Social Change in Syria Dec 02 2022 Studying a rural village in northern Syria during a period of tremendous social and political change (1940s to 1970s), this book offers a unique perspective on how agrarian transformations in land distribution and its use deeply affected social and political relations among a rural community. Embedding the personal with the local and the global, this work traces the seeds of social, political and economic struggles that are still important and unfolding in Syria forty years on: changes in social relations brought about by land policy and technological modernization, divisions and connections between urban and rural locations, shifts in education and immigration. Thematically, the study is divided into two parts: the first concerns the historical, socio-economic and political changes occurring in Syria from the beginning of the twentieth century, and the second concerns the life histories of particular actors and their perspectives on social changes. This book is the edited and updated version of Khalaf ' s original work, including an ' updating chapter ' which brings invaluable insight about the village and its people at the aftermath of ISIS and the destruction of the war in Syria. Focusing on the village community of Hawi Al-Hawa, this intensely knowledgeable and personal account — a rare combination — brings village life in Syria strikingly close. The volume is an important contribution to the fields of anthropology, social sciences, Syrian and Middle East studies.

Richard Stephenson Aug 18 2021 This book contains papers from a conference held to celebrate the 70th birthday of one of the world's foremost astronomical historians, Professor F. Richard Stephenson, the latest recipient of the American Astronomical Society's highest award for research in astronomical history, the LeRoy Doggett Prize. Reflecting Professor Stephenson's extensive research portfolio, this book brings together under one cover papers on four different areas of scholarship: applied historical astronomy (which Stephenson founded); Islamic astronomy; Oriental astronomy and amateur astronomy. These papers are penned by astronomers from Canada, China, England, France, Georgia, Iran, Japan, Lebanon, the Netherlands, Portugal, Thailand and the USA. Its diverse coverage represents a wide cross-section of the history of astronomy community. Under discussion are ways in which recent research using

historical data has provided new insights into auroral and solar activity, supernovae and changes in the rotation rate of the Earth. The Journal of John Wesley Mar 25 2022 Spanning some fifty-five years, John Wesley's voluminous Journal records the daily tribulations experienced in traveling the length and breadth of the British Isles in the 18th century. These selections present an engrossing portrait of Wesley during the course of his travels and evangelical activities, illuminating the preacher's views and opinions on a host of contemporary matters. Begun as a public vindication of his early spiritual and pastoral work in Oxford and America, Wesley's journal became a means of keeping far-flung outposts of Methodism in touch with one another, a device for administering encouragement and rebukes, and a textbook of the experiential religion Wesley spent his life proclaiming. Wesley's eclectic interests and passion for rational analysis also make the Journal a rich source for any reader interested in observing the conditions and values of Augustan society--particularly those of the lower classes--through the

eyes of a well-educated and intelligent gentleman of the time.
