The Narrative Approach to Informed Consent: Empowering Young Children's Rights and Meaningful Participation is a practical guide for researchers who want to engage young children in rights-based, participatory research. This book presents the Narrative Approach, an original and innovative method to help children understand their participation in research. This approach moves away from traditional paper-based consent to tailor the informed consent process to the specific needs of young children. Through the Informing Story, which employs a combination of interaction, information and narrative, this method enables children to comprehend concepts through storytelling. Researchers are stepped through the development of an Informing Story so that they can deliver accurate information to young children about what their participation in research is likely to involve. To further inform practice, the book documents the implementation of the Narrative Approach in four case studies demonstrating the variety of settings in which the method can be applied. *The Narrative Approach to Informed Consent* addresses the rights of young

children to be properly researched, expands opportunities for their active and engaged research participation, and creates a unique conceptual ethical space within which meaningful informed consent can occur. Today's researchers have access to more information than ever before. Yet the new material is both overwhelming in quantity and variable in quality. How can scholars survive these twin problems and produce groundbreaking research using the physical and electronic resources available in the modern university research library? In *Digital Paper*, Andrew Abbott provides some much-needed answers to that question. Abbott tells what every senior researcher knows: that research is not a mechanical, linear process, but a thoughtful and adventurous journey through a nonlinear world. He breaks library research down into seven basic and simultaneous tasks:

design, search, scanning/browsing, reading, analyzing, filing, and writing. He moves the reader through the phases of research, from confusion to organization, from vague idea to polished result. He teaches how to evaluate data and prior research; how to follow a trail to elusive treasures; how to organize a project; when to start over; when to ask for help. He shows how an understanding of scholarly values, a commitment to hard work, and the flexibility to change direction combine to enable the researcher to turn a daunting mass of found material into an effective paper or thesis. More than a mere how-to manual, Abbott's guidebook helps teach good habits for acquiring knowledge, the foundation of knowledge worth knowing. Those looking for ten easy steps to a perfect paper may want to look elsewhere. But serious scholars, who want their work to stand the test of time, will appreciate Abbott's unique, forthright approach and relish every page of *Digital Paper*. Its ten contributions firstly center on the various forms and functions narratives assume in computer-mediated environments, e.g. websites, weblogs, message boards, etc. In this light, past and present approaches to the description of narratives are presented and reevaluated based on their ability to capture the conceptual and methodological exigencies of new media. Secondly, the volume sheds new light upon the multimodal composition of new media narratives which typically feature multiple co-occurring semiotic modes such as speech, sound, text, static or moving images. In this vein, each paper explores a wide array of authentic examples from text genres as diverse as political speeches, real-time narratives and contemporary feature films. Its wide scope should not only appeal to linguists interested in the discursive and pragmatic dimension of narratives but also to scholars and students in

other scientific disciplines. It examines the role narratives can play in encouraging growth in contexts and domains such as personal and family identity, creative movement, memory and self-concept, social relationships, or developing a sense of humor.
