor, and leader. I have learned many lessons along the way, and I share them with you in the hopes that you will use them to

make your path a little more enjoyable, fulfilling, and successful. In this book, I offer to you the same encouragement my parents gave me, and I ask that you use my nuggets of wisdom to guide you on your journey. I believe that leading self is also

the path to being a 'responsible' leader. The important contribution made by Self Leadership is that it tells you what to do if you want to get better at leading self. Read this book if you desire to be more effective as a leader and remember, "You don't have to be bad at leadership to get better." —Stephen C. Lundin Ph.D., author of the bestseller, *Fish!* "Superbosses is the rare business book that is chock full of new, useful, and often unexpected ideas. After you read Finkelstein's well-crafted gem, you will never go about leading, evaluating, and developing talent in quite the same way."—Robert Sutton, author of *Scaling Up Excellence* and *The No Asshole Rule* "Maybe you're a decent boss. But are you a superboss? That's the question you'll be asking yourself after reading Sydney Finkelstein's fascinating book. By revealing the secrets of superbosses from finance to fashion and from cooking to comic books, Finkelstein offers a smart, actionable playbook for anyone trying to become a better leader."—Daniel H. Pink, author of *To Sell Is Human* and *Drive* A fascinating exploration of the world's most effective bosses—and how they motivate, inspire, and enable others to advance their companies and shape entire industries, by the author of *How Smart Executives Fail*. A must-read for anyone interested in leadership and building an enduring pipeline of talent. What do football coach Bill Walsh, restaurateur Alice Waters, television executive Lorne Michaels, technology CEO

Larry Ellison, and fashion pioneer Ralph Lauren have in common? On the surface, not much, other than consistent success in their fields. But below the surface, they share a common approach to finding, nurturing, leading, and even letting go of great people. The way they deal with talent makes them not merely success stories, not merely organization builders, but what Sydney Finkelstein calls superbosses. After ten years of research and more than two hundred interviews, Finkelstein—an acclaimed professor at Dartmouth's Tuck School of Business, speaker, and executive coach and consultant—discovered that superbosses exist in nearly every industry. If you study the top fifty leaders in any field, as many as one-third will have once worked for a superboss. While superbosses differ in their personal styles, they all focus on identifying promising newcomers, inspiring their best work, and launching them into highly successful careers—while also expanding their own networks and building stronger companies. Among the practices that distinguish superbosses: They Create Master-Apprentice Relationships. Superbosses customize their coaching to what each protégé really needs, and also are constant founts of practical wisdom. Advertising legend Jay Chiat not only worked closely with each of his employees but would sometimes extend their discussions into the night. They Rely on the Cohort Effect. Superbosses strongly encourage collegiality even as they simultaneously drive internal

competition. At Lorne Michaels's Saturday Night Live, writers and performers are judged by how much of their material actually gets on the air, but they can't get anything on the air without the support of their coworkers. They Say Good-Bye on Good Terms. Nobody likes it when great employees quit, but superbosses don't respond with anger or resentment. They know that former direct reports can become highly valuable members of their network, especially as they rise to major new roles elsewhere. Julian Robertson, the billionaire hedge fund manager, continued to work with and invest in his former employees who started their own funds. By sharing the fascinating stories of superbosses and their protégés, Finkelstein explores a phenomenon that never had a name before. And he shows how each of us can emulate the best tactics of superbosses to create our own powerful networks of extraordinary talent. The inspirational bestseller that ignited a movement and asked us to find our WHY Discover the book that is captivating millions on TikTok and that served as the basis for one of the most popular TED Talks of all time—with more than 56 million views and counting. Over a decade ago, Simon Sinek started a movement that inspired millions to demand purpose at work, to ask what was the WHY of their organization. Since then, millions have been touched by the power of his ideas, and these ideas remain as relevant and timely as ever. **START WITH WHY** asks (and answers) the

questions: why are some people and organizations more innovative, more influential, and more profitable than others? Why do some command greater loyalty from customers and employees alike? Even among the successful, why are so few able to repeat their success over and over? People like Martin Luther King Jr., Steve Jobs, and the Wright Brothers had little in common, but they all started with WHY. They realized that people won't truly buy into a product, service, movement, or idea until they understand the WHY behind it. START WITH WHY shows that the leaders who have had the greatest influence in the world all think, act and communicate the same way—and it's the opposite of what everyone else does. Sinek calls this powerful idea The Golden Circle, and it provides a framework upon which organizations can be built, movements can be led, and people can be inspired. And it all starts with WHY.
