Blue vs. Yellow Jun 15 2021 From Tom Sullivan, author-illustrator of *I Used to Be a Fish*, comes a high-concept picture book about a battle between primary colors, for fans of *The Day the Crayons Quit*, *Red: A Crayon's Story*, and *Mix It Up!* Ladies and gentlemen, boys and girls, welcome to the Clash of the Colors! BLUE VS. YELLOW! Which one will be declared the best color of all? Will they join forces and be mightier together? Or . . . will another color challenge them for the title? Ding! Ding! Let the battle begin!

Red, Yellow, Blue (and a Dash of White, Too!) Jul 05 2020 Splish! Splash! Sploosh! A little girl is about to discover the wonders of mixing colors. With the sound of paint splatter, a bright blue elephant named EleBooyah enters the scene. She wants to help paint, too, and pretty soon the girl and her elephant are playing with all the colors of the rainbow. What do blue and yellow make? A funky green frog! And red and blue? An enormous purple octopus king! What other creatures are waiting for the splatter of paint on a brush to join the raucous painting party? Charles George Esperanza's author/illustrator debut is a riot of color and magic. Esperanza's rhythmic stanzas and vibrant illustrations tickle the imagination, and this is sure to become a staple color book for kids across the country.

I Know My Colors!. Jan 03 2023 Each delightful big book in the series focuses on a different color ... with big, bold illustrations and super-simple text that's just right for early readers.

Little Blue and Little Yellow Nov 01 2022 Beloved picture book creator and four-time Caldecott Honor-winner Leo Lionni's very first story for children, and a New York Times Best Illustrated Book of the Year. Little Blue and Little Yellow are best friends, but one day they can't find each other. When they finally do, they give each other such a big hug that they turn green! How they find their true colors again concludes a wonderfully satisfying story told with colorful pieces of torn paper and very few words. Leo Lionni launched his children's book career in 1959 with Little Blue and Little Yellow, and this 50th-anniversary edition, complete with Lionni's own explanation of how the book came to be, is sure to resonate with children today.

Gemstones Jun 03 2020 Gemstones is the first attempt in English to bring together the geological, mineralogical and gemmological developments that have taken place during the last thirty years. Though there have been many gemstone books published in that time, most have been concerned, understandably and rightly, with the science of gem testing and have covered that area very well. Details of the geological occurrence of many of the classic gemstones, and of nearly all those which have only recently been discovered, have been less adequately dealt with. Coverage has been restricted to a number of papers in a wide variety of geological and mineralogical journals. Gemstones hopes to get the balance right. In the preparation of the book all the journals and monographs in the field have been consulted so that the book should stand for some years as the authority to which gemmologists and others turn in the first instance. Ease of reference and depth of coverage make Gemstones both a reference book and a bench book. Acknowledgements I am grateful to Brian Jackson of the Department of Geology, Royal Museums of Scotland who read the manuscript and painstakingly indicated places where amendment or alteration was needed. I am also grateful to the publishers of the books on which the line illustrations are based. The colour plates present in the book derive from a number of sources, which I would like to acknowledge as follows. Plates 1, 4-15 and 17 Crown copyright reserved.

Blue and Yellow Don't Make Green Feb 04 2023 For more than 200 years the world has accepted that red, yellow and blue - the artists primaries - give new colours when mixed. And for more than 200 years artists have been struggling to mix colours on this basis. In this exciting new book, Michael Wilcox offers a total reassessment of the principles underlying colour mixing. It is the first major break-away from the traditional and limited concepts that have caused painters and others who work with colour so many problems. Back Cover.
