In 1864, Arizona was divided into four counties named after the local Indian communities: Yavapai, Yuma, Mohave, and Pima. Believed to have been the largest county ever created in the lower 48 states at the time, Yavapai encompassed over 65,000 square miles until 1891, when the state was divided into additional

counties. Yavapai finally settled to 8,125 square miles. While still a US territory in 1900, Yavapai County had a population just under 13,800 people and was quite remote. Within a few years, postcards started appearing in drugstores, such as Brisley, Timerhoff, Owl, Heit, Corbin and Bork, or Eagle Drug in Prescott and Lynn Boyd or Mitchell in Jerome. Verde River Recreation Guide differs from most guide books in that it is not just a factual description of the Verde and its tributaries. I tell stories, also. Stories which are designed to give you an intuitive feel for the water-shed, even if you never actually travel any of these waterways. I have personally paddled a canoe down the entire perennial portion of the Verde and significant sections of its major tributaries. I've canoed the Verde and its tributaries in all seasons and at a wide variety of water flow. I have also hiked many of the tributaries. I have had a great deal of pleasure discovering some of the special secrets of the Verde watershed and I'm going to present you with that same opportunity. The Verde watershed offers incredible variety and beauty. We are

fortunate to have it. Enjoy it! Take care of it! -- With detailed listings and useful tips, this guide for equestrians profiles 262 riding trails in Arizona's six national forests--a practical guide to the high country. Each hike features an individual trail map, elevation profile, and at-a-glance information, helping readers quickly find the perfect trip. Sized to fit in a pocket, the book's detailed trail descriptions will help readers find their way on and off the trail. Driving directions and GPS trailhead coordinates will help with navigating the myriad of unnamed roads. The trails covered range from those best suited to the novice, families, experienced hikers, or backpackers. "Nothing is more important to life than water, and no one knows water better than Sandra Postel. Replenish is a wise, sobering, but ultimately hopeful book." --Elizabeth Kolbert "Remarkable." --New York Times Book Review "Clear-eyed treatise...Postel makes her case eloquently." --Booklist, starred review "An informative, purposeful argument." --Kirkus

We spend billions of dollars on irrigation, dams, sanitation plants, and other feats of engineering to control water for our own prosperity. What if the answer was not control, but replenishment? Sandra Postel takes readers around the world to explore water projects that work with, rather than against, nature's rhythms. Forest rehabilitation is safeguarding drinking water, farmers are planting cover crops to reduce polluted runoff, and "sponge cities" are capturing rainwater to curb urban flooding. Postel argues that efforts like these will be essential as we adjust to a hotter, wilder climate. Will we continue to fight the water cycle, endangering ourselves and the planet, or recognize our place in it and take advantage of the inherent services nature offers? Arizona is home to some of the region's most stunning national parks and monuments and has had a long tradition of strong federal agencies—along with effective local governments—developing and managing parklands. Before World War II, protecting sites from development seemed counterproductive to a state government dominated by extractive industries. By the late 1950s this state that prided itself on being a tourist destination found its lack of state parks to be an embarrassment. Gateways to the Southwest is a history of the

creation of state parks in Arizona, examining the ways in which different types of parks were created in the face of changing social values. Jay Price tells how Arizona's parks emerged from the recreation and tourism boom of the 1950s and 1960s, were shaped by the environmental movement of the 1970s and 1980s, and have been affected by the financial challenges that arose in the 1990s. He also explains how changing political realities led to different methods of creating parks like Catalina, Homol'ovi Ruins, and Kartchner Caverns. In addition, places that did not become state parks have as much to tell us as those that did. By the time the need for state parks was recognized in Arizona, most choice sites had already been developed, and Price reveals how acquiring land often proved difficult and expensive. State parks were of necessity developed in cooperation with the federal government, other state agencies, community leaders, and private organizations. As a result, parks born from land exchanges, partnerships, conservation easements, and other cooperative ventures are more complicated entities than the "state park" designation might suggest. Price's study shows that the key issue for parks has not been who owns a place but who manages it, and today Arizona's state parks are a network of lake-based recreation, historic sites, and environmental education areas reflecting issues just as complex as those of the region's better-known national parks. Gateways to the Southwest is a case study of resource stewardship in the Intermountain West that offers new insights into environmental history as it illustrates the challenges and opportunities facing public lands all over America. a little bit crazy, a little bit daring, and a little bit dangerous? When Mary and Barbara (Bob) decided to retrace the General Crook Trail in Arizona, they understood it was going to be a difficult journey, and they were no strangers to roughing it in the woods. They knew how to shoot, how to cook in the wild, and how to pitch a tent. They had hiked certain portions of the trail before and knew they had what it takes to brave a path previously dominated by men. The only thing they didn't count on was those Damn mules!
