European colonization of other continents has had far-reaching and lasting consequences for the construction of childhoods and children's lives throughout the world. Liebel presents critical postcolonial and decolonial thought currents along with international case studies from countries in Africa, Latin America, and former British settler colonies to examine the complex and multiple ways that children throughout the Global South continue to live with the legacy of colonialism. Building on the work of Cannella and Viruru, he explores how these children are affected by unequal power relations, paternalistic policies and violence by state and non-state actors, before showing how we can work to ensure that children's rights are better promoted and protected, globally. Autobiographical writings have been a major cultural genre from antiquity to the present time. General questions of the literary as, e.g., the relation between literature and reality, truth and fiction, the dependency of author, narrator, and figure, or issues of individual and cultural styles etc., can be studied preeminently in the autobiographical genre. Yet, the tradition of life-writing has, in the course of literary history, developed manifold types and forms. Especially in the globalized age, where the media and other technological / cultural factors contribute to a rapid transformation of lifestyles, autobiographical writing has maintained, even enhanced, its popularity and importance. By conceiving autobiography in a wide sense that includes memoirs, diaries, self-portraits and autofiction as well as media transformations of the genre, this three-volume handbook offers a comprehensive survey of theoretical approaches, systematic aspects, and historical developments in an international and interdisciplinary perspective. While autobiography is usually considered to be a European tradition, special emphasis is placed on the modes of self-representation in non-Western cultures and on inter- and transcultural perspectives of the genre. The individual contributions are closely interconnected by a system of cross-references. The handbook addresses scholars of cultural and literary studies, students as well as non-academic readers. The information revolution changed the way state-organized disinformation campaigns are conducted. Spreading various forms of propaganda, confusing half-truths and pure falsehoods have accelerated, and social media made it possible to reach an increasing number of people targeted, in an ever-shorter news cycle. In the past disinformation actors mostly tried to persuade an audience of a single

made-up story. Nowadays in the so-called post-truth era, disinformation actors rather attempt to dissuade an audience of the evidence-based story by disseminating an unending number of alternative narratives. At the core of this research lays the question how to deal with disinformation in digitized society. Auf der Verlobungsfeier ihrer Schwester läuft das Fass für die 28-jährige Studentin Anna endgültig über. Deutlicher kann man der liebenswerten Chaotin das makellose Leben ihrer perfekten Schwester kaum unter die Nase reiben – und dann ist da auch noch ihre kuppelwütige Mutter. Es reicht! Ein neues Leben muss her, oder nein, besser gleich drei! So kreierte die Fettnäpfchen-Queen Anna kurzerhand drei Alter Ego: eine Brünette, eine Blondine und eine Rothaarige. Eine für die Familie, eine für die Karriere und eine für sich selbst. Und als ob dies nicht schon verwirrend genug wäre, begegnet sie ausgerechnet jetzt Max – dem Mann ihrer Träume ...- Pilgern: Die Suche nach Richtung und Halt im Leben! Die Welt ist im permanenten gesellschaftlichen und technischen Wandel begriffen. Zudem hat hierzulande jeder Mensch unzählige Möglichkeiten, sein Leben zu gestalten. Im Zuge dessen fällt es dem Einzelnen oft nicht leicht, die Orientierung zu behalten. Viele suchen daher nach Richtung und Halt im eigenen Leben. Immer mehr Menschen greifen dabei auf eine Glaubenspraxis zurück, die Jahrtausende alt ist: sie pilgern. Zahlreiche Expertinnen und Experten aus Theorie und Praxis beleuchten interdisziplinär die spirituellen, kirchlichen und touristischen Perspektiven des Pilgerns in Deutschland. Sie schaffen damit eine eindrucksvolle wissenschaftliche Grundlage zum Thema und setzen dabei theologische, soziologische, psychologische und touristische Maßstäbe. Das Buch richtet sich gleichermaßen an Wissenschaftler, Kirchen und Praktiker. This volume examines the ways in which biblical tourism is enmeshed within the production and management of heritage, global contexts of marketing and publicity, accessibility of sacred sites and routes for multiple audiences, and the forging of connections between travel and social identity. By exploring issues such as devotional piety, religious pedagogy, and entertainment, an interdisciplinary collection of scholars traces how biblical tourism experiences are choreographed and consumed, and how these practices shape embodied and narrative performances of scripture. Contributors focus on four major questions: How have people used tourism to develop new, or renewed, relationships with the Bible? Historically, what role has the Bible played in the development of modern tourism? In the context of the tourist encounter, how have people mobilized the Bible as a social and expressive resource? And what forms

of social exchange shape acts of biblical tourism, such as among pilgrims, or between people and landscapes? These questions are centered not only around authorized shrines and “Holy Places,” but also festivals, museums, theme parks, and heritage sites. This book aims to create a comparative and interdisciplinary dialogue around the dynamic relationship between biblical heritage claims and the practices and infrastructures of modern tourism. Walking is an essentially human activity. From a basic means of transport and opportunity for leisure through to being a religious act, walking has served as a significant philosophical, literary and historical subject. Thoreau’s 1851 lecture on Walking or the Romantic walks of the Wordsworths at Grasmere in the early 19th Century, for example, helped create a philosophical foundation for the importance of the act of walking as an act of engagement with nature. Similarly, and sometimes inseparable from secular appreciation, pilgrimage trails provide opportunities for finding self and others in the travails of the walk. More recently, walking has been embraced as a means of encouraging greater health and well-being, community improvement and more sustainable means of travel. Yet despite the significance of the subject of walking there is as yet no integrated treatment of the subject in the social science literature. This handbook therefore brings together a number of the main themes on the study of walking from different disciplines and literatures into a single volume that can be accessed from across the social sciences. It is divided into five main sections: culture, society and historical context; social practices, perceptions and behaviours; hiking trails and pilgrimage routes; health, well-being and psychology; and method, planning and design. Each of these highlights current approaches and major themes in research on walking in a range of different environments. This handbook carves out a unique niche in the study of walking. The international and cross-disciplinary nature of the contributions of the book are expected to be of interest to numerous academic fields in the social and health sciences, as well as to urban and regional planners and those in charge of the management of outdoor recreation and tourism globally. Proceedings of a colloquium held in July 2008 in Swansea, Wales. Over the last two decades, the conceptualisation and empirical analysis of mobilities of people, objects and symbols has become an important strand of social science. Yet, the increasing importance of mobilities in all parts of the social does not only happen as observable practices in the material world but also takes place against the background of changing discourses, scientific theories and conceptualisations and knowledge. Within the formation of these mobilities discourses, the social sciences constitute a relevant actor. Focussing on mobility as an object of knowledge from a Foucauldian perspective rather than a given entity within the historical contingency of movement, this book asks: How do discourses and ideologies structure the normative substance, social meanings, and the lived reality of mobilities? What are the real world effects of/on the will and the ability to be mobile? And, how do these lived realities, in turn, invigorate or interfere with certain discourses and ideologies of mobility? This book provides a state of the art collection of constructional research on syntactic structures in German. The volume is unique in that it offers an easily accessible, yet comprehensive and sophisticated variety of papers. Moreover, various of the papers make explicit connections between grammatical constructions and the concept of valency which has figured quite prominently in Germanic Linguistics over the past half century. In this volume, Ottmar Ette unfolds a theory and practice of the Literatures of the World from a fractal and multi-perspective point of view.

With the departure of European Muslims to the "Islamic State" and a wave of terrorist attacks in Europe in recent years, the questions of why and how individuals radicalize to Jihadi extremism attracted keen interest. This thesis examines how individuals radicalize by applying a theoretical framework that primarily refers to social capital theory, the economics of religion, and social movement theory. The analysis of the biographical backgrounds, pathways of radicalization, and network connections of more than 1,300 Jihadi extremists from Germany, Austria, and Switzerland shows that radicalization primarily need to be considered as a social process of isolation from former social contacts and affiliation with a new religious group. Radicalization is characterized by the transformation of social capital and often channeled through so-called "strong ties" to friends and family members. These peer networks constitute the social fundament of radical clusters on the local level which are usually linked to a broader milieu through exclusive mosque communities and religious authorities. Bonding social capital within these radical groups minimizes the risk of betrayal and promotes trust essential for clandestine and risky activities.

Gernot Zimmermann ist der Paradetyp eines Couch-Potato und entscheidet sich spontan, eine Weitwanderung zu unternehmen. Weil ihm aber kein Ort eine solche Mühe wert ist, bleibt er daheim und wandert durch Innsbruck, ohne dabei auch nur eine einzige Straße auszulassen. Im März 2020 geht er los, zuerst bremst ihn die Corona-Pandemie, dann eine Arterien-Verschluss-Krankheit, wegen der er keine 200 Meter mehr schmerzfrei gehen kann. Wie Zimmermann es trotzdem geschafft hat, alle 654 Straßen, Gassen, Wege, Plätze, Promenaden, Steige, Stege und Brücken abzugehen, beschreibt er in seinem Tagebuch, das mit zahlreichen Erinnerungen und Anekdoten versehen ist. Schritt für Schritt

hat sich der Autor seine Heimatstadt erarbeitet und er nimmt die Leserinnen und Leser auf diese ganz spezielle Weitwanderung mit. Ein Buch für Einheimische und für all jene, die Innsbruck besser kennenlernen wollen. The Camino de Santiago, the Route of Saint James, the Way--all describe a pilgrimage with multiple routes that pass through Spain and end at the Cathedral of Saint James in Santiago de Compostela. In the 21st century, this medieval tradition is seeing a revival with travelers, both spiritual and secular, who embrace it for different reasons. Offering insight into the personal journeys of contemporary pilgrims, this collection of new essays explores cultural expressions of the Camino from the perspective of literature, film and graphic novels, and looks beyond Spain and the "Caminoisation" of other historical routes. This book investigates spiritual tourism - tourism characterised by an intentional search for spiritual benefit - from a contemporary religious studies perspective. Using field research gathered from spiritual tourism locations in Asia and Europe, and utilizing contemporary scholarship on practices concerned with meaning and identity, it explores the phenomena of journeys that are taken for self transformation, tracing the history of transformative ideas in Western cultures of travel, and including the modes in which the travel experience has been communicated. Spiritual Tourism provides an important opportunity to comment on the role of tourism in contemporary conceptions of spirituality and spiritual practice in Western society. Particularly in the humanities and social sciences, festschrifts are a popular forum for discussion. The IJBF provides quick and easy general access to these important resources for scholars and students. The festschrifts are located in state and regional libraries and their bibliographic details are recorded. Since 1983, more than 659,000 articles from more than 30,500 festschrifts, published between 1977 and 2011, have been catalogued. Travel, Tourism and Identity addresses the psychological and social adjustments that occur when people make contact with others outside their social, cultural, or linguistic groups. Whether such contact is the result of tourism, seeking exile, or relocating abroad, the volume's contributors demonstrate how one's identity, cultural assumptions, and worldview can be brought into question. In some cases, the traveller finds that bridging the social and cultural gap between himself and the new society is fairly easy. In other cases, the traveller discovers that reorienting himself requires absorbing a new cultural history and traditions. The contributors argue that making these adjustments will surely enhance the traveller's or tourist's experience; otherwise the traveller or tourist will be

at risk of becoming a marginalized figure, one disconnected from the society that surrounds him. This latest volume in the Culture & Civilization series features a collection of essays on travel and tourism. The essays cover a range of topics from historical travels to modern social identities. They discuss ancient travels, contemporary travels in Europe, Africa and sustainable eco-tourism, and the politics of tourism. Essays also address experiences of Grenada's "Spice Island" identity, and the effects of globalization and migrations on personal identity. Quantum physics and the theory of relativity have shaken our conception of reality. They have made us realize that the universe is not as we perceive it. Religion and philosophy have so far failed to adapt our view of the world on the basis of these findings. Thus, together with the reader, the author sets out to clarify the fundamental questions of life. He skillfully juxtaposes convincing answers from different fields of knowledge. Scientific chapters about the world of quantum objects, space and time, or the origin and evolution of the universe stand in stark contrast to chapters about scientifically unexplainable events such as miracles, spiritualistic phenomena, findings about life after death, and reincarnation. In addition, the author discusses the atheistic worldview. The scientific sections are easily understandable, especially since they are, to a large extent, free of technical terms and formulas. In the religious chapters, the author draws parallels between ideas from all religions (especially Hinduism, Buddhism, and Taoism) and scientific findings. Descriptions of the God-experiences of spiritual masters from all times, cultures, and religions as well as personal anecdotes and stories imagined by the author provide manifold paradigm shifts in the detailed consideration of one and the same thing: the ultimate reason of our existence and the meaning of life. In anschaulicher und motivierender Bildsprache entwickelt der Autor seine Methode, die nicht auf das schnelle und bequeme Abnehmen zielt, sondern auf eine nachhaltige Esskultur durch gesunde Ernährung und den sinnvollen Umgang mit Kohlenhydraten, Eiweissen und Fetten. Researchers often face significant and unique ethical and methodological challenges when conducting qualitative field work among people who have been identified as perpetrators of genocide. This can include overcoming biases that often accompany research on perpetrators; conceptualizing, identifying, and recruiting research subjects; risk mitigation and negotiating access in difficult contexts; self-care in conducting interviews relating to extreme violence; and minimizing harm for interviewees who may themselves be traumatized. This collection of case studies by scholars from a range of disciplinary backgrounds turns a critical and reflective eye toward qualitative fieldwork on the topic. Framed by an introduction that sets out key issues in perpetrator research and a conclusion that proposes and outlines a code of best practice, the volume provides an essential starting point for future research while advancing genocide studies, transitional justice, and related fields. This original, important, and welcome contribution will be of value to historians, political scientists, criminologists, anthropologists, lawyers, and legal scholars. I'm Off Then has sold more than three million copies in Germany and has been

translated into eleven languages. The number of pilgrims along the Camino has increased by 20 percent since the book was published. Hape Kerkeling's spiritual journey has struck a chord. Overweight, overworked, and disenchanting, Kerkeling was an unlikely candidate to make the arduous pilgrimage across the Pyrenees to the Spanish shrine of St. James, a 1,200-year-old journey undertaken by nearly 100,000 people every year. But he decided to get off the couch and do it anyway. Lonely and searching for meaning along the way, he began the journal that turned into this utterly frank, engaging book. Filled with unforgettable characters, historic landscapes, and Kerkeling's self-deprecating humor, I'm Off Then is an inspiring travelogue, a publishing phenomenon, and a spiritual journey unlike any other.

Diathesis ("valency alternation") is a sentence structure that reshapes the roles of a verb. The prototypical example of such a diathesis is the well-known passive. However, there are very many other such role-remappings, like antipassives, applicatives, causatives, etc. This book presents an encyclopaedic survey of diathesis in German. The objective is to catalogue all diatheses that exist in this language. Currently almost 250 different German diatheses are described in this book, some highly productive, some only attested for a handful of verbs. The main goal of this book is to present this wealth of grammatical possibility in a unified manner, while at the same time attempting to classify and organise this diversity. A summary of the about 80 most prominent diatheses is also provided, including many newly-minted German names, because most these diatheses did not have a German name yet. It might come as a surprise that there are so many different diatheses in German, but my impression is that in this respect German is no exception among the world's languages. I expect that all languages have a similar abundance of different ways in which to construe a sentence around a lexical predicate. In a sense, a diathesis allows for the expression of a distinct perspective on the event described, something that is arguably a common desire of any language user. Except for diathesis this book also aims to completely catalogue its counterpart: epithesis. An epithesis is a derived sentence structure in which the marking of the verb roles remains constant. Basically, these are the grammaticalised constructions expressing tense-aspect-mood-evidentiality in German. The list of major epitheses is also quite long (about 40 constructions), but it is quite a bit smaller than the list of major diatheses (about 80 constructions). This indicates that from a purely grammatical perspective, diathesis ("grammatical voice") is about a two-times more elaborate topic than epithesis ("tense-aspect-mood

marking") in German. Ancient religions are definitely complex systems of gods, which resist our understanding. Divine names provide fundamental keys to gain access to the multiples ways gods were conceived, characterized, and organized. Among the names given to the gods many of them refer to spaces: cities, landscapes, sanctuaries, houses, cosmic elements. They reflect mental maps which need to be explored in order to gain new knowledge on both the structure of the pantheons and the human agency in the cultic dimension. By considering the intersection between naming and mapping, this book opens up new perspectives on how tradition and innovation, appropriation and creation play a role in the making of polytheistic and monotheistic religions. Far from being confined to sanctuaries, in fact, gods dwell in human environments in multiple ways. They move into imaginary spaces and explore the cosmos. By proposing a new and interdisciplinary angle of approach, which involves texts, images, spatial and archeaeological data, this book sheds light on ritual practices and representations of gods in the whole Mediterranean, from Italy to Mesopotamia, from Greece to North Africa and Egypt. Names and spaces enable to better define, differentiate, and connect gods. Learn German with Stories - A modern approach to learning German in a fun and interactive way! This extensive work explores the changing world of religions, faiths and practices. It discusses a broad range of issues and phenomena that are related to religion, including nature, ethics, secularization, gender and identity. Broadening the context, it studies the interrelation between religion and other fields, including education, business, economics and law. The book presents a vast array of examples to illustrate the changes that have taken place and have led to a new world map of religions. Beginning with an introduction of the concept of the “changing world religion map”, the book first focuses on nature, ethics and the environment. It examines humankind’s eternal search for the sacred, and discusses the emergence of “green” religion as a theme that cuts across many faiths. Next, the book turns to the theme of the pilgrimage, illustrated by many examples from all parts of the world. In its discussion of the interrelation between religion and education, it looks at the role of missionary movements. It explains the relationship between religion, business, economics and law by means of a discussion of legal and moral frameworks, and the financial and business issues of religious organizations. The next part of the book explores the many “new faces” that are part of the religious landscape and culture of the Global North (Europe, Russia, Australia and New Zealand, the U.S. and Canada) and the Global South (Latin America, Africa and Asia). It does so by looking at specific population movements, diasporas, and the impact of globalization. The volume next turns to secularization as both a phenomenon occurring in the Global religious North, and as an emerging and distinguishing feature in the metropolitan, cosmopolitan and gateway cities and regions in the Global South. The final part of the book explores the changing world of religion in regards to gender and identity issues, the political/religious nexus, and the new worlds associated with the virtual technologies and visual media.

Waldorf Education: An all-round, balanced approach to education that is equally concerned with intellectual-cognitive and artistic-creative learning. A practice- and experience-based pedagogy. Non-selective and open to all children and young people; offering a stress-free, secure learning environment across 12 grades; embedded in a community of students, teachers, and parents. An alternative education that has been successfully practiced for over a century. The first Waldorf School was founded in Stuttgart, Germany, in 1919. Today, Waldorf Education is practiced in all countries and cultures around the world: in over 1,000

schools, more than 2,000 kindergartens, and numerous centers for special needs education. This makes Waldorf Education the most prevalent alternative approach to teaching. And yet, despite the success and (now empirically validated) recognition that Waldorf schools enjoy, the theory underlying them remains controversial. Within the academic debate, Waldorf Education is seen as ideologic and unscientific. This publication sets out to bring clarity to this debate: Renowned researchers explain and discuss Waldorf Education's foundations in relation to the current discourse on education and core disciplines such as theory of knowledge, anthropology, developmental psychology, learning theory, and the theory of professions. This scientific inquiry into Waldorf Education is breaking new ground, casting light on its fascinating humanistic ideal and holistic potential. Following the collapse of the Ottoman Empire, Istanbul would lose its position as capital yet remain a crucial urban centre in the new Turkish republic. Since the 1950s it has undergone a metamorphosis from a mid-sized city to a megapolis. Beyoglu, historically represented as its most 'cosmopolitan' district and home to European embassies and cultural institutions, is a microcosm of these changes. This book explores the urban history of Beyoglu via a series of case studies which use previously unexamined archival material to tell the story of its local and international institutions. From the German Teutonia club and a centre point of Turkey's cinema culture to influential francophone, British and German schools which educated many of Turkey's future elite, the book charts the shifting identities of the residents of the district. These case studies reveal the effects of changing political circumstances, from the rise of nationalism to Turkey's place in the Cold War, as well as critically examining Beyoglu's legacy as a multicultural centre. In the process, the book reveals a picture of resilience, cross-cultural contact and provides an important contribution to our understanding of present-day and historical Istanbul and Beyoglu.

How were space and movement in Roman cities affected by economic life? What can the study of Roman urban landscapes tell us about the nature of the Roman economy? These are the central questions addressed in this volume. While there exist many studies of Roman urban space and of the Roman economy, rarely have the two topics been investigated together in a sustained fashion. In this volume, an international team of archaeologists and historians focuses explicitly on the economics of space and mobility in Roman Imperial cities, in both Italy and the provinces, east and west. Employing many kinds of material and written evidence and a wide range of methodologies, the contributors cast new light both on well-known and on less-explored sites. With their direct focus on the everyday economic uses of urban spaces and the movements through them, the contributors offer a fresh and innovative perspective on the workings of Roman urban economies and on the debates concerning space in the Roman world. This volume will be of interest to archaeologists and historians, both those studying the Greco-Roman world and those focusing on urban economic space in other periods and places as well as to other scholars studying premodern urbanism and urban economies.

Fachbuch aus dem Jahr 2016 im Fachbereich Literaturwissenschaft - Vergleichende Literaturwissenschaft, Note: 1,3, Technische Universität Dortmund, Sprache: Deutsch, Abstract: Im Rahmen eines qualitativen Forschungsseminars entstand hier eine Hausarbeit, deren Grundlage Hape Kerkelings Reisetagebuch „Ich bin dann mal weg“ aus dem Jahr 2015 liefert, in dem er seine Erlebnisse und Erfahrungen schildert, die ihn auf seinem Jakobsweg geprägt haben. Im Laufe dieser Arbeit wird mit Hilfe der „objektiven Hermeneutik“ die Forschungsfrage zu klären versucht, inwiefern sich die zwischenmenschliche Beziehung Hape Kerkelings zu seiner Pilgerbekanntschaft Anne während seiner Reise verändert hat. Die theoretische Forschungsarbeit wird mit einem Fazit abgerundet, in dem die Forschungsfrage schlussendlich beantwortet wird.

In recent years, the subject of religion has undergone a dramatic renaissance and attracted considerable media attention. At the same time, however, knowledge about people's individual religiosity and the social characteristics and dynamics

of religion has not grown considerably. Nonetheless, this knowledge has become especially important in a context of growing religious plurality and globalization, where interactions between societies with different cultural and religious backgrounds are increasing. To expand upon this knowledge, the Bertelsmann Stiftung-in cooperation with a team of sociologists, psychologists, theologians and religious studies experts-developed the most advanced instrument to date for examining the various dimensions of religiosity in modern society: the Religion Monitor. A quantitative and representative survey of 21,000 people around the world who represent all of the major religions constitutes the baseline of the Religion Monitor. As the scholarly complement to the popular publication, this second volume includes original analyses by renowned experts of the Religion Monitor's international survey results. Contributors include: José Casanova, Michael N. Ebertz, Karl Gabriel, Hans Joas, Volkhard Krech, Armin Nassehi, Michael von Brück and Paul M. Zulehner. Seit Urzeiten streben wir Menschen nach Wachstum, Zufriedenheit und Glück. In den heutigen Zeiten orientieren wir uns dabei zunehmend an den Idealen und Trends der Wachstumsideologie, die uns durch Werbung, Influencer und Medien von außen vermittelt werden. Hierbei besteht die Gefahr, dass wir zunehmend den Kontakt zu unseren eigenen Bedürfnissen und Lebenswerten verlieren. Darüber hinaus zeigen die aktuellen Geschehnisse in vielen Ländern auf unserer Erde, dass wir an einer natürlichen Grenze des progressiven Wirtschaftswachstums und der ständigen Steigerung unseres materiellen Wohlstands angelangt sind. Die vielfältigen aktuellen Krisen können allerdings auch zum Anlass genommen werden, den Blickwinkel zu erweitern und sich neuen Lebenswerten zuzuwenden. Mit einem von den Gesetzmäßigkeiten der Natur bestimmten Ansatz zeigt der Autor Josef Heine, ein approbierter Psychologischer Psychotherapeut, verschiedene Möglichkeiten auf, wie wir uns von Fremdbestimmung und Abhängigkeiten lösen und zu einer weitgehend selbstbestimmten, zufriedenen und sinnerfüllten Lebensweise finden können. Es liegt an jedem von uns, ob wir uns auf einen „Standortwechsel“ einlassen, unsere bisherigen Lebenswerte kritisch hinterfragen und gegebenenfalls anderen Lebenswerten zuwenden. In diesem Buch sind hierzu vielfältige Anregungen und Denkanstöße zu finden. Josef Heine hat in Konstanz Psychologie und Soziologie studiert. In der Zeit seiner Promotion zum Thema „Ökologische Sozialisationsforschung“ hat er erkannt, wie wichtig es für ein größeres Verständnis ist, den einzelnen Menschen immer auch in der Beziehung zu seinem Umfeld zu betrachten. 1984 hat er seine

psychotherapeutische Zusatzausbildung abgeschlossen, 1999 erhielt er die Approbation zum Psychologischen Psychotherapeuten. Nach der Beendigung seines Studiums hat er 32 Jahre lang in einer Fachklinik für Alkoholabhängige Männer gearbeitet, die letzten 22 Jahre als Gesamtleiter der Klinik. Hier ist es ihm ein besonderes Anliegen gewesen, die Patienten in ihren Resilienzfähigkeiten zu stärken. Außerhalb seiner beruflichen Tätigkeit ist Josef Heine viele Jahre lang als Referent in der Erwachsenenbildung tätig gewesen mit dem Ziel, im Dialog mit seinen Mitmenschen immer wieder aufs Neue Anregungen für ein zufriedenes und sinnerfülltes Leben zu entdecken. Mit seiner Frau lebt er im Westallgäu und genießt es, weitgehend im Einklang mit der Natur leben zu können.
