Weeks later you get a report that might tell you where your ancestors came from or if you carry certain genetic risks. Or, the report could reveal a long-buried family secret that upends your entire sense of identity. Soon a lark becomes an obsession, a relentless drive to find answers to questions at the core of your being, like “Who am I?” and “Where did I come from?” Welcome to the age of home genetic testing. In *The Lost Family*, journalist Libby Copeland investigates what happens when we embark on a vast social experiment with little understanding of the ramifications. She explores the culture of genealogy buffs, the science of DNA, and the business of companies like Ancestry and 23andMe, all while tracing the story of one woman, her unusual results, and a relentless methodical drive for answers that becomes a thoroughly modern genetic detective story. Gripping and masterfully told, *The Lost Family* is a spectacular book on a big, timely subject. “An urgently necessary, powerful book that addresses one of the most complex social and bioethical issues of our time.” —Dani Shapiro, New York Times—bestselling author “Before you spit in that vial, read this book.” —The New York Times Book Review “Impeccably researched . . . up-to-the-minute science meets the philosophy of identity in a poignant, engaging debut.” —Kirkus Reviews (starred review) This book constitutes the refereed proceedings of the 10th European Conference on Research and Advanced Technology for Digital Libraries, ECDL 2007, held in Budapest, Hungary. The papers are organized in topical sections on ontologies, digital libraries and the web, models, multimedia and multilingual DLs, grid and peer-to-peer, preservation, user interfaces, document linking, information retrieval, personal information management, new DL applications, and user studies. Today's work is characterized by a high degree of innovation and thus demands a thorough overview of relevant knowledge in the world and in organizations. Semantic Work Environments support the work of the user by collecting knowledge about needs and providing processed and improved knowledge to be integrated into work. *Emerging Technologies for Semantic Work Environments: Techniques, Methods, and Applications* describes an overview of the emerging field of Semantic Work Environments by combining various research studies and underlining the similarities between different processes, issues and approaches in order to provide the reader with techniques, methods, and applications of the study. Starting from 135 manuscripts that were once part of the library of the late Mamluk sultan Q?ni?awh al-Ghawr? (r. 1501–1516), this book challenges the dominant narrative of a "post-court era", in which courts were increasingly marginalized in the field of adab. Rather than being the literary barren field that much of the Arabic and Arabic-centred sources, produced extra muros, would have us believe, it re-cognizes Q?ni?awh's court as a rich and vibrant literary site and a cosmopolitan hub in a burgeoning Turkic literary ecumene. It also re-centres the ruler himself within this court. No longer the passive object of panegyric or the source of patronage alone, Q?ni?awh has an authorial voice in his own right, one that is idiosyncratic yet in conversation with other voices. As such, while this book is first and foremost a book about books, it is one that consciously aspires to be more than that: a book about a library, and, ultimately, a book about the man behind the library, Q?ni?awh al-Ghawr?. This text traces developments in rational drug discovery and combinatorial library design with contributions from 50 leading scientists in academia and industry who offer coverage of basic principles, design strategies, methodologies, software tools and algorithms, and applications. It outlines the fundamentals of pharmacophore modelling and 3D Qua This book constitutes the refereed proceedings of the 11th International Conference on Asian Digital Libraries (ICADL 2008) held in Bali, Indonesia, in December 2008. The objective of this conference series is to provide a forum for presentation of high-quality research in the field of digital libraries. ICADL 2008 provided an opportunity for digital libraries researchers and practitioners in the Asia Pacific area and beyond to gather to explore ideas, exchange and share experiences, and further build the research network in this region. ICADL 2008 was a truly international event, with presenters from 21 countries. A total of 63 papers were accepted for inclusion in the proceedings: 30 full papers, 20 short papers, and extended abstracts of 13 posters. Submissions were subject to a rigorous, blind peer-review process. The research topics cover the spectrum of digital libraries, including multimedia digital libraries, usability and evaluation, information retrieval, ontologies, social tagging, metadata issues, multi- and cross-language retrieval, digital preservation, scholarly publishing and communities, and more. Additionally, three tutorials were offered in association with the conference by Andreas Rauber (Vienna University of Technology), David Bainbridge (University of Waikato), and George Buchanan (Swansea University). But how do you know whether it is right for your organization? What benefits are on offer and how do you ensure you realize them? How do you begin to construct a value-for-money agreement or determine a basis for pricing? What are the risks, and how do you recognize and manage them? Because every organization's needs are different, informed answers to these questions have been difficult to come by. Robert White and Barry James are experts with more than 35 years of experience in this field. The Outsourcing Manual is a fully comprehensive guide for any organization considering taking this route. It is above all practical, with models, outline procedures, a step-by-step guide to procurement, and standard documentation that can easily be adapted to your organization's requirements. There are case studies and worked examples throughout. The four part structure takes you through: assessment of outsourcing as a strategy for your organization; the planning phase; implementation; and outsourcing from the supplier's perspective. If you are involved in or considering outsourcing, the methodical and case study illustrated approach of The Outsourcing Manual will equip you to manage the process for a successful outcome.
