Disease Control Priorities, Third Edition (Volume 2) Jun 25 2020 The evaluation of reproductive, maternal, newborn, and child health (RMNCH) by the Disease Control Priorities, Third Edition (DCP3) focuses on maternal conditions, childhood illness, and malnutrition. Specifically, the chapters address acute illness and undernutrition in children, principally under age 5. It also covers maternal mortality, morbidity, stillbirth, and influences to pregnancy and pre-pregnancy. Volume 3 focuses on developments since the publication of DCP2 and will also include the transition to older childhood, in particular, the overlap and commonality with the child development volume. The DCP3 evaluation of these conditions produced three key findings: 1. There is significant difficulty in measuring the burden of key conditions such as unintended pregnancy, unsafe abortion, nonsexually transmitted infections, infertility, and violence against women. 2. Investments in the continuum of care can have significant returns for improved and equitable access, health, poverty, and health systems. 3. There is a large difference in how RMNCH conditions affect different income groups; investments in RMNCH can lessen the disparity in terms of both health and financial risk.

Quality Investing Jan 13 2022 Quality. We all make judgments about it every day. Yet articulating a clear definition of quality in an investing context is challenging. This book addresses the challenge, and distills years of practical investing experience into a definitive account of this under-explored investment philosophy. Finance theory has it that abnormal outcomes do not persist, that exceptional performance will soon enough become average performance. Quality investing involves seeking companies with the right attributes to overcome these forces of mean reversion and, crucially, owning these outstanding companies for the long term. This book pinpoints and explains the characteristics that increase the probability of a company prospering over time - as well as those that hinder such chances. Throughout, a series of fascinating real-life case studies illustrate the traits that signify quality, as well as some that flatter to deceive. The authors' firm, AKO Capital, has a strong track record of finding and investing in quality companies - helping it deliver a compound annual growth rate more than double that of the market since inception. *Quality Investing* sheds light on the investment philosophy, processes and tough lessons that have contributed to this consistent outperformance.

The Bond King Jan 25 2023 From the host of NPR's Planet Money, the deeply-investigated story of how one visionary, dogged investor changed American finance forever. Before Bill Gross was known among investors as the Bond King, he was a gambler. In 1966, a fresh college grad, he went to Vegas armed with his net worth ($200) and a knack for counting cards. $10,000 and countless casino bans later, he was hooked: so he enrolled in business school. The Bond King is the story of how that whiz kid made American finance his casino. Over the course of decades, Bill Gross turned the sleepy bond market into a destabilized game of high risk, high reward; founded Pimco, one of today's most powerful, secretive, and cutthroat investment firms; helped to reshape our financial system in the aftermath of the Great Recession—to his own advantage; and gained legions of admirers, and enemies, along the way. Like every American antihero, his ambition would also be his undoing. To understand the winners and losers of today's money game, journalist Mary Childs argues, is to understand the bond market—and to understand the bond market is to understand the Bond King.

The fund subjects can vary and so many categories have been established during the last decades. Today, investments in real estates, ships, renewable energy, planes, and other divisions are open for private and corporate investors. The main challenge for the investor is to understand the product, which is essential for an investment decision. The conception and operative stage of a fund is complex and sophisticated why many investors keep distance to these type of investments. The previous market development has shown that there are many risks and opportunities given which have to be considered. An evaluation of these aspects is cru-cial to the investment success and should be clearly observed. The legislator has stan-dardized the information system of CEFs to offer the possibility of well-arranged in-formation which is intelligible to all. Summing up, an investor has to identify the main risks and opportunities of a CEF investment and then to evaluate the possible return consistent with his portfolio strategy.

The Education of a Value Investor Apr 04 2021 What happens when a young Wall Street investment banker spends a small fortune to have lunch with Warren Buffett? He becomes a real value investor. In this fascinating inside story, Guy Spier details his career from Harvard MBA to hedge fund manager. But the path was not so straightforward. Spier reveals his transformation from a Gordon Gekko wannabe, driven by greed, to a sophisticated investor who enjoys success without selling his soul to the highest bidder. Spier's journey is similar to the thousands that flock to Wall Street every year with their shiny new diplomas, aiming to be King of Wall Street. Yet what Guy realized just in the nick of time was that the King really lived 1,500 miles away in Omaha, Nebraska. Spier determinedly set out to create a new career in his own way. Along the way he learned some powerful lessons which include: why the right mentors and partners are critical to long term success on Wall Street; why a topnotch education can sometimes get in the way of your success; that real learning doesn't begin until you are on your own; and how the best lessons from Warren Buffett have less to do with investing and more to do with being true to yourself. Spier also reveals some of his own winning investment strategies, detailing deals that were winners but also what he learned from deals that went south. Part memoir, part Wall Street advice, and part how-to, Guy Spier takes readers on a ride through Wall Street but more importantly provides those that want to take a different path with the insight, guidance, and inspiration they need to carve out their own definition of success.

You'll never find a wiser advisor with a bigger heart." -- Malachi Rempen: Filmmaker, cartoonist, author and self-described ruffian This book grew out of a series of letters to my daughter concerning various things-mostly about money and investing-she was not yet quite ready to hear. Since money is the single most powerful tool we have for navigating this complex world we've created, understanding it is critical. "But Dad," she once said, "I know money is important. I just don't want to spend my life thinking about it." This was eye-opening. I love this stuff. But most people have better things to do with their precious time. Bridges to build, diseases to cure, treaties to negotiate, mountains to climb, technologies to create, children to teach, businesses to run. Unfortunately, benign neglect of things financial leaves you open to the charlatans of the financial world. The people who make investing endlessly complex, because if it can be made complex it becomes more profitable for them, more expensive for us, and we are forced into their waiting arms. Here's an important truth: Complex investments exist only to profit those who create and sell them. Not only are they more costly to the investor, they are less effective. The simple approach I created for her and present now to you, is not only easy to understand and implement, it is more powerful than any other. Together we'll explore: Debt: Why you must avoid it and what to do if you have it. The importance of having F-you Money. How to think about money, and the unique way understanding this is key to building your wealth. Where traditional investing advice goes wrong and what actually works. What the stock market really is and how it really works. Why the stock market always goes up and why most people still lose money investing in it. How to invest in a raging bull, or bear, market. Specific investments to implement these strategies. The Wealth Building and Wealth Preservation phases of your investing life and why they are not always tied to your age. How your asset allocation is tied to those phases and how to choose it. How to simplify the sometimes confusing world of 401(k), 403(b), TSP, IRA and Roth accounts. TRFs (Target Retirement Funds), HSAs (Health Savings Accounts) and RMDs (Required Minimum Distributions). What investment firm to use and why the one I recommend is so far superior to the competition. Why you should be very cautious when engaging an investment advisor and whether you need to at all. Why and how you can be conned, and how to avoid becoming prey. Why I don't recommend dollar cost averaging. What financial independence looks like and how to have your money support you. What the 4% rule is and how to use it to safely spend your wealth. The truth behind Social Security. A Case Study on how this all can be implemented in real life. Enjoy the read, and the journey!
